EXPLANATION
STREAMFLOW OR RESERVOIR-CONTENT STATION
CHEMICAL-QUALITY OR SEDIMENT STATION
RIVER BASIN DIVIDE
INSET AREA
The numbers adjacent to each station indicate an abbreviated station number. The normal station number identifier is an eight digit number. Because of the limited space, the number is abbreviated. The prefix 07 is used in the Red and Arkansas River basins; 08 is used in all other basins. For example, the number 475 in the Trinity River basin would be station number 08047500.
