GENERAL INSTRUCTIONS

Before filling out this application, please read the *OME Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves* (30 CFR Chap. III). To assure prompt action, your application must provide all applicable material and information specified on the back of this application form. Avoid unnecessary correspondence and delays by submitting complete and accurate information. *Please submit two copies of this application and all accompanying papers* except as otherwise noted. Place your name and address on each sheet. Each item of information, maps, and reports required as a part of this application is described on the back of this form. Identify each attached statement by the item number to which it applies. If an item does not apply to your application, show the item number on your statement and after it write "not applicable." Maps or sketches should be used to supplement narrative descriptions of the property location and boundaries in item 2, existing mine workings and geology in item 3, and the proposed exploration work in item 5. When this information is not too complex, all of it may be shown on one map or sketch. All documents and other attachments submitted as a part of this application, except those in item 3(g) which you mark to be returned, become the property of the Government and will not be returned to the applicant. Send true copies, *not originals*, of leases, contracts, and other documents which are an essential part of your business records. *File this application with the Office of Minerals Exploration, Department of the Interior, Washington 25, D. C., or with the nearest OME Field Office.*

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief, and that he would not ordinarily undertake the proposed exploration under current conditions and circumstances at his sole expense.

TITLE

A wilfully false statement or certification to any Department or Agency of the United States Government is a criminal offense. U. S. Code, Title 18, Sec. 1001.

INFORMATION REQUIRED WITH THIS APPLICATION

1. Financial Eligibility:

(a) Submit evidence of efforts made within 90 days preceding the filing of this application to obtain credit from your bank of account and at least one other banking institution or other private source of credit. Such evidence shall include true copies of correspondence which show: (1) date of loan request, (2) amount and terms requested, (3) proposed use of loan funds, and (4) the replies from credit sources. If the loan was offered under terms which you consider unreasonable, state why you consider them so.

(b) List names and addresses of affiliated, parent, or controlling companies or organizations and state extent and nature of their interest.

(c) State how you propose to furnish your share of the cost of the exploration work.

2. Applicant's Rights in Land:

(a) State your interest in the land and mineral rights, whether owner, lessee, purchaser under contract, or other. If you are not the owner, submit one true copy of the lease, contract, or other document (with address of owner) under which you control the property. Describe all liens, mortgages, or other encumbrances on the land and state book and page number and official place where recorded.

(b) State the legal description (section, township, and range; metes and bounds; patent number of claims) of the land upon which you wish to explore and all adjacent land which you own or control. Describe any part of the land or workings which should not be subject to Government royalty and liens. If the land consists of unpatented claims, state book and page number for each recorded location notice, including amended locations, and official place where recorded. State all the names by which you know the property.

(c) For all land or mineral rights encumbered or not owned, submit five copies of Lien and Subordination Agreements on MME Form 52. If the agreements cannot be obtained, state reasons and provide copies of letters of refusal.

3. Physical Description:

(a) Describe in detail and illustrate with maps or sketches all mining or exploration operations which you know have been or are being conducted upon the land. Include existing mine workings and all production facilities.

(b) State your interest, if any, in operations described in (a).

(c) State, if you know, the past and current production, supporting your statement with copies of settlement sheets, mine records, or published data if available.

(d) Describe known ore reserves, giving quantities and grades and sampling methods used. Support your statement with copies of assay certificates and assay maps if available.

(e) Describe by narrative and maps or sketches the geologic features of the property, including ore minerals, geologic formations if known, and type of deposit (vein, bedded, etc.).

(f) State your reasons for expecting to find ore, and if you have sampled the area you propose to explore, show where the samples were taken, describe sampling methods used, and provide copies of assay certificates.

(g) Send with your application at least *two* copies of all geologic or engineering reports, assay maps, or technologic information which you have, indicating whether you require their return.

4. Accessibility of Property:

(a) To aid the OME representative who may examine the property, state name and address of person who will meet him; give directions for reaching the property; and describe accessibility of property and of any mine workings.

(b) Name the shipping and supply points and state the distances to the property.

5. Exploration Work:

(a) Describe fully the proposed exploration work giving individual footages and sizes of openings *for each item of work.* Use narrative, maps, plans, and sections as necessary. Show location of the proposed work as related to geologic features such as veins, ore-bearing beds, contacts of rock formations, etc. Show also the relation of the proposed work to any existing mine workings and to *land boundaries* or to the closest identifiable corner.

(b) If an access road must be built, show the proposed location on the property map and state the length, type and construction methods proposed.

(c) If an OME contract is executed, state how soon thereafter work would be started and finished. State your anticipated average daily or monthly rate of progress for each type of work.

6. Experience:

State your operating experience and background to conduct this exploration work and also that of the person who will supervise the work.

7. Estimate of Costs:

Furnish detailed estimates of the necessary costs *for each item of the work proposed in 5(a)* under the headings listed below with a total for each heading and the estimated total cost of the work. Costs for any work to be performed by an independent contractor should be listed separately under category (a) below. Costs for any work that is not to be performed by an independent contractor should be listed under categories (b) through (g).

(a) Independent contracts. State the total cost of any proposed independent contract for all or any part of the work, and the number of units and the unit cost for each type of work, such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, or per cubic yard of material moved. Cost estimates should be supported by bids from three contractors if possible. (*Note*—If none of the work is to be contracted, write "none" after this item.)

(b) Personal services. The cost of supervision, engineering and geological services, outside consultants, and labor should be itemized by numbers and classes of employees; rates of wages, salaries or fees; and periods of employment. State whether these services are available.

(c) Operating materials and supplies. List items of material and supplies giving quantity and cost of each. Include under this heading power, water, and fuel, and units of equipment and tools costing less than $50 each.

(d) Operating equipment. List items of equipment and tools costing $50 or more per unit. Give specifications and indicate how each item is to be acquired—i.e., rented, purchased or provided by the applicant. If rented or purchased, state the estimated rental or purchase price. If furnished by the applicant, state condition and present fair market value.

(e) Initial rehabilitation and repairs. Describe the type and the cost of *initial* rehabilitation or repair of existing buildings, fixtures, installations (exclusive of mine workings), and movable operating equipment now owned by the applicant which will be used in the exploration work.

(f) New buildings, fixtures, installations. Describe each building, fixed improvement, and installation to be purchased, constructed, or installed for the exploration work, stating specifications and cost including labor, materials, and supervision.

(g) Miscellaneous. Describe the type and estimate the cost of repairs and maintenance of the operating equipment listed in 7(d). Do not repeat initial repairs listed in 7(e). Show also the costs of analytical work, accounting, workmen's compensation and employees' liability insurance, payroll taxes, and other required costs that do not fall within the previous categories. [*Note*—The Government will not contribute to costs incurred before the date of the contract, or to costs of or incident to: (1) acquiring, using, or possessing land and any existing improvements, facilities, buildings, installations, and appurtenances, or the depreciation and depletion thereof; (2) general overhead, corporate management, interest and taxes (other than payroll and sales taxes); (3) insurance (other than employees' liability insurance); and (4) damages to persons or property (other than authorized repair to or replacement of equipment or other property used in the work).]

RES. 9-7124 BUS. NA 9-70

Victor P. Hendricks
DENTAL TECHNICIAN

958 W. FIFTH POMONA, CALIFORNIA

August 30, 1965

Minerals Exploration
Federal Center
Denver 25, Colorado.

Dear Sirs:

I would like to obtain a Government Loan for exploration of Sampson, Hardscrabble, Missing Link and Missing Link No.2. These are in the Antelope Group in Sevier County, Utah. Seven miles North of Marysvale, Utah, Section 21, T 26S R 4W Salt Lake M.

The exploration would be between $5,000.00 to $9,000.00 depending on your expert advise on the extent for exploration needed to obtain commercial ore.

I started out twelve years ago as a week-end prospector and I finally ended up twelve years later in Marysvale, Utah. This is by far the best prospect I have ever run across. I believe it worthwhile. I have put in over $1,000.00 to expose the formations and open it for examinations by competent mining men, such as; Rex Smith former superintendent of Vanadium Corporation Uranium mine, Marysvale, Utah.

Also, Richard Kennedy, Geologist, Salt Lake City, Utah.

Because of lack of cash, I will need financial help to get it ready for mining.

I will be glad to meet with a representative of your department and go over the mining property with him at your convenience.

Hoping to hear from you soon.

Very truly yours,
Victor P. Hendricks
Victor P. Hendricks.

P. S.

This letter has been delayed because I have been waiting for permission for a lein on their property. This has been granted at board of directors meeting. However, I am sending everything else but this permission for Government lein.

Also, please send me forms for the lein if you think this necessary.

SALT LAKE CITY, UTAH
August 24, 1965

Mr. Victor M. Hendricks
958 West 5th Avenue
Pomona, California

Dear Mr. Hendricks:

As per your request, please find the following brief geological description of the Antelope Mine area, Sec. 31 and 32, T. 26 S., R. 3 W., S.L.B.M., Sevier County, Utah.

The mine area is located about five miles north-northwest of Marysvale, Utah. The area is readily accessible by improved dirt roads.

The mine is situated in the Antelope Range which is located across the north end of Marysvale Valley. This transverse range is almost completely made up of volcanic and intrusive igneous rocks.

At the mine, the igneous rocks are as follows. The oldest rocks exposed are dark purple, black, green, and gray latites, andesites, and tuffs that belong to the Bullion Canyon Group of volcanic rocks. A greenish-gray monzonite is intrusive into these older volcanic rocks. Overlying the Bullion Canyon Group and the intrusive rocks is a much younger series of welded tuffs, rhyolite, and glasses that belong to the younger Mount Belknap Group of volcanic rocks. The Antelope Mine is located in a bedded and silicified tuff of Bullion Canyon type that immediately overlies the intrusive monzonite.

Structurally the silicified tuff bed dips between 35 and 42 degrees toward the south-southwest. The tuff bed ranges from about 20 to 50 feet in thickness, and is heavily laced with massive crystalline quartz.

Although past production records are not known to be available, the Antelope Mine has a history of Silver production. Current assay reports show silver mineralization to be prevalent throughout the mine area. In addition to quartz and silver mineralization, there is also manganese, pyrite, chalcopyrite, and traces of galena and sphalerite. The carbonates calcite and siderite are locally abundant, as is gossan type iron oxide. Assay reports also show a trace of gold.

Mine workings consist of an inclined shaft that is reported to be 450 feet down on about a 45 degree angle. Several crosscuts extend out from this inclined shaft, with stopes between levels. A 60 foot vertical shaft connects one of these crosscuts with the surface. Considerable bulldozer work has exposed the mineralized bedding updip for at least 300 feet above the shaft portal.

The most promising area for prospecting for additional silver mineralization appears to lie south of these present workings. The mineralized tuff bed extends in that direction on a 35 to 42 degree dip. Apparently none of the past mining activity explored this southward extension. ?

Two drill holes could readily detect the presence of mineralization along the south extension. One drill hole would be located approximately 125 feet south of the vertical shaft and another hole located approximately 200 feet east of the vertical shaft. The south hole would intersect the mineralized tuff bedding at about 200 feet, and the east hole at about 125 feet.

Holes vertical?

Geologic conditions appear to be good for the discovery of additional silver mineralization in the area.

Respectfully yours,

Richard R. Kennedy

REPORT ON THE ANTELOPE CLAIMS NORTH OF MARYSVALE, UTAH

OFFICIAL COPY U. S. G. E. RECEIVED SEP 15 1965 CODE

INTRODUCTION:

The examination of the Antelope group of claims was made at the request of Mr. Victor P. Hendricks, Pomona, California. The primary purpose of the examination was to determine the feasibility of a development and exploratory program to delineate and evaluate existing gold-silver ore bodies in the area, including recommendations for development.

LOCATION:

Big Star Mine? Fig. 1 - pg. 2 RI-3972

The Antelope Group is located in the Antelope Range, Sevier County, Utah about 7 miles north of Marysvale, Utah and about a mile east of Marysvale Canyon, in section 21, T. 26 S., R. 4 W., S.L.M. The portion of the Antelope group covered by this report are patented claims and title is held by the Deer Trail Mines Company of Marysvale, Utah

GENERAL INFORMATION:

The property can be reached from either the north or the south by reasonably good dirt roads which are open through all seasons except for occasional severe storms. Daily truck and bus service and weekly rail services are available out of Marysvale or points to the north.

PHYSICAL FEATURES:

The Antelope claims are located in a narrow canyon near the central part of the Antelope Range. The topography within the area consists of low rolling hills ranging from 6500 to 7000 feet in elevation.

SUPPLIES:

Maintenance, repair, and operating supplies are available at several of the nearby towns and cities located on Highway 89, such as Marysvale, Richfield, Provo and Salt Lake City. No springs or streams are located on the immediate property however, ample water supplies are available approximately a mile to the west from the Sevier River.

GEOLOGY:

The property is located within the South Central Utah Volcanic Field which lies along the northwestern margin of the Colorado Plateau Province. The major regional units that have been described by geologists of the U.S.G.S., A.E.C., and others are as follows:

1. Early Tertiary (?) andesites and latites, largely tuffs and tuff breccias.

2. Tertiary quartz monzonite, quartz monzonite porphyry, and associated fine grained granite

3. Late tertiary flows, tuffs and tuff breccias, mainly rhyolitic in composition.

4. Quaternary alluvium, river deposits and terrace deposits.

The area immediately to the west of the antelope mine consists mainly of the later ryolitic flows and to the east the earlier latite porphyry, tuffs and agglomerates.

Major faulting is apparent in the area and detailed mapping will probably reveal several intersecting systems.

Intense hydrothermal alteration is present and massive quartz veins are exposed in surface outcrops.

The area of immediate interest consists of a Northwest-southeast brecciated quartz vein dipping about 45° to the southwest. The vein material shows mineral values in numerous places consisting of chalcopyrite, iron pyrite, minor amounts of galena, secondary silver minerals and copper carbonates. Recent assays from surface exposures over 15 feet of thickness has indicated gold and silver values from $6.00 to 11.00 per ton.

PRODUCTION:

No records of past production are available to the writer but considerable stoping in the old workings indicate notable amounts of ore has been selectively removed possibly during the early 1900's. Primitive mining methods of the period has undoubtedly required high grade ore to be profitable. not true for 90-99 ores

CONCLUSIONS AND RECOMMENDATIONS:

Due to the strong surface indication of the structure along with the overall values I would highly recommend that further exploratory work be conducted as follows:

1. Reopen all the old workings for examination and mapping. ? out

2. Exploratory drifting on the lower levels primarily along the strike of the vein to the east.

3. Additional bulldozer stripping to extend the vein on the surface mainly to the east.

4. Core drilling both surface and underground if considered feasible after mapping and closer examination.

COST ESTIMATE:

1.	Reopening old workings - - - - - - - - -	$1,000.00
2.	Exploratory drifting - - - - - - - - -	2,000.00
3.	Bulldozing - - - - - - - - - - - - - - -	500.00
4.	Drilling - - - - - - - - - - - - - - - -	2,500.00
	Total	$5,500.00

PROSPECTING PERMIT WITH OPTION TO LEASE

THIS AGREEMENT, made and entered into this _____ day of October, 1964 by and between DEER TRAIL MINING COMPANY, a corporation, whose address is c/o Carlyle Hunt, Secretary, Richfield, Utah, hereinafter called LICENSOR, and VICTOR P. HENDRICKS of 958 West 5th Street, Pomona, California, hereinafter called LICENSEE;

W I T N E S S E T H:

THAT WHEREAS, the LICENSOR owns mining claims hereinafter described, and desires the same to be prospected for valuable minerals; and is willing to grant a mining lease on said claims should any deposit or deposits be found therein which the LICENSEE desires to develop and mine; and

WHEREAS, the LICENSEE desires to prospect for valuable minerals on said claims, and desires to lease the same if any promising deposit or deposits be found;

NOW THEREFORE, it is mutually agreed as follows:

The LICENSOR has granted and does grant to the LICENSEE the exclusive right to prospect for deposits of valuable minerals on and in those certain mining claims situate in the County of Piute, State of Utah, described as follows:

SAMPSON, HARDSCRABBLE, INDEPENDENT, INDEPENDENT NO. 2, SILVER EAGLE, BLUE BIRD, RED BIRD, PITTSBURG NO. 1, PITTSBURG NO. 2, and PITTSBURG NO. 3, INDEPENDENT NO. 3, ALICE, ALICE EXTENSION, JOSEPH, WESTERN, NORTH EXTENSION, and DEER TRAIL, all in Survey No. 4670A, located in Henry Mining District. also missing link and missing link 2 (unpatented)

The LICENSEE shall have from the date hereof to JULY 1, 1965, together with the privilege of using such facilities on the property as are reasonably necessary in connection with such prospecting operation.

1. The LICENSEE shall proceed with reasonable diligence to prospect said lands, using such methods and working at such places as he shall select.

2. It is mutually agreed that when and if the LICENSEE encounters any deposits of minerals which he desires to develop and mine, he shall be entitled to a mining lease upon not more than four (4) of the above described mining

claims. That the LICENSEE shall be entitled to select up to four (4) of the mining claims above described to be included in a mining lease upon the terms and conditions as specifically set forth in the mining lease attached hereto as Exhibit "A".

3. This Agreement does not vest in the LICENSEE any property in the minerals until the same are severed from the ground.

4. The termination of this license on the 1 day of JULY, 1965 shall not defeat the right of the LICENSEE to receive the lease if a discovery shall have been made and an application shall have been made for a lease prior to said date.

IN WITNESS WHEREOF, this instrument is executed as of the day and year first above written.

DEER TRAIL MINING COMPANY, a corporation

By J W Fuller

LICENSOR

By Victor P. Hendricks

Victor P. Hendricks

EXHIBIT "A"

MINING LEASE

THIS MINING LEASE, made this 1st day of July 1965, between DEER TRAIL MINES, a Utah Corporation, LESSOR, and VICTOR P. HENDRICKS of 958 West 5th Street, Pomona, California, LESSEE, WITNESSETH:

That the LESSOR, for and in consideration of the royalties and agreements hereinafter reserved, and by said LESSEE to be paid, kept and performed, has granted, demised and let unto said LESSEE the following described mining properties, situated in Piute or Sevier County, State of Utah, known and recorded as follows: Hard scrabble, sampson, missing link and missing link No. 2.

TERM OF LEASE: The term of this LEASE shall be for a period of five (5) years from the date hereof and will expire at noon on the 30 day of June, 1970 unless sooner forfeited or terminated under the provisions hereinafter made.

For and in consideration of said Lease, the LESSEE does agree with said LESSOR as follows:

1. To commence work upon said mine and work the same in a good workmanlike manner, working the aforesaid premises steadily and continuously from the date hereof; it is agreed the LESSEE shall perform such work and expend upon the premises herein described a minimum annual expenditure of $3,000.00 per year; the LESSEE at the end of each year shall furnish to the LESSOR proof of expenditures in the sum herein provided and it is agreed that in the event such expenditures are not made as herein agreed the LESSEE shall pay to the LESSOR a sum equalling the difference between the amount so expended upon said properties and the $3,000.00 minimum herein provided.

2. The LESSEE agrees to timber said mine when necessary at his expense and also agrees to allow the LESSOR or its agents to enter upon said property or in all parts of said mine for the purpose of inspection.

3. The LESSEE agrees to pay to the LESSOR as royalty 10% of the net value of all ores extracted from said premises during the life of this Lease. Net value means the proceeds of ore sold less the entire cost of transportation from mine to smelter and all smelter charges including sampling, assaying and any other charges which may be assessed for handling frozen ore.

4. The LESSEE agrees to deliver up to the LESSOR the said premises with appurtenances, and all improvements, including any buildings erected, but not including rail, pipe or other items of equipment installed by the LESSEE, in good condition, without demand or further notice, on the last day of the term of this Lease unless this Lease is extended for an additional term at the election of the LESSEE.

5. Said Lease (WITH THE MODIFICATIONS SPECIFIED IN SECTIONS 13 AND 14) may be extended for an additional term of five (5) years with the privilege of renewal for additional five (5) years if the LESSEE is not in default at the end of the ~~first~~ PREVIOUS term and commercial ore is being THEN CURRENTLY extracted and sold from said mine property. This option to extend the term of this Lease for an additional term shall be exercised by written notice from the LESSEE to the LESSOR given not less than 30 days prior to the expiration of the initial term herein provided. Written notice shall be deemed given when mailed in a U. S. Post Office addressed to Deer Trail Mines c/o Carlyle Hunt, Secretary, Richfield, Utah.

6. LESSEE agrees that if, during the term of this Lease, he shall locate any new mining claim, adjacent to or contiguous with mining claims OF the LESSOR, or in the vicinity of the LESSORS claims, said claim or claims shall be taken in the LESSORS name and shall be the sole property of the LESSOR at the termination of this Lease.

7. All maps and geological information concerning the property subject to this Lease prepared by the LESSEE shall be available to the LESSOR, and the LESSOR shall, at its own expense, be permitted to make copies of such information. It is further agreed that LESSOR shall furnish all information held by it concerning the claims herein described to the LESSEE at the LESSEE's request.

8. LESSEE shall be responsible for all operations conducted on the leased property, shall comply with all the ~~workman's compensation laws~~ LAND MINING LAWS AND MINING REGULATIONS of the State of Utah, as now exists, or as may hereafter be amended. LESSEE further agrees to indemnify and hold the LESSOR harmless from payment of any and all damages, costs, and expenses arising out of any accident which may occur by reason of the LESSEE's operation on the leased premises during and throughout the term and existence of this Lease.

9. LESSEE agrees to indemnify and hold the LESSOR harmless from any and all costs, liability or damage whatsoever on account of materials furnished, or labor performed on the leased premises at the LESSEE'S instance and request, and to post and maintain in a conspicuous place upon the premises notice to the effect that said premises are being leased by the LESSEE, and the LESSEE agrees to assume and be responsible for all bills contracted and to keep said premises free and clear of all liens and encumbrances of every kind, except such as may result by the acts of other than the LESSEE. Neither the Lessor, nor the successors in interest shall be liable in any manner for the payment of any labor performed or materials furnished to the LESSEE, or for any obligations incurred by him.

10. The LESSOR agrees to pay all general, and special real estate taxes which are assessed on the claims leased under the terms of this Agreement.

11. Any failure upon the part of the LESSEE to perform each and every or any and all covenants and conditions of this Lease incumbent upon him to be performed, and any failure to pay the royalties herein reserved promptly as the same shall become due, may at the option of the LESSOR work a forfeiture of any and all rights of the LESSEE under the terms and conditions of this Lease, and LESSOR may, upon giving written notice of the claimed default on the part of the LESSEE re-enter and take possession of the premises and property covered by this Lease.

12. The LESSEE shall have the additional option to terminate this Lease agreement upon 30 days written notice to the LESSOR of his intentions so to do. In which event the LESSEE shall vacate the property and shall give an accounting of the expenditure made from the commencement of the Lease. ~~and the $3,000.00 annual expenditure requirement herein provided may be prorated through that~~

~~portion of the year during which the LESSEE had possession of said property.~~

Any part of the ~~pro rated sum not~~ ($3,000.00 ANNUAL EXPENDITURE REQUIREMENT HEREIN PROVIDED NOT) expended upon said property during the portion of the LAST year in which LESSEE had possession shall be paid in cash to the LESSOR under the terms of this Agreement.

IN WITNESS WHEREOF, we have hereunto set our hands the _____ day of _____, 196__.

DEER TRAIL MINES, A Utah Corporation,

_____
LESSOR

_____
Victor P. Hendricks,
LESSEE

13. If said lease is extended for an additional term of five (5) years according to the terms of the option given lessee in section 5, all and any requirements for and provisions of and references to minimum annual expenditure upon the premises by the lessee ~~by~~ shall remain unchanged and in force except that the minimum annual ~~figure~~ expenditure amount shall be $10,000.00 instead of $3,000.00.

14. If said lease is extended for a second additional term of five (5) years according to the terms of the option given to lessee in section 5, all and any requirements for and provisions of and references to minimum annual expenditure upon the premises by the lessee shall remain unchanged and in force except that the minimum annual ~~figure~~ expenditure amount shall be $20,000.00 instead of $9,000.00

Memorandum

To: The File

From: F. M. Murphy, Mining Engineer FMM

Subject: OME-6501 (Silver-Gold)
Victor P. Hendricks
Antelope Group of Claims
Sevier County, Utah

Justification for Denial of Application

The application submitted is incomplete in that it lacks copies of the Applicant's letters to the banks, a definite exploration program, a specific location for the claims, and a good geologic reason for expecting to find ore deposits of eligible metals.

Within a radius of 15 miles from the town of Marysvale, a number of gold-silver mines, some with a considerable production, were worked. The largest producerwas the Annie Laurie mine in Piute County about 10 miles northwest of Marysvale. These mines were along Deer and Beaver Creeks which flow into the Sevier River from the west. According to Lindgren[1], the ore deposits at the Annie Laurie and adjacent mines occur in dacite and none occur in rhyolite or rhyolite tuff.

About the year 1910 it was found that the veins southwest of Marysvale along Cottonwood Creek and also in the Antelope Range in Sevier County about 5 miles north of Marysvale and east of the Sevier River contained considerable alunite. A number of these veins were exploited for potash during and for a brief period after World War I.

Two reports by consultants were submitted with the application; one states that the property is in secs. 31 and 32, T. 26 S., R. 3 W., S.L.B.M., the other states it is in sec. 21, T. 26 S., R. 4 W., S.L.B.M. The first must be incorrect as there are only

8623

30 sections in T. 26 S., R. 3 W. If the claims are in sec. 21, it is quite possible the mine cited in the application is the Big Star mine which was exploited for alunite ore during the period mentioned above.

The type of rock in which the ore grade gold and silver veins were found apparently does not crop out in the area of the Applicant's claims. The veins in the claim area occur in a bedded and silicified tuff of the later Bullion Canyon series. The ore in the Annie Laurie mine was not very high grade ranging from $5 to $18 per ton. The Applicant submitted three assays of material from the project area that show values ranging from $0.58 to $10.83 per ton. It is quite likely the vein material in the mine would not average up to the highest figure since the veins in this mine and other mines in the nearby area were all in tuff and were worked principally for alunite.

The work proposed by the Applicant consists of 1) reopening the mine for examination and mapping, 2) exploring by drifting on the vein, 3) additional surface bulldozing to extend the vein, and 4) core drilling both surface and underground if considered feasible after mapping and closer examination.

According to U.S.G.S. and U.S.B.M. reports, the veins in the area in which the Applicant's claims are located were exploited for alunite. Although alunite has been noted in a few bonanza deposits such as those at Goldfield, Nevada, the Annie Laurie mine, etc., such deposits are the exception rather than the rule; and ordinarily alunite may be looked upon as an unfavorable rather than a favorable indication of gold-silver values.

In addition to the above-mentioned unfavorable factors, the application as submitted is a request for aid in a prospecting venture; and in accordance with our regulations it must be denied.

Dear Mr. Hendricks:

Careful study of your application for financial assistance in exploring the subject property and of other information available to us indicates that the probability of disclosing significant ore reserves on the property is not sufficiently promising to justify Government participation in the proposed exploration. Accordingly, we regret to inform you that your application for exploration assistance is denied.

Sevier County, Utah

Dear Mr. Hendricks:

Careful study of your application for financial assistance in exploring the subject property and of other information available to us indicates that the probability of disclosing significant ore reserves on the property is not sufficiently promising to justify Government participation in the proposed exploration. Accordingly, we regret to inform you that your application for exploration assistance is denied.

Sincerely yours,

Dear Mr. Hendricks:

On August 12, 1966, we requested additional information which is necessary for the processing of your application.

If you need additional time to prepare this information, please let us know. If we do not receive a reply from you within thirty days from the date of this letter, we must assume that you are no longer interested in proceeding with your application and we shall consider it as having been withdrawn.

Sincerely yours,

Re: OME-6501 (Silver-Gold)
Victor P. Hendricks
Antelope Group of Claims
Sevier County, Utah

Dear Mr. Hendricks:

We are in receipt of your letter of August 7, 1966, concerning the subject application, and enclosing a chip specimen from your Bullion claims in Piute County, Utah.

In order for us to continue processing your application for exploration assistance on the Antelope claims, it will be necessary that we have the additional information requested in our letter to you of October 4, 1965. Copies of your letters to banks requesting a loan were not included in your application. Since your application was filed more than a year ago, copies of new letters to two banks requesting the loan needed and copies of their replies will be required. Because of increased costs it is suggested that new bids be obtained for any proposed work to be performed under independent contracts, such as core drilling. Two different locations of the property were mentioned in your application. The correct location of the property should be given as to section, township, and range. Any new information you have obtained concerning the property also would be helpful.

As requested, we are enclosing two sets of Lien and Subordination Agreements. If you own the Bullion claims, Lien and Subordination Agreements covering these claims would not be required. However, if you propose to request assistance to explore these claims complete information as shown on the back of the enclosed application forms should be submitted.

23263

The chip specimen enclosed in your letter appears to be fine-grained galena (lead-sulphide). Lead is not eligible for assistance under the program. Unless substantial silver or gold values were indicated by assays of representative samples taken from the property or other reliable data we could not be of assistance to you in exploring for the type of mineralization indicated by the chip sample.

This request for additional information should not be construed that an exploration contract will be granted.

Sincerely yours,

FRANK E. JOHNSON

Re: O.M.E. 6501
(Gold - Silver)
Antelope Claims
Sevier County, Utah.

Frank E. Johnson
Chief
Minerals Exploration.

Dear Mr Johnson

The Deer Trail Co. has given me permission for a government lien on their Antelope Claims with the stipulation not to exceed $10,000.

Would you please send me the necessary forms

which requires five copies I believe. Also please send me five extra copies for me as I have purchased outright eight patented mining claims in Bullion Canyon in Piute County Utah. We may be able to work both of these in on one trip.

Enclosed is sample of ore I chipped off of my Bullion claims. I consider these claims superior to the Antelope group.

Sincerely

J P Hendricks

8/1/66

Mr. Johnson said to hold until September 1, 1966; then, if no word, send a 30-day notice letter

Mr Frank Johnson
Minerals Exploration:

Re O.M.E 6501
Victor Hendricks
Antelope Group

Dear Mr. Johnson:

Thank very much for your interest in my mining claims. Yes, I am definitely going a head with work on my mining claims as soon as the snow is off.

The reason I haven't sent

you additional information
as because the board of directors
meets once a year. They have
approved tentevely to give me
a right to put a government
lein on property but they want
additional information and then
vote on it. This will be this
summer, their meeting date has
not been set yet. The other, you
mentioned a more compensive
mapping. The gollogist I hired
has another job with a big
Company and so I guess I
will have to hire someone to
do this also. I can only

RES. 9-7124 BUS. NA 9-7010

Victor P. Hendricks
DENTAL TECHNICIAN

958 W. FIFTH POMONA, CALIFORNIA

work on these claims in summer and I intend to put a couple of more thousand dollars of my own hard earned money into the mine this first part of June. It is not easy for me as I am a little man, financially. But I have faith. Please bear with me a little longer and I will do all I can to hurry things as much as possible. Believe me I want to have

your backing much more than you as all my future depends on this enterprise.

I will keep you informed

Thank you once again for your kindness and interest

Yours very truly

Victor P. Hendricks

Antelope Group of Claims
Sevier County, Utah

Dear Mr. Hendricks:

Thank you for your letter of January 5, 1966, in which you express your intention to proceed with your application and the difficulties in obtaining the information requested in our letter of October 4, 1965.

We sympathize with you in these problems and we wish to cooperate fully in allowing you ample time to furnish the additional information and documents, but we cannot postpone action on an application indefinitely. Therefore, if we do not receive the information requested within 30 days from the date of this letter, we must assume that you are unable to proceed with the application and we shall consider it as having been withdrawn.

In the event the application is withdrawn and at some future time you wish to reopen this case, you can do so by filing a new application, referring to this OME docket number, and furnishing the information previously requested together with any new information you think might be helpful.

Sincerely yours,

FRANK E. JOHNSON

Jan. 5 - 1966.

Office of Mineral Exploration:

Dear Mr. Johnson:

Received your letter regarding my application I sent to you, and asking me if I intended to pursue my goal of obtaining a government loan. Yes, I do.

The company I deal with has thousands of acres of patented mining land. There are 5 million shares sold. The president and most of the board of directors

live out of state of Utah. It is the hardest things to do I ever attempted is to deal with this bunch. They voted to give me or let me get a gov. loan at board of directors meeting. However I have written them and sent them papers to fill out and it is pidgen holed and I can't seem to even get replys to my letters.

It is difficult for a little man to do much in mining. If I had the money nothing would stop me as I sincerely believe in the value of the property. I brought a beautiful specimen back that was just dripping with free silver.

I will make another attempt to contact them and get thing in order.

Sincerely Vic Hendricks

Dear Mr. Hendricks:

On October 4, 1965, we wrote you outlining certain information which was necessary to continue the processing of your application. To date, we have not had a reply to our letter. Will you please inform us of your plans regarding the application. If you have decided not to pursue it further, will you please so inform us.

Sincerely yours,

Re: OME-6501 (Silver-Gold)
Victor P. Hendricks
Antelope Group of Claims
Sevier County, Utah

Dear Mr. Hendricks:

A preliminary review of your application for financial assistance in minerals exploration does not reveal sufficient information for our purposes.

An examination of a property is not made unless the data submitted in the application show that the applicant can qualify for assistance and that the proposed exploration has sufficient merit to justify the cost of an examination. Funds are not provided by the Government to make mine workings accessible for an examination. Such work must be performed by the applicant before an examination can be authorized.

You did not state in the application how you proposed to finance your share of the cost of the proposed exploration. We wish to point out that an applicant's labor and charge for the use of any equipment he may own usually is not sufficient to pay for his share of the cost of the exploration. Also, an applicant should have sufficient funds to finance the full share of the cost of the work for at least two months, because he is reimbursed by the Government's share of the cost only at the end of each month after a voucher has been submitted and approved for the work performed during the preceding month. It usually takes two or three weeks after a voucher has been submitted before payment of the Government's share is received.

In addition to assurance that the mine workings are accessible and that you can pay for your share of the cost of the exploration, the following information is needed:

23263

A sketch map of your mining claims showing the present workings and your proposed exploration.

A more detailed description of the geology of your property, giving the dips and strikes of the major formations and faults, with the assay results of representative samples taken from the mineralized areas on the property.

A detailed breakdown of your cost estimates for the exploration work, including the number and type of workers, rate of drift expected per shift, and cost of supervision.

Five copies of a Lien and Subordination Agreement from Deer Trail Mines. (Forms enclosed for this purpose.)

This request for additional information should not be construed that a contract will be granted.

Sincerely yours,

(signed) FRANK E. JOHNSON
