FINAL INSPECTION REPORT

DMEA-4850, Idm-E1174 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	Total
Number of holes	1	53
Footage	600	35,375*

Number of holes showing:

a) Commercial-grade zinc ore	6
b) Non-commercial zinc mineralization	42
c) No zinc mineralization	5

*375 feet drilled by Operator at own expense.

Data on the one hole completed since the last inspection are summarized as follows:

Hole LW-106: Located on the W. M. Brewer tract (NJZ Mining and Mineral Rights) at coordinates: 746,256-N; 2,795,161-E (approximately 100 feet down dip from Hole LW-80). Collar elevation: 1,667 feet AT. Drilling started: 5-12-60; completed: 5-20-60. Total depth: 600 feet. Summary log: 0-14 overburden; 14-284 Mascot dolomite; 284-586 Kingsport formation (TR @ 440); 586-600 Longview dolomite. Mineralization: Shine hole---shines of ZnS @ 390, 390½; trace @ 399; 403-404 (1'), 1% est; traces of ZnS @ 407, 412-413, 414; shines @ 418, 419-421, 422-424, and 451.

With the bottoming of Hole LW-106 the Little War Creek DMEA contract was completed and the drill moved out of the area. As far as is known the Operator has no immediate plans to resume operations in the area.

This project was visited on April 19, 1960 accompanied by L. G. Houk, Acting Field Officer, Region IV, OME and V. J. Lynch, U. S. Bureau of Mines. A report of this visit was not prepared because data on the holes completed to that date were not available. Data on the seven holes completed since the inspection made on March 1, 1960 are summarized below.

Hole LW-99: Located on the M. C. Tunmire tract at coordinates: N-746,318; E-2,799,692. Collar elevation: 1588 feet. Drilling started: 2/23/60; completed 3/1/60. Total depth: 500 feet. Summary log: 0-36 overburden; 36-194 Mascot dolomite; 194-500 Kingsport formation (T-bed probably not reached; TR @ 385). Mineralization: Shine hole; shines of ZnS @ 138-140 and traces at 235 and 268.

Hole LW-100: Located on the Lewis Turnmire (NJZ M&M) tract at coordinates: N-745,753; E-2,793,971. Collar elevation: 1622 feet. Drilling started: (dates not available). Total depth: 726 feet. Summary log: 0-60 overburden; 60-400 Mascot dolomite; 400-706 Kingsport formation (TR @ 584); 706-726 Longview dolomite. Mineralization: Shine hole; teaces of ZnS @ 483,493, 644 and 658; weighted averages of assay runs as follows: 662-672 (10') 2.42%; 672-701 (29') 0.99%; 662-701 (39')1.36%; also ZnS shine@ 703.

Hole LW-101: Located on Lewis Turnmire tract. Angle hole with collar coordinates: N745,384; E-2,794,746. Inclined minus 50° with a bearing of N.1°W. Collar elevation: 1568 feet. Drilling started: 3/23/60; completed: 4/8/60. Total depth: 850 feet.

MAY 26 1960
O.M.E.

Hole LW-101 con'td: Summary log: 0-18 overburden; 18-557 Mascot dolomite; 557-850 Kingsport formation and Longview dolomite (T-bed not recognized; TR @ 722). Mineralization: Shine hole; shines ZnS @ 724 and a run of 4' (729-733) estimated at 1½% zinc.

Hole LW-102: Located on Lewis Turnmire tract at coordinates: N-745,853; E-2,793,970. Collar elevation: 1629 feet. Drilling started: 4/9/60; completed: 4/19/60. Total depth: 650 feet. Summary log: 0-90 overburden; 90-320 Mascot dolomite. 320-610 Kingsport formation (TR @ 490); 610-650 Longview dolomite. Mineralization: Shine hole. Shines of ZnS @ 449 and 548; 564-583 (19') 2% est; 586-599(13') 1/4% est; 599½-609 (9½') ½% est.

Hole LW-103: Located on Lewis Turnmire tract 125 ft. down-dip from Hole LW-100. Coordinates and collar elevation not yet available. Drilling started: 4/20/60; completed: date not available. Total depth: 805 ft. Summary log: 0-30 overburden: 30-495 Mascot dolomite; 495-793(?) Kingsport formation (TR @ 663); 793(?)-805 Longview dolomite. Mineralization: Shine hole; 684-685 (1') 2% Zn est; also traces of ZnS @ 715,718,719, and 736-738.

Hole LW-104: Located on W. M. Brewer tract 200 feet up-dip from Hole LW-80. Collar coordinates and elevation not yet available. Drilling started: (date not available); completed 5/5/60. Total depth: 306 ft. Summary log: 0-122 overburden; 122-282 Kingsport formation (TR not recognized); 282-306 Longview dolomite: Mineralization: None- barren hole.

Hole LW-105: Located on W. M. Brewer tdact 100 ft. up-dip from Hole LW-80. Collar coordinates and elevation not yet available. Drilling started: 5/6/60; completed: 5/12/60. Total depth 410 ft. Summary log: 0-40 overburden; 40-60 Mascot dolomite; 60-375 Kingsport formation (TR @ 249); 375-410 Longview dolomite. Mineralization: None--barren hole.

Drilling in progress

Drilling is in progress on Hole LW-106 at a site 100 ft. down dip from Hole LW-80. This hole will be the last under the DMEA contract. As the hole is expected to be about 600 ft. deep, only part of the hole will be completed under the DMEA contract and the remainder at the Operator's own expense. It is doubtful whether the Operator will continue drilling in the Little War Creek area on the completion of Hole LW-106 as the results have been generally disappointing.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature ..... Title ..... Date .....

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

GEOLOGIST, U. S. G. S.

JUN 21 1960

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for May, 1960

Little War Creek Area DMSA 4850

Contract Idm S 1174 (Zinc)

During the month of May, three holes were drilled on the Little War Creek Project. All of these holes are located on the W. M. Brewer property. The footage authorized under the terms of the DMSA contract was used up in Hole LW-106.

Hole LW-104 (W. M. Brewer property)

Hole LW-104 was drilled at a location 200 feet updip from LW-80 in an attempt to intersect the indicated eastward trend of mineralization encountered in holes LW-75 and LW-85. This hole collared in the Kingsport formation and was drilled to a depth of 306 feet.

Coordinates: N 746,357.72; 795,159.43
Elevation: 1661.44

Results:

0-122 - - Overburden
122-282 - - Lower Kingsport dolomite
282-306 - - (Bottom) Longview dolomite

Hole LW-105 (W. M. Brewer property)

Hole LW-105 was drilled half-way between LW-104 and LW-80 in a further attempt to intersect the indicated eastward trend of mineralization encountered in holes LW-75 and LW-85. This hole collared in the Mascot formation and was drilled to a depth of 410 feet.

Coordinates: N 746,056.12; E 795,157.95
Elevation: 1674.80

Results:

0- 40 - - Overburden
40- 60 - - Mascot dolomite
60-249 - - Upper Kingsport dolomite
249 - - TM
249-375 - - Lower Kingsport dolomite
375-410 - - (Bottom) Longview dolomite

Hole LW-106 (W. M. Brewer property)

This hole was drilled 100 feet south of hole LW-80 in order to test for the eastward extension in this area of the mineralization

encountered in holes LW-75 and LW-85. The hole collared in the Mascot formation and was drilled to a depth of 600 feet.

Coordinates: N 746,255.58; E 795,161.21
Elevation: 1667.40

Results:

0- 14	- -	Overburden

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MAY 18 1960

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for April 1960

Little War Creek Area DMEA 4850

Contract Idm E 1174 (Zinc)

During the month of April three holes were completed on the Little War Creek Project.

Hole LW-101 (NJZ Co. M & M rights)

Hole LW-101 was drilled on the Lewis Tunmire farm at a location approximately 150 feet south of LW-87 and on a - 50° angle toward holes LW-87, 76 and 75. The purpose of this hole was to intersect the potential ore zones in the Lower Kingsport between holes LW-76 and LW-75 and to test for the presence of a steeply dipping orebody. This hole collared in the Mascot formation and was drilled to a depth of 850 feet.

Coordinates: N 745,384.03; E 794,745.56
Elevation: 1568.15
Inclination: - 50°; Bearing N 1° W

Results:

Hole LW-102 (NJZ Co. M & M rights)

Hole LW-102 was drilled on the Lewis Tunmire farm at a location 100 feet north of hole LW-100 in an attempt to intersect the indicated westward trend of the mineralization encountered in holes LW-74, LW-75 and LW-85. This hole collared in the Mascot formation and was drilled to a depth of 650 feet.

Coordinates: N 745,852.67; E 793,969.97

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Lawrence G. Houk Title Act Field Officer Date 4/25/60

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the cost of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [illegible] Title ACTING EXECUTIVE OFFICER DMEA - REGION V Date MAR 22 1960

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MAR 25 1960 O.M.E.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for February, 1960

Little War Creek Area DMEA 4850

Contract Idm E 1174 (Zinc)

During the month of February, two holes were completed on the Little War Creek project.

Hole LW-97 - (N.J.Z. Co. M & M rights)

Hole LW-97 was drilled on the James Brewer farm at a location of 200 feet southeast of LW-29. The hole collared in the Mascot formation and was drilled to a depth of 540 feet.

Coordinates: N 746,253.05; E 798,986.43
Elevation: 1630.83

Results:

INTERIM REPORT

DMEA-4850, Idm-E1174 - (zinc)

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes.....	3	45
Footage.....	1,865	30,528
Number of holes showing:		
a) Commercial-grade zinc ore.....		6
b) Non-commercial zinc mineralization....		36
c) No zinc mineralization.....		3

Data on the three holes completed since the last inspection are summarized as follows:

Hole LW-96: Located on Brewer tract with the collar approximately 160 feet down dip from Hole LW-63 and at coordinates: N-745,737; E-2,799,348. Collar elevation: 1,592 feet A.T. Hole is inclined in the plane of the dip fence approximately minus 50° NW. Drilling started: 1/10/60; completed 1/26/60. Total length: 750 feet. Summary log: 0-33 overburden; 33-503 Mascot dolomite; 503-750 (bottom of hole) Kingsport formation (TR @ 654). Mineralization: Shine hole.

Note: all values following are in estimated percent zinc.

2' (381-383) 1% ; 6' (394-400) ½%; traces @ 450-459, 461,495, 508, 510,521; 10' (523-533) ½%; 1' (597-598) 5%; 1' (603-604) ½%.

Hole LW-97: Located on Brewer tract at coordinates: N-746,253; E-2,798,986 (approximately 100 feet downdip from Hole LW-28). Collar elevation: 1,631 feet A. T. Vertical hole. Drilling started: 1/27/60; completed: 2/8/60. Total depth: 540 ft. Summary log: 0-63 overburden; 63-195 Mascot dolomite; 195-505 Kingsport formation (TR @ 405); 505-540 (bottom of hole) Longview dolomite. Mineralization: Shine hole. (All values in estimated percent zinc). 1' (260-261) ½%; 1'(264-265) 15%; 6' (271-277) 1½%; shines @ 291 and 325-327; 3' (329-332) 1½% shine @ 350.

Hole LW-98: Located on Brewer tract at coordinates: N-746,173; E-2,799,052(approximately 100 ft downdip from Hole-LW-97). Collar elevation: 1,617 feet A.T. Vertical hole. Drilling started: 2/9/60; completed: 2/22/60. Total depth: 575 feet. Summary log: 0-105 overburden; 105-253 Mascot dolomite; 253-575 Kingsport formation and Longview dolomite (TR @ 440; T-bed not recognized but may be at about 561 ?). Mineralization: Presently classified as shine hole on basis of estimates, but may move into ore category on completion of assays. All values following are in estimated percent zinc: 3' (186-189) 3/4 %; traces @ 210-211; 3' (216-219) 1½%; traces @ 299-301,308,309, 325-327,329-330; 5' (330-335) 2% ; 2' (340-342) 10%; 8'(342-350) 1%; traces @ 354, 362; 6' (363-369) 3%; traces @ 370-374; 13' (380-393) 1½%; 1' (404-405) 1%; 2' (408-410) 2%; shines @ 419,420,426, and 434.

Drilling in progress

Drilling on Hole LW-99 is now in progress. This hole is located on the M. C. Tummire property approximately 200 feet northeast of Hole LW-58 on the strike fence consisting of Holes LW-66 and -58. Core was observed to a depth of 424 feet with total drilling depth estimated at 500 feet. The hole is almost completed barren of zinc to the depth seen with shine and traces only being seen at depths of 139-140, 235, and 269 feet. On the completion of Hole LW-99 it is anticipated that the drill will be moved to a site in the southwestern part of the project area somewhere in the vicinity of Holes LW-78 and -86.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for January, 1960

Little War Creek Area DMEA 4850

Contract Idm E 1174 (Zinc)

During the month of January two holes were completed on the Little War Creek project. Hole LW-95, located on the James Brewer farm, was drilled to a depth of 901 feet. The results are as follows:

Hole LW-95 - (NJZ Co. M&M Rights, J. Brewer surface)
Inclined @ -50°, bearing S 37°-23' E

Coordinates: 736,445.21 N; 798,840.62 E
Elevation:, 1651.62

Results:

0-122 - - - Overburden
122-188 - - - Mascot dolomite
188-901 - - - (Bottom) Upper Kingsport dolomite
230-337, 107' of scatt. shines & traces
337-342, 5' of 2½% Est.
357-361, 4' of 2½% Est.
361-523, 162' of ½% Est.
523-532, 9' of 1% Est.
532-545, 13' of traces of ZnS
545-549, 4' of 3% Est.
549-574, 25' - traces of ZnS
622-634, 12' - traces of ZnS
646-689, 43' - traces of ZnS

Hole LW-96, located 170 feet southeast of LW-63, was drilled on a -50° angle, N 36°-53' W to a depth of 750 feet. The results areas follows:

Hole LW-96 (NJZ Co. M&M rights - J. Brewer surface)
Inclined @ -50° bearing N 36°-53' W.

INTERIM REPORT

DMEA-4850, Idm-E1174-zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes.....	2	42
Footage.....	1,614	28,663

Number of holes showing:

a) Commercial-grade zinc ore.....	6
b) Non-commercial zinc mineralization..	33
c) No zinc mineralization.....	3

Data on the two holes completed since the last interim report are summarized as follows:

Hole LW-94: Located on the M.C. Tunmire tract at coordinates: 745,831-N; 799,770-E. Collar elevation: 1598 feet A.T. Bearing: N 31°W; inclination: minus 51°. Drilling started: 11/10/59; completed: 12/3/59. Total length: 713 ft. Summary log: 0-482 Mascot dolomite (no overburden) 482-713 Kingsport formation (TR @ 633). Mineralization: Ore hole. Traces of ZnS @ 509-512; 102 ft. estimated at 5% Zn @ 512-614; 6 ft. estimated at 1% Zn @ 621-627.

Hole LW-95: Located on Brewer tract in fence consisting of Holes LW-29,-28,-62,-60, and -63. Coordinates: 746,445-N; 798,841-E. Collar elevation: 1652 feet A.T. Bearing: S 38½°E; inclination: minus 51° SE. Drilling started : 12/8/59; completed: 1/9/60. Total length: 901 feet. Summary log: 0-120 overburden; 120-191 Mascot dolomite; 191-901 Upper member of Kingsport formation (hole bottomed approximately 10 ft. above the top of R-bed). Numerous zones of brecciation were encountered, most of which were associated with mineralization. Mineralization: Scattered shines and traces of sphalerite from 234-770 with estimated percentages as follows: 274-300 (26') 1% Zn; 337-342 (5') 2% Zn; 382-387 (5') 1% Zn; 397-403 (6') 1½% Zn; 432-435 (3') 1½% Zn; 505-520 (15') 1%Zn; 545-549 (4') 3% Zn.

Drilling in progress

Drilling is in progress on Hole LW-96 on the Brewer tract. This hole is collared approximately 160 feet down dip from Hole LW-63 and is angled at minus 50° in the plane of the dip fence to a

target zone approximately midway between Holes LW-60 and -62. At the time of the last inspection the hole was at a depth of 110 feet and was drilling in the Mascot dolomite.

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DME FIELD TEAM REGION V Date JAN 20 1960

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for December 1959

Little War Creek Area DMEA 4850

Contract Idm E 1174 (Zinc)

During the month of December, one hole was completed on the Little War Creek project. Hole LW-94, located 90 feet southeast of LW-55, was drilled on a 51° angle, N 31-12 W. The hole was bottomed at a depth of 713 feet.

Hole LW-94 - M. C. Tunmire property

Coordinates: 745,830.72 N; 799,770.33 E
Elevation: 1597.69
Bearing: N 31° 12' W
Inclination: - 51°

Results:

0-482 - - - Mascot dolomite
482-663 - - - Upper Kingsport dolomite. Zinc mineralization occurs as follows:
509-512, traces of sphalerite
512-614, 102' @ 5% Estimated
621-627, 6' @ 1% Estimated
633 - - - TR
633-713 - - - (Bottom) Lower Kingsport formation

REMARKS:

INTERIM REPORT

DMEA-4850, Idm-E1174--Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

No drill holes have been completed since the last reported inspection on November 13, 1959. Hole LW-94 is still in progress. Core has been examined to a depth of 684 feet. The anticipated bottoming depth of this hole is estimated at 725 feet. This depth, although short of the estimated base of the Kingsport, will put the hole well through the zone of mineralization and into an expected barren limestone section of the lower Kingsport S-bed. Mineralization encountered to date is as follows: 509-512 scattered traces of sphalerite; 512-614 (102') estimated at 5 percent zinc; 621-627 (6') estimated at 1 percent zinc; and 659-661 (2') estimated at 3 to 4 percent zinc. The hole shows excellent ore and on assay will probably be very close in grade to the crossing vertical hole (LW-57). The data thus far obtained shows that the angle hole (LW-94) has penetrated a greater stratigraphic thickness of ore than the crossing vertical hole (LW-57). In all it appears that the ore zone in the plane of the exploration fence is probably no more than 50-60 feet in width but is more than 100-feet in a direction normal to the dip.

The problem of the horizontal extent of the ore shoot in a direction away from the exploration fence thus becomes the search for the vertical or near vertical structure localizing a high narrow shoot in the favorable stratigraphic zone. The next hole to be drilled therefore will be in the dip fence consisting of Hole LW-29, -62, and -63 in order to probe for the westward extension of the shoot. It will be an angle hole collared at a site approximately 60 feet up dip in the plane of the fence from Hole LW-29 that with an inclination and bearing of approximately 150° and S 32°E respectively will penetrate the entire favorable stratigraphic zone from the surface to the vicinity of Holes LW-60 and 63. Approval for this hole has alread been given by the Field Team.

Inspected: November 24 and December 2, 1959.

Helmuth Wedow, Jr., Geologist
U. S. Geological Survey

Signature Robert A. Lawrence Title EXECUTIVE OFFICER OME FIELD TEAM REGION V Date DEC 16 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OFFICE OF MINERALS EXPLORATION

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes.....	2	40
Footage.....	1,588	27,049

Number of holes showing:

a) Commercial-grade zinc ore.....	5
b) Non-commercial zinc mineralization.....	32
c) No zinc mineralization.....	3

Available data on the two holes completed since the last inspection are summarized as follows:

Hole LW-92: Located on the J. Barndard tract at coordinates: 745,406-N; 792,523-E. Collar elevation: 1,631 feet A.T. Drilling started: 10/12/59; completed: 10/21/59. Total depth: 788 feet. Summary log: 0-62 overburden; 62-397 Mascot dolomite; 397-734 Kingsport formation (TR@ 582) 734-788(bottom of hole) Longview dolomite. Mineralization: Shine hole; traces of ZnS @ 116, 282, 283, and 617; 1' (650-651) with 2% Zn (est); 5' (666-671) with 1% Zn(est); 11'(676-687) with 2½% Zn(est).

Hole LW-93: Located on the J Barnard tract at coordinates: 744,953-N; 791,602-E. Collar elevation: 1,582 feet A.T. Drilling started: 10/23/59; completed 11/4/59. Total depth: 800 feet. Summary log: 0-95 overburden; 95-442 Mascot dolomite; 442-800 Kingsport formation (TR @ 638). Mineralization: Shine hole; traces of ZnS @ 626 and 636-637; shines @ 677 and 690-691.

Drilling in progress

Hole LW-94 is being drilled at the northeastern end of the Little War Creek area on the M. C. Tunmire property. It is an angle hole collared at a point 115 feet up dip from Hole LW-54 and has an inclination of -50° and a bearing of N 32°W. The objective of this hole is to cut the strongly mineralized zone encountered in Hole LW-57 in an attempt to gain further information on the structures controlling the location of this ore run. At the time of inspection it was drilling at a depth of 117 feet.

Inspected: November 13, 1959.

(For Government use only)

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. E-1174 in accordance with the terms of the contract.

Signature [signature] Title MINING ENGINEER, U. S. BUREAU OF MINES Date NOV 23 1959

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [signature] Title EXECUTIVE OFFICER, DME FIELD TEAM, REGION V Date NOV 23 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-4850, Idm-E1174 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	2	38
Footage	1,330	25,461

Number of holes showing:

a) Commercial-grade zinc ore	5
b) Non-commercial zinc mineralization	30
c) No zinc mineralization	3

Data on the two holes completed since the last inspection (September 16, 1959) are summarized below:

Hole LW-90: Located on the Dudley Dalton property at coordinates 745,462-N; 793,094-E (approximately 500 feet S. 40° E. of Hole LW-89. Collar elevation: 1676 feet A. T. Drilling started: 9/14/59; completed: 9/29/59. Total depth: 872 feet. Summary log: 0-57 overburden; 57-525 Mascot dolomite; 525-802(?) Kingsport formation (TR @ 684); 802(?)-872 (bottom of hole) Longview dolomite. Mineralization: Shine hole; trace of sphalerite @ 727; 2 feet (763-765) with 4 percent zinc (estimated).

Hole LW-91: Located on the John Barnard trace approximately 800 feet S. 79° W. of Hole LW-89 (coordinates and elevation not yet available). Drilling started: 9/30/59; completed: 10/9/59. Total depth: 458 feet. Summary log: 0-56 overburden; 56-143 Mascot dolomite (very cavernous to 112); 143-435 Kingsport formation (TR @ 323 or 330, probably 330); sedimentary or "dry" breccia 404-436) 435-458 (bottom of hole) Longview dolomite. Mineralization: Trace hole; traces of sphalerite @ 218).

Drilling in progress

With the completion of hole LW-91 the drill will move to a site on the Barnard tract approximately 500 feet S. 40° E. of Hole LW-91. Drilling will probably start within the next day or two.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MINERALS EXPLORATION-REGION V

INTERIM REPORT

DMEA-4850, Idm-E1174 (zinc)

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes.....	1	36
Footage.....	* 496 ?	24,131 ?

Number of holes showing:

a)	Commercial-grade zinc mineralization....	5
b)	Non-commercial zinc mineralization.....	28
c)	No zinc mineralization.....	3

The data on the one hole completed since the last inspection are summarized as follows:

Hole LW-89- Located on the Dudley Dalton tract approximately 850 feet N 82°30' W. of Hole LW-79 (coordinates and elevation not yet available). Drilling started: 9-1-59 (recess ended about mid-August with location of drill hole site and re-laying of water-line to site); drilling completed: 9-10-59. Total depth * 540 feet. ? Summary log: 0-130 overburden; 130-478 (?) Kingsport formation (chert-matrix sand at 130 ?., TR @ 320); 478(?)-496(bottom of hole) Longview dolomite. Mineralization: Shine hole. 320-333 (13') with 2% Zn (est.); 339-354 (15') with ½-1% Zn (est.); 440-455 (15') with 1/4% Zn (est.).

Drilling in progress

Hole LW-90 was drilling at the time of inspection. It is located about 500 feet S 41°E of Hole LW-89. It collared in

* Which is correct ?
Talbert

the Mascot dolomite and had reached a depth of 186 feet.

Inspected: September 16, 1959

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [illegible] Title ACTING EXECUTIVE OFFICER OME REGION V Date JUN 10 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures, which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations.. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

GEOLOGIST, U. S. G. S.

JUN 10 1959

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-4850, Idm-E1174 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	2	35
Footage	1,472	23,635

Number of holes showing:

a)	Commercial-grade zinc ore	5
b)	Non-commercial zinc mineralization . . .	27
c)	No zinc mineralization	3

Brief summaries of the two holes completed since the last inspection are given below:

Hole LW-87: Located on the Lewis Tunmire property approximately 200 feet down-dip from Hole LW-76. Coordinates: N-745,529; E-794,758. Collar elevation: 1,573 feet A. T. Drilling started: 4/24/59; completed: 5/7/59. Total depth: 932 feet. Summary log: 0-40 residual clay overburden; 40-595 (CM ss) Mascot dolomite; 595-763(TR) upper Kingsport dolomite member; 763-897 (T bed) lower Kingsport limestone member; 897-932 (bottom of hole) Longview dolomite. Mineralization: Barren hole.

Hole LW-88: Located on the Lewis Tunmire property approximately 400 feet east (on strike) from Hole LW-80. Coordinates: N-746,184; E-795,555. Collar elevation: 1,732 feet A. T. Drilling started: 5/8/59; completed: 5/15/59. Total depth: 540 feet. Summary log: 0-116 residual clay overburden; 116-181(CM ss) Mascot dolomote; 181-371(TR?) upper Kingsport dolomite member; 371-540 (bottom of hole) lower Kingsport limestone member and Longview dolomite (T-bed not recognized). Mineralization: Barren hole.

With the completion of Hole LW-88 drilling on the Little War Creek project was recessed pending consideration by the Government of the Operator's request for a formal recess or termination.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form ME-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for April 1959

Little War Creek Area DMEA 4850

Contract Idm E 1174 (Zinc)

One drill operated on this project during the month and completed three holes for a total of 1994' of drilling. These holes are shown in green on the accompanying map, AX-TENN-B-103.

Hole LW-84 - Lewis Tunmire property

Coordinates: 745,821.33 N; 794,548.46 E
Elevation: 1577.10

Results:

0- 84	Clay
84-352	Mascot dolomite. Scattered traces of sphalerite 234-240, 262-266
352	Chert Matrix
352-558	Upper Kingsport dolomite
558-724	(Bottom) Lower Kingsport dolomite

Hole LW-85 - Lewis Tunmire property

Coordinates: 745,946.14 N; 794,348.99 E
Elevation: 1594.19'

Results:

0- 90	Clay
90-265	Mascot dolomite
265	Chert Matrix
265-438	Upper Kingsport dolomite
438	TR
438-515	Lower Kingsport dolomite Trace of sphalerite 486, 506
515-523	8' - 4.19% zinc
523-541	Lower Kingsport dolomite. Weak traces of sphalerite 523-533
541-551	10' - 2.34% zinc
551-610	(Bottom) Lower Kingsport dolomite. Traces of sphalerite 551-557

Hole LW-86 - Lewis Tunmire property

Coordinates: 745,834.51 N; 794,348.93 E
Elevation: 1574.58

Results:

0- 51	- -	Clay
51-364	- -	Mascot dolomite. Shine of sphalerite in chert 240
364	- -	Chert Matrix ?
364-500	- -	Upper Kingsport dolomite
500	- -	TR
500-651	- -	Lower Kingsport dolomite. Scattered traces of sphalerite 581-620
651-660	- -	(Bottom) Longview dolomite

Note: Listed below is a tabulation of samples assayed in LW-85:

515-519 - 4' - 1.30% zinc
519-523 - 5' - 7.08% zinc
541-546 - 5' - 3.23% zinc
546-551 - 5' - 1.45% zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	2	33
Footage	1,270	22,163

Number of holes showing:

a) Commercial-grade zinc ore	5
b) Non-commercial zinc mineralization	27
c) No mineralization	1

Brief summaries of the two holes completed in the interim follow:

Hole LW-85: Located on the Lewis Tunmire property at coordinates 745,946-N; 794,349-E. Elevation: 1,594 feet. Drilling started on 4/2/59 and was completed on 4/13/59 at a depth of 610 feet. Summary log: 0-90 Clay; 90-265 Mascot dolomite; 265-610 Kingsport formation (TR @ 438, E-marker and T-bed not recognized). Mineralization: Traces of ZnS @ 486 and 506; 515-523, 8 feet with 4.19 % Zn; traces of ZnS @ 523-533; 541-551, 10 feet with 2.34 % Zn; traces of ZnS @ 551-557. Shine hole---not classed as ore by Operator as no single run contains as much as 50 feet-percent units.

Hole LW-86: Located on Lewis Tunmire property at coordinates 745,835-N; 794,349-E (100 feet down dip from Hole LW-85). Elevation: 1,575 feet. Drilling started on 4/14/59 and was completed on 4/23/59 at a depth of 660 feet. Summary log: 0-51 Clay; 51-364 Mascot dolomite; 364-651 Kingsport formation (TR @ 500); 651-660 Longview dolomite. Mineralization: Shine of ZnS in chert @ 240; scattered traces of ZnS @ 581-620. Shine hole.

Drilling in progress

Drilling in currently in progress on Hole LW-87. This hole is located approximately 200 feet up dip from Hole LW-76. Core was observed to a depth of 763 feet, at which depth the hole was drilling in the lower part of the Kingsport formation. Estimated bottoming depth will be about 900 feet.

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174 (Zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	3	31
Footage	2,095	20,893

Holes showing:

a)	Commercial-grade zinc ore	5
b)	Non-commercial zinc mineralization	25
c)	No zinc mineralization	1

Summaries of the three holes completed since the last inspection are given below:

Hole LW-82: Located on the Brewer property approximately 200 feet east of Hole LW-81. Coordinates: 745,835-N; 794,852-E. Collar elevation: 1593 feet. Drilling started on 3/3/59 and was completed on 3/12/59 at a depth of 731 feet. Summary log: Thickness of overburden not recorded; collared in Mascot dolomite--base of Mascot at 358; 358-731 Kingsport and Longview formations (U-255 bed at 446, TR at 547?, E-bed not recognized, T-bed at 705-712?). Mineralization: Traces of sphalerite at 500, 575; shine at 561; 590-595 (5') estimated at 2 % Zn; rare scattered traces 608-622. Shine hole.

Hole LW-83: Located on Brewer property 100 feet up-dip and 100 feet east of Hole LW-82. Coordinates: 745,934-N; 794-951-E. Collar elevation: 1617 feet. Drilling started on 3/13/59 and completed on 3/21/59 at a depth of 640 feet. Summary log: 0-19 overburden; 19-257 Mascot dolomite; 257-640 Kingsport formation (U-255 bed at 362, TR at 476, E-bed not recognized, T-bed probably not reached). Mineralization: 477-480 (3') estimated at 3 % Zn; scattered traces and shines of sphalerite 485-494, and traces at 502 and 523. Shine hole.

Hole LW-84: Located on Lewis Turnmire property approximately 100 feet west of Hole LW-81. Coordinates: 745,821-N; 794,548-E. Collar elevation: 1577 feet. Drilling started on 3/24/59 and was completed on 4/1/59 at a depth of 724 feet. Summary log: 0-84 overburden; 84-352 Mascot dolomite; 352-724 Kingsport and Longview formations (U-255 bed at 440, TR at 559, E-bed at 603, T-bed not recognized due to brecciation in bottom part of hole). Mineralization: Traces of sphalerite 234-240 and scattered shines 262-266. Shine hole.

Drilling in progress

Drilling is now in progress on Hole LW-85 located at a site 400 feet west of Hole LW-75. The hole was collared in the Mascot dolomite and is now drilling in the upper part of the Kingsport formation (Chert-matrix sandstone was penetrated at depth of 265 feet). Core was observed to a depth of 356 feet but no mineralization was seen.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [signature] Title ACTING EXECUTIVE OFFICER OME - REGION V Date APR 16 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INTERIM REPORT

DMEA-4850, Idm-E1174-zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To date
Number of holes	3	28
Footage	1764	18,798

Holes showing:

a)	Commercial zinc ore----------	5
b)	Non-commercial zinc mineralization--	22
c)	No zinc mineralization----------	1

Additional data on the three holes completed during the interim follows:

Hole No. LW-79.- Located 400 feet southwest of LW-78 on D. Dalton property. Coordinates N746,002.03, E793,614.92; Collar elevation 1635.20. Total depth 500 feet. Drilling began 2-3-59 and was completed 2-10-59. Brief log of hole: 0-131 ft overburden including some cored boulder material, collared in Mascot fm; top of Kingsport (chert matrix) at 179; top of "R" bed at 347; hole bottomed at 500 feet.

Mineralization: Traces of sphalerite at 175; scattered traces and shines from 366 to 395; 4' (384-388) of est. ½ to 1% Zn; shines from 391 to 392 and at 395; weak traces from 402 to 417, from 422 to 432 and from 442 to 458. The core from this hole was 93% dolomite.

Hole No. LW-80. Coordinates N746,147.63, E795,163.91; collar

elevation 1671.17. Total depth 524 feet. Drilling began 2-12-59 and was completed 2-19-59. Brief log of hole: 0-62 feet overburden, collared in Mascot fm; boulder material from 62-131; top of Kingsport (chert matrix) at 200; top of "R" bed at 358; top of "T" bed (?) at 507; hole bottomed at 524 feet.

Mineralization: Scattered traces and shines of sphalerite from 320 to 322; scattered traces from 324 to 331 and from 331 to 332; traces at 356 and 387; shine at 440; abundant pyrite from 432 to 436; scattered traces of sphalerite from 458 to 465, and scattered traces of pyrite at 495.

Hole No. LW-81. Lewis Turnmire property. Coordinates N745,824.61, E794,648.79; collar elevation 1587.22 feet. Total depth 740 ft. Drilling began 2-20-59 and was completed 3-2-59. Brief log of hole: 0-100 feet overburden, collared in Mascot fm; top of Kingsport (chert-matrix) at 362; top of "R" bed at 546; "E" bed from 588 to 595; top of "T" at 715; hole bottomed at 740 feet.

Mineralization: shine of sphalerite at 264; trace at 707.

Current drilling is in progress on hole No. LW-82, located 200 feet east of LW-81. Core was observed to a depth of 575 feet. The estimated total depth is 740 feet. Mineralization encountered consists of shines and traces between 500 and 575 feet.

Inspected: March 10, 1959

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lawrence Title EXECUTIVE OFFICER OME FIELD TEAM REGION V Date MAR 19 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MINING ENGINEER
U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To date
Number of Holes	3	25
Footage	1,753	17,034

Holes showing:

a) Commercial Zinc ore----------	5
b) Non-Commercial zinc mineralization----	19
c) No zinc mineralization----------	1

Additional data on the three holes completed during the interim follows:

Hole No. LW-76, Located 200 feet downdip from LW-75 on Lewis Turnmire property. Coordinates N745, 734.30, E794,742.82, elevation at collar of hole 1582.88 feet. Total depth 805 feet. Drilling began on 12/29/58 and was completed 1/14/59. Brief log of hole: 0-100 feet overburden, collared in Mascot fm; Chert matrix at 466 feet; brown oolite marker bed at 529 ft; "U"-255" bed at 561; top of "R" bed at 657 feet; top of "E" bed at 706 feet; "T" bed from 800 to 805 feet; hole bottomed at 805 feet. Mineralization:

4'	(553-557)	of est.	1% Zn
1'	(560-561)	" "	3% Zn
20'	(570-590)	" "	0.5% Zn
9'	(603-612)	" "	0.5% Zn
4'	(764-768)	" "	0.5 to 1% Zn.

Hole No. LW-77 , located 400 feet on strike from LW-74 on Lewis Turnmire property. Coordinates N746,099.42, E794,350.87;

elevation at collar of hole 1615.94 feet. Total depth 446 feet. Drilling began 1/15/59 and was completed 1/23/59. Brief log of hole: 0-83 overburden; collared in Mascot fm; chert matrix at 124 feet; top of "R" bed at 286 feet; "E" bed from 334 to 336 feet; "T" bed from 430 to 438 feet; hole bottomed at 446 ft; Mineralization: Traces of Zinc at 388; scattered traces of zinc from 400 to 420 feet, of estimated 0.5% Zn.

Hole No. LW-78, located 400 feet southwest from LW-77 on Lewis Turnmire property. Coordinates and collar elevation not available to date. Total depth 502 feet. Drilling began 1/24/59 and was completed 1/31/59. Brief log of hole: 0-92 ft; overburden, collared in Mascot fm; No chert matrix was selected from 3 sandy matrixes found at 126 , 144 and 181 feet; top of "R" bed at 341; "E" bed from 423 to 429; "T" bed at 498; hole bottomed at 502 feet. Mineralization: Shines of zinc at 309; scattered shines and traces of zinc from 355 to 437 feet.

Current drilling is in progress on LW-79, located 400 feet southwest of LW-78 on D. Dalton property. Core was observed to a depth of 400 feet. The estimated total depth of the hole is 510 feet. Mineralization encountered consists of: traces of zinc at 175 ft; scattered traces and shines of zinc from 366 to 395 and 4' (384-388) of est. 1% Zn.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MINING ENGINEER
U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for January 1959

Little War Creek Area DMEA 4850

Contract Idm E 1174 (Zinc)

One drill operated on this project during the month and completed three holes for a total of 1753 feet. The accompanying map, AX-TENN B 103 shows these holes in green.

Hole LW-76 - Lewis Tunmire property

Coordinates: 745,734.30 E; 794,742.82 E
Elevation: 1582.88'

Results:

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174-Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To date
Number of holes	1	22
Footage	603	15,281

Holes showing:

a) Commercial zinc ore.....	5
b) Non-commercial zinc mineralization...	16
c) No zinc mineralization.....	1

Additional data on the one hole completed during the interim follows:

Hole No. LW-75- Located 100 feet south of LW-74. Coordinates N745,933, E794,749; elevation at collar 1600 feet. Total depth 603 feet. Drilling began 12/11/58 and was completed 12/29/58. Brief log of hole: 0-110 ft. overburden, collared in Mascot fm; top of Kingsport fm (chert matrix) at 304 ft; top of "R" bed at 448 ft; "T" bed estimated between 600 and 610 ft; hole bottomed at 603 feet.

Mineralization: Shines sphalerite at 164 ft; trace at 447 ft; shine at 502 ft, traces at 506 and 510 ft; 16 ft. (513-529) of 5.96% Zn; trace of sphalerite from 542 to 543 ft; 2 ft (560-562) of 2.16% Zn.

Current drilling is in progress on LW-76, located 200 ft. downdip from LW-75 on Lewis Turnmire Property. Core was

observed to a depth of 749 feet. The estimated total depth of this hole is 805 feet. Approximately 35 feet of mineralized ground has been encountered between 553 and 612 feet.

The location of LW-77 was made at the time of this inspection.

Mr. V. J. Lynch, Member of the OME Field Team accompanied the Field Examiners on this inspection.

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To Date
Number of holes	3	21
Footage	1230	14,678

Holes showing:

a)	Commercial zinc ore	4
b)	Non-commercial zinc mineralization	16
c)	No zinc mineralization	1

Additional data on the three holes completed during the interim follows:

Hole No. LW-72.--Located 100 feet west of LW-71 on Lewis Turnmire property. Coordinates N 746,237, E 794,653; elevation at collar 1,609 feet. Depth 340 feet. Drilling began November 11, 1958 and was completed November 22, 1958. Brief log of hole: 0-106 overburden, collared in Kingsport formation; top of "R" bed at 155; "E" bed from 198 to 203; "T" bed from 286 to 292; hole bottomed at 340 feet.

Mineralization:-- 12' (271-283) 0.95 % Zn
Scattered traces of sphalerite from 283 to 292
8' (292-300) 1.07 % Zn

Hole No. LW-73.-- Located 100 feet east of LW-71 on W. M. Brewer property. Coordinates N 746,236, E 794, 848; elevation at collar 1,626 feet. Depth 350 feet. Drilling began November 25, 1958 and was completed November 29, 1958. Brief log of hole: 0-110 overburden, collared in Kingsport formation; top of "R" bed at 183; top of "E" bed at 233; "T" bed from 318 to 325; hole bottomed at 350 feet.

Mineralization: Trace of sphalerite at 139.
7' (273-280) est. 0.5 % zinc (2' core recovery)

Hole No. LW-74.--Located 200 feet south of LW-71 on Lewis Turnmire property. Coordinates N 746,033, E 794,746; elevation at collar 1,606 feet. Depth 540 feet. Drilling began on December 1, 1958 and was completed December 9, 1958. Brief log of hole: 0-99 overburden, collared in Mascot formation; top of Kingsport (chert matrix) at 215; "U-255" bed at 260; top of "R" bed at 371, "E" bed from 424 to 426; "T" bed from 519 to 523; hole bottomed at 540 feet.

Mineralization.--

18' (474-492) of 9.55 % Zn	4' (474-478) of 4.60 % Zn
	5' (478-483) of 7.22 % Zn
	4' (483-487) of 11.18 % Zn
	5' (487-492) of 14.52 % Zn
	12' (492-504) Scattered traces of Zn
	Pyrite above, below and in ore zone.

Current drilling is in progress on Hole No. LW-75, located 100 feet south of LW-74. Overburden drilling extended to 110 feet and no core had been recovered at the time of the inspection.

Signature [illegible] Title ACTING EXECUTIVE OFFICER DME - REGION V Date DEC 17 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MINING ENGINEER
U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Hole LW-73 - W. M. Brewer property

Coordinates: 746,236.15 N; 794,848.40 E
Elevation: 1625.81

Results

0-110	Clay
110-183	Upper Kingsport dolomite
183	TR ?
183-273	Lower Kingsport dolomite
273-280	Estimated 1/2% zinc (2' core recovered)
280-318	Lower Kingsport dolomite
318-350	(Bottom) Longview dolomite 100% dolomite in R & S beds.

General Comment:

The ore horizon in each of the three holes reported above was characterized by considerable leached and weathered ground and an unusual thickness of overburden was found in these holes. Some impoverishment of zinc by leaching has taken place, but the extent of this process here cannot be determined. It is possible that before leaching, some of the ground penetrated by these holes may have been of ore grade. This can best be determined by following this zone down dip into the unweathered zone.

Attention: Mr. A. G. Hoagland

Gentlemen:

An adjustment has been made on your November voucher covering Contract Idm-K117h, Docket No. DMEA-4850 as follows:

NX Size Drilling 28 feet changed from $74.20 to $70.00

The November voucher claims NX size drilling at $2.65/ft., overburden drilling and diamond drilling to 1,000-foot depth. However, the contract calls for NX size at $2.50/ft.

Please correct your records as follows:

	Monthly Totals	Totals Previously Reported	Totals to Date
Drilling	$ 2,880.20	$ 36,160.05	$ 39,040.25
Tech. Services Supervision	229.68	2,880.68	3,110.36
Samples, Etc.	5.00	65.00	70.00
Core Boxes	30.60	392.40	423.00
Totals	$ 3,145.48	$ 39,498.13	$ 42,643.61

Your voucher is being processed today for payment in the amount of $1,572.74, which is 50% of the $3,145.48 Monthly Total.

Sincerely yours,

Helen R. Miller
Administrative Assistant

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174-Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To date
Number of holes	2	18
Footage	668	13,448

Holes showing:

a) Commercial zinc ore---------- 3
b) Non-Commercial zinc mineralization--------- 14
c) No zinc mineralization---------- 1

Additional data on the two holes completed during the interim follows:

Hole No. LW-70 - Coordinates N746,333, E794,752; elevation at collar 1616 feet, Lewis Turnmire property. Drilling began 10/27/58 and was completed 10/31/58. Brief log of hole: 0-108 overburden, collared in "R" bed; top of "E" bed at 172 ft; "T" bed from 294 to 297 ft; hole bottomed at 314 ft; Mineralization: 19'(188-207) of 3.1% Zn.

Hole No. LW-71 - Located 100 ft downdip from LW-70 on Lewis Turnmire property. Coordinates N746,233, E794,751; elevation at collar 1613 ft. Drilling began 11/1/58 and was completed 11/8/58. Brief log of hole: 0-120 ft overburden, collared in Kingsport fm; top of "R" bed at 184 ft;"E" bed at 240 ft; hole bottomed a 354 ft. Mineralization: 26' (284-310) of est. 1% zinc.

At the time of this visit the drill was being moved to the site of LW-72, located 100 feet west of LW-71 on Lewis Turnmire property.

Inspected: November 18, 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To Date
Number of holes	1	16
Footage	1079	12,780

Holes showing:

a)	Commercial zinc ore	2
b)	Non-commercial mineralization	13
c)	No zinc mineralization	1

Additional data on the one hole completed during the interim follows:

Hole No. LW-69.--Located 200 feet down dip from LW-61. Coordinates N745,644.88, E798, 948.63, elevation at collar of hole 1605.64. Drilling began September 23, 1958 and was completed October 20, 1958. Brief log of hole: 0-42 feet overburden, collared in Mascot formation; chert matrix at 732; top of "R" bed at 951; hole bottomed at 1079 feet. No mineralization was encountered in this hole and it is the first hole drilled to date that has been completely blank of mineralization.

Current drilling is in progress on LW-70 located on Lewis Turnmire property. The drilling is in overburden at the present depth of 108 feet. The estimated total depth of this hole is 600 feet.

Inspected: October 28, 1958

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To Date
Number of holes	2	15
Footage	1798	11,701

Holes showing:

a)	Commercial zinc ore	2
b)	Non-commercial zinc mineralization	13
c)	No zinc mineralization	0

Additional data on the two holes completed during the interim follows:

Hole No. LW-67.--M. C. Tummire property. Depth 1028 feet. Located 400 feet east of LW-54. Coordinates N745,681.70, E800,238.75; collar elevation 1509.5 feet. Drilling began August 27, 1958 and was completed September 11, 1958. Brief log of hole: 0-10 feet overburden, collared in Mascot formation; top of Kingsport (CM) at 696; top of "R" bed at 850; "E" bed from 873 to 875; "T" bed from 1006 to 1010; hole bottomed at 1028.

Mineralization.--Scattered shines of sphalerite at 807 feet.

Hole No. LW-68.--Located 200 feet on strike from LW-56. Depth 770 feet. Coordinates N746,035.21, E799,772.17; elevation at collar 1584.87 feet. Drilling started September 12, 1958 and was completed September 22, 1958. Brief log of hole: 0-10 feet overburden, collared in Mascot formation; top of Kingsport (CM) at 420; brown oolitic marker at 470; U-255 bed(?) at 521; top of "R" bed at 602; "T" bed from 762 to 766; hole bottomed at 770 feet. Material is 66 % dolomite from top of "R" bed to supposed position of "S" bed.

Mineralization.--Shine of sphalerite at 453; traces of sphalerite at 464, 469 and 493; scattered traces from 508 to 522; shine at 533; traces at 563, 569 and 622. Runs: 7' (501-508) of estimated 1½% zinc.

Current drilling is in progress on Hole No. LW-69, located 200 feet down dip from LW-61. Core was observed to a depth of 850 feet. No mineralization has been encountered to date.

Mr. V. J. Lynch accompanied the Field Examiners on the field inspection.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MINING ENGINEER
U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for August 1958

Little War Creek Area DMEA 4350

Contract Idm E 1174 (Zinc)

Two drills operated on this project during the month and completed five holes for a total of 3656'. The accompanying maps AX-TENN-1309 and 1310 show these holes in green.

Hole LW-61 - James Brewer property
430' S 79° W from hole LW-60

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174-Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of Drilling Completed

	Since last inspection	To date
Number of holes	4	13
Footage	2781	9903

Holes showing:

a) Commercial zinc ore	2
b) Non-commercial zinc mineralization	11
c) No zinc mineralization	0

Additional data on the four holes completed during the interim follows:

Hole No. LW-63- Located approximately 415 feet southwest of LW-59, J. Brewer property. Coordinates N745,887.92, E799,252.38; elevation 1587.00 feet. Drilling began 7/31/58 and was completed 8/15/58. Brief log of hole: 0-51 feet overburden, collared in Mascot fm; top of Kingsport (CM) at 507 feet; top of "R" bed at 737, hole bottomed at 885 ft; Faulting observed at 341, 445(57°) feet; from 551 to 552 ft; and from 580 to 582 (55°). All were high angle faults.

Mineralization: Shines of sphalerite at 261,277, from 301 to 302, and a trace of sphalerite in chert at 364 feet.

Hole No. LW-64- Located 100 feet up-dip from LW-61, J. Brewer property. Coordinates: N746,048.88, E798,655.23; elevation 1619 ft. Drilling began 8/2/58 and was completed 8/14/58. Brief log of hole: 0-40 feet overburden, collared in Mascot fm; top of Kingsport (CM) (?) at 328; top of "R" bed (?) at 534; "T" bed at 674; hole bottomed at 676 ft; faulting observed from 137 to 138, 349 to 350, 365 to 371, 382-385 and from 397 to 417.

Mineralization: Shines of sphalerite at 72 ft; traces of sphalerite at 106, shine at 108, traces at 117, and from 255 to 256 feet.

Hole No. LW-65, Located 200 feet up-dip from LW-64, J. Brewer property. Coordinates and collar elevation not available. Drilling began 8/16/58 and was completed 8/26/58. Brief log of hole: 0-91 ft. overburden, collared in Mascot fm; top of Kingsport fm (CM) at 247; top of "R" bed at 423 ft; hole bottomed at 580 ft. Faulting observed from 330 to 350 and at 540.

Mineralization: Traces of sphalerite at 120, 138, 154 and 157 ft.

Hole No. LW-66. Located 100 ft S66°W from LW-58, M.C. Tunmire property. Coordinates and collar elevation not available. Drilling began 8/18/58 and was completed 8/25/58. Brief log of hole: 0-100 overburden, collared in Mascot fm; top of Kingsport (CM) at 287; top of "R" at 487; hole bottomed at 640 ft. Faulting observed as mylonite from 148 to 154 ft.

Mineralization:

5	ft	(220-225)	Est. 5% Zn.
4	"	(366-370)	3.37% Zn
17	"	(370-387)	Traces of sphalterite
46	"	(387-433)	1.22% Zn
10	"	(433-443)	3.87% Zn
8	"	(443-451)	1.06% Zn
17	"	(451-468)	Est. 2% Zn
9	"	(468-477)	Est. 4% Zn
8	"	(477-485)	Est. 2% Zn

One core drill is now operating on the property. Hole LW-67 is currently being drilled and is located 400 feet east of LW-54 on M. C. Tunmire property. Core from this hole has been examined to a depth of 797 feet; total estimated depth is 1040 feet.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA REGION V Date AUG 14 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Report for July 1958

Little War Creek Area DMEA 4350

Contract Idm E 1174 (Zinc)

Two drills operated on this project during the month and completed two holes. The accompanying map, AX-TENN-B-95 shows these holes in green.

Hole LW-60 - J. Brewer property - 405' S 71°W from LW-57

Coordinates: 745,969.77 N; 799,193.03 E
Elevation: 1609.62

Results:

0- 55	Clay
55-304	Mascot dolomite
304-312	8' estimated @ 2% zinc
312-445	Mascot dolomite. Scattered traces sphalerite 344-375
445	Chert Matrix
445-653	Upper Kingsport dolomite Scattered shines of sphalerite 450-566
653	TR
653-799	Lower Kingsport
799-825	(Bottom) Longview dolomite 100% dolomite in R & S beds

Hole LW-62 - J. Brewer property - 100' N 33°W from LW-60

Coordinates: 745,054.19 N; 799,134.52 E
Elevation: 1618.57

Results:

0- 21	Clay
29-351	Mascot dolomite. Sphalerite estimated at 2% zinc 231-233. Shine sphalerite 264
351	Chert Matrix
351-551	Upper Kingsport dolomite. Scattered traces of sphalerite 393-511
551	TR
551-720	(Bottom) Lower Kingsport dolomite and limestone. 94% dolomite in R & S beds

Note: Two samples from LW-59 were split and assayed. They are as follows:

LW-59

543-544 - 1' core - 7.30% zinc
562-567 - 4½' core - 1.93% zinc

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174 (zinc)

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of drilling completed

	Since last inspection	To date
Number of holes	3	9
Footage	2420	7,122

Holes Showing:

(a)	Commercial zinc ore	1
(b)	Non-Commercial zinc ore	8
(c)	No zinc mineralization	0

Additional data on the three holes completed during the Interim follows:

Hole No. LW-60- Located 415 feet S 71°W of LW-57, J. Brewer Property. Depth 825 feet. Coordinates N745,969.77, E 799,193.03; elevation 1609.62 feet. Drilling began 6/28/58 and was completed 7/21/58. Brief log of hole: 0-55 ft overburden; collared in Mascot fm; top of Kingsport (CM) at 445; top of "R" bed at 653; "T" bed from 799-to 803 ft; hole bottomed at 825 ft. Mineralization: 1 ft (304-305 ft.) est. 6% Zn; 4 ft. (308-312 ft.) est. 2½% Zn; scattered traces of sphalterite from 344 to 376 ft; 5 ft (352-357 ft) est. 1 3/4 % Zn; traces of zinc at 450; scattered shines of Zn from 479 to 491, 526 to 533 and 561 to 566 feet.

Hole LW-61 - Located 800 feet west of LW-59, J. Brewer Property. Depth 875 feet. Coordinates N745,889.58, E 798,781.65; Elevation 1605 feet. Drilling began 7/17/58 and was completed 8/2/58. Brief log of hole: 0-69 feet overburden; collared in Mascot fm; top of Kingsport (CM) at 510 feet; top of "R" bed at 709 feet; "T" bed from 848 to 852 feet. Hole bottomed at 875 feet. Mineralization: Traces of sphalerite from 265 to 297, 356 to 373, 403 to 435, at 531, 550, and 563 feet. Scattered traces of sphalerite from 597 to 610 feet; Traces at 651 and 684 feet. Scattered traces at 715 and from 723 to 742 feet; trace at 792 feet. Pyrite is scattered throughout the above mineralized sections.

Hole LW-62 - Located 100 ft. up-dip from LW-60, J. Brewer Property. Depth 720 feet. Coordinates N 746,054.19 E 799,134.52; elevation 1619 feet. Drilling began 7/21/58 and was completed 7/30/58. Brief log of hole: 0-29 feet overburden, collared in Mascot fm; top of Kingsport (CM) at 351 feet; top of "R" bed at 551 feet; no "T" bed recognized; hole bottomed at 720 feet. Mineralization: 2 feet (231-233 feet) est. 2% Zn; 48 feet (408-456 feet) est. ½% Zn; 14 feet (466-480 feet) est. 1½% Zn; Shine of sphalerite at 264 feet; scattered traces of sphalerite from 393 to 405, 480 to 511 and at 595 feet.

Two core drills are presently in use on the J. Brewer property. Hole LW-63 and LW-64 are being drilled and core was examined to 767 feet and 563 feet respectively. Considerable faulting was noted in both holes.

Inspected: August 12, 1958.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature W. J. Lynch Title ACTING EXECUTIVE OFFICER DMEA - REGION V Date JUL 14 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

DMEA EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Summary of drilling completed:	Since last Insp.	To date
Number of holes	1	6
Footage	710	4,702
Holes showing:		
(a) Commerical Zn ore		1
(b) Non-commercial Zn mineralization		5
(c) No zinc mineralization		0

Additional data on the one hole completed during interim follows:

Hole No. LW-59 - located 100 ft down dip from LW-57, M. C. Tunmire property. Depth 710 ft. Coordinates N746,070, E799,609; elevation 1592 ft. Drilling began 6/16/58 and was completed 6/26/58.

Brief log of hole: 0-48 ft overburden; collared in Mascot fm; openings or cavities from 50 to 54 ft, 61 to 64 ft, 67-69 ft, 81 to 96 ft and 97 to 103 ft; top of Kingsport (CM) at 367 ft; top of "R" bed at 540 ft; "T" bed from 675 to 677 ft; hole bottomed at 710 ft. Mineralization - scattered traces of sphalerite from 440 to 543 ft., and 567 to 577 ft.

Runs: 1 ft (543-544) Est. 15% Zn.
5 ft (562-567) " 2.5% Zn.

Mineralization in LW-58. This hole was erroneously reported in the last interim report as a blank hole. Widely scattered traces of sphalerite extended from 281 ft to 550 ft.

Runs: 3 ft (368-371) 16.48% Zn
5'" (401-406) 1.23% Zn

Drilling is now in progress on LW-60 located on J. Brewer property 415 ft S71°W from LW-57. Core was examined to a depth of 424 feet.

Inspected:
July 14, 1958

EXPLORATION PROJECT

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Company, Jefferson City, Tenn.

Location: Little War Creek Area, Hancock County, Tennessee

SUMMARY OF DRILLING COMPLETED

	Since last inspection	To date
Number of holes	4	5 ✓
Footage	2,986	3,992 ✓

Holes showing:

a) Commercial zinc ore..... 1 ✓ good hole
b) Non-Commercial zinc mineralization ...3
c) No zinc mineralization..... 1

Additional data on the four holes completed during the Interim follows:

Hole # LW-55. Located 200 ft updip from LW-54. M.C. Tunmire Property-

Depth 890 ft; Coordinates N745,907, E799,726; Elevation 1588 ft.

Drilling began April 25, 1958 and was completed May 16, 1958.

Brief log of hole: 0-11 overburden; collared in Mascot fm; top of Kingsport (CM) at 544; top of "R" bed at 722 ft; top of "T" bed at 870 ft; bottomed at 890 ft.

Mineralization: Scattered traces of sphalerite from 662-665 ft, at 787, 791 and 838 ft.

Runs: 11 ft (794-805) 1.86% Zn.

16 ft (818-834) 1.75% Zn.

Hole #LW-56. Located 100 ft updip from LW-55 on M.C. Tunmire Prop.

Depth 810 ft. Coordinates N745,987, E799,670; elevation 1587 ft.

Drilling began May 17, 1958 and was completed May 30, 1958.

Brief log of hole: 0-3 overburden, collared in Mascot; top of Kingsport(chert matrix) at 452 ft; top of "R" at 636 ft; "T" bed at 793 ft; bottomed at 810 ft.

Mineralization: Scattered traces of sphalerite from 515 to 518, 535 to 547, 700 to 708, and 724 to 750.

Hole # LW-57. Located 200 ft updip from LW-56 on M.C.Tunmire Prop. Depth 676 ft. Coordinates N746,149; E799,553; Elevation 1600 ft.

Drilling began May 31, 1958 and was completed June 6, 1958. Brief log of hole: 0-76 overburden, collared in Mascot fm; top of Kingsport (chert matrix) at 276; top of "R" at 510, bottomed at 676 near "T" bed.

Mineralization: Scattered traces of sphalerite from 303 to 369.

Runs: 5 ft (369-374) 3.38% Zn.

10 ft (374-384) Min.
5 ft (384-389) 3.25% Zn.
5 ft (389-394) 4.65% Zn.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA FIELD TEAM REGION V Date JUN 23 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

Report for May, 1958

Little War Creek Area DMEA 4350

Contract Idm E 1174 (Zinc)

One drill operated on this project during the month and completed two holes. These holes are shown on the accompanying map, AX-TENN-B-95.

Hole LW-55 - M. C. Tunmire property. 200 feet updip from LW-54

Coordinates: 745,907.05 N; 799,726.45 E
Elevation: 1588.18

INTERIM REPORT

DMEA-4850, Idm-E1174 - Zinc

Operator: The New Jersey Zinc Co., Jefferson City, Tennessee

Location: Little War Creek Area, Hancock County, Tennessee

Drilling is now in progress on this contract. One hole has been completed and one hole is in progress. Drilling data to date is as follows:

Drilling Completed:

Number of holes completed since drilling began.....	1
Footage in holes completed " " "	1,006
Total number of holes completed.....	1
Total footage completed to date.....	1,006
Number of holes showing commercial zinc ore.....	0
Number of holes showing non-commercial zinc mineralization.....	1
Number of barren holes.....	0

Additional data on the one hole completed follows:

Hole No.	Property	Total Depth	Remarks
LW-54	M.C. Tunmire	1006	Drilling began on 4/8/58 and was completed 4/24/58. No coordinates available at time of inspection. Brief log of hole: 0-22 overburden, collared in Mascot; chert matrix @ 713, top of "R" @ 845; "T" bed from 963 to 967; bottomed @ 1006 Mineralization: Traces of sphalerite @ 753,801, 809-scattered shines of sphalerite @ 825 and traces @ 835 and 850.

Drilling In Progress

Available data on the one hole in progress is as follows:

Hole No.	Property	Present depth	Anticipated depth	Remarks
LW-55	M.C. Tunmire	587	850	Location: 200' updip from LW-54; coordinates not available at time of inspection. Drilling began 4/25/58. Brief log of hole; 0-11 overburden; Collared in Mascot; Chert matrix @ 544 and presently drilling in Kingsport fm.

Inspected: May 5, 1958

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA FIELD TEAM REGION V Date MAY 20 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MINING ENGINEER
U. S. BUREAU OF MINES

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.
