

Appendix 9. Excel Spreadsheets Containing U.S. Geological Survey Water-Use Data.

The spreadsheets in Appendix 9 contain water-use information for the 16 grantee States. The source of this water-use information is described in the report and in Appendix 1. Water-use data are reported by county in the following spreadsheets:

California: [*CA.wateruse.xls*](#)
Connecticut: [*CT.wateruse.xls*](#)
Florida: [*FL.wateruse.xls*](#)
Maine: [*ME.wateruse.xls*](#)
Maryland: [*MD.wateruse.xls*](#)
Massachusetts: [*MA.wateruse.xls*](#)
Missouri: [*MO.wateruse.xls*](#)
New Hampshire: [*NH.wateruse.xls*](#)
New Jersey: [*NJ.wateruse.xls*](#)
New Mexico: [*NM.wateruse.xls*](#)
New York: [*NY.wateruse.xls*](#)
Oregon: [*OR.wateruse.xls*](#)
Pennsylvania: [*PA.wateruse.xls*](#)
Utah: [*UT.wateruse.xls*](#)
Washington: [*WA.wateruse.xls*](#)
Wisconsin: [*WI.wateruse.xls*](#)

Each spreadsheet contains three worksheets, the first of which is a “readme” file. The “WU county code” worksheet describes the numeric codes for counties within the State. The “Water-Use Data 2000” worksheet contains water-use data as of 2000. Water use is reported for many types of use, but domestic and public water supply probably are of most interest to EPHT.
