Re: DMEA-2193 (Antimony)
G.O.P. Antimony, Inc.
Bales Antimony Prospect
Okanogan County, Wash.
Contract Idm-E258

Mr. Theodore Smith and/or
Mr. Clyde A. Scott
Carlton, Washington

Gentlemen:

After the completion of the approved exploration work under the contract identified above, we asked to be informed about changes in the status of the property and production from it during the period of royalty obligation.

To assist you to furnish this information and to assure the accuracy of our records, please answer the questions on the back of this letter and return two copies to this office with copies of any pertinent documents.

On August 15, 1962, we forwarded copies of this form to Mr. Smith but have received no reply. The period during which royalty on production was due the Government has expired, but we cannot release the Government's lien on the property and close our books on the contract without the information requested. This will be to your advantage since both of you and also Mrs. Scott signed a Landlord's Subordination Agreement dated October 16, 1951, covering the Bales Antimony and Bales Antimony Nos. 2 and 3 claims.

Sincerely yours,

W. R. Griswold, Chief
Division of Minerals

Mr. George C. Selfridge, Chairman
DMEA Operating Committee
Department of the Interior
Washington 25, D. C.

Re: Semi-annual Reports on Certified Projects

Dear Mr. Selfridge:

Enclosed are four copies each of royalty inspection reports for Region I for the period January 1 to June 30, 1958. These reports have been prepared by Engineers of the U. S. Bureau of Mines.

The royalty report on Peter Antonioli, Docket No. DMEA-3278 (manganese), will be forwarded upon receipt of additional information necessary to complete it.

In accordance with Special Notice No. 931 of the Minutes of the Operating Committee, dated February 14, 1958, we have reported together, grouped by commodities, the properties which have been inactive since the last report.

Sincerely yours,

Wing C. Agnew
Acting Executive Officer

ADDENDUM TO
SEMI-ANNUAL REPORT OF CERTIFIED PROJECT
March 15, 1956

Reporting period: July 1, 1955 to December 31, 1955

Operator: G.O.P. Antimony, Inc.

Mine name: Bales Antimony

County and State: Okanogan County, Washington

Docket No. and Commodity: DMEA-2193 (antimony)

Contract No.: Idm-E258

Other Remarks: (Page 2)

The production potential for the immediate future is nil and for long term is indeterminable. Should antimony reach a price of $7.00 per unit, then the small reserve can be mined profitably.

The only work done on the property since the termination of the contract is annual assessment work.

Remarks: The property has been inactive since the termination of the DMEA contract on September 30, 1952.

It is believed that the lease which G.O.P. Antimony held on the property has expired and that the property has reverted back to the owners.

Production Summary: No production in 1955 to date.

SEMI-ANNUAL REPORT OF CERTIFIED PROJECT

Period: July 1, 1954 to December 31, 1954

Docket No. DMEA-2193 (antimony) Contract Idm-E258

Operator: G.O.P. Antimony, Inc.
General Delivery
Omak, Washington

Name of Mine: Bales Antimony Project

County: Okanogan County State: Washington

Date certified: March 23, 1953 Date of last inspection: See "Remarks".

Contract amount: $16,080.00

Amount spent: $10,780.88 Government participation: $8,085.66

Amount repaid to date: $ 81.70

Reserves: 240 tons containing 20 - 30 percent antimony.

Remarks: The property has been inactive since the termination of the contract on September 30, 1952. The last routine inspection of the property was made on September 24, 1952.

No shipment of ore was made during the DMEA project; however, 37.82 tons of stibnite ore averaging 14.4 percent antimony was stockpiled. This ore was shipped later to the Talache mill of the Hermada Mining Co., Atlanta, Idaho, where it was crushed and sampled. The sample was assayed by the Union Assay Office, Inc., Salt Lake City, Utah, and the Hermada Mining Company purchased the ore for $1,634.10, paying $3.00 per unit for the 544.7 short ton units of contained metallic antimony. A 5 percent royalty payment of $81.70 was sent to the Government in April 1953.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Subject: Monthly Progress Report
Docket No. 2193 (Bales)
Contract Idn E-258
Sept 1-22 Incl., 1952

Dear Mr. Volin:

Enclosed with this narrative you will find five copies of the Monthly Progress Report, Form MF 104 and MF 104A, to cover the costs of the Bales antimony project for the period September 1-22, incl., 1952. Included also are two copies of the cost distribution sheet, invoices and payroll. Also enclosed are five copies of a map showing the drift on the north ore body.

During the partial month of September we completed 52 feet of drift, which gives us total new exploration on the north vein of 115 feet. This consists of the following: open cut, not timbered; open cut, timbered; and new drift, both timbered and untimbered. This 115 feet was work on the vein throughout the entire length and about 15 feet of that 115 feet shows commercial ore in the floor to a width of 12 to 24 inches of ore which will assay an estimated 20 percent antimony. When we stopped the work, the barren vein in the face was starting to straighten up to a vertical dip, which sometimes means another pay shoot is starting to come in. In view of the fact that 60 tons of 30 percent ore was mined by us, at our expense, on this vein, and that it is reasonable to expect another 60 tons could be mined back of this spot, we assume that your Engineers will declare this to be a discovery.

The only other point where any ore was opened up by exploration work is on the west vein, and since the DMA does not feel that [illegible] satisfactory and are questioning payment, we do not consider this a new discovery. In any event, the exploration work, even including our own, does not block out any ore. In our experience, one face of antimony ore is not a commercial discovery until it is explored sufficient to show whether it has any extent and depth. We have been fooled a number of times in the past, so hesitate to be enthusiastic about anything until we know more about it.

In view of the fact that it was understood by both the DMA and by us that should our payments on the Bales project be delayed beyond the point where we had more expenditures into the project than we agreed upon, I advised you and your staff that we would be forced to quit. Therefore, upon receiving notification that there would be a delay in payment pending an audit, we kept our word and quit work, when we would have liked to have carried on since the Bales is a good project. Likewise, when our suggestions for future exploration here on this project were not accepted by your office, we could see no sense in continuing the project — worthwhile as the Bales is.

DRAFT

We would like to point out that by slowly absorbing fixed, initial costs for the drift work, we were able to show a cost last month of $19.42 per foot. We believe that had we carried on further drift work it would have averaged out in the neighborhood of $30.00 per foot.

Also, please bear in mind that driving short drifts runs up the unit cost per foot because of portal work and moving equipment.

Likewise, we want to point out at this time that the allowable cost of bulldozing for the work we did came to only $1,750, and since it cost us $750.00 to move the tractor back and forth to the project, we figure the $1,000 remaining wasn't even enough to pay the operator's wages. It is my honest opinion that we did work for the benefit of the project to a total value of $3,000.00 which is a figure we would have had to pay any outsider for the same work. This, of course, is $1,250 more than the contract allowed. In this connection, I want to point out that work entirely for our own benefit with the tractor amounted to an additional $500.00. If there is any question about my statements here, I would like to have some outside engineer or contractor look over the work we did.

Since the work we have accomplished during September was unquestionably, entirely for the benefit of the Balco DMA Project, and since we did not do any ore mining to foul up the accounts, and since there are no supplies or equipment to be settled at the end of the project, we see no reason why you should not promptly forward this voucher for payment. Kindly send payment to the First Security Bank of Idaho, N. A., Boise, Idaho, to be deposited into the G-O-P Antimony, Inc. account.

Very truly yours,

E.O.

Ernest Oberbilling,
President

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Spokane 2, Washington

Subject: Monthly Progress Report, Balos Antimony (Wn.)
Contract: Idn F-258, Docket No. DMA 2193, July, 1952

Dear Mr. Reed:

Enclosed with this narrative report you will find five copies of the Monthly Progress Report, Form MF 104, and Form MF 104 A, to cover the cost distribution of the Balos Antimony Project for the month of July, 1952. Also enclosed are two copies of the cost distribution sheet, supporting invoices, and 1 copy of the payroll. Likewise, you will find enclosed five copies each of two maps made of the Balos workings.

During July the west vein was opened up to a depth of 8 to 10 feet, and a 20 foot lens of high-grade stibnite ore of a maximum width of 12 inches was exposed. Considerable drilling and blasting had to be done here to get the required depth. This vein is shown on the map and designated as the "West Vein".

Test hole drilling was done to the west from the drift to a total length of 164 feet and disclosed no commercial quantities of stibnite ore. The location of the test holes is shown on the enclosed map. It might be stated that the test holes through their entire length were in silicified altered rock generally found near ore.

Cat work totaling 80 hours was done with most of the time spent on work uncovering the west vein. Only 28 hours has been included for payment since that is the remainder allowable under the contract. The map enclosed with this report shows a complete coverage of all the cat work done on the property, except two small cuts at locations off the map.

An accurate survey has been completed at the Balos which shows the relationship between the various areas where ore has been found. The enclosed maps were made from the data collected on the survey. Also, permanent iron base survey stakes consisting of 1-½" pipe have been placed at convenient locations near the workings of interest.

In view of the fact that the work on the Balos to date indicates the necessity of slightly changing the program, we wish to submit the following proposals for amendments in order to make this exploration program more effective:

1. <u>Bulldozer Work:</u> We wish to increase the bulldozer work from 250 hours to 400 hours, which is an increase of 150 hours at a unit cost of $7.00 per operating hour. The locations for the increased work are marked upon the enclosed map and include work already done to the extent of 52 hours on the west vein. Bulldozer work has accomplished more for the money spent than any other phase of the exploration.

2. Raise: The vein which we have been following in the drift has had a dip of 75 to 80 degrees to the east and is in contrast to all the other locations where commercial ore has been exposed, because all of the bodies of ore located to date are either vertical or dipping slightly to the west. Because of this, it is considered advisable by us to put a small raise from that drift to the surface of the pit, a distance of 38 feet and it will at relatively small cost show us what has happened to the vein. It seems to us rather strange that a vein such as exposed in the pit for a distance of over 400 feet appears to cease carrying mineral in a vertical depth of only 38 feet. We want to know what happened.

3. Shaft: On one of the accompanying maps the proposed location for an inclined shaft to a depth of 40 feet is shown. We plan to use the slusher for mucking. An inclined shaft at this location appears to be the most reasonable and inexpensive way to explore the ore because the ground to the east of the west vein is quite flat and makes further depth by bulldozer work impossible. It is interesting to note that this west vein is nearly 100 ft. vertical elevation above the ore in the floor of the pit.

4. Tunnel Work: At the north vein we have been (on our own account) following the ore down with an open cut and mining the ore as we go. The main reason for doing this is so that we can study the occurrence of the ore as we go and this gives us valuable information on the occurrence. Now, however, we have reached the extent of our doing this work further because the cut is becoming too deep, with the walls too vertical, so we are forced to timber up the cut as a drift and cover it over. Likewise, the ore seems to be dipping to the west, and this has caused one wall of the cut to be very dangerous and overhanging. We propose that the timbered cut will take the place of the timbered drift originally planned for this location, and that we be allowed as an expense for the project drift work to the extent of 50 feet at $30.00 per foot to take the place of the originally itemized expenses. As soon as the 50 feet of drift has been timbered up in the open cut, we plan to continue drifting at this location, and our drift work can be more intelligently carried on because of the knowledge gained from following the ore in the open cut.

We hope that you will expedite payment on the enclosed vouchers because it can be readily seen that we have expended more on this project than our originally agreed-upon one-fourth. In this matter I am speaking entirely of the project and not the open cut mining on our own account. Likewise, it is quite unfair to have our reports held up for payment because of some slight technicality, when we have in good faith gone ahead on this project and are accomplishing the objective. The DMEA program can be a very fine thing and it is my impression that the Geological Survey men have all been interested in helping the operator accomplish his job. Some of the Bureau of Mines personnel unfortunately have themselves as well as the operator so badly tied up in amendments, red tape, etc. etc. that if the program is considered to be unsatisfactory the blame will be entirely theirs. Therefore, without the delay usually encountered on our Washington projects, we hope that payment will be expedited because to this date we have received less than $2,000.00 and if there is much more delay we shall be forced to suspend the Bales project, even after having our one-fourth on the line.

Payment on this voucher, the same as all those in the past, should be sent to the First Security Bank of Idaho, N. A., Boise, Idaho, to be deposited into that account of G-O-P Antimony, Inc.

Very truly yours,

Ernest Oberbilling

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Subject: Monthly Progress Report
June, 1952
Contract: Idm 1 - 252
Pelos Antimony (Washington

Mr. Glenn Reed
Mining Engineer
U. S. Bureau of Mines
1201 N. Division Street
Spokane 2, Washington

Dear Mr. Reed:

Enclosed with this narrative report are five copies the Monthly Progress Report, Form MF 104 (Rev) and Form MF 104 A to cover the cost distribution of the Pelos Antimony Project for the month of June, 1952. Also enclosed are two copies of the cost distribution sheet and supporting invoices and a copy of the payroll.

Drift work under the vein was carried forward for a distance of 54 feet during the month, but was suspended about June 24 to await results of test hole drilling. This drilling will be done as soon as additional steel can be sent to the property. The drift followed the vein all the way but there appeared to be no concentration of mineable ore.

Bulldozer work to an extent of 70 hours actual working time was done in two places with about 40 hours in each location. A long road cut was made north (down the hill) from the ore zone on the north side. This cut exposed vein formation in two places where it cut the structure. Further work is indicated here. The other bulldozer work consisting of 40 hours was accomplished on the west vein which is located about 150 feet west of the main adit. Drilling, blasting and stripping on this structure has opened up antimony along a continuous strike length of 150 feet, which is roughly parallel to the vein in the adit. More work is indicated here and will be carried on during the first week of July.

We were required to do considerable repair work on the Jeep Pickup as evidenced by Invoice Nos. 26 and 29. However, it must be understood that to prepare this pickup for the season's work on the Pelos project we installed a new motor last fall, and this spring purchased four new tires. These expenses came to better than $400.00 which were not paid by any DMA funds. Therefore, we feel it is fair to allow the repair work which we have submitted this month.

It is planned to completely survey the Pelos with a transit during July and leave transit stations which can be used to tie in short Brunton surveys. The level line, solar work, and tunnel survey have been completed.

Kindly send payment to our account, First Security Bank of Idaho, Boise, Idaho

Very truly yours,
E.O.

Contract Idm-E258

Dear Mr. Reed:

In reply to your letter of July 15 we wish to submit the requested map, showing the location of the bulldozer work done during the month of June.

With regard to the discrepancy of 18 feet of the reported advance made in No. 1 Drift, it is regrettable but I must state that either my scaling from the map or taping from my last survey station was in error by that amount, and the government's measurements are therefore correct. Likewise, there was a misunderstanding on starting point for the work unders this contract.

Could we impose upon you to request full-speed ahead on the vouchering and payment of our June invoice.

Very truly yours,

Ernest Oberbillig

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MEMORANDUM

To: Chairman, Operating Committee, DMEA, Washington, D. C.

From: Acting Executive Officer, DMEA Field Team, Region II

Subject: Docket DMEA--2193 (antimony), Contract Idm-E258
GOP Antimony, Inc.

A memorandum from E. A. McGill, Mining Engineer, U. S. Bureau of Mines, is forwarded herewith in reply to your letter of July 25, 1952, concerning the May Progress Report submitted under the captioned contract.

The several questions raised regarding this progress report apparently are answered in Mr. McGill's memorandum.

E. A. Magill, Mining Engineer, Bureau of Mines

Letter from G. C. Selfridge dated July 25, 1952
RE: Docket No. DMEA 2193 (Antimony), Contract Bm-E258
G.O.P. Antimony, Inc., Okanogan County, Washington

In reply to subject letter:

Paragraph I — A copy of a letter from the Fiscal Officer, W. Rulon Lee, to the G.O.P. Antimony, Inc. is attached. I believe this explains the deduction of $710.42.

Paragraph II — Mr. Lee's letter explains the disallowance of the $550.00. Amendment No. 1 to the contract allows $550.00 for rehabilitation of No. 1, 2, and 3 adits. This amendment was not returned by the operator in time to reach Mr. Lee prior to the submission of the voucher. As you will note, the operator has claimed the full amount allowable for the rehabilitation of the three adits against the No. 1 adit.

Paragraph III — Mr. Lee's letter explains the deletion of $120.00, Amendment No. 1 allows for the rental of all the items excepting the slusher and bucket. The rental of the slusher and bucket is not an allowable cost, inasmuch as they were moved (without permission) from the Hermada project (Contract I-DMA-E22, Docket 506X (antimony) in Idaho. They were purchased for that project with the government participating in their purchase. If they are to be charged against the G.O.P. Contract, then their rental should in turn be credited to the Hermada project.

July 6, 1952

MEMORANDUM TO: GOP Antimony, Inc., Twin Springs, Idaho

From: W. Rulon Lee, Fiscal Officer, Bureau of Mines, Albany, Oregon

Subject: Form MF-104 submitted for May, 1952, Cont. Idm-E258.

The following invoices were deducted from the above referenced form as rental of this equipment is not covered by contract Idm-E-258:

Western Machinery Co.	$50.00
Drill & Sinker Leg	
GOP Antimony, Inc. - Hermada Mining Co.	
Ore Car	$10.00
GOP Antimony, Inc. - Hermada Mining Co.	
Slusher and bucket	$50.00
Geo. Gibson	
Air Motor Driven Grinder	$10.00

Should the contract be amended to include rental on these items, they can be reclaimed at a later date.

Your form MF-104 for May was further reduced $550.00 for rehabilitation and repairs to tunnel, as this was not covered in the contract. Social Security was reduced to $10.34, Workmen's Compensation was reduced to $32.68 and Unemp. Comp. was reduced to $18.61, to agree with the reduction of $409.50 labor reduction from item 3(a).

STRATEGIC AND CRITICAL MINERAL EXPLORATION PROGRAM
OPERATOR'S MONTHLY PROGRESS REPORT

Operators are to submit monthly reports to the designated field representative of the Defense Minerals Administration. Reports are to be submitted in quadruplicate prior to the 15th day of the month following the reporting period.

Narrative.—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered is to be furnished.

Maps.—Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

Cost Accounts.—All applicable parts of this form are to be filled in. This report will form the basis for payments of the Government's participating share of expenses. Audits of accounts may be made from time to time.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this report is correct and complete to the best of their knowledge and belief.

Mr. Glenn A. Cool
Mining Engineer
U. S. Bureau of Mines
1201 E. Division
Spokane 2, Washington

Subject: Monthly Progress Report
May, 1952
Contract: Ida I - 257
Falcon Antimony (Unk.)

Dear Mr. Cool:

Enclosed with this memorandum report are six copies of Monthly Progress Report Form IP 104, to cover cost distribution of the Falcon Antimony for the month of May, 1952. Also you will find two copies of the cost distribution sheet and supporting invoices and documents as well as the payroll sheet, and three maps.

The crew moved onto the Falcon property on May 1, and started work on that date. It was found that considerable caving of the drift had taken place between stations 2 - 3 and 4 shown on Map 1 enclosed. This caved ground was cribbed up, timbered, and the curve widened. No ore was found at Station 4, but was small in quantity. The vein was followed for 9[illegible] feet and the vein widened to 1" inches as shown on the map and will carry an estimated 3 [illegible]. in the face at the Station 5.

Bulldozing work totaling 142 hours was accomplished at the points marked on Map 3. An extremely rich vein was stripped and exposed in the North area shown on Map # 2.

By stripping the middle outcrop just west of the open pit area shown on Map # 2, a stibnite vein four inches thick and 15 feet long was exposed, but bedrock of the rock prohibited further exploration at this time. It is proposed to rent a portable Trenton-Corrugator to facilitate further exploration on this vein and other places where some digging may be needed to carry shallow bulldozer cuts.

It is proposed that further stripping and exploration cuts be made by bulldozer to extend the vein stripping both up and down the hill (North and South) on the North area vein and to further strip the first vein discovered 200 feet west of the vein exposed by the open pit work. The bulldozer stripping on this property is continuing with marked success and soon will be ready to open up more ore.

The drift work will be continued in following the vein under the open pit during June.

We trust you will find the report in order and will forward the Final Check or to forward payment thereon to the First Security Bank of Idaho, N. A., Boise, Idaho, for deposit in the account of C.O.D. Antimony, Inc.

Very truly yours,

Ernest Oberfelling
