Petray and Rathburn mine and Bear Valley sample locations.

- Mine tailings
- Water/sediment
- Water/biota

(Sutton et al. 2004)

For total mercury, numbers in parentheses indicate the concentration in the <0.45 µm fraction.

All solid-phase total mercury (HgT) and methyl mercury (MeHg) results are presented on a dry-weight basis.

Numbers surrounded by a triangle denote photographs provided in Appendix 1.

Figure 2a.
