ENGINEERING GEOLOGY OF THE NORTHEAST CORRIDOR WASHINGTON, D. C., TO BOSTON, MASSACHUSETTS

SOURCES OF PUBLISHED DATA FOR COASTAL PLAIN AND SURFICIAL GEOLOGY

Prepared by the
United States Geological Survey
at the request of the
United States Department of Transportation

SCALE 1:1 500 000

20 0 20 40 60 80 100 MILES

20 0 20 40 60 80 100 KILOMETERS

1967

EXPLANATION

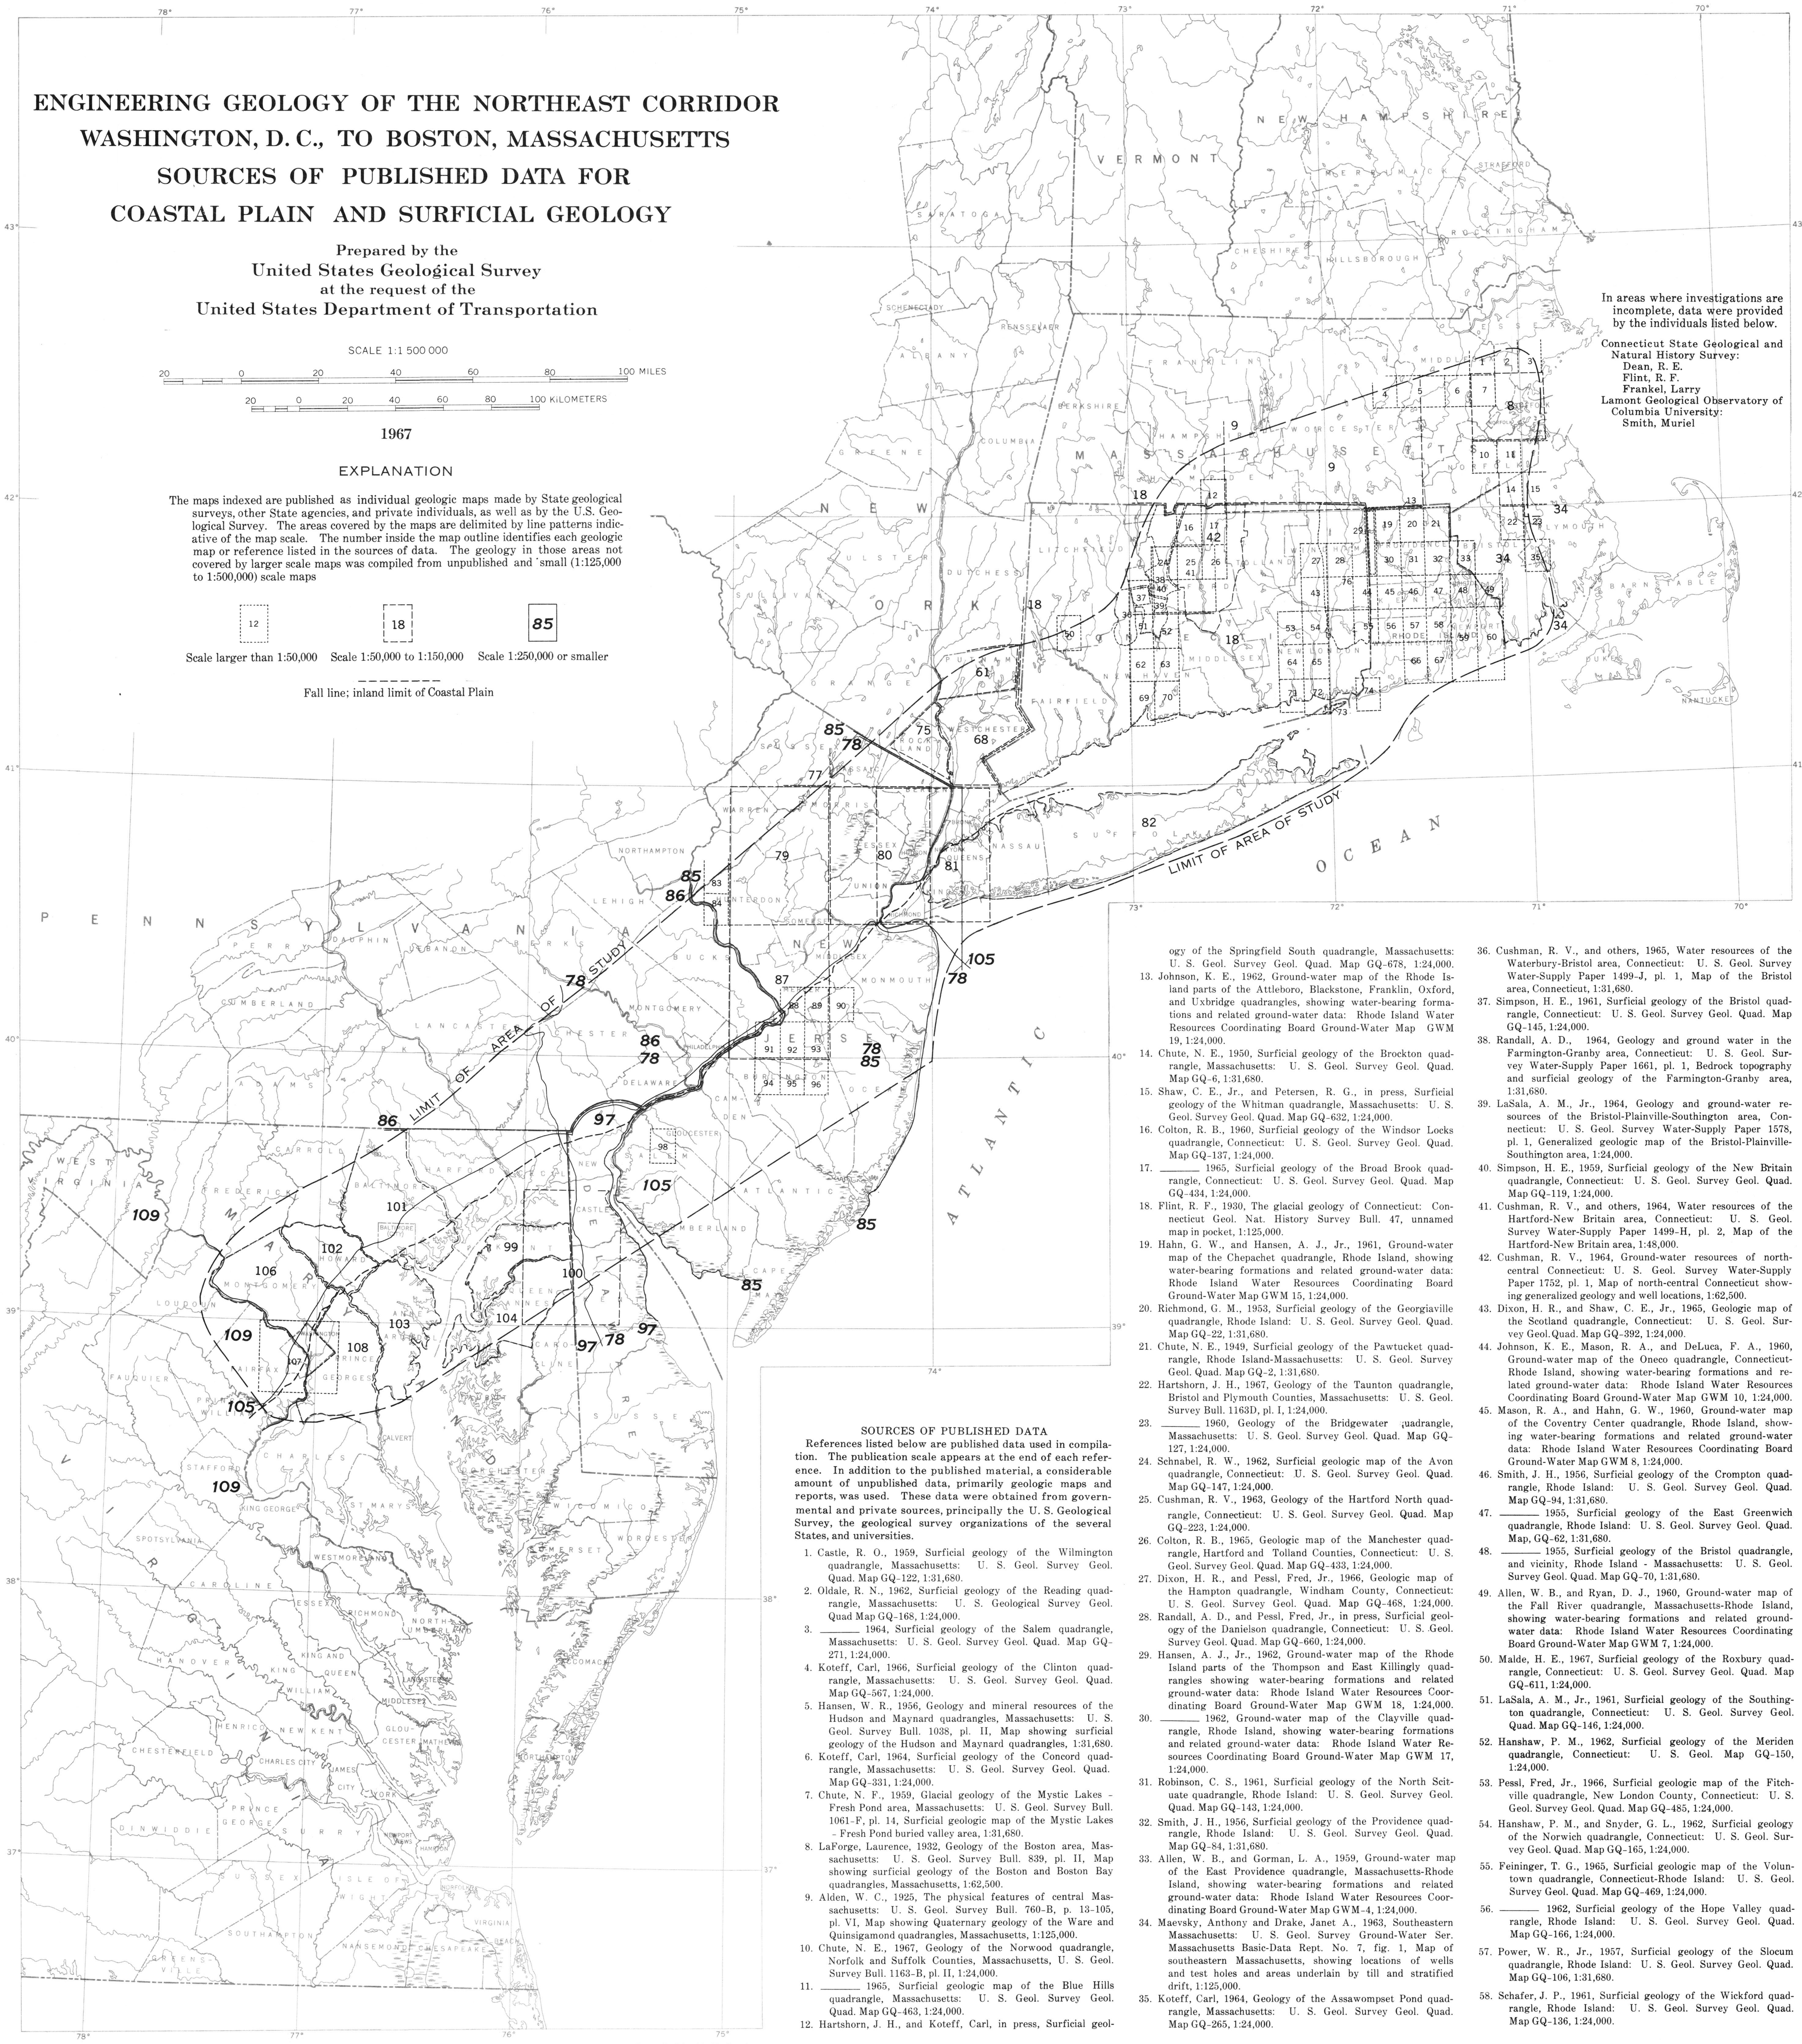
The maps indexed are published as individual geologic maps made by State geological surveys, other State agencies, and private individuals, as well as by the U.S. Geological Survey. The areas covered by the maps are delimited by line patterns indicative of the map scale. The number inside the map outline identifies each geologic map or reference listed in the sources of data. The geology in those areas not covered by larger scale maps was compiled from unpublished and small (1:125,000 to 1:500,000) scale maps

12 — Scale larger than 1:50,000

18 — Scale 1:50,000 to 1:150,000

85 — Scale 1:250,000 or smaller

Fall line; inland limit of Coastal Plain



In areas where investigations are incomplete, data were provided by the individuals listed below.

Connecticut State Geological and Natural History Survey:
Dean, R. E.
Flint, R. F.
Frankel, Larry
Lamont Geological Observatory of Columbia University:
Smith, Muriel

Base by U.S. Geological Survey

Compiled by M. E. Gardner

SOURCES OF PUBLISHED DATA

References listed below are published data used in compilation. The publication scale appears at the end of each reference. In addition to the published material, a considerable amount of unpublished data, primarily geologic maps and reports, was used. These data were obtained from governmental and private sources, principally the U. S. Geological Survey, the geological survey organizations of the several States, and universities.

1. Castle, R. O., 1959, Surficial geology of the Wilmington quadrangle, Massachusetts: U. S. Geol. Survey Geol. Quad. Map GQ-122, 1:31,680.
2. Oldale, R. N., 1962, Surficial geology of the Reading quadrangle, Massachusetts: U. S. Geological Survey Geol. Quad Map GQ-168, 1:24,000.
