MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Footage.....	2,474	34,909 34,909' Talbert

Number of holes showing:

a) Commercial-grade zinc ore.....	6
b) Non-commercial zinc mineralization..	22
c) No zinc mineralization.....	13

Data on the two holes completed are summarized as follows:

Hole I-66: Located on the W. C. Stapleton property (NJZ Mining and Mineral Rights) at coordinates: 30,282-N; 63,115-E. Collar elevation: 1,469 feet A. T. Drilling started May 5, 1959 and was completed June 3, 1959. Total depth 1,219 feet.

Summary log: 0-8 overburden; 8-186 Chickamauga limestone; 186-873(CM-ss) Mascot dolomite; 873-1053? (TR?) upper Kingsport; 1053?-1219 lower Kingsport and possibly Longview dolomite (top of T-bed not recognized). Mineralization: Ore hole with runs of mineralization as follows: 878,879,908-909, shines of ZnS; 916-978 (62') with 3.16% Zn; 995 shines ZnS; 1007, 1010 and 1014, traces ZnS; 1018-1022 (4') estimated @ 1½% Zn; 1046 trace ZnS; 1066-1070

(4'½ estimated 2% Zn; 1081-1094 (13') with scattered traces ZnS.

Hole I-67: Located on the W. C. Stapleton property. Coordinates: (approximate) 729,965-N; 762-850-E. Collar elevation: (approximate) 1,460 feet A.T. Drilling started June 5, 1959; completed June 26, 1959. Total depth: 1255 feet. Summary log: 0-10 overburden; 10-242 chickamauga limestone; 242-935(CM-ss) Mascot dolomite; 935-1002(TR) upper Kingsport; 1102-1255 lower Kingsport and possibly longview dolomite (questionable top of T-bed at 1235). Mineralization: Barren hole.

Drilling in progress

Hole I-68, located approximately 200 feet up-dip from Hole I-67, is now in progress. Core was observed to a depth of 812 feet at the time of inspection. At this depth the hole was still in the lower part of the Mascot dolomite. Estimated total is about 1150 feet. As the total footage of this hole will exceed the 35,000 foot maximum of the contract, authorization has been given by the Field Team to exceed this maximum to the extent permitted by the maximum funds allowed for drilling under the contract. OK

On completion of Hole I-68 the drilling under the Cedar Springs contract will have been completed. The Operator, however, intends to continue drilling in this area on its own initiative, but will move into the tracts northeast of the Stapleton property which have been excluded from the contract area.

Inspected: July 9, 1959

Helmuth Wedow, Jr., Geologist

INTERIM REPORT

DMEA-4586, Idm-E1071 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	1	39
Footage	1,317	32,435 X 32,433

Talbut 6/18/59

Number of holes showing:

a)	Commercial-grade zinc ore	5
b)	Non-commercial zinc mineralization . . .	22
c)	No zinc mineralization	12

The data on the one hole completed since the last inspection are summarized as follows:

Hole I-65: Located on the W. C. Stapleton property (New Jersey Zinc Company Mining and Mineral Rights) approximately 290 feet S. 13° W. of Hole I-64. Coordinates: N-30,119; E-63,232. Collar elevation: 1,461 feet. Started: 4/22/59; completed: 5/11/59. Total depth: 1,317 feet. Summary log: 0-6 residual clay overburden; 6-346 Chickamauga limestone; 346-998 Mascot dolomite; 998-1163 (TR) upper Kingsport dolomite; 1163-1290 (T-bed) lower Kingsport limestone; 1290-1317 (bottom of hole) Longview dolomite. Mineralization: Shine hole. Trace of ZnS at 1024; scattered traces ZnS at 1105-1144; shine of ZnS at 1152.

Drilling in progress

Drilling is now in progress on Hole I-66, also on the Stapleton property. At the time of inspection the hole was at a depth of 1,141 feet and core was observed to this depth. The hole appears to be strongly mineralized, although the grade may not be sufficient to meet the operator's cut-off for ore. From depths of 916 to 978 is a run of 62 feet with an average estimated grade of about 2½ percent zinc. Scattered shines and traces occur further to a depth of 1,077 feet. The hole was drilling in the lower part of the R-bed at the time of inspection, and the chances for more mineralization in S-bed appear to be excellent.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

JUN 10 1959

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	1	38
Footage	1,175	31,118 * X 31,116' Falkner

Number of holes showing:

a) Commercial-grade zinc ore	5
b) Non-commercial zinc mineralization	21
c) No mineralization	12

The data on the one hole completed since the last inspection are summarized briefly below:

Hole I-64: W. C. Stapleton property (New Jersey Zinc Co. Mining and Mineral Rights). Located approximately 200 feet southwest from Hole I-63. Coordinates 30,404-N; 63,282-E and at elevation 1,446 feet. Started drilling on 4/4/59 and completed on 4/21/59 at a total depth of 1,175 feet. Summary log: 0-2 Residual clay overburden; 2-164 Chickamauga limestone; 164-815 Mascot dolomite; 815-996 upper member of Kingsport formation (TR @ 996); 996-1175 lower member of Kingsport formation (top of T-bed not reached or not recognized). Mineralization: Traces and shines of sphalerite at 482,528-530, 629-630, 932-984, and 1012-1021; 1059-1079, 20 feet with 3.55 % Zn; traces of sphalerite 1079-1085 and 1110. Ore hole.

Drilling in progress

Drilling is currently in progress on Hole I-65 which is located 290 feet S. 13° W. of Hole I-64. At the time of inspection it was drilling in the upper member of the Kingsport formation at a depth of 1,061 feet.

Inspected: May 5, 1959

Helmuth Wedow, Jr., Geologist
U. S. Geological Survey

*Note: Correction of cumulative arithmetical and typographical errors in interim reports of 10/17/57, 12/5/57, 1/14/58, and 3/4/58 show that the correct total footage of the last previous interim report should be 29,943 feet instead of 29,935 feet. Also, cumulative total under "Units to date" in Monthly Report of Operator for December 1957 should be 18,493 feet instead of 18,491 feet. This error has carried through to the April 1959 voucher and the cumulative total should read 31,118 feet. No! 2' disallowed in Nov. MF-104 by Fld. Ins. Falkner

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4586, Idm-E1071 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	1	37
Footage	1,230	29,935 29,900

Holes showing:

a)	Commercial-grade zinc ore	4
b)	Non-commercial zinc mineralization	21
c)	No zinc mineralization	12

A summary of the data on the one hole completed since the last inspection follows:

Hole I-63: Located on the Stapleton (NJZ M&M) property about 100 feet down-dip (southeast) of Hole I-62. Drilling started on 3/10/59 and was completed on 4/3/59 at a depth of 1,230 feet. Coordinates: 30,520-N; 63,445-E. Elevation: 1442 feet. Summary log: 0-4 overburden; 4-163(?) Chickamauga ls; 163(?)-930 Mascot dolomite; 930-1230 Kingsport and Longview formations (TR not recognized; T-bed at 1222-1226?). Mineralization: 903-984 (81') weighted average of assays 4.33 % Zn; ore hole.

Drilling in progress

Drilling is now in progress in Hole I-64 which is located approximately 200 feet southwest (on strike) from Hole I-63. The hole collared in the Chickamauga limestone and is currently drilling in the Mascot dolomite at a depth of 280 feet.

Signature [signature] Title ACTING EXECUTIVE OFFICER DMEA - REGION V Date APR 16 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INTERIM REPORT

DMEA-4586, Idm-E1071 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tenn.

Location: Cedar Springs Area, Grainger County, Tennessee

Summary of Drilling Completed

	Since last inspection	To date
Number of holes	2	36
Footage	2146	28,705 28,711

Holes showing:

a)	Commercial zinc ore	3
b)	Non-commercial zinc mineralization	21
c)	No zinc mineralization	12

Additional data on the two holes completed during the interim follows:

Hole No. I-61 - Located on W. C. Stapleton property (NJZ M and M) 200 feet south of I-60. Coordinates N30,675.34, E63,320.26; collar elevation 1462.79. Total depth 1035 feet. Drilling began 1-29-59 and was completed 2-16-59. Brief log of hole: 0-10 feet overburden, collared in Chickamauga fm; top of Mascot at 27 feet; top of Kingsport (chert matrix) at 739; Tro-pari Survey showing an inclination of 3° and a bearing of N59°W at 800 feet; top of "R" bed at 890; "T" bed from 1029 to 1034; hole bottomed at 1035 feet.

Mineralization: Sphalerite mineralization extended from 746 to 879. Ore runs are: 4' (758-762) of est. 3½% Zn; 4' (762-766) of est. 4% Zn; 3' (766-769) of est. 3% Zn; 4' (776-780) of est. 5% Zn; 4' (791-795) of est. 2% Zn; 4' (795-799) of est. 6% Zn;

Mineralization con'd: 4' (799-803) of est. 2% Zn; 5' (803-808) of est. 1% Zn; 4' (824-828) of est. 3% Zn; 7' (828-835) of est. 2½% Zn; 5' (850-855) of est. 1½% to 2% Zn; 5' (855-860) of est. 10% Zn; 5' (874-879) of est. 6% Zn. Ore hole.

Hole No. I-62. Located 100 feet south of I-61. Coordinates N30598.03, E63383.31; collar elevation 1449.68. Total depth 1111 feet. Drilling began 2-17-59 and was completed 3-9-59. Brief log of hole: 0-10 feet overburden, collared in Chickamauga; top of Mascot at 91; top of Kingsport (chert matrix) at 837; brown oolite bed at 868; top of "R" bed at 957; "T" bed from 1093 to 1102; hole bottomed at 1111 feet. Dips were taken at 107'-41°, 144'-32°, and 167'- 34°.

Mineralization: 50' (830-880) of est. 5½% Zn. Ore Hole.

Current drilling is in progress on hole No. I-63, located 100 feet south and downdip from I-62. Core was observed to a depth of 20 feet. The estimated total depth of the hole is 1200 feet.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4586, Idm-E1071-Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee.

Location: Cedar Springs area, Grainger County, Tennessee

Summary of Drilling Completed

	Since last inspection	To date
Number of holes	1	34
Footage	850	26,559 X 26,565'

Holes showing:

a)	Commercial zinc ore----------	1
b)	Non-commercial zinc mineralization	21
c)	No zinc mineralization----------	12

Additional data on the one hole completed during the interim follows:

Hole No. I-60, located 400 feet on strike from I-52 (NJZ)Hole). Coordinates N730,830.26, E763,197.65; elevation at collar 1495.15. Total depth 850 feet. Drilling began 1/9/59 and was completed 1/28/29. Brief log of hole: 0-30 overburden, collared in Mascot fm; chert matrix at 542; "A" marker at 707; "B" marker at 717; "T" bed (?) from 843 to 850; hole bottomed at 850 feet. Mineralization: Shines of Zn at 675 feet.

Current drilling is in progress on Hole No.I-61 located on W. C. Stapleton property. Core was observed to a depth of 865 feet. Mineralization encountered consisted of 119 feet (746-865) of estimated 1.5% zinc.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4586, Idm-E1071- Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee.

Location: Cedar Springs area, Grainger County, Tennessee

Drilling has resumed on this contract after a recess period of approximately eight months. Hole No. I-60 is located 400 feet on strike and southwest from I-52 on sheet 4 SW of Sector II, Copper Ridge Belt. The hole has collared in the Mascot formation and will be drilled an estimated total depth of 900 feet. Core from drilling to a depth of 216 feet was inspected.

Actual drilling of this hole began January 8, 1959.

Mr. V. J. Lynch, Member, OME Field Team accompanied the Field Examiners on this inspection.

Inspected:
January 13, 1959

L. E. Shirley, Mining Engineer

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4586, Idm-E1071-Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs Area, Grainger County, Tennessee

This contract is temporarily recessed pending approval of request for formal recess. Drilling completed since the last inspection of March 27, to the date of recess is reported below. A summary of all work completed to date follows:

Drilling Completed

Number of holes completed since last inspection	2
Footage in holes completed since last inspection....	2,229
Total number of holes completed to date.....	33
Total footage completed to date.....	25,709* *
Number of holes showing commercial zinc ore.....	1
Number of holes showing non-commercial zinc mineralization.....	20
Number of barren holes.....	12

* Hole No. CS-39 bottomed at 1159 instead of 1150 as reported in the interim report dated 3/27/58.

Additional data on the two holes completed during the interim follows:

Hole No.	Property	Total depth	Remarks
CS-41	R. Mallicoat	1070	Location: 200' updip from CS-39. Drilling began 3/10 and was completed 4/1/58. Brief log of hole: 0-2 overburden, collared in Chickamauga, top of Mascot @ 105; chert matrix @ 775; top of "R" @ 901; bottom @ 1070. Mineralization: 4' (958-962) of est. 3.5% Zn. 4'(966-970) of est. 5% Zn. 12' section assayed 3.13% Zn.

* Should be 25,715 ft.
[illegible] 5/20/58

Hole No.	Property	Total Depth	Remarks
CS-42	R. Mallicoat	1159	Location: 200' updip from CS-41. Drilling began 4/2 and was completed 4/24/58. Brief log of hole: 0-9 overburden; collared in Chickamauga; top of Mascot @ 161; chert matrix (?) @ 860; top of "R" @ 998; "T" bed from 1132 to 1133, bottom @ 1159. Mineralization: Traces of sphalerite @ 1049 and from 1055 to 1057. Traces of pyrite @ 949, 961 to 963, 971,977 to 983 and from 985 to 1159.

Core from both of these holes as well as CS-39 was examined at the core storage shed at the Flat Gap Mine of the Company.

Inspected: 5/8/58

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MINING ENGINEER
U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for March, 1958

Cedar Springs Area DMEA 4586

Contract Idm E 1071 (Zinc)

One drill operated on this project during the month and two holes were completed.

Hole CS-39 - Robert Mallicoat property - 100' downdip from CS-37

Coordinates: 734,439.33 N; 770,861.71 E
Elevation: 1356.98

0- 10	- -	Clay
10- 210	- -	Chickamauga limestone
210- 858	- -	Mascot dolomite. Strong shine sphalerite at 608'
858	- -	Ce Mtx
858- 997	- -	Upper Kingsport dolomite
997	- -	TR marker
997-1120	- -	Lower Kingsport limestone and dolomite Traces Sp 1038, 1048-1049
1120-1159	- -	(Bottom) Longview limestone and dolomite

This hole is disappointing because despite its proximity to CS-37 it contains only traces of zinc.

Hole CS-41 - Robert Mallicoat property. 100' updip from CS-37.

Approx. Coord: 734,610 N; 770,760 E
Approx. Elev: 1370'

0- 2	- -	Clay
2- 105	- -	Chickamauga limestone
105- 775	- -	Mascot dolomite
775	- -	Ce Mtx
775- 901	- -	Upper Kingsport dolomite
901	- -	TR marker
901- 958	- -	Lower Kingsport dolomite/ Scattered shines Sp 937-938, 940, 941-942, 954-955
958- 962	- -	4' - 2.35% Zn
962- 966	- -	4' - 0.25% Zn
966- 970	- -	4' - 6.80% Zn
970-1070	- -	(Bottom) Lower Kingsport dolomite

The 12 feet from 958 to 970 averages 3.13% Zn. This appears to tie through to the 10' of 5.02% in the "S" bed in hole CS-37.

Attached to this report are map AX-TENN-105 and sections for all holes drilled in the first quarter of 1958, AX-TENN-C-1323, C-1329, C-1350, C-1357 and B-1333.

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4586, Idm-E1071-Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs Area, Grainger County, Tennessee

Diamond drilling data on the above contract to date and progress made since the last inspection of March 4, 1958 is summarized as follows:

Drilling Completed

Number of holes completed since last inspection....	1
Footage in holes completed since last inspection...	1,150
Total number of holes completed to date.....	31
Total footage completed to date.....	23,471*
Number of holes showing commercial zinc ore.....	1
Number of holes showing non-commercial zinc mineralization.....	18
Number of barren holes.....	12

Additional data on the one hole completed during the Interim follows:

Hole #	Property	Total depth	Remarks
CS-39	Robt.Mallicoat	1150	No additional markers recognized between "U-255" bed and the bottom @ 1150. No mineralization in this hole.

Drilling in Progress

Number of holes in progress.....	1
Footage drilled in incompleted holes at time of inspection.....	913

Available data on the one hole in progress follows:

Hole #	Property	Present depth	Est. total depth	Remarks
CS-41	R. Mallicoat	913	1050	Drilling began on March 10. Brief log to date: 0-2 overburden. Collared in Chickamauga. top of Mascot fm @ 105; Chert matrix @ 775; Top of "R" bed @ 901. No mineralization to date.

Signature Robert A Lawrence Title EXECUTIVE OFFICER DMEA FIELD TEAM REGION V Date MAR 18 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for February 1958

Cedar Springs Area DMEA 4586

Contract Idm E 1071 (Zinc)

Two drills operated on the project during the month and two holes were completed.

Hole CS-37 - Robert Mallicoat property - 800' SW on strike from CS-22

Coordinates: 734,526.55 N; 770,808.53 E
Elevation: 1359.76

Results:

0- 155 - - Chickamauga limestone
155- 815 - - Mascot dolomite
815 - - Ce Mtx
815- 938 - - Upper Kingsport dolomite
938- 973 - - 35' ore averaging 6.24% zinc
938-943 - 5' - 2.68% zinc
943-948 - 5' - 2.66% zinc
948-953 - 5' - 5.31% zinc
953-958 - 5' - 6.92% zinc
958-963 - 5' - 8.85% zinc
963-968 - 5' - 8.97% zinc
968-973 - 5' - 8.32% zinc
973-976 - - Upper Kingsport dolomite
976 - - TR
976- 988 - - Lower Kingsport dolomite
988-1007 - - 19' ore averaging 3.41% zinc
988- 993 - 5' - 3.63% zinc
993- 998 - 5' - 2.40% zinc
998-1003 - 5' - 0.60% zinc
1003-1007 - 4' - 7.90% zinc
1007-1015 - - Lower Kingsport dolomite
1015-1025 - - 10' ore averaging 5.02% zinc
1015-1020 - 5' - 4.58% zinc
1020-1025 - 5' - 5.46% zinc
1025-1115 - - Lower Kingsport dolomite and limestone
1115-1150 - - (Bottom) Longview dolomite & limestone

This hole, with substantial footage of ore, is very promising. The drill has been moved 100' downdip to search for an extension of this ore.

Hole CS-40 - Carl Davidson property - 1250' NE on strike from CS-33

Coordinates: 738,500.82 N; 775,225.41 E
Elevation: 1562.66

Results:

0- 47 - - Clay
47-169 - - Upper Kingsport dolomite. Trace sphalerite 91',106',143',166'.
169-345 - - (Bottom) Lower Kingsport limestone and dolomite

This hole contains a small amount of zinc mineralization and strong pyrite mineralization. The area looks encouraging but no more drilling will be done until additional geochemical information is gathered to aid further drilling. This drill was moved to the Lawson Area to begin drilling on that program.

INTERIM REPORT

DMEA-4586, Idm-E1071-zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs Area, Grainger County, Tennessee

Diamond drilling data on the above contract to date and progress made since the last inspection of February 6, 1958 is summarized as follows:

Drilling Completed

Number of holes completed since last inspection..	1
Footage in holes completed since last inspection .	345
Total number of holes completed to date.....	30
Total footage completed to date.....	22,321
Number of holes showing commercial zinc ore....	1
Number of holes showing non-commercial zinc mineralization.....	18
Number of barren holes.....	11

Correct footage of complete holes - 22,321' 3/14/58

Additional information on the one hole completed during the interim is as follows:

Hole No.	Property	Total depth	Remarks
CS-40	C. Davidson	345	Coordinates: 738,500.82 North; 775,225.41 east. Collar elevation 1562.66; Hole is located 1100 ft northeast and along strike from CS-33. A brief log of the hole is as follows; 0-47 overburden; top of "TR" @ 169; "B" marker @ 191; top of "E" bed @ 206; bottomed @ 345. Mineralization: Traces of sphalerite @ 91,106,143 and 166. Scattered pyrite from 153 to 238.

Drilling in Progress

Number of holes in progress.....	1
Footage drilled in incompleted holes at time of inspection.....	927

Available data on the one hole in progress is as follows:

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. E-1071 in accordance with the terms of the contract.

Signature V. J. Lynch Title U. S. BUREAU OF MINES Date FEB 25 1958

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA REGION V Date FEB 25 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

V. J. Lynch
MINING ENGINEER
U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for January 1958

Cedar Springs Area MTEA 4586

Contract Idm E 1071 (Zinc)

Two drills operated on the project during the month and three holes were completed. The locationsof these holes are shown in green on the accompanying map.

Hole CS-35 - Robert Mallicoat property - 300' downdip from CS-32

Coordinates: 734,587.28 N; 770,068.97 E
Elevation: 1451.94

0- 10 - - Clay
10-608 - - Mascot dolomite
608 - - C Matrix
608-755 - - Upper Kingsport dolomite
755 - - TR
755-930 - - (Bottom) Lower Kingsport

Hole CS-36 - J. R. Davidson property - 300' downdip from CS-34

Coordinates: 737,385.86 N; 774,466,68 E
Elevation: 1448.91

0- 21 - - Clay
21-363 - - Mascot dolomite
363 - - Ce Matrix ?
363 -519 - - Upper Kingsport dolomite. Traces of sphalerite 503, 515, 516, 519
519 - - TR
519-524 - - Lower Kingsport dolomite
524-543 - - 19' - mineralization estimated at 1% Zn
543-701 - - (Bottom) Lower Kingsport-Upper Longview Scattered traces sphalerite 546-549, 563

Hole CS-38 - J. R. Davidson property. 300' downdip from CS-31 Coordinates 737,140.27 N, 774,007.83 E Elev. 1439.82

0- 48 - - Clay
48-528 - - Mascot and upper Kingsport dolomite Traces sphalerite 477, 483-484, 494, 495, 506-508, 527
528 - - TR ?
528-694 - - Lower Kingsport limestone and dolomite. Traces sphalerite 537-543, 545
694-701 - - T Bed
701-710 - - Longview dolomite

This hole is strongly fractured, brecciated, and mylonitized making identification of upper marker horizons uncertain.

INTERIM REPORT

DMEA-4586, Idm-E1071 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs Area, Grainger County, Tennessee

Diamond drilling data on the above contract todate and progress mde since the last inspection of January 14, 1958 is summarized as follows:

Number of holes completed since last inspection--	2
Footage in holes completed since last inspection--	1860
Total number of holes completed todate----------	29
Total footage completed todate----------	21,971 *
Number of holes showing commercial zinc ore-----	1
Number of holes showing non-commercial zinc mineralization----------	17
Number of barren holes----------	11

Additional information on the two holes completed during the Interim is as follows:

Hole No.	Property	Total depth	Remarks
CS-37	Robt. Mallicoat	1150	Drilling started 1-10-58 and hole was bottomed 2-4-58. A continued brief log is as follows: Chert matrix @ 815', U-255 bed @ 894. Top of "TR" @ 976', top of "E" bed @ 1007, bottomed @ 1150'.
35 x 5.5 =	192.5		
10 x 3.5 =	35.0		
10 x 4.0 =	40.0		
			Mineralization: from 938 to 973- 35' of est. 5½% Zn, 988 to 1007; 19' of est. 3½% Zn, 1015 to 1025; 10' of est. 3½% to 4% Zn.
CS-38	Davidson	710	Location: 600 ft downdip from CS-31. Coordinates: 737, 140 north and 774, 008 East. Elevation @ collar-1440'. A brief log of the hole is as follows: 0-48 overburden, top of "TR" bed @ 528; top of "E" @ 581; top of "T" @ 694, bottomed @ 710.
			Mineralization: Traces of Zn @ 477, 483, to 484, 494-495, 506 to 508, 527, 537 to 543 and @ 545.

* Should be 21,979'

INTERIM REPORT

DMEA-4586, Idm-E1071 - Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Cedar Springs Area, Grainger County, Tennessee

Diamond drilling data on the above contract todate and progress made since the last inspection of Dec. 5, 1957 is summarized as follows:

Drilling Completed:

Number of holes completed since last inspection....	6
Footage in holes " " " "	3,679
Total number of holes completed to date	27
Total footage completed in holes todate	20,111
Number of holes showing commercial zinc ore.....	0
Number of holes showing non-commercial zinc mineralization.....	16
Number of barren holes	11

Additional data on the 6 holes completed during the interim is as follows:

Hole No.	Property	Total depth	Remarks
CS-31	J.R. Davidson (tract 1)	452	Coordinates: 737,670.79 North 773,728.24 East. Elevation:of hole at collar-1542.65' Drilling began Dec.28, 1957 and the hole was bottomed Jan.7, 1958. Mineralization: In addition to that previously reported there were traces of sphalerite at 183, 184, 196 and 199.
CS-32	Robt.Mallicoat	760	Location: 300' downdip from CS-38. Coordinates: 734,850.37 North 769,927.75 East Elevation at collar of hole: 1470.16 ft Drilling began Dec.5, 1957 and was completed (?). A brief log of the hole is as follows: 0-30 overburden, Chert matrix @ 427, U-255 bed @ 499, "TR" bed @ 579, "B" bed @ 596, "E" (?)bed @ 732, "J" bed @ 710, "T" bed from 734 to 743. Hole bottomed @ 760. No mineralization was encountered.

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. E-1071 in accordance with the terms of the contract.

Signature P. B. Lynch Title MINING ENGINEER U.S. BUREAU OF MINES Date JAN 17 1958

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA FIELD TEAM REGION V Date JAN 17 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-4586, Idm-E1071 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs Area, Grainger County, Tennessee

Diamond drilling data on the above project to date ~~and progress~~ made since the last inspection of November 7, 1957 is summarized as follows:

Drilling completed:

Footage in holes completed since last inspection	3,042
Total footage in holes completed todate	16,432
Number of holes completed since last inspection	4
Total number of holes completed todate	21
Number of holes showing commercial zinc ore	0
Number of holes showing non-commercial zinc mineralization	12
Number of barren holes	9

Additional data on the four holes completed during the interim is as follows:

Hole No.	Property	Total Depth	Remarks
I-57	J. R. Davidson (tract 2)	632	No additional mineralization encountered other than that previously reported.
I-58	J. R. Davidson (tract 2)	406	Location: 300 feet updip from I-57 Collared in Mascot; chert matrix @ 111, U-255 bed @ 179', TR bed @ 258, "E" bed @ 301, "J" sand @ 382, "T" bed @ 405. Mineralization: @ 228-229, 1' of 35% Zn (est), @ 229-231, scattered traces of sphalerite.
I-59	J. R. Davidson (tract 2)	987	Location: 300 ft downdip from I-56; collared in Mascot fm, chert matrix @ 678, U-255 bed @ 743, TR bed @ 825, "E" bed @ 876, "J" bed @ 947, "T" bed @ 976. Mineralization: 833-837; traces of sphalerite
CS-30	J. R. Davidson (tract 1)	1017	Mascot fm from 0-692, chert matrix @ 692 ft. TR bed @ 841, sands @ 1002 and 1006. Bottomed in sed. breccia. No mineralization noted in this hole.

Drilling in progress:

Number of holes in progress 2
Total footage drilled in incompleted holes at time of inspection 424

Additional data of the two holes in progress at this time is as follows:

Hole No.	Property	Present Depth	Estimated Total Depth	Remarks
CS-31	J. R. Davidson (tract 1)	424	452	Located 1200 feet NE of CS-25; collared near bottom of Mascot fm. "U-255" bed at 136 ft. Mineralization: Zn shine @ 155 ft; scattered traces of sphalerite from 156 to 174 feet; shine @ 207; trace of sphalerite @ 208 ft.
CS-32	Robert Mallicoat	0	700 +	Located 300 feet downdip from CS-28 Drill moving to this location on date of inspection.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Signature V. J. Lynch Title ACTING EXECUTIVE OFFICER DMEA - REGION V Date NOV 26 1957

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-4586, Idm-E1071 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Diamond drilling on the Cedar Springs project of the New Jersey Zinc Company in the Copper Ridge district to date and since the last inspection on October 17, 1957 is summarized as follows:

Drilling completed:

Footage in holes completed since last inspection . . .	1,702
Total footage in holes completed to date	13,390
Number of holes completed since last inspection . . .	2
Total number of holes completed to date	17
Number of holes showing commercial zinc ore	0
Number of holes showing non-commercial zinc mineralization	9
Number of barren holes	8

Drilling in progress:

Number of holes in progress	2
Total footage drilled in incompleted holes at time of inspection	850

Brief summaries of the two holes completed since the last inspection follow:

Hole no.	Property	Total Depth	Remarks
I-56	J. R. Davidson (tract-2)	773	Location: About 500 feet southwest and 320 feet down-dip from Hole 1-55. Abbreviated log: 0-4 residual clay; 4-479 Mascot dolomite; 479-613 upper Kingsport dolomite member; 613-768 lower Kingsport limestone member (top of S-bed @ 648?); 738-773 Longview dolomite. Mineralization: Shine hole; 1 foot (587-588) w/ 15 % Zn (est).
CS-29	J. R. Davidson (tract-1)	929	Location: About 200 feet down dip from Hole CS-27. Abbreviated log: 0-8 residual clay; 8-617 Mascot dolomite; 617-759 upper Kingsport dolomite member; 759-929 lower Kingsport limestone member and Longview dolomite. Most of Kingsport formation was highly brecciated and silicified and marker toward bottom of hole not recognizable. Mineralization: None; barren hole.

INTERIM REPORT

DMEA-4586, Idm-E1071 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

The diamond drilling program of the New Jersey Zinc Company in the Cedar Springs area of the Copper Ridge district to date and since the last inspection on September 19, 1957 is summarized as follows:

Drilling completed:

Footage in holes completed since last inspection	4,268
Total footage in holes completed to date	11,688
Number of holes completed since last inspection	6
Total number of holes completed to date	15
Number of holes showing commercial zinc ore	0
Number of holes showing non-commercial zinc mineralization	8
Number of barren holes	7

Drilling in progress:

Number of holes in progress	2
Footage drilled in in completed holes	130

Brief summaries of the six holes completed since the last inspection follow:

Hole No.	Property	Total Depth	Remarks
CS-25	J. R. Davidson (Tract 1)	636	Location: About 900 feet NE of Hole CS-3 on line with Hole CS-14. Abbreviated log: 0-7 residual clay; 7-290 Mascot dolomite; 290-468 upper Kingsport dolomite member; 468-577(??) lower Kingsport limestone member; 577(??)-636 Longview dolomite. Mineralization: Traces of ZnS as follows: 411-426, 446, 472-478.
CS-26	Woodrow Davidson	1293	Location: 100 feet down dip from Hole CS-24. Abbreviated log: 0-10 residual clay; 10-319 Chickamauga limestone; 319-974 Mascot dolomite; 974-1154 upper Kingsport dolomite member; 1154-1230(?) lower Kingsport limestone member; 1230(?)-1293 Longview dolomite. Mineralization: Zinc as follows: Shine @ 927; 1049-1074 (25') w/ 1½ % Zn (est); scattered traces and shines @ 1077-1103; 1121-1129 (8') w/ 3½% Zn (est); traces and shines @ 1131, 1143,1148, 1168, and 1170; 1172-1183 (11') w/ 1½% Zn (est); traces @ 1188-1191; 1202-1205 (3') w/ 1½% Zn (est).

Hole No.	Property	Total Depth	Remarks
CS-27	J. R. Davidson (tract-1)	800	Location: 300 feet downdip from Hole CS-25 Abbreviated log: 0-20 residual clay; 20-490(??) Mascot dolomite; 490(??)-644 upper Kingsport dolomite member; 644-800 lower Kingsport limestone member and Longview dolomite (chert-matrix ss and T-bed not recognized--Mascot dolomite highly brecciated and Kingsport highly silicified and brecciated). Mineralization: Barren hole.
CS-28	Robert Mallicoat	500	Location: 1200 feet southwest of Hole CS-14. Abbreviated log: 0-24 residual clay; 24-202 Mascot dolomite; 202-339 upper Kingsport dolomite member; 339-500 lower Kingsport limestone member and Longview dolomite (T-bed not recognized). Mineralization: Trace of ZnS @ 324; barren hole.
I-54	J. R. Davidson (tract-2)	494	Location: About 100 feet up-dip from Hole I-53. Abbreviated log: 0-19 residual clay; 19-180 Mascot dolomite; 180-315 upper Kingsport dolomite member; 315-435 lower Kingsport limestone member; 435-494 Longview dolomite. Mineralization: 300-301 (1') w/ 25% Zn (est); shine hole.
I-55	J. R. Davidson (tract-2)	546	Location: 600 feet southwest of Hole I-53. Abbreviated log: 0-47 residual clay; 47-252 Mascot dolomite; 252-386 upper Kingsport dolomite member; 386-546 lower Kingsport limestone member (probably bottomed 1-2 feet above T-bed). Mineralization: Strong shine of FeS_2@ 405-407; barren hole, S-bed mostly limestone.

With the transfer of one drill rig back to the Big War project (DMEA-4286) since the last inspection only two rigs are currently operating at Cedar Springs. Available pertinent data on the two holes currently drilling are summarized as follows:

Hole No.	Property	Depth	Est. Total Depth	Remarks
CS-29	J. R. Davidson (tract-1)	130	1050	Located about 300 feet downdip from Hole CS-27; collared and drilling in Mascot dolomite (overburden 8')
I-56	J. R. Davidson (tract-2)	--	550	Located about 600 feet southwest of Hole I-55; moving and setting up.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

GEOLOGIST, U. S. G. S.

OCT 18 1957

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-4586, Idm-E1071 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Diamond drilling on the Cedar Springs quadrangle of the New Jersey Zinc Company to date and since the last inspection on August 29, 1957 is summarized as follows:

Drilling completed:

Footage in holes completed since last inspection . . .	1,743
Total footage in holes completed to date	7,420
Number of holes completed since last inspection . . .	2
Total number of holes completed to date	9
Number of holes showing commercial zinc ore	0
Number of holes showing non-commercial zinc mineralization	6
Number of barren holes	3

Drilling in progress:

Number of holes in progress	3
Total footage in incompleted holes	616

Summaries of the two holes completed since the last inspection follow:

Hole No.	Property	Total Depth	Remarks
I-53	J. R. Davidson (Tract-2)	543	Location: 1800 feet SE (on strike line) from CS-14 (see contract map). Abbreviated log: 0-13 overburden; 13-256 Mascot dolomite; 256-404 upper Kingsport dolomite member; 404-543 lower Kingsport limestone member. Mineralization: 373-374; 1 ft w/ 35% Zn (est); scattered strong shines of ZnS @ 320-321 and 374-377.
CS-24	Woodrow Davidson	1200	Location: 100 ft down-dip from Hole CS-22. Abbreviated log: 0-5 overburden; 5-243 Chickamauga ls; 243-895 Mascot dolomite; 968-1062 upper Kingsport dolomite member; 1062-1166 lower Kingsport limestone member; 1166-1200 Longview dolomite. Mineralization: Shines of ZnS @ 785, 992, 1008, 1014; 1019-1030, 11 ft w/ 1% Zn (est); shines of ZnS @ 1036, 1047, 1054, and 1060; 1066-1088, 22 ft w/ 1% Zn (est); traces of ZnS @ 1090, 1095; 1099-1105, 6 ft w/ 2% Zn (est).

With the move of one drill rig from the Big War project (DMEA-4286) to Cedar Springs three rigs are now in operation on this project. Available data on the three holes currently drilling are summarized below:

Hole No.	Property	Depth	Estimated Total Depth	Remarks
I-54	J. R. Davidson (Tract-2)	24	480	Collared and drilling in Mascot dolomite at site 100 feet up-dip from Hole I-53.
CS-25	J. R. Davidson (Tract-1)	505	635	Collared in Mascot dolomite at site about 900 feet NE of Hole CS-3 on line with Hole CS-14; chert-matrix ss @ 290; TR @ 468; currently drilling in lower member of Kingsport fm; Mineralization as follows: traces of ZnS @ 411-426 and 446; scattered traces of ZnS @ 472-478 with traces of Cu associated with FeS_2 rosettes.
CS-26	Woodrow Davidson	87	1300	Collared and drilling in Chickamauga ls at site 100 feet down-dip from Hole CS-24.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA FIELD TEAM REGION V Date AUG 28 1957

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Report for July 1957

Cedar Springs Area DMEA 4586

Contract Idm E-1071 (Zinc)

In July, one drill operated in the Cedar Springs area and two holes were completed. Summary logs of these holes, CS-21 and CS-22, follow:

<u>Hole CS-21</u> - Woodrow Davidson property, 200 feet down-dip from CS-20

Approx. Coordinates: 735,080 N; 771,180 E
" Elevation: 1410'

0- 22 - - Clay
22-645 - - Mascot dolomite
645-758 - - Upper Kingsport dolomite
758-880 - - Lower Kingsport, 40% dolomite
880-914 - - (Bottom) Longview formation

<u>Hole CS-22</u> - Woodrow Davidson property, 300 feet down-dip from hole CS-21

Approx. Coordinates: 734,825 N; 771,330 E
" Elevation: 1425'

0- 2 - - Clay
2-171 - - Chicamauga limestone
171-823 - - Mascot dolomite
823-973 - - Upper Kingsport dolomite
973-999 - - Weakly mineralized, estimated ½% Zn
999-1029 - 30' mineralization averaging 1.62% Zn assays as follows:
999-1004 - - 2.03% Zn
1004-1009 - - 0.35% "
1009-1014 - - 3.30% "
1014-1019 - - 1.33% "
1019-1023 - - Nil (not assayed)
1023-1029 - - 2.25% Zn
1029-1037 - Weakly mineralized, estimated ½% to 1% Zn
1037-1093 - Lower Kingsport
1093-1104 - (Bottom) Longview dolomite.

INTERIM REPORT

DMEA-4586, Idm-E1071 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Drilling on the Cedar Springs project in the Copper Ridge district completed to date and since the last inspection on August 8, 1957 is summarized as follows:

Footage in holes completed since last inspection . . .	1,025
Total footage in holes completed to date	5,677
Number of holes completed since last inspection . . .	1
Total number of holes completed to date	7
Number of holes showing commercial zinc ore	0
Number of holes showing non-commercial zinc mineralization	4
Number of barren holes	3

Data on the one hole completed since the last inspection are summarized below:

Hole No.	Property	Total depth	Remarks
CS-23	Woodrow Davidson	1025	Location: 100 feet up dip from Hole CS-22. Abbreviated log: 0-9 overburden; 9-57 Chickamauga limestone; 57-710 Mascot dolomite; 710-875 upper Kingsport dolomite member; 875-1002 lower Kingsport limestone member; 1002-1025 Longview dolomite (T-bed @ 1002-1004). Mineralization: Trace ZnS @ 858; scattered pyrite @ 917-928 and 996.

Hole CS-24 located 100 feet downdip from Hole CS-22 is now in progress. It is collared in the Chickamauga limestone, is currently drilling in the Mascot dolomite (top at a depth of 243 feet), and will bottom at a depth of about 1230 feet.

INTERIM REPORT

DMEA-4586, Idm-E1071 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Diamond drilling completed on the Cedar Springs project to date and since the last inspection on July 25, 1957 is summarized as ~~follows:~~

Footage in holes completed since last inspection . . .	1,104
Total footage in holes completed to date	4,652
Number of holes completed since last inspection . . .	1
Total number of holes completed to date	6 ✓
Number of holes showing commercial zinc ore	0 ✓
Number of holes showing non-commercial zinc mineralization	3
Number of barren holes	3

Additional available information on the one hole completed since the last inspection is given below:

Hole No.	Property	Total depth	Remarks
CS-22	Woodrow Davidson	1104	TR @ 990; E marker not recognized; T-bed @ 1093-1098; estimated zinc as follows: 4 ft @ 3%; 973-977 ✓ 11 ft @ 1½%; 999-1010 ✓ 8 ft @ 3%; 1010-1018 ✓ 6 ft @ 3%; 1023-1029 2 ft @ 4%; 1035-1037 not bad! Also shines of sphalerite @ 983, 984, 985, 986, 988, 994, 1045, 1063, and 1064.

With the strong showing of mineralization in Hole CS-22, the drill rig was moved 100 feet up dip to Hole CS-23, rather than to the other end of the fence as was reported in the last previous interim report. Available data on the hole in progress are as follows:

Hole No.	Property	Depth	Est. total depth	Remarks
CS-23	Woodrow Davidson	734	1025	Collared in Chickamauga ls and drilling in Mascot dolomite (top @ 57).

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-4586, Idm-E1071 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Drilling completed to date and since the last inspection on June 27, 1957 on the Cedar Springs project of the New Jersey Zinc Company in the Copper Ridge district is summarized as follows:

Footage in holes completed since last inspection . . .	914
Total footage in holes completed to date	3,548
Number of holes completed since last inspection . . .	1
Total number of holes completed to date	5
Number of holes showing commercial zinc ore	0
Number of holes showing non-commercial zinc mineralization	2
Number of barren holes	3

The one hole completed since the last inspection is summarized as follows:

Hole no.	Property	Depth	Remarks
CS-21	Woodrow Davidson	914	Location: 200 feet down dip from Hole CS-20. Abbreviated log: 0-22 Overburden; 22-645? Mascot dolomite; 645?-758 upper Kingsport dolomite member; 758-796 lower Kingsport--R bed; 796-881 lower Kingsport--S bed; 881-914 Longview dolomite (T bed @ 881-892). Mineralization: Barren

Hole CS-22 drilling at the time of the current inspection, is located 300 feet down dip from Hole CS-21 on the Woodrow Davidson property. Hole CS-22 collared in the Chickamauga limestone, reached the top of the Mascot dolomite at a depth of 171 feet, and was drilling at a depth of 211 in the Mascot dolomite at the time of inspection. It will be bottomed at about 1200 feet.

Inspected: July 11, 1957

INTERIM REPORT

DMEA-4586, Idm-E1071 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Diamond drilling on the Cedar Springs project in the Copper Ridge district completed to date and since the last inspection on June 13, 1957 is summarized as follows:

Footage in holes completed since last inspection . . .	829
Total footage in holes completed to date	2,634
Number of holes completed since last inspection . . .	1
Total number of holes completed to date	4
Number of holes showing commercial zinc ore	0
Number of holes showing non-commercial zinc mineralization	2
Number of barren holes	2

A summary of the one hole completed since the last inspection follows:

Hole no.	Property	Depth	Remarks
CS-20	Woodrow Davidson	829	Location: 200 feet down dip from Hole CS-19. Abbreviated log: 0-16 Overburden; 16-500 Mascot dolomite; 500-659 upper Kingsport dolomite member; 659-715 lower Kingsport--R bed; 715-780 lower Kingsport--S bed; 780-829 Longview dolomite (T bed @ 780-785). Mineralization: Traces of sphalerite @ 234, 697, and 747; 3 ft estimated @ 3% Zn @ 734-737; local traces and shines of pyrite @ 630-776.

One hole was drilling at the time of the current inspection. Preliminary available data on this hole are given below:

Hole no.	Property	Depth	Est. depth	Remarks
CS-21	Woodrow Davidson	344	1000	Located 200 feet down dip from Hole CS-20; collared and drilling in Mascot dolomite (22 feet of overburden).

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lemmon Title EXECUTIVE OFFICER DMEA FIELD TEAM REGION V Date JUN 24 1957

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INTERIM REPORT

DMEA-4586, Idm-E1071-Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Diamond drilling completed on the Cedar Springs project of the New Jersey Zinc Company in the Copper Ridge district to date and since the last inspection May 27, 1957 is summarized as follows:

Footage in holes completed since last inspection ...	1,285
Total footage in holes completed to date.....	1,805
Number of holes completed since last inspection.....	2
Total number of holes completed to date.....	3
Number of holes showing commercial zinc ore.....	0 ✓
Number of holes showing non-commercial zinc mineralization.....	1
Number of barren holes.....	2

Brief summaries of the two holes completed since the last inspection follow:

Hole No.	Property	Depth	Remarks
CS-18	Woodrow Davidson	606	Location: 100 ft down dip from Hole CS-17. Abbreviated log: 0-8 Overburden; 8-289 Mascot dolomite; 289-437 upper Kingsport dolomite; 437-489 lower Kingsport --R bed; 489-588 lower Kingsport--S-bed; 588-606 Longview dolomite (T bed 588-597). Mineralization: Shine of pyrite 397-399; barren hole.
CS-19	Woodrow Davidson	679	Location: 100 ft down dip from Hole CS-18. Abbreviated log: 0-27 Overburden; 27-355 Mascot dolomite; 355-515 upper Kingsport dolomite; 515-557 lower Kingsport-R-bed; 557-666 lower Kingsport--S bed; 666-679 Longview dolomite (T bed 666-675). Mineralization: Scattered shines of pyrite 579-607; barren hole.

Hole CS-20 was drilling at the time of inspection. It is located on the Woodrow Davidson property about 200 ft down dip from Hole CS-19. Hole CS-20 was collared and at a depth of 173 ft is currently drilling in the Mascot dolomite. It will probably bottom at a depth of about 750 ft.

Inspected: June 13, 1957

V. J. Lynch, Mining Engineer
Bureau of Mines

Helmuth Wedow, Jr, Geologist, Geological Survey.

INTERIM REPORT

DMEA-4586, Idm-21071 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Cedar Springs area, Grainger County, Tennessee

Diamond drilling on the Cedar Springs project of the New Jersey Zinc Company in the Copper Ridge district was initiated on May 14, 1957 with the drill rig moved off the recessed Independence project (DMEA-4153).

The first hole to be completed was located 100 feet down dip from Hole CS-14 (pre-DMEA drilling). Significant data on the first hole are summarized below:

Hole no.	Property	Depth	Remarks
CS-17	Woodrow Davidson	520	Abbreviated log: 0-17 overburden; 17-217 Mascot dolomite; 217-371 Upper Kingsport dolomite; 371-407 Lower Kingsport ("R" bed); 407-510 Lower Kingsport ("S" bed); 510-520 Longview dolomite ("T" bed). Mineralization: Trace of ZnS and FeS_2 @ 223; traces of pyrite @ 292, 362, 363, 366-371; shine of sphalerite @ 367; 4 ft estimated @ 6 % Zn @ 375-379; traces of sphalerite @ 379-382, and 385.

Data on the hole currently drilling are summarized below:

Hole no.	Property	Depth	Est. depth	Remarks
CS-18	Woodrow Davidson	264	610	Located 100 feet down dip from Hole CS-17; collared in Mascot dolomite; currently drilling in lower part of Mascot dolomite.

Inspected: May 27, 1957

V. J. Lynch, Mining Engineer
U. S. Bureau of Mines

Helmuth Wedow, Jr., Geologist
