This intercretive map of seafloor topography was compiled using digital data from the National Ocean Service (NOAA) Hydrographic Data Base distributed by the National Geophysical Data Center, 325 Broadway, Boulder, CO 80303. Bathymetric contours were computer-generated (using a beta-test version of GRID, 1991) from 624,000 data points at the USGS Center for Marine and Coastal Geoscience, Woods Hole, MA 02543. This map is not intended for navigational purposes.
