37—QUADRANGLE LOCATION MAPS

| CARTOGRAPHIC SPECIFICATIONS	NOTES ON USAGE
all lineweights .125 mm H-4.5 KAUAI OAHU maximum map height approximately 20 mm HAWAII H-6 HAWAII MAP LOCATION	Location maps are at various scales; projection is Albers Equal-Area, based on parallels 29 1/2° and 45 1/2°. Maps are modified from the United States Base Map (U.S. Geological Survey, 1965, scale 1:3,168,000) and the Digital Shaded-Relief Image of Alaska (J.R. Riehle and others, 1997, U.S. Geological Survey Miscellaneous Investigations Map I-2585, scale 1:2,500,000; see fig. 2, approximate scale 1:8,000,000). To show a quadrangle or map area location, place a small black-filled rectangle (■) to show actual size and location within state. Adjust shape accordingly. If a quadrangle or map area is in two or more states, show all states. Create a new location map that shows all states at the same scale (extract from location map of 48 conterminous states, Section 37.2). Resize new location map so that its height is approximately 20 mm.
