

GEOLOGIC UNITS

af	Artificial fill
Qhr/af	Estuarine deposits with areas of artificial fill
Qhr	Estuarine deposits
Qhi	Latest Holocene alluvial deposits
Qhi/Qhb	Latest Holocene flood plain and basin deposits
Qhs	Holocene dune and beach sand
Qhb	Holocene basin deposits
Qht	Holocene terrace deposits
Qhf	Holocene fan deposits
Qha	Holocene alluvium, undifferentiated
Qs	Late Pleistocene to Holocene dune sands
Qt	Late Pleistocene to Holocene terrace deposits
Qf	Late Pleistocene to Holocene fan deposits
Qa	Late Pleistocene to Holocene alluvium undifferentiated
Qpt	Late Pleistocene terrace deposits
Qpf	Late Pleistocene fan deposits
Qpa	Late Pleistocene alluvium, undifferentiated
Qpm	Late Pleistocene marine terrace deposits
Qoa	Early or middle Pleistocene alluvium
Qom	Early to middle Pleistocene marine terrace deposits
br	Pre-Quaternary deposits and bedrock. Includes Quaternary landslides

	Water bodies
	Unit contact
	Potentially active faults, shown with solid line where accurately located, dashed where approximate or inferred, dotted where concealed. Compiled from Earthquake Fault Zone maps, 1:24,000, California Division of Mines and Geology. Additional potentially active faults may be present.

Notes:

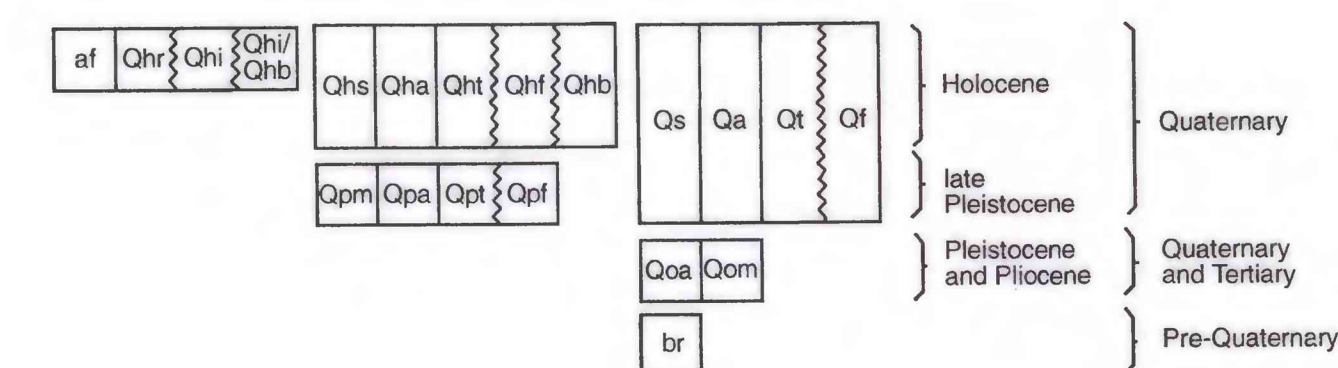

See accompanying text for descriptions of units.

All contacts should be considered approximate. This map was prepared by interpretation of aerial photographs and topographic maps, compilation of previous geologic and soil mapping, and limited field checking. (See accompanying text for cautions.) Many areas were not field checked. **Information on this map is not sufficient to serve as a substitute for geologic site investigations.**

Base from United States Geological Survey, 1:100,000 Napa, California, 1983.
Contour interval = 50 meters.

MAPS SHOWING QUATERNARY GEOLOGY AND LIQUEFACTION SUSCEPTIBILITY IN THE NAPA, CALIFORNIA, 1:100,000 SHEET

CORRELATION OF MAP UNITS

This report was prepared under a grant from the U. S. Geological Survey and has not been reviewed for conformity with USGS editorial standards or with the North American Stratigraphic Code. Opinions and conclusions expressed herein do not necessarily represent those of the USGS. Any use of trade, product or firm names is for descriptive purposes only and does not imply endorsement by the U. S. Government.
