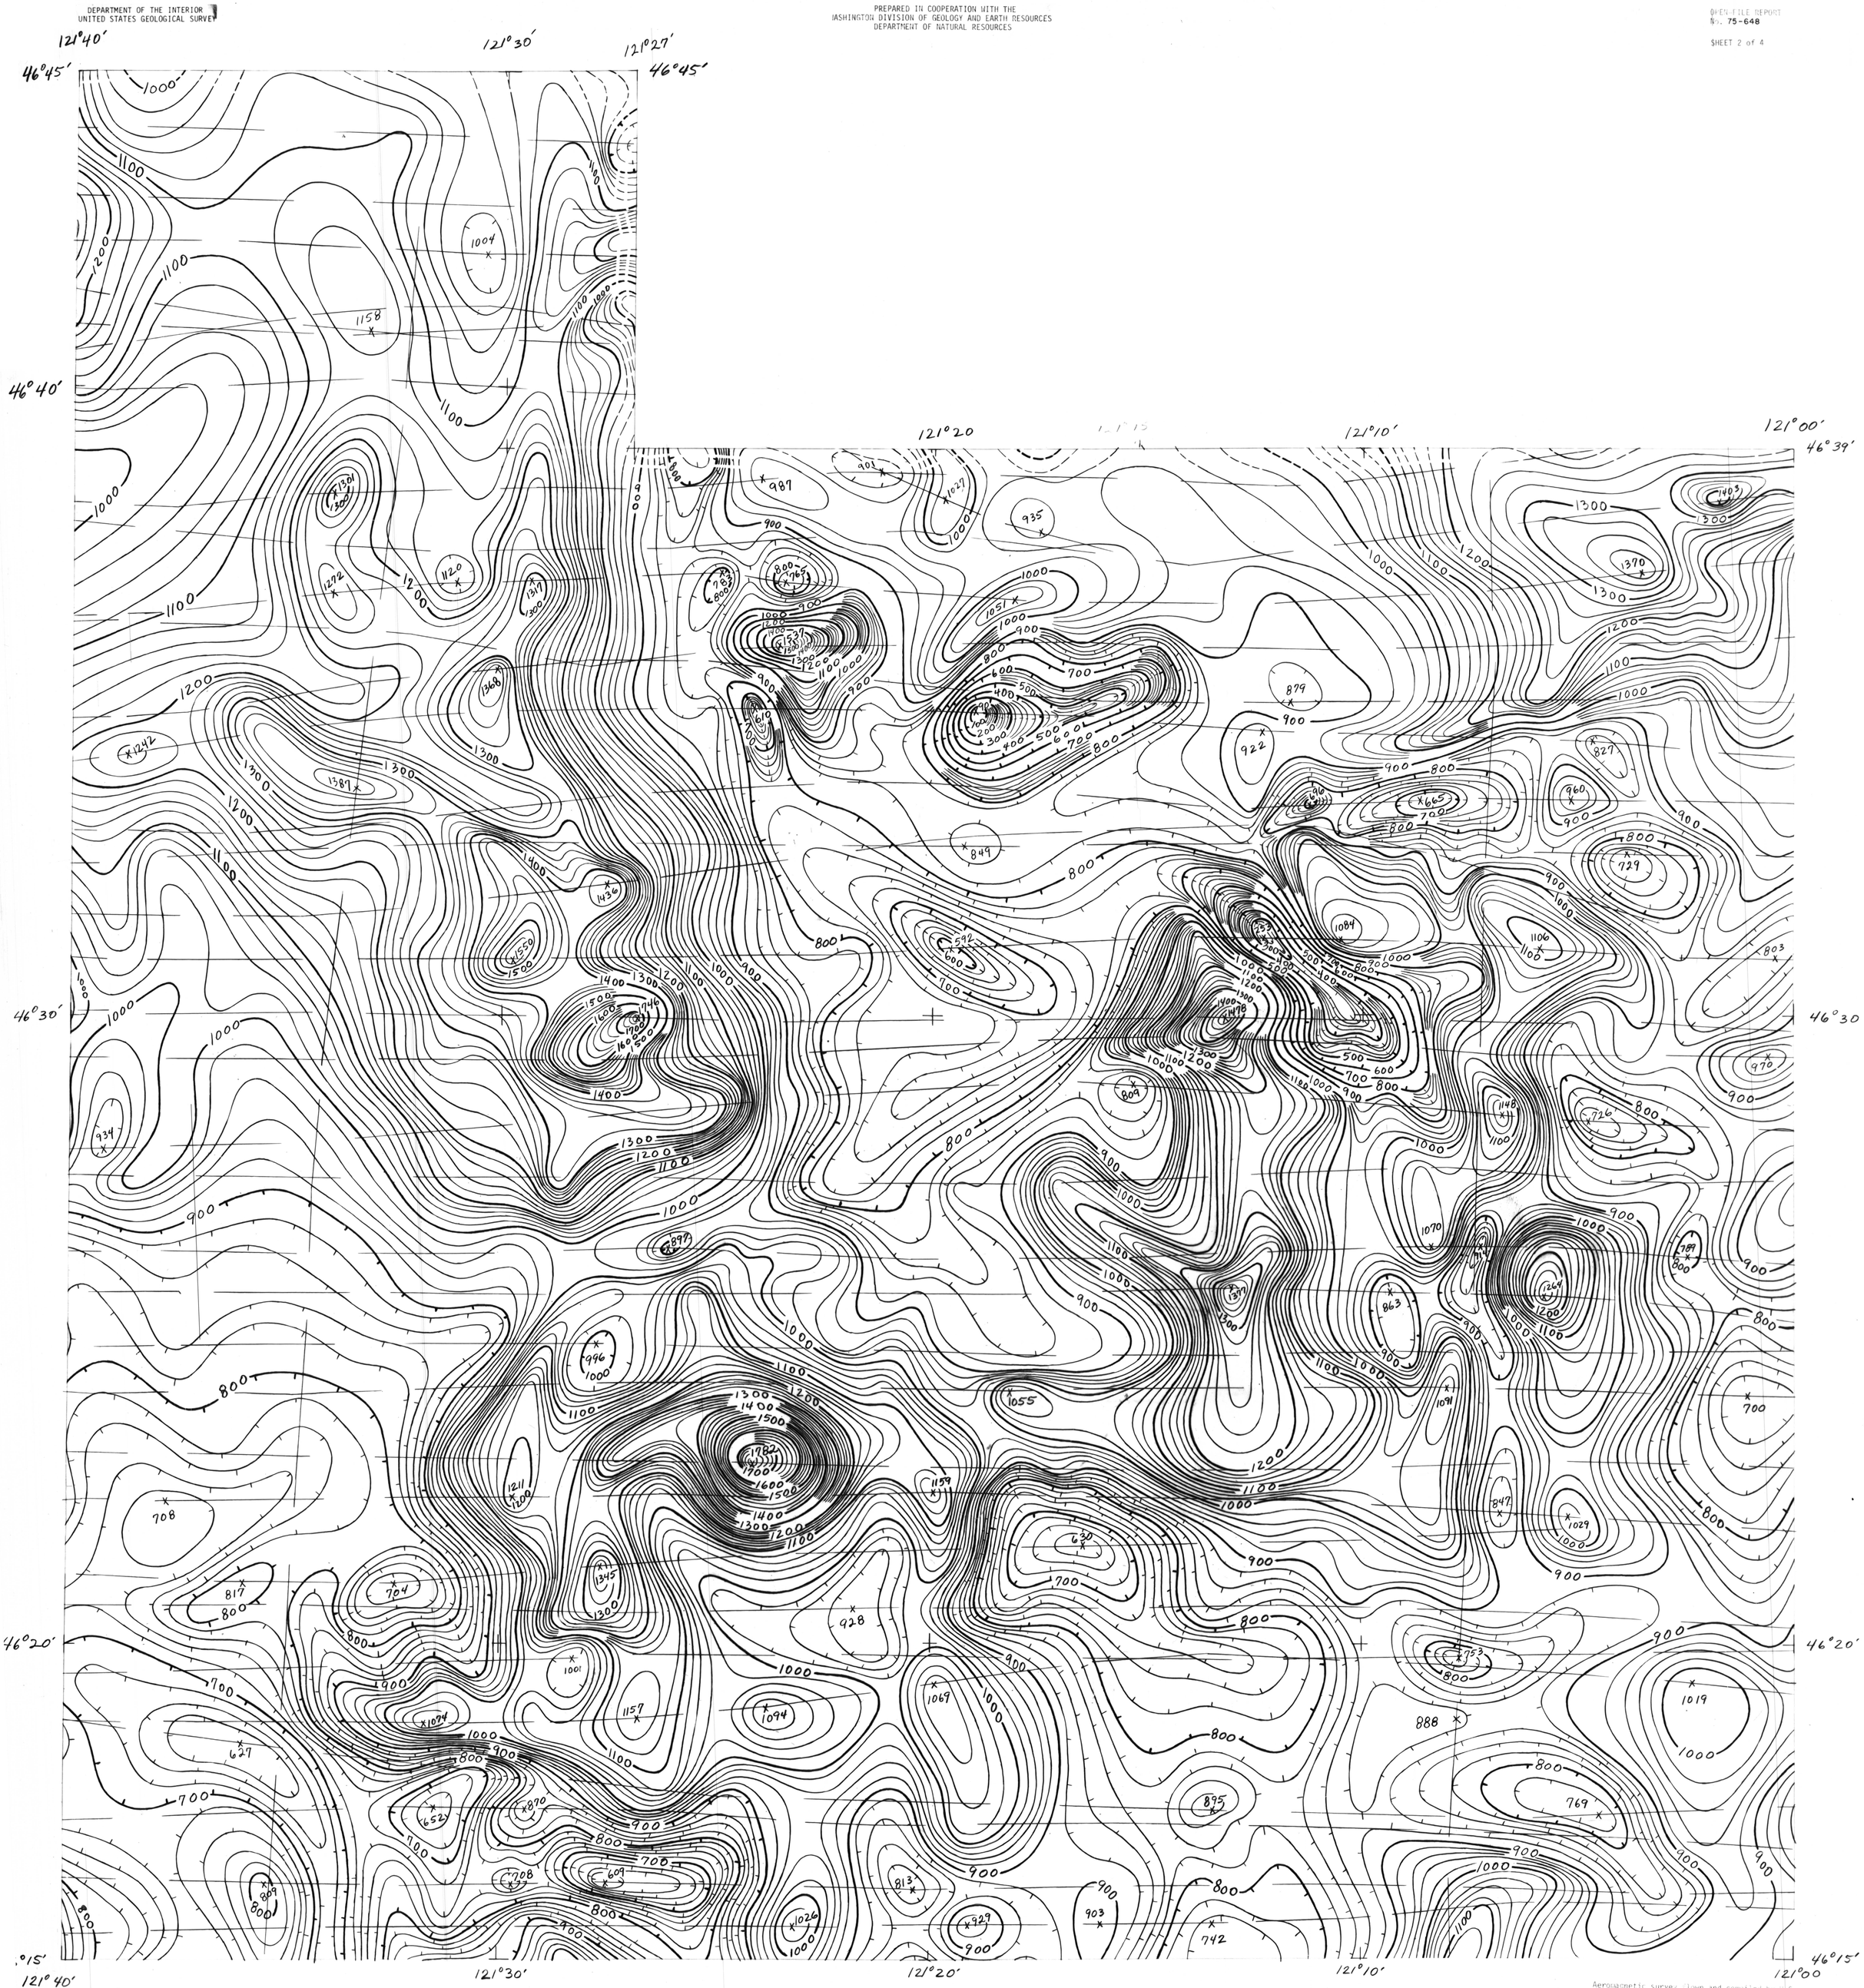
PREPARED IN COOPERATION WITH THE
WASHINGTON DIVISION OF GEOLOGY AND EARTH RESOURCES
DEPARTMENT OF NATURAL RESOURCES

OPEN-FILE REPORT
No. 75-648

SHEET 2 of 4



Grid from U.S. Geological Survey.

Aeromagnetic survey flown and compiled by U.S. U.S. Geological Survey. Flown at 9,000 feet barometric elevation.

EXPLANATION

Magnetic contours

Showing total intensity magnetic field of the earth in gammas relative to arbitrary datum. Hachured to indicate closed areas of lower magnetic intensity. Dashed where data are incomplete. Contour interval is 20 gammas.

Main magnetic field of earth for 1965, updated to 1974, removed (Fabiano and Peddie, 1969), 1,000 gammas added.

Location of measured maximum or minimum intensity within closed high or closed low

Flight path

Showing location and spacing of data
