SCHROEDER-DEER CREEK QUADRANGLE, WYOMING

1:24,000

MAP GQ-1551

GEOLOGIC MAP SYMBOLS
COMMONLY USED ON MAPS OF THE UNITED STATES GEOLOGICAL SURVEY
(Special symbols are shown in explanation)

— Contact—Dashed where approximately located; short dashed where inferred; dotted where concealed

 45 Contact—Showing dip; well exposed at triangle

— Fault—Dashed where approximately located; short dashed where inferred; dotted where concealed

 20 Fault, showing dip—Ball and bar on downthrown side

— Normal fault—Hachured on downthrown side

— Fault—Showing relative horizontal movement

— Thrust fault—Sawteeth on upper plate

↔ Anticline—Showing direction of plunge; dashed where approximately located; dotted where concealed

↑ Asymmetric anticline—Short arrow indicates steeper limb

— Overturned anticline—Showing direction of dip of limbs

↔ Syncline—Showing direction of plunge; dashed where approximately located; dotted where concealed

↑ Asymmetric syncline—Short arrow indicates steeper limb

— Overturned syncline—Showing direction of dip of limbs

↔ Monocline—Showing direction of plunge of axis

→ 20 Minor anticline—Showing plunge of axis

→ 60 Minor syncline—Showing plunge of axis

Strike and dip of beds—Ball indicates top of beds known from sedimentary structures

 70 Inclined  Horizontal
 Vertical  40 Overturned

Strike and dip of foliation
 20 Inclined  Vertical  Horizontal

Strike and dip of cleavage
 15 Inclined  Vertical  Horizontal

Bearing and plunge of lineation
 15 Inclined  Vertical  Horizontal

Strike and dip of joints
 40 Inclined  Vertical  Horizontal

Note: Planar symbols (strike and dip of beds, foliation or schistosity, and cleavage) may be combined with linear symbols to record data observed at same locality by superimposed symbols at point of observation. Coexisting planar symbols are shown intersecting at point of observation.
