

Sample locations are from cruise SEAX96024 in Long Island Sound in 1996.

Stations are numbered by transect A through M, then station number, generally north to south; eg. A1 = transect A, station 1.

Cores are numbered by station number then core number where the core number is the sequential cast;

eg. A1C1 = transect A, station 1, core cast 1.

The full sample name for each core includes cruise, station and core identification; eg. SEAX96024-A1C1.
