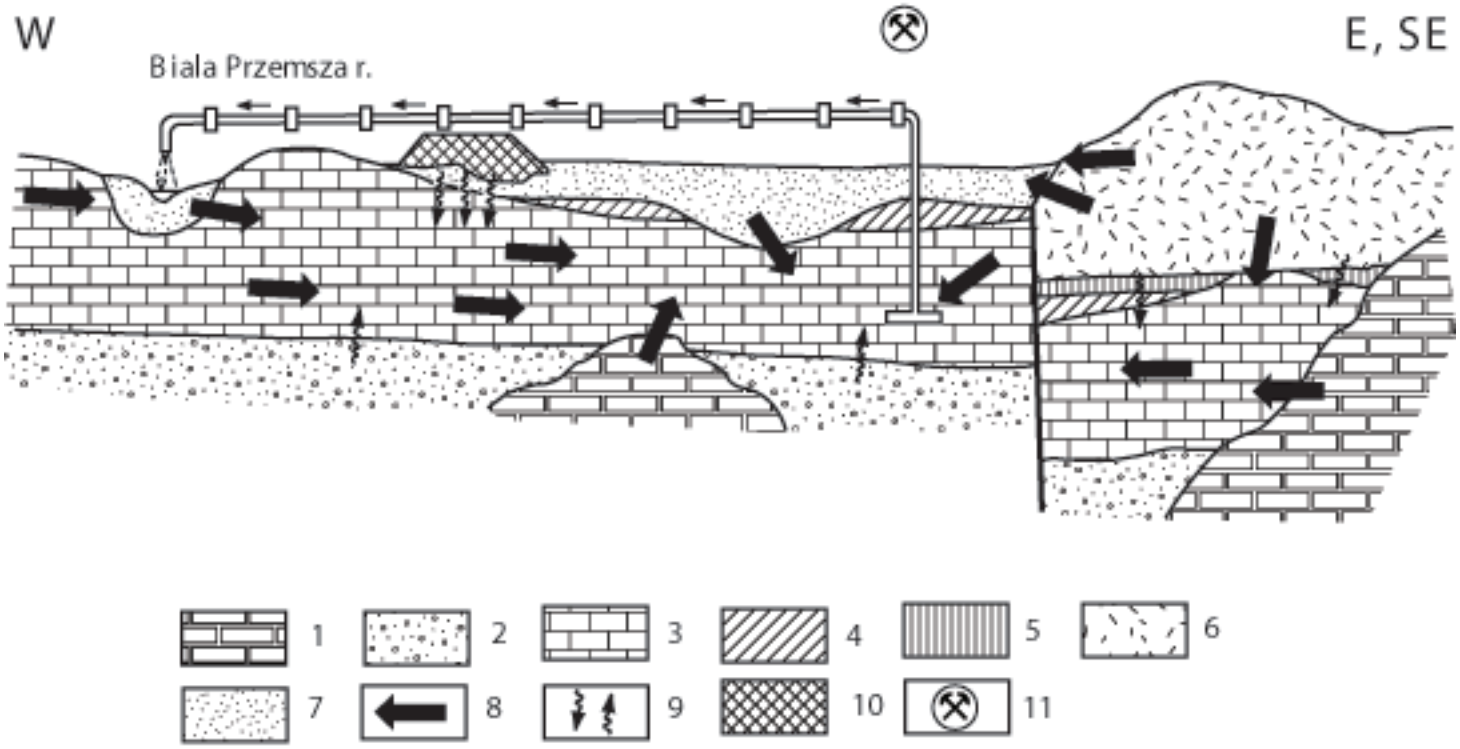
Figure 4. Generalized hydro-geologic cross-section of the Upper Silesia Ore Distrct, Poland.



1. Devonian and/or L. Carboniferous carbonates (aquifer)
2. Permian - conglomerates
3. Triassic carbonates (aquifer)
4. Kenper - clays
5. Middle Jurassic - marls
6. Upper Jurassic - limestones (aquifer)
7. Quaternary fluvioglacial mainly sands, gravels - (aquifer)
8. Direction of groundwater flow
9. Seepage
10. Tailings
11. Mine
