

Reported value (ppm)	Frequency (%)
N(20)	~8
<20	~3
20	~19
30	~18
50	~35
70	~10
100	~3
150	~3
200	~1
300-10,000	~5

EXPLANATION

-  Approximate boundary of the Hoover Wilderness
-  Approximate boundary of the adjacent study area
-  Geologic contact
-  Sample site, stream-sediment sample only contains anomalous lead
-  Sample site, concentrate sample only contains anomalous lead
-  Sample site, both samples contain anomalous lead
-  Sample site, neither type of sample is anomalous
-  Approximate limit of drainage basin(s) for stream-sediment samples containing anomalous lead
-  Approximate limit of drainage basin(s) for concentrate samples containing anomalous lead
