Digital cartography by R.S. Koch
Manuscript approved for publication September 11, 1998

- EXPLANATION**
[Where symbols overlap, see database to clarify deposit type]
- ◆ Gold deposit
 - ◆ Epithermal quartz-sulfate, quartz-sulfuric gold
 - † Breccia pipe
 - ⊙ Low-sulfide, gold-quartz vein
 - ⊙ Placer gold-platinum group elements
 - Gold-silver deposit
 - ▲ Distal disseminated
 - Gold-silver quartz-pyrite vein
 - Silver deposit
 - ◇ Silver-copper brecciated dolostone
 - × Polymetallic deposit
 - △ Fault
 - △ Replacement
 - Skarn
 - Vein
 - ◇ Tungsten deposit
 - Skarn
 - ◇ Vein
 - Other metal deposit
 - ☆ Carbonatite, rare-earth-element
 - Copper skarn
 - Iron skarn
 - Placer-iron-titanium
 - Porphyry molybdenum, low-fluorine
 - Tin skarn
 - Zinc-lead skarn
 - Unclassified
 - Nonmetallic deposit
 - Clay
 - Fluorite vein
 - Marble, dolomite, limestone
 - Sand and gravel
 - Vein barite
 - Vein magnesite
 - Volcanic clinders, perlite, and pumice
- Boundary of East Mojave National Scenic Area (EMNSA, this report)
- - - - - Boundary of Mojave National Preserve (current as of March 2007)

Localities of Identified Mineral Occurrences in the East Mojave National Scenic Area, California

Compiled by
Kenneth R. Bishop
2007
