TITLE Pavillion

PROJECT NO. GC12RT00EV70000

BOOK NO.

1

Work continued from Page

Recieved sample bottles from Test America laboratories.

Fourteen coolers were received with chain-of-custody seals in tact

After sorting through coolers I found we were short all the MBAS bottles and Trip blanks.

I contacted the laboratory and requested MBAS bottles and a whole new set of VOC vials with trip blanks be put together. Scott Edmiston will pick these "New" bottles up on Monday from the lab.

In the mean time I put together bottle sets with the bottles I have available. Ten bottle sets were put together.
