ANALYTICAL RESULTS FOR 50 WATER SAMPLES
FROM MILFORD BASIN, UTAH

by

John B. McHugh and William R. Miller

INTRODUCTION

Fifty water samples were collected from Milford basin, west-central Utah, during June of 1980, as part of a hydrogeochemical study of the basin. The water samples were analyzed for calcium, magnesium, sodium, potassium, lithium, silica, alkalinity as bicarbonate, sulfate, chloride, fluoride, nitrate, zinc, copper, molybdenum, arsenic, iron, manganese, aluminum, uranium, selenium, and vanadium content. Specific conductance, pH, and temperature were also measured.

Temperature and pH were measured at the sample site. The remaining analyses were completed at the U.S. Geological Survey laboratory in Denver, Colorado. Sample analyses and localities are presented in this report.

The 50 water samples were collected from 27 irrigation wells, 20 windmills, and 3 springs; figure 1 is a sample locality map of the study area.

Figure 1.--Sample locality map of Milford basin, Utah

SAMPLE COLLECTION TECHNIQUES

Water samples were collected in acid-rinsed polyethylene bottles. At each locality, a 60-ml and a 30-ml sample were collected and filtered through a 0.45- μ m and a 0.10- μ m membrane filter, respectively, and acidified with reagent-grade concentrated nitric acid to pH<2. An untreated 0.5 L sample was also taken.

ANALYTICAL TECHNIQUES

Water temperature and pH were measured at each sample site. Calcium, magnesium, sodium, potassium, lithium, silica, zinc, copper, molybdenum, arsenic, selenium, and vanadium were determined using the 0.45- μ m filtered and acidified sample. Iron, manganese, and aluminum were determined using the 0.10- μ m filtered and acidified sample. Alkalinity, sulfate, chloride, fluoride, nitrate, uranium, and specific conductance were determined, using the untreated sample. The analytical methods used for the analysis of each constituent are shown in table 1.

Specific conductance-----	Conductivity bridge-----	Brown, Skougstad, and Fishman (1970) p. 28-29.

RESULTS

Table 2 is a list of sample locality numbers, sources, and well depth for each sample shown on figure 1. Analytical data for each sample locality, as well as the locality's latitude and longitude in degrees, minutes, and seconds are shown in table 3. Table 4 is a summary of chemical analyses for the 50 Milford basin water samples showing each constituent with its minimum and maximum values, mean, geometric mean, standard deviation, and geometric deviation

Ionic solutions theoretically are electrically neutral. Therefore, accuracy of analyses can be checked by comparing the sum of the cations to the sum of the anions. For electrical neutral solutions, they are equal to each other. The concentrate ion unit for ionic species is moles/liter. The charge balance of the cations and anions for the 50 samples in this report is within 10 percent of each other.

TABLE 3. --WATER ANALYSES FROM THE MILFORD BASIN, UTAH--continued

SAMPLE	MN (ug/L)	AL (ug/L)	U (ug/L)	SE (ug/L)	V (ug/L)	SP-COND. (umhos/cm)	pH	TEMP. (C)
M46	1.1	17	3.40	4.9	27	3,400	7.53	12.0
M47	85.0	28	3.00	3.1	21	3,200	7.54	13.0
M48	2.1	30	3.90	2.9	14	1,190	7.80	12.0
M49	1.4	21	1.50	2.2	7	790	7.75	15.0
M50	1.2	16	2.60	1.2	12	500	7.90	18.0

Table 4.--Summary of chemical analyses of 50 water samples, Milford basin, Utah
[Leaders (--) indicate no data]

Constituent	Minimum	Maximum	Mean	Geometric mean	Standard deviation	Geometric deviation
Ca (mg/L)	15.	430.	94.3	75.5	71.0	1.99
Mg (mg/L)	5.0	170.	36.3	26.7	33.7	2.17
Na (mg/L)	21.	910.	98.2	64.7	139.	2.24
K (mg/L)	1.9	53.	7.35	5.82	7.67	1.84
Li (µg/L)	13.	6500.	211.	48.8	928.	3.12
SiO ₂ (mg/L)	19.	110.	40.6	38.4	14.9	1.38
Alkalinity (mg/L)	73.	344.	164.	152.	65.9	1.47
SO ₄ (mg/L)	14.	1060.	186.	117.	210.	2.61
Cl (mg/L)	11.	1900.	174.	100.	278.	2.76
F (mg/L)	0.13	5.4	0.772	0.561	0.892	2.04
NO ₃ (mg/L)	0.10	70.	10.4	3.82	12.9	6.26
Zn (µg/L)	2.0	186.	27.4	12.6	46.0	3.12
Cu (µg/L)	0.80	26.	5.52	4.07	5.13	2.15
Mo (µg/L)	1.2	13.	4.58	4.17	2.17	1.56
As (µg/L)	3.3	200.	21.2	12.2	35.6	2.44
Fe (µg/L)	4.0	310.	38.8	17.6	67.6	3.01
Mn (µg/L)	0.50	85.	4.89	1.57	13.3	3.16
Al (µg/L)	15.	150.	31.4	28.0	21.1	1.53
U (µg/L)	0.10	52.	7.66	4.06	9.43	3.87
Se (µg/L)	0.50	9.2	2.88	2.46	1.75	1.77
V (µg/L)	4.0	27.	13.1	12.1	5.39	1.49
Sp. Cond. (µmhos/cm)	300.	5900.	1260.	1020.	990.	1.88
pH	7.03	9.45	7.84	--	0.358	--
Temp. (C°)	11.	93.	17.9	16.6	11.5	1.38
