Re: OME-6404 (Silver-Gold)
L. L. Anderson and Vern Meacham
Linzy Pines Group of Claims
Box Elder County, Utah

Dear Mr. Anderson:

On May 26, 1965, we informed you that we would hold your December 21, 1964, application for financial assistance in minerals exploration in abeyance until July 15 as requested in your letter of May 24.

As we have not heard from you, we now consider that the application has been withdrawn and are placing it in our closed files.

Should you be able to arrange for additional financing, we would be pleased to consider a new application which should mention the present one. Pertinent information need not be repeated. However, new bank letters would be needed.

Sincerely yours,

(signed) FRANK E. JOHNSON

Office Of Mineral Exploration
Washington 25, D.C.

Dear Sir:

I am very sorry for the delay in answering your letter of April 5, 1965. We have been desperatly looking for a core driller that will take on such a small job within a reasonable price range. So far the oly commitment we have can do this work for us after July 15th.

It is absolutly necessary to do the amount of road work applyed for in our application. We also feel the dozer work is very necessary. We are now in the process of arranging for private money to allow us to apply for a larger loan. One large enough to do considerable core drilling. If we can get the additional capitol to go along with government money, no doubt we will have to revise our applicaton. We are wondering if our applicaton can be held as it is until the 15th of July. At which time we will be able to go throught with the loan as it is or inlarge it for more core drilling.

Should you have an engineer or geologest in this area at any time this spring, we would appreciate it if he would look at our deposit and advise us on a program.

Very truly yours,

L.L.Anderson

Re: OME-6404 (Silver-Gold)
L. L. Anderson and Vern Meacham
Linzy Pines Group of Claims
Box Elder County, Utah

Dear Mr. Anderson:

This is in response to your letter of March 25, 1965, requesting our advice in regard to a change in the work proposed in the subject application.

In reviewing the application, we consider diamond drilling a feasible method to further explore the Linzy Pines claims. However, the proposed additional bulldozer trenching appears unnecessary because this work would have small value in determining the possible mineral potentiality of the veins since the trenches would expose only a few feet of the oxidized upper part of the veins and the gold and silver values at depth would remain unknown.

According to the information submitted, most of the vein structures have been exposed and sampled and their approximate strikes and dips are known. In view of the above, it appears that diamond drilling should be the principal exploratory method to use with possibly some additional bulldozer work which might be necessary to further check the strikes and dips of the veins.

Since you find it difficult to obtain reasonable bids for the small diamond drilling footage proposed in the application, it is suggested that in lieu of requesting an increase in the bulldozer work the subject application be amended to cover a larger drilling program. If neither you nor Mr. Meacham has had experience in planning

such a program, it is suggested that you have a qualified geologist or mining engineer do this work. The proposed drilling program should include the total estimated footage, the core bit size, the length of the individual holes and their bearings and inclinations. Also, a plan map or sketch should be submitted showing the locations of the holes in reference to the claim lines and veins. The dips of the veins should also be indicated.

In the event you decide to change the proposed work in the subject application, you need only submit the revised information under Item 5. Exploration work and Item 7. Estimate of Costs. In addition, please submit bids from three contractors if possible for the drilling and bulldozer work.

Submittal of the above-mentioned additional information should not be construed as committing the Government to an exploration contract.

Sincerely yours,

George C. Selfridge

[illegible]

Dear Mr. Se[illegible]

Re[illegible] regarding
our OME-[illegible]

We are exper[illegible] great deal of difficulty in getting a bid for [illegible]. In fact we cannot get any one to bid the work [illegible] of it is a very small job. The only one that has [illegible] one will do the work for us, told us the cost [illegible] be a[illegible] out of reason price wise.

We are wondering if we may under this applicaton, with draw the drilling and transfer the money ask for, for the drilling to additional [illegible]. If this is possible, please send our a[illegible] we will [illegible] it.

Very truly yours,

L.L.Anderson
