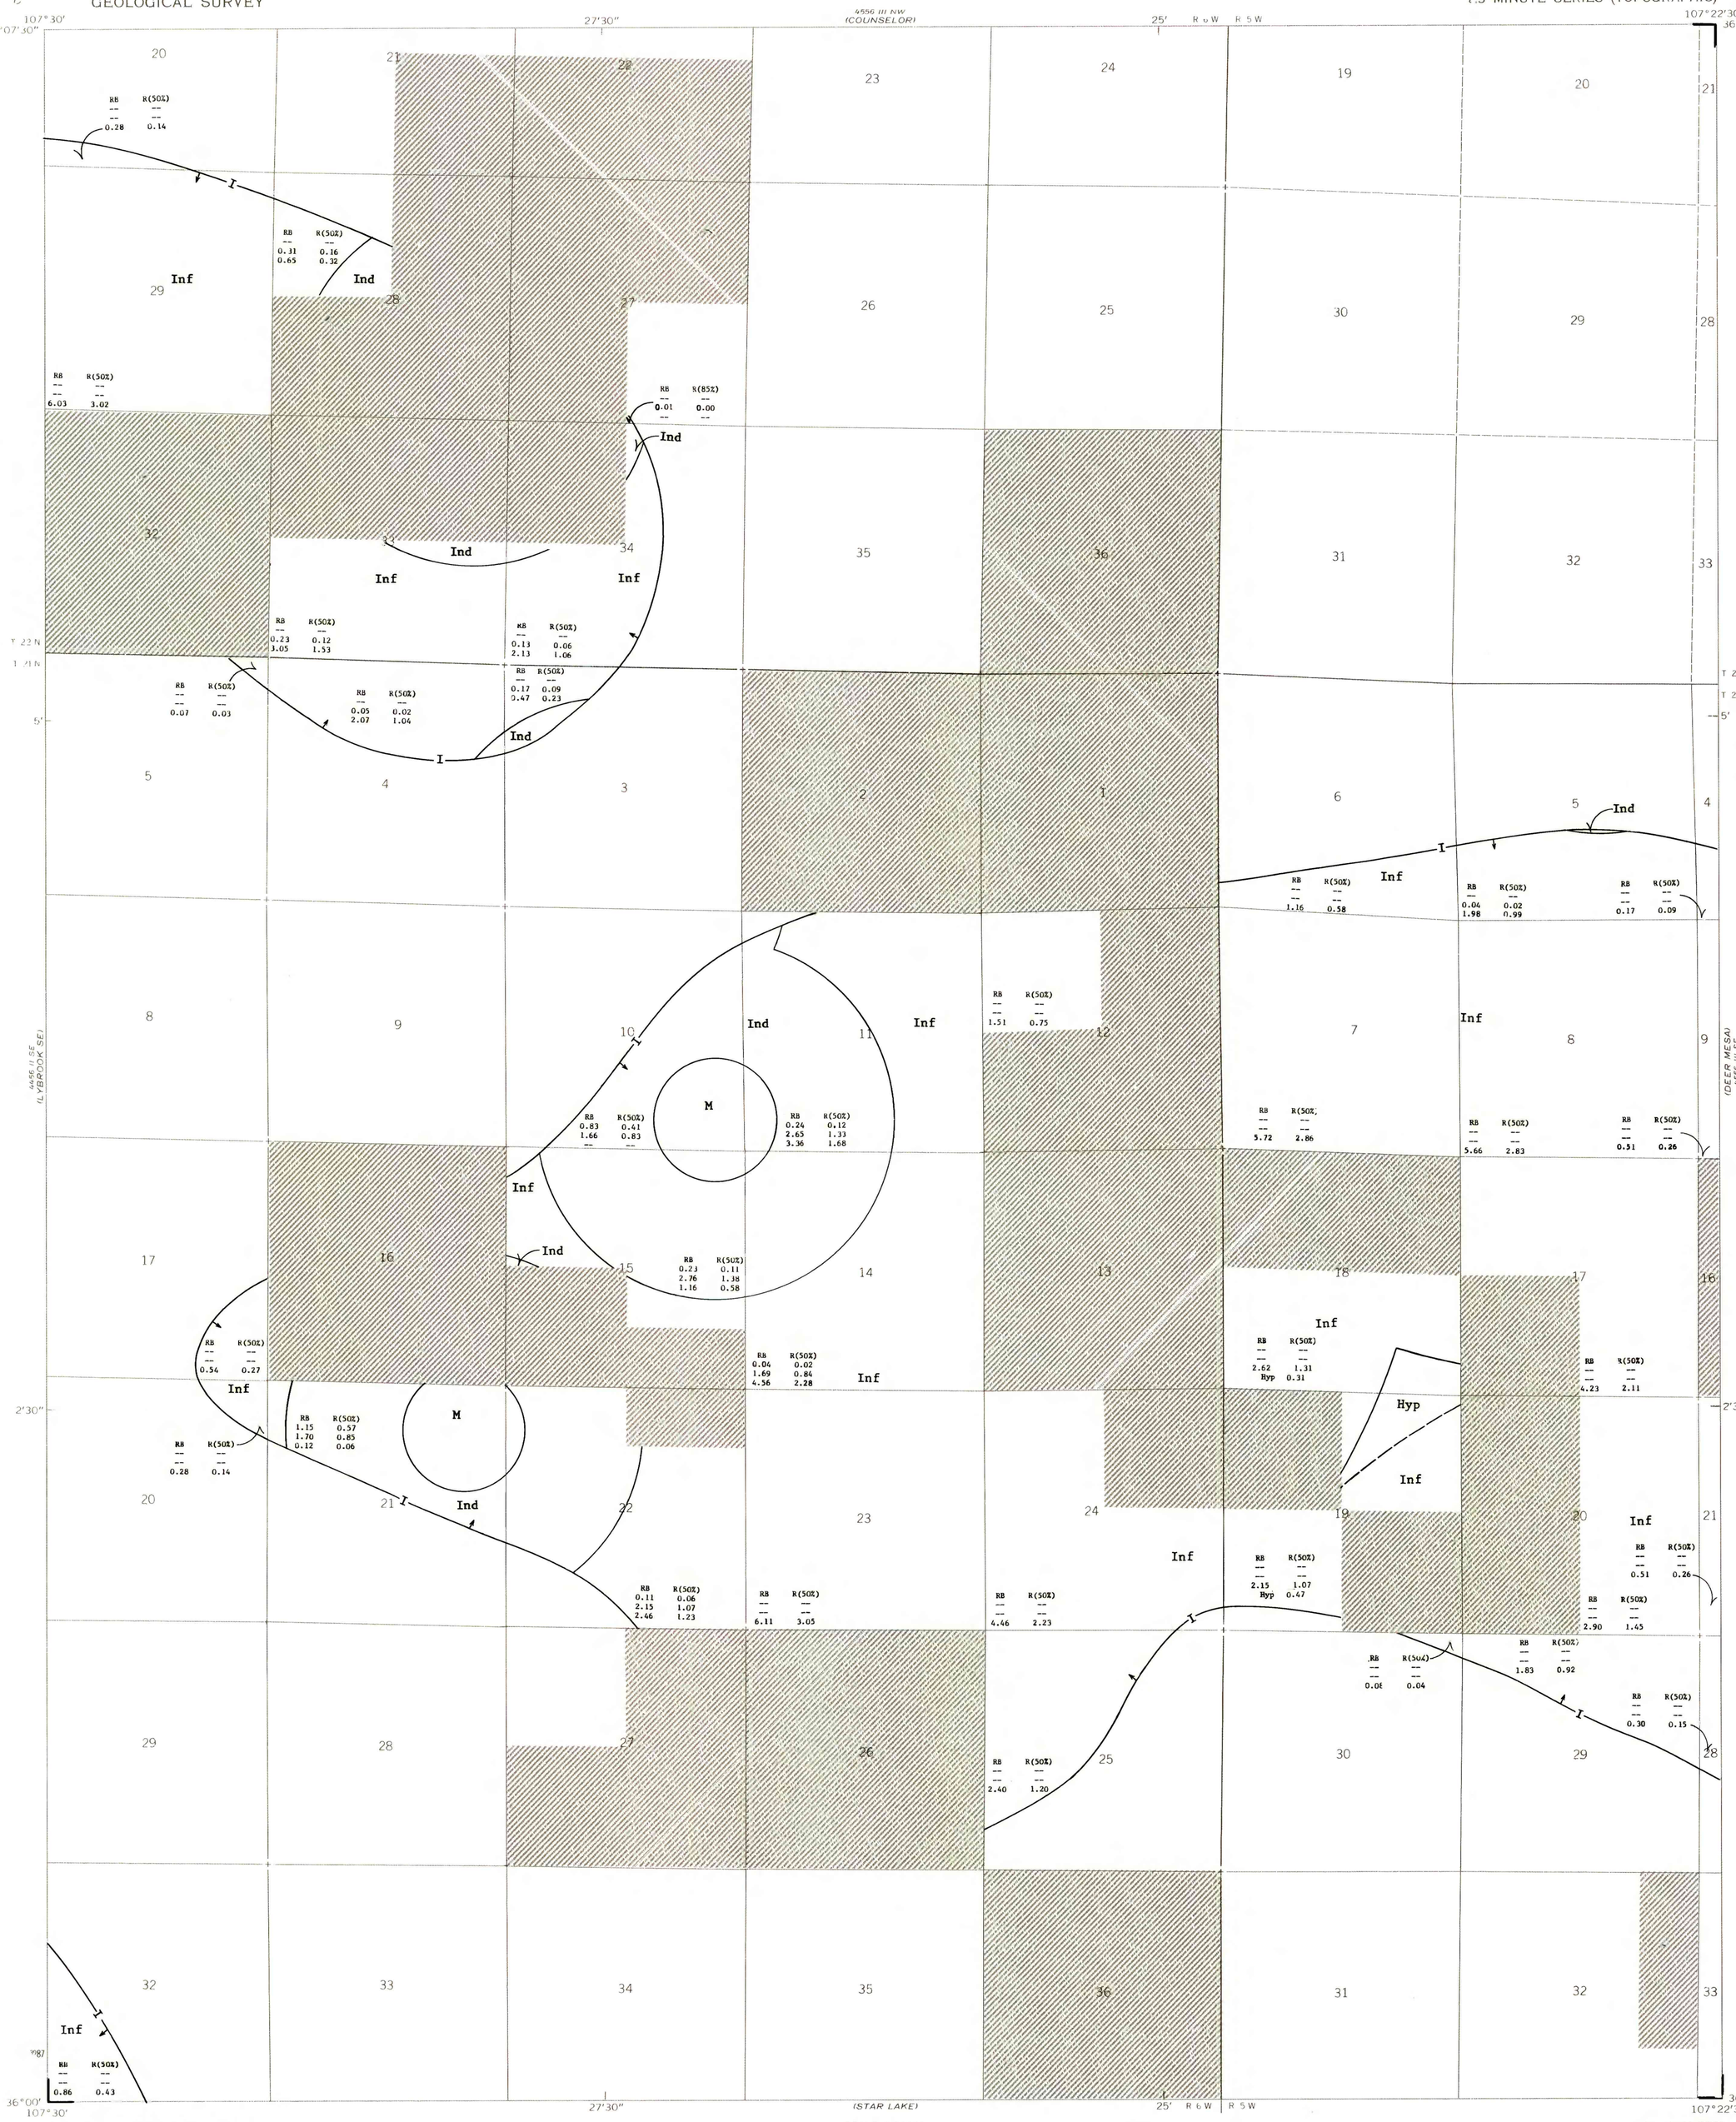
MULE DAM QUADRANGLE
NEW MEXICO–SANDOVAL CO.
7.5 MINUTE SERIES (TOPOGRAPHIC)

OPEN FILE REPORT 79-112
PLATE 10 OF 14



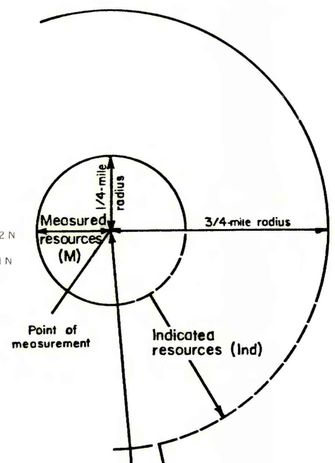
EXPLANATION

NON-FEDERAL COAL LAND – Land within the KRCRA boundary for which the Federal Government does not own the coal rights.

BOUNDARY OF IDENTIFIED RESERVE BASE COAL – Drawn along the 5-foot (1.5-m) coal isopach (I). Arrow points toward area of identified Reserve Base coal.

RB	R (50%)	
--	--	(Measured resources)
--	--	(Indicated resources)
2.15	1.07	(Inferred resources)
Hyp	0.47	(Hypothetical resources)

IDENTIFIED AND HYPOTHETICAL COAL RESOURCES OF THE FRUITLAND 1 COAL BED – Showing totals for Reserve Base (RB), Reserves (R), and hypothetical (Hyp) resources, in millions of short tons, for each section or part(s) of section of Federal coal land outside the stripping-limit line. Dash indicates no resources in that category. Reserve Base (RB) x the Recovery Factor (50 percent) = Reserves (R).



BOUNDARY LINES – Enclosing areas of measured (M), indicated (Ind), and inferred (Inf) coal resources. Dashed where projected from adjacent quadrangles.

Coal outside the 3-mile radius is a hypothetical resource.

To convert short tons to metric tons, multiply short tons by 0.9072.

To convert miles to kilometers, multiply miles by 1.609

Values given for subsurface Reserve (R) tonnages represent 50% of the calculated Reserve Base (RB) values. Calculated Reserve Base and Reserve values have been rounded off to the nearest 10,000 tons of coal.

Reserve Base and Reserve values of 0.00 represent resources of less than 5,000 tons of coal.

Base from U.S. Geological Survey, 1966
