THICKNESS OF ROCKS OF SILURIAN AGE, ARKANSAS

10 0 10 20 30 40 50 Miles

EXPLANATION

Well, showing deepest rock penetrated

Silurian

Ordovician

Cambrian

Precambrian

X
Location of measured outcrop

179 (99)
Thickness of unit, in feet
Underlined figures are reported thicknesses. Parenthesis indicates partial penetration of unit

13+
Thickness, in feet of incomplete exposure of unit along outcrop

150
Thickness line
Thickness interval 50 feet, dashed where inferred
