BOUGUER GRAVITY-ANOMALY MAP OF THE URAVAN AREA MESA, MONTROSE, AND SAN MIGUEL COUNTIES, COLORADO

Scale 1:125 000

1 0 1 2 3 4 5 Miles

Contour interval 1 milligal

Contour values are 300 mgal. higher than bouger anomalies for a reduction density of 2.50 relative to the 1930 international gravity spheroid

+ Gravity station

Dry hole
