

Appendix 3. Hydrograph for groundwater monitoring well GWM 120 modified from Danish Committee for Aid to Afghan Refugees (2011).

GWM_ID	120	Well type	Latitude	36.41742
District	Baghlani Jadid		Longitude	68.92041
Place	Gelawgir	Organisation in charge of the measurement		
Method	manual (with modified well)	DACAAR		

EXPLANATION

+++++ depth to water (m) below ground surface – right vertical axis
 _____ groundwater specific conductance (µS/cm) – left vertical axis

The horizontal axis on the hydrograph is the date given as week number and year (for example, 7 '07 is week number 7 in 2007). The left vertical axis is the groundwater specific conductance in microsiemens per centimeter (µS/cm) and the right vertical is the depth to water in meters (m) below ground surface (bgs).
