GUIDE TO GROUND-WATER DATA, COOK INLET BASIN, ALASKA

By G. W. Freethy

INTRODUCTION

Basic data form the foundation for planning, development, and management in any geographic area of interest. These data should be readily available to all concerned agencies, firms, and individuals. The purpose of this report is to describe the types of ground-water data available for the Cook Inlet basin, to illustrate the general distribution of data sites on maps, and to describe how data are identified, stored, and retrieved. Ground-water data similar to those described in this document are also available for other areas in Alaska and may be obtained in a manner similar to that reported here.

The Cook Inlet basin in south-central Alaska lies between latitudes 58°40' and 63°40' N., and longitudes 146°07' and 154°43' W., (fig. 1.). The Alaska Range forms a lofty rim at the basin's western and northern borders; the less imposing Chugach and Kenai ranges bound the basin on the east and southeast. The southern end of the basin opens into the Gulf of Alaska. The physiography ranges from broad, flat, swampy lowlands at or near sea level to glaciated mountain peaks. Climatic conditions vary from the moderate maritime conditions at Seldovia to the quite severe continental conditions of the upper Susitna basin. The basin constitutes less than 7 percent of the total land area of Alaska but holds more than 50 percent, or roughly 200,000, of the State's inhabitants.

Funding for the collection and compilation of ground-water data and for the preparation of this report was shared by the Alaska Division of Geological and Geophysical Surveys, the Alaska Department of Natural Resources, the City of Kenai, the Kenai Peninsula Borough, the Municipality of Anchorage, and the South-central Resources Study (Level B) of the Alaska Water Study Committee.

TYPES OF GROUND-WATER DATA AVAILABLE

Ground-water data generally fall into three categories: general site information, quantitative data, and quality of the ground water. General site information covers the site's location, physiographic description, ownership history, site identification numbers, and site-visit data. The quantitative data comprises information such as well depths, construction and yield of well, discharge of springs, water-level measurements, pumpage volumes, and subsurface hydrologic information. The ground-water quality data consist of field and laboratory water-chemistry values and pertinent sampling information.

Base from U.S. Geologic Survey, Map C.

Figure 1.--Major drainage basins of Alaska.

SITE IDENTIFICATION AND LOCATION

Two independent numbering systems are used for storing ground-water site data: A 15-digit unique number called the Site Identification Number which is used for computer storage, and an 18-character identification number (16-character for springs) called the Local Number, which is used for office file storage and retrieval.

The Site Identification Number is the latitude and longitude of the preliminary location of the site, with a 2-digit sequence number at the end. Once assigned, the number is never altered, even if a more accurate location is subsequently assigned to the site. The sequential number prevents duplication of the Site Identification Number where more than one site occurs at or near the same latitude and longitude. For example, three wells located very near each other, seemingly at the same latitude and longitude, would have Site Identification Numbers assigned as follows:

614630151294001
614630151294002
614630151294003

The well ending with 01 was located and stored first, 02 second, 03 third and so on.

The Local Number is derived from the official rectangular subdivision of public lands (fig. 2). The first two letters of this number indicate, respectively, the letter symbol assigned to the baseline and meridian and the quadrant formed by the intersection of the baseline and the principle meridian (fig. 3). The first three digits indicate the Township in which the well is located, the next three digits the Range, and the next two, the section. Letters following the section number indicate the $\frac{1}{4}\frac{1}{4}\frac{1}{4}$ subdivisions of the section. Each of these successively smaller subdivisions of the section is lettered counter-clockwise from the northeast corner (fig. 2). The next digit is a sequential number to distinguish between sites that fall within the same fourth-quarter subdivision. If the site is a spring, the last character is an S after the sequential number. The last three digits in the Local Number form an optional map number. This number is a U.S. Geological Survey office number which is assigned consecutively, beginning with 1, to sites within a single section. It is unique only within that section.

Other numbers are assigned to ground-water sites as supplemental identifiers for more specific groups of users. These identifiers might include a five-digit Alaska Register Number (examples: 01621, 21346, 00067), a three-digit field map number (same as map number in the Local Number), a one- to five-digit Alaska Department of Natural Resources water-use permit number, or a variety of other identifiers assigned to the site by other agencies or in published reports. A current cross-reference list of these numbers for computer-stored information on sites within the Cook Inlet basin is given in table 1.

Figure 2.--Derivation of Local Number from the official rectangular subdivision of public lands.

Figure 3.--Principal meridians and baseline quadrants of the Cook Inlet basin.

Three maps showing ground-water site locations within the Cook Inlet basin are included with this report (figs. 4 through 6). Figure 4, at a scale of 1:48,000, shows the ground-water site distribution in the densely populated area of the Municipality of Anchorage. The remaining two maps are at a scale of 1:250,000 and show the overall distribution of ground-water sites throughout the basin. Insets within these two maps are at a scale of 1:125,000 and show ground-water site locations for the major developed areas outside the Municipality of Anchorage. These two small-scale maps also show sites for which there are laboratory water-quality analyses.

STORAGE OF GROUND-WATER DATA

Ground-water data of many types for the Cook Inlet basin are stored in the office files of the U.S. Geological Survey, Water Resources Division, Anchorage Subdistrict Office. Recently, computerization has introduced a more expedient system for the storage and retrieval of data. The National Water Data Storage and Retrieval System (WATSTORE) is used by many state and federal agencies to store a variety of information about the water resources of the nation. Currently, selected ground-water data are contained in four files within the WATSTORE system: the Station Header File, the Water-Quality File, the Daily Values File, and the Ground-Water File. The Station Header File indexes all sites for which data have been stored in the Water-Quality File and the Daily Values File. The Water-Quality File stores chemical, physical, biological or radiochemical characteristics determined for ground water obtained from wells or springs. The Daily Values File stores water-level measurements made in wells on a daily or continuous basis (by continuous recorders). The Ground-Water File is independent of the Station Header File but is cross-referenced to the Water-Quality and Daily Values File. The Ground-Water File stores inventory data on ground-water sources only. These data include site location, field water-quality measurements, geohydrologic characteristics and water-level measurements made at irregular intervals.

A list of the data most commonly recorded for wells and springs is given in table 2. Tables 3 and 4 show, respectively, computer-stored ground-water sites from which water samples have been taken and analysed for some type of water-quality determination, and those sites currently used for observation of water levels.

Entering historic and new ground-water site data into the WATSTORE system is a continuing process. Tables 1 and 3 list only those ground-water sites that have been computer stored up to the date of this publication. Lists obtained after the date of this publication may contain data on many more ground-water sites.

ACCESS TO GROUND-WATER DATA

Three sources for Cook Inlet ground-water data are available: published reports on specific project areas, office files, and computer-stored data. A list of selected published reports that contain ground-water data is given in table 5. The data in these reports are usually not exhaustive and are selected according to the purpose of the subject. Most of these reports can be found in the library of the U.S. Geological Survey, 218 E Street, Anchorage, Alaska.

The original documents that describe ground-water data can be examined at the Anchorage Subdistrict Office of the U.S. Geological Survey, Water Resources Division, 1209 Orca St., Anchorage, Alaska 99501. These documents may include chemical analyses, geophysical logs, water-level hydrographs, and pumpage quantities; but more commonly only a driller's log or survey field inventory form is filed.

The most expedient use of the WATSTORE system is in the display of selected types of ground-water data. With some limitations, many variations of listings and tables can be generated to match specific requests. Common methods of data retrieval are: 1) by area, through the use of latitude and longitude coordinates, hydrologic units, or county codes, 2) by site specifics, such as use of site, use of water, altitude, well depth, or well yield, and 3) by site identification numbers.

Requests for retrievals and information about costs should be made to: District Chief, WRD, U.S. Geological Survey, 218 E Street, Anchorage, Alaska 99501.

Table 2.--*Types of ground-water site data.*

The following list of data types represents those most often recorded. The number in parentheses is the WATSTORE code number for that particular piece of data. These code numbers should accompany the data description when requesting computer retrievals.

SITE, SPRING OR WELL IDENTIFICATION

NUMBERS

Hydrologic unit number - 19050002 for Cook Inlet (20)
Local number (12)
Other identification numbers - lab number, map number,
Alaska register number (189)
Project number - used as a retrieval key by means of which
all the data collected for a particular project can be
retrieved conveniently (5).
Site ID (1)

OTHER IDENTIFICATION

Agency reporting the data (4)
Owner's name - last (160), first (161), middle initial (163)
Water Resources District that collects the data

GENERAL INVENTORY INFORMATION

Altitude of site (16)
Network site (257, 258, 259)
Reliability of data - indicates the degree of confidence the
reporting agency has for the data (3)
Site visits - date a site was visited, person who visited (186)
Type of site (2)
Use of site (23)

DATES

Beginning of ownership (159)
Discharge measurement of spring (136)
Establishment of measuring point (267)
Field water-quality measurement (193)
First construction completion (21)
Individual construction phases - month, day, and year each
construction phase was completed (60)
Individual production determinations (148)
Site visits - month, day, and year the site was first visited
by the reporting agency (187)
Water-level measurements - month, day, and year the water
level was measured in the well (31) (95)

Table 2.--Continued

WATER QUALITY

Field water quality, parameter name (196)
Field water quality, parameter value (197)
Water-quality records, collecting agency (117)
Water-quality records, first year collected (115)
Water-quality records, frequency of collection (118)
Water-quality records, last year collected (116)
Water-quality records, type of analysis collected (120)

HYDROGEOLOGY

Geologic data, source (36)
Geologic data, depth to bottom (92)
Geologic strata, depth to top (91)
Geologic strata, major lithology (96)
Geologic strata, name (93)
Geologic strata, other lithology (97)
Water level for this strata (126)

OTHER SPRING INFORMATION

Spring, name (172)
Spring, number of openings (176)
Spring, permanence (174)
Spring, type (173)
Spring, discharge (138)
Spring, discharge, method of measurement (140)
Spring discharge, source (139)

Table 2.--Continued

WELL LOGS

Log, begin depth (200)
Log, end depth (201)
Log, data, source (202)
Log, type available (199)

WITHDRAWAL OF WATER

Lift, type (43)
Pump, depth to intake (44)
Pump, horsepower (46)
Pump, power source (45)
Use (24)
Use, secondary (25)
Use, tertiary (26)
Withdrawal data, collecting agency (130)
Withdrawal data, first year of collection (128)
Withdrawal data, frequency of collection (131)
Withdrawal data, last year of collection (129)
Withdrawal data, method of collection (133)

AQUIFER AND GROUND WATER CHARACTERISTICS

AQUIFER YIELD

Discharge (150)
Discharge, method of measurement (152)
Discharge, source (151)
Drawdown, lowest water level during pumping (153)
Drawdown, water level before pumping (153)
Pumping duration in hours (157)
Specific capacity of well (272)

WATER LEVELS

Measuring point, height (266)
Site status when water level was determined (37)
Water level (30, 126)
Water-level measurement, method (34)
Water-level collection, source agency (124)
Water-level records, first year collected (122)
Water-level records, frequency (125)
Water-level records, last year collected (123)
Water level, source (33)

Table 2.--Continued

SITE, SPRING OR WELL LOCATION

County or census district where site is located (8)
Hydrologic unit (20)
Land net location - legal description of the 10-acre tract
where the site is located (13)
Latitude (9)
Local number - locates the site according to the principal
meridian, township, range, section and $\frac{1}{4}\frac{1}{4}\frac{1}{4}\frac{1}{4}$ section (12)
Longitude (10)
Map on which the site can be located (14)
Map scale (15)
State in which the site is located (7)
Topographic setting in which site is located (19)

WELL CHARACTERISTICS

CONSTRUCTION

Casing, depth to bottom (78)
Casing, depth to top (77)
Casing, diameter (79)
Casing, type (80)
Construction information, source (64)
Construction, method (65)
Depth, bottom of seal (68)
Depth, hole (27)
Depth, source (29)
Depth, well (28)
Driller (63)
Development, method (69)
Development, special treatment (71)
Development, time taken (70)
Finish, Well (66)
Hole, depth to bottom (74)
Hole, depth to top (73)
Hole, diameter (75)
Openings, depth to bottom (84)
Openings, depth to top (83)
Openings, diameter (87)
Openings, length (89)
Openings, material (86)
Openings, type (85)
Openings, width (88)
Seal, well (67)

Table 3.--Index of ground-water quality records.

EXPLANATION

LABORATORY-- BEGIN YEAR - END YEAR: SIGNIFIES THE TIME SPAN COVERED BY THE TYPE OF LABORATORY ANALYSIS PERFORMED. WHEN ONLY A SINGLE ANALYSIS WAS DONE THE BEGINNING AND ENDING YEARS WILL BE IDENTICAL.

FREQ COL: SIGNIFIES THE FREQUENCY OF COLLECTION WITH THE FOLLOWING CODES;
A - ANNUAL, O - ONE TIME ONLY, I - INTERMITTENT.

TYPE: SIGNIFIES THE TYPE OF ANALYSIS PERFORMED ACCORDING TO THE FOLLOWING CODES;
A - PHYSICAL PROPERTIES DETERMINED IN A LABORATORY; MAY INCLUDE COLOR, ODOR, PH, SPECIFIC CONDUCTANCE, TEMPERATURE, OR TURBIDITY.
B - COMMON CHEMICALS; MAY INCLUDE ONE OR MORE MAJOR INORGANIC IONS SUCH AS HCO₃, CA, MG, MN, FE, NA, K, CO₃, SO₄, CL, NO₃ + NO₂, F, OR SiO₂ (USUALLY INCLUDES PHYSICAL PROPERTIES).
C - TRACE ELEMENTS; MAY INCLUDE ONE OR MORE OF THE LESS COMMON IONS SUCH AS AL, AS, SB, BA, B, BE, CD, CR, CO, CU, PB, HG, MO, NI, SE, AG, SR, SN, V, ZN, CN, CS, LI, OR SO₃(MAY INCLUDE SOME PHYSICAL PROPERTIES).
E - NUTRIENTS; INCLUDES ANALYSIS FOR ONE OR MORE FORMS OF NITROGEN, PHOSPHOROUS, OR CARBON(SOMETIMES INCLUDES PHYSICAL PROPERTIES).
H - ONE OR MORE COMMON CHEMICALS AND ONE OR MORE NUTRIENT PROPERTIES (SOMETIMES INCLUDES PHYSICAL PROPERTIES).
J - ONE OR MORE COMMON CHEMICALS AND ONE OR MORE TESTS FOR SANITARY CONDITIONS; TESTS FOR SANITARY CONDITIONS MAY INCLUDE OXYGEN DEMAND, FECAL COLIFORM, FECAL STREPTOCOCCI, COMBINED AVAILABLE CHLORINE, OR DETERGENT.
M - ANALYSIS MAY INCLUDE VALUES FOR PHYSICAL PROPERTIES, TRACE ELEMENTS, COMMON CHEMICALS, NUTRIENTS, AND/OR SANITARY CONDITIONS.
Z - ANALYSIS RESULTING FROM SOME OTHER COMBINATION OF THE TRACE ELEMENT AND COMMON CHEMICAL CATEGORIES.

FIELD----- FIELD QW: SIGNIFIES THE DAY, MONTH, AND YEAR THAT A CERTAIN FIELD TEST WAS DONE.
FIELD PARM: CODE NUMBER IDENTIFIES THE FIELD TEST PERFORMED;
10 - TEMPERATURE
95 - SPECIFIC CONDUCTANCE
400 - PH
440 - ALKALINITY

Table 4.--Current U.S. Geological Survey observation wells in the Cook Inlet basin.

EXPLANATION: FREQUENCY: C = CONTINUOUS RECORDER; D = DAILY; W = WEEKLY; B = BI-MONTHLY; M = MONTHLY; F = SEMI-MONTHLY;
 Q = QUARTER ANNUALLY; S = SEMI-ANNUAL; I = INTERMITTENT (MORE THAN ONE MEASUREMENT NOT TAKEN
 AT ANY REGULAR INTERVAL);
 REMARKS: Y = WATER-LEVEL RECORD WAS FEDERALLY-FUNDED AS PART OF A NATIONAL WATER-LEVEL COLLECTION NETWORK.
 DATA FOR 1956-1970 PUBLISHED IN U.S.G.S. WATER-SUPPLY PAPERS 1760, 1845, AND 1980. DATA FOR
 WATER YEARS 1975 AND 1976 PUBLISHED IN U.S.G.S. WATER-DATA REPORTS AK-75-1 AND AK-76-1.

Table 5.--*Selected publications by the U.S. Geological Survey or Survey personnel containing ground-water data for the Cook Inlet basin.*

Anderson, G. S., 1971, Ground-water exploration, Beaver Creek valley near Kenai, Alaska: U.S. Geol. Survey open-file report, 27 p.

_____, 1977, Artificial recharge experiments on the Ship Creek alluvial fan, Anchorage, Alaska: U.S. Geological Survey Water Resources Inv. 77-38, 39 p.; also NTIS PB 270 623/AS.

Anderson, G. S., and Jones, S. H., 1971, Hydrologic data of the Kenai-Soldotna area, Alaska: U.S. Geol. Survey open-file report, 57 p.

Barnwell, W. W., George, R. S., Dearborn, L. L., Weeks, J. B., and Zenone, Chester, 1972, Water for Anchorage: U.S. Geol. Survey open-file report (pub. by City of Anchorage and Greater Anchorage Area Borough), 77 p.

Cederstrom, D. J., and Trainer, F. W., 1953, Tabulations of wells records and logs and chemical analyses of ground water in the vicinity of Anchorage, Alaska: U.S. Geol. Survey open-file report, 38 p.

Dearborn, L. L., and Barnwell, W. W., 1975, Hydrology for land-use planning - The Hillside area, Anchorage, Alaska: U.S. Geol. Survey open-file report 75-105 (pub. by City of Anchorage and Greater Anchorage Area Borough), 46 p.

Donaldson, D. E., and Still, P. J., 1975, Water-quality data, 1948-1973, Anchorage and vicinity, Alaska: U.S. Geol. Survey open-file report, 59 p.

Feulner, A. J., Water-supply potential in the Ohlson Mountain area, Kenai Peninsula Area: U.S. Geol. Survey Hydrol. Data Report 22, 16 p.

_____, 1968, Data on wells in the Matanuska-Susitna Borough area, Alaska: U.S. Geol. Survey open-file report, 25 p.

_____, 1971, Water-resources reconnaissance of a part of the Matanuska-Susitna Borough, Alaska: U.S. Geol. Survey Hydrol. Inv. Atlas HA-364.

Freethy, G. W., 1975, Preliminary report on water availability in the lower Ship Creek basin, Anchorage, Alaska - with special reference to the fish hatchery on Fort Richardson and a proposed fish hatchery site near the Elmendorf Air Force Base powerplant: U.S. Geol. Survey Water Resources Inv. 48-75, 21 p.
