BUREAU OF MINES
Denver, Colorado

APPLICATION FOR AID IN AN EXPLORATION PROJECT, PURSUANT TO DMEA ORDER 1, UNDER THE DEFENSE PRODUCTION ACT OF 1950, AS AMENDED

Not to be filled in by applicant

Docket No. 3931
Metal or Mineral Uranium
Date Received 8-1-55
Estimated Cost $28,000
Participation (Government %)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Lucky San Uranium Corporation
919 Grand, Kansas City, Missouri
Field Office
Box 73, Monticello, Utah

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized. See attached Page 1

(*c*) If a corporation, add to above statement, titles, names and addresses of officers. See PP1

(*d*) If a partnership, add to the above statement the names and addresses of all partners. None

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract All property is in San Juan County, Utah and all recordings are in the Recorders office in the San Juan County Courthouse at Monticello, Utah.

(*b*) State any mine name by which the property is known.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Claims are owned with no royalties.

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property. Owners

(*e*) If you own the land, describe any liens or encumbrances on it No Liens or Encumbrances
Assessments are all up to date.

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. Given in attached Page 2 - Paragraph 3 - Item (b).

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. No production

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore Uranium and Vanadium

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within 5 days and be completed within 6 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

☒ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

(f) Full description, Book and Page number given in (e)

LUCKY SAN URANIUM CORPORATION

4.

(a) Extensive surface and exploration progress has been conducted on Cottonwood, Ada, and Spencer claims. Drill roads have been built and the location is accessible by Blanding-Bluff Highway #45. A camp has been set up and about 400 tons of rock removed from an extensive drift exploration. The site can be reached by going south from Blanding, Utah approximately 16 miles to the Hoven Weep road and going east 4 miles until you cross Recapture Creek. Turn south down the creek and in about 1/25 of a mile is the Cottonwood camp site. Attached is a portion of the Utah map which will show this location.

(b) No known production

(c) The attached geological report will indicate the reason for wanting to develop the Cottonwood and Payton groups. There is no geological report on the Clay Hills or Bears Ears, but these are in the Schinnrump location in the vicinity of rich operating mines in the White Canyon area.

(d) Access roads are good or can be put into use on short notice. Shipping distance would be to Monticello or to the White Canyon Buying Station. Our supply points would be considered at Blanding, Bluff or Monticello, Utah. The company now owns trailers that can be used for residence.

(e) Man power and other necessary materials adequate for this project.

LUCKY SAN URANIUM CORPORATION

(b) Exploration would be started on the Cottonwood Claims a drill road has been built and as indicated in the attached photo a beginning program would be to locate the drill rig 300 feet in back on the rim. It is expected that drilling depths would be approximately 200 feet. The bulldozer blade cut into a high count area at the base of the rim when the road was being built. It is planned that this rim drilling would go down the count area. This property extends down the Recapture Canyon about a mile and a half.

(d) The exploration program will be handled by Mr. G. W. Hast, Mr. Joe Greer, and Mr. Clete Spencer, who have beenworking on the Colorado Plateau for the last two years in the uranium property business. Mr. Spencer is a hard rock miner from Carthage, Missouri and he has had 30 years experience as ground boss and supervisor in lead and zinc mining operations. The drift work and exploration date has been completed by Mr. Spencer. Mr. G. W. Hast who is in the mining and building machinery business has spent many years handling machinery for rock quarries and other types of mining. It is believed that his advise and counsel on the matters of drilling and development will be an asset. Mr. Art Vandendael who has been in the earth moving and contract business and who has been associated with Lucky San during the past year has considerable experience working on the Colorado Plateau and we believe can do a credible job handling drilling equipment and exploration machinery to help in the location of uranium on Lucky San properties. Mr. Vandendael is one of the stock holders in the company and is vitally interested in its development.

LUCKY SAN URANIUM CORPORATION

5. cont'd

(d) We have had services of Mr. George Gilmore, registered engineer and geologist, who has been very helpful. Mr. Gilmore's experience and know how should be a great asset to this project.

6.

(a) Core Drilling per foot $2.50

4,000 feet	10,000
Bulldozer work 100 hours	1,000
400 feet of drift @ $30.00 foot	12,000
	23,000
(b) 2 laborers $19 day 60 days	2,280
Supervision	1,020
Engineering	880
Geological Consultants	750
(c) Set of hand tools	40
Maps	35
Set of Hand Tools Carpenter	40
Power	40
(d) Water and fuel tanks	48

Schramm Drilling Equipment will be used under the $2.50 rate

Pick up trucks all ready owned by the company

125 cu. ft. Air Compressor is now leased by the corporation

(e) There is no known rehabilitation or repair needs for any of the trucks or equipment now being used by the company. The counters and other equipment, the house trailers for the camp are in good operating condition.

(f) It is anticipated that a tool and storage house will be installed and cost is estimated at $400

LUCKY SAN URANIUM CORPORATION

6. cont'd

(g) Bookkeeping work for this project	$50
Insurance and payroll taxes	350
(h) $400 contingencies are set aside for exploration and is included in the estimate of $400	
Total estimated Cost of Project	$20,000.00

7.

(a) Yes, we are prepared to furnish our share of the cost on the proposed drilling project for Lucky San properties.

(b) It is expected that we will furnish our share of the estimated cost of money and in return furnish the use of our equipment and facilities in order to add to the value of the corporation project. We are of the opinion that the drilling program will disclose a considerable ore body because we are in a high producing area of San Juan County, Utah. We also believe that with many of our people who have spent considerable time on the properties and who have gained know how through work in the San Juan County area the project can be developed along a rapid and economical line.

Re: Docket No. DMEA-3931 (Uranium)
Cottonwood Claims
San Juan County, Utah

Dear Mr. Mast:

Reference is made to our letter dated February 3, 1956, in which we stated that the subject docket would be considered closed unless certain information required to process the captioned application had reached this office within thirty days from the date of that letter. No answer to our communication having been received, we therefore inform you that the subject docket is considered closed effective as of March 3, 1956.

This is without prejudice to the merits of your proposed project. We regret the necessity of this action and express appreciation for your interest in the exploration program during the period your application has been under consideration.

Sincerely yours,

C. O. Mitchell (for)

DEC - 5 1955

Re: Docket No. DMEA-3931 (Uranium)
Cottonwood Claims
San Juan County, Utah

Dear Mr. Maat:

Your letter of November 22, 1955, in which you request that the above-docketed application be held in abeyance until early spring of next year, has been referred to this Office for reply.

The subject application, dated July 23, 1955, lacks considerable essential information. This was called to your attention by Mr. W. M. Traver, Executive Officer, DMEA Field Team, Region III, in his letter of July 27, 1955.

We note that at the present time you are unable to submit the additional information requested in Mr. Traver's letter.

We prefer not to hold inactive applications open for an indefinite period of time. Therefore, it is suggested that you withdraw the subject application, and submit a new one next spring, when the requested additional information becomes available. Will you kindly advise this Office, as soon as possible in regard to this matter.

In the event you submit a new application, please endeavor to answer all the questions Mr. Traver outlined in his letter. In addition, you should submit copies of a map or sketch showing the location and name of all the claims included in the application.

Sincerely yours,

Ernest Wm. Ellis

Gentlemen:

Thank you for your letter of November 4, 1955, having to do with the subject docket. We would greatly appreciate your leaving this docket open as this company has acquired additional claims.

The necessary time to perform the assessment work has caused some delay in our continued operation, however, in the early spring we anticipate to further our operation. We would appreciate very much that you advise that this docket will remain open and that we still may continue with our negotiations.

Thank you very much.

Gentlemen:

We have had no reply to our letter of July 27, 1955 requesting additional information on your application for DMEA assistance for exploration of the Cottonwood claims.

Three months have elapsed since we wrote you, and it is entirely possible that during this time your further prospecting has revealed much additional information. If this has happened, will you please submit the additional information you have obtained so that we may continue to process your application.

In the event that you are no longer interested in DMEA assistance, will you please so inform us so that we may close the docket.

Very truly yours,

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 3931 (Uranium), Lucky San Uranium Corporation, Cottonwood Claims, San Juan County, Utah

In accordance with your letter of October 31, 1955 and your Memorandum No. 12 dated December 3, 1952 attached are two copies of our letter to the subject applicant.

If we receive no reply from the applicant by December 5, 1955, we will follow up and forward you copies of our letter to the applicant.

In the event that we receive no reply to the follow-up letter giving the applicant thirty days notice, we will recommend to you that the docket be closed.

Re: Docket DMEA 3931 (Uranium), Lucky Sam Uranium Corporation, Cottonwood claims, San Juan County, Utah

Gentlemen:

We have had no reply to our letter of July 27, 1955 requesting additional information on your application for DMEA assistance for exploration of the Cottonwood claims.

Three months have elapsed since we wrote you, and it is entirely possible that during this time your further prospecting has revealed much additional information. If this has happened, will you please submit the additional information you have obtained so that we may continue to process your application.

In the event that you are no longer interested in DMEA assistance, will you please so inform us so that we may close the docket.

Very truly yours,

W. M. Traver

Re: Docket No. DMEA-3931 (Uranium)
Lucky San Uranium Corporation
Cottonwood Claims
San Juan County, Utah

Dear Mr. Traver:

Reference is made to your memorandum dated August 24, 1955, enclosing four copies of a joint memorandum of review from the Grand Junction office on the subject docket. It was recommended that an examination of the property covered by this application be held in abeyance pending receipt of additional information requested from the Applicant by the Field Team. It is noted that the Field Team wrote the Applicant on July 27, 1955.

Inasmuch as this application has been pending for quite a period of time, and if the Applicant has not responded to your request, we should appreciate receiving your recommendations with respect to closing this docket in accordance with Memorandum No. 11, dated December 3, 1952, to all Field Teams.

Sincerely yours,

George C. Selfridge

Re: Docket No. DMEA-3931 (Uranium)
Cottonwood, et al., Groups of claims
San Juan County, Utah

Dear Mr. Payton:

A copy of your letter, dated August 1, 1955, addressed to the Hon. Edward Mansure, Administrator, General Services Administration, has been forwarded to this Agency for reply.

It is noted that you desire to know the status of the captioned application filed with the Defense Minerals Exploration Administration at the Region III field office, Denver, Colorado. A copy of your application is also on file here in the Washington office.

The information supplied with your application is too meager for determining the merits of your proposed project. Accordingly, the Executive Officer of the DMEA Field Team, Region III, wrote you on July 27, listing certain information that is required to process your application. Upon receipt of this additional data your application will be given further prompt attention.

Sincerely yours,

Subject Application DMEA loan

Dear Mr. Mansure:

Lucky San Uranium Corporation a firm in which I am interested has made application for a loan.

The company owns the property with no royalties and our people are willing to pay their share of the exploration program in cash. Any information you can give us on the status of this application would be deeply appreciated.

I hope this finds you in the best of health and that I have an opportunity to visit with you in the near future.

Yours truly

WASHINGTON 25, D. C.

RECEIVED
AUG - 9 1955

August 8, 1955

Memorandum

To: Ernest William Ellis, DMEA Member
Uranium Commodity Committee, Room 4445

From: John E. Crawford, Bureau of Mines Member
Uranium Commodity Committee

Subject: Application for assistance, DMEA Docket 3931, Lucky San Uranium Corporation, Cottonwood claims, San Juan County, Utah

I have reviewed the attached application for assistance, Lucky San Uranium Corporation, DMEA Docket 3931; and I have discussed with Joseph O. Hosted, Washington representative of the Atomic Energy Commission.

The application cannot be properly evaluated because of the lack of information about (1) the geology of the area, (2) mineralization on the subject claims, and (3) the proposed exploration drilling program. Therefore, based on the data supplied in the attached application, I recommend denial.

I note, however, that under the new procedure for processing DMEA applications, described in the DMEA Field Team's memorandum of July 11, 1955, to Messrs. Wilson, Osterstock, Hasler, and Shaw, the Lucky San Uranium Corp. has been requested by the Field Team to submit additional supporting data. Should this information be supplied to the Bureau Commodity Committee member, a re-evaluation of the application in its entirety could be made

Mr. Hosted agrees that the application does not qualify as an exploration project without the benefit of more substantiating geologic and mineralogic facts.

Gentlemen:

Your application for DMEA assistance on the Cottonwood claims, San Juan County, Utah has been forwarded to the Washington office, DMEA for further processing.

No specific geologic data was presented to justify the drilling, the pattern or the depth and number of holes.

To assist us in determining the merits of your proposal we suggest that the following additional information, if available, be submitted to this office:

1. A topographic map or sketch showing the elevations of the surface where the proposed drilling is to be done; also showing the following:

(a) Contact lines of the exposed rock formations and structural features, such as folds, faults, etc.

(b) Indicated or inferred favorable sedimentary and/or channel trends

(c) Location of any samples taken and assay reports

(d) Tentative locations of the proposed drill holes.

2. A supporting narrative report containing the following:

(a) Specific geologic data concerning the subject property, such as:

(1) Exposures of rock formations and indicated bedding dip

(2) Comments on host rock and its favorability to mineralization, such as thickness of strata, color of sandstone and mudstone, evidence of mineralized trash, logs, etc.

(3) Any other geologic information that will assist in determining the merits of the proposed exploration project.

Will you kindly advise us if it is feasible to submit this additional information. If so, give the approximate date when we may expect to receive it. If such information is submitted, we will require four complete sets of data.

Very truly yours,

W. M. Traver

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Lucky San Uranium Corporation
919 Grand, Kansas City, Missouri
Field Office
Box 73, Monticello, Utah

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized. See attached Page 1

(*c*) If a corporation, add to above statement, titles, names and addresses of officers. See PP1

(*d*) If a partnership, add to the above statement the names and addresses of all partners. None

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract All property is in San Juan County, Utah and all recordings are in the Recorders office in the San Juan County Courthouse at Monticello, Utah.

(*b*) State any mine name by which the property is known.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Claims are owned with no royalties.

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property. Owners

(*e*) If you own the land, describe any liens or encumbrances on it No Liens or Encumbrances
Assessments are all up to date.

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. Given in attached Page 2 - Paragraph 3 - Item (a).

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. No production

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore Uranium and Vanadium

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within 5 days and be completed within 6 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

[X] Money [ ] Use of equipment owned by you [ ] Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

(a) Extensive surface and exploration progress has been conducted on Cottonwood, Ada, and Spencer claims. Drill roads have been built and the location is accessible by Blanding-Bluff Highway #45. A camp has been set up and about 400 tons of rock removed from an extensive drift exploration. The site can be reached by going south from Blanding, Utah approximately 16 miles to the Hovon Weep road and going east 4 miles until you cross Recapture Creek. Turn south down the creek and in about 1/25 of a mile is the Cottonwood camp site. Attached is a portion of the Utah map which will show this location.

(b) No known production

(c) The attached geological report will indicate the reason for wanting to develop the Cottonwood and Payton groups. There is no geological report on the Clay Hills or Bears Ears, but these are in the Schinarump location in the vicinity of rich operating mines in the White Canyon area.

(d) Access roads are good or can be put into use on short notice. Shipping distance would be to Monticello or to the White Canyon Buying Station. Our supply points would be considered at Blanding, Bluff or Monticello, Utah. The company now owns trailers that can be used for residence.

(e) Man power and other necessary materials adequate for this project.

LUCKY SAN URANIUM CORPORATION

5. Sheet No. 5 of 7 Sheets

(b) Exploration would be started on the Cottonwood Claims a drill road has been built and as indicated in the attached photo a beginning program would be to locate the drill rig 300 feet in back on the rim. It is expected that drilling depths would be approximately 200 feet. The bulldozer blade cut into a high count area at the base of the rim when the road was being built. It is planned that this rim drilling would go down the count area. This property extends down the Recapture Canyon about a mile and a half.

(d) The exploration program will be handled by Mr. G. W. Hast, Mr. Joe Greer, and Mr. Clete Spencer, who have beenworking on the Colorado Plateau for the last two years in the uranium property business. Mr. Spencer is a hard rock miner from Carthage, Missouri and he has had 30 years experience as underground boss and supervisor in lead and zinc mining operations. The drift work and exploration date has been completed by Mr. Spencer. Mr. G. W. Hast who is in the mining and building machinery business has spent many years handling machinery for rock quarries and other types of mining. It is believed that his advise and counsel on the matters of drilling and development will be an asset. Mr. Art Vandendael who has been in the earth moving and contract business and who has been associated with Lucky San during the past year has considerable experience working on the Colorado Plateau and we believe can do a credible job handling drilling equipment and exploration machinery to help in the location of uranium on Lucky San properties. Mr. Vandendael is one of the stock holders in the company and is vitally interested in its development.

LUCKY SAN URANIUM CORPORATION

5. cont'd

(d) We have had services of Mr. George Gilmore, registered engineer and geologist, who has been very helpful. Mr. Gilmore's experience and know how should be a great asset to this project. ?

6.

(a) Core Drilling per foot $2.50

4,000 feet	10,000
Bulldozer work 100 hours	1,000
400 feet of drift @ $30.00 foot	12,000
	23,000
(b) 2 laborers $19 day 60 days	2,280
Supervision	1,020
Engineering	850
Geological Consultants	750
(c) Set of hand tools	40
Maps	35
Set of Hand Tools Carpenter	40
Power	40
(d) Water and fuel tanks	45

? [illegible]

Schramm Drilling Equipment will be used under the $2.50 rate

Pick up trucks all ready owned by the company

125 cu. ft. Air Compressor is now leased by the corporation

(e) There is no known rehabilitation or repair needs for any of the trucks or equipment now being used by the company. The counters and other equipment, the house trailers for the camp are in good operating condition.

(f) It is anticipated that a tool and storage house will be installed and cost is estimated at $400

LUCKY SAN URANIUM CORPORATION

6. cont'd

(g)	Bookkeeping work for this project	$50
	Insurance and payroll taxes	350
(h)	$400 contingencies are set aside for exploration and is included in the estimate of $400	
	Total estimated Cost of Project	$28,000.00

7.

(a) Yes, we are prepared to furnish our share of the cost on the proposed drilling project for Lucky San properties.

(b) It is expected that we will furnish our share of the estimated Cost of money and in return furnish the use of our equipment and facilities in order to add to the value of the corporation project. We are of the opinion that the drilling program will disclose a considerable ore body because we are in a high producing area of San Juan County, Utah. We also believe that with many of our people who have spent considerable time on the properties and who have gained know how through work in the San Juan County area the project can be developed along a rapid and economical line.
