
EXPLANATION

Well, showing deepest rock penetrated

Ordovician

Cambrian

Precambrian

X Location of measured outcrop

72 (572) Thickness of unit, in feet

Underlined figures are reported thicknesses. Parenthesis indicates partial penetration of unit, (underlined figures are reported partial penetration)

500 Thickness line

Thickness interval 100 feet, dashed where inferred

Less than 25 percent sandstone

25–50 percent sandstone

50–75 percent sandstone

More than 75 percent sandstone
