

## Revision History File

Publication Series and Series Number: Scientific Investigations Report 2008-5238

Publication Title: Analysis of streamflow trends, ground-water and surface-water interactions, and water quality in the upper Carson River basin, Nevada and California

Publication Authorship: Maurer, D.K., Paul, A.P., Berger, D.L., and Mayers, C.J.

First Version and Date of First Release: 1.00 February 5, 2009

Current Version and Date of Current Release: 1.1 March 30, 2009

### Summary of Product Components

Component	Description	Last Revised in Pub Version	Date of Last Revision
Book	Streamflow trends, upper Carson River basin, Nevada	1.1	March 2009

### Historical List of Revisions (latest revision first)

#### Version 1.1—March 2009

##### Book—

This revision includes corrections to annual streamflow losses and estimates.

Revision details follow.

Page 9: Table 1: The period of record for Truckee Canal near Hazen, Nev. and Carson River below Lahontan Reservoir, near Fallon, Nev. was changed from 1966 to 2006 to 1967 to 2006.

Page 63: The last paragraph in column 1: 2<sup>nd</sup> sentence was changed from "The resulting estimates of annual streamflow losses through the entire upper Carson River basin differ by 9,800 acre-ft, or about 3 percent of annual outflow..." To "The resulting estimates of annual streamflow losses through the entire upper Carson River basin differ by 2,800 acre-ft, or less than 1 percent of annual outflow..."

Page 64: Table 15: Table row: "Total difference, rounded -139,600" was replaced with: "Total difference rounded -132,600."

Table row: "Difference between estimates 9,800" was replaced with "Difference between estimates 2,800."

Table row: "Percent of annual flow below Lahontan Reservoir 2.7", was replaced with "Percent of annual flow below Lahontan Reservoir 0.8".

Page 100: Column 1, paragraph 3, 3<sup>rd</sup> sentence was changed from "Similarly, mean annual streamflow differences calculated for inflow to and outflow from the entire upper Carson River basin agree with the sum of differences calculated for each reach within about 3 percent of annual streamflow", **To**

"Similarly, mean annual streamflow differences calculated for inflow to and outflow from the entire upper Carson River basin agree with the sum of differences calculated for each reach within less than 1 percent of annual streamflow"

Appendix A1, graphs 1-6, were revised because labels in explanation and data on graphs were incorrect in the original version.

Appendix A2, graphs 1-5, were revised because labels in explanation and data on graphs were incorrect in the original version.

Appendix A3, graphs 1-6 were revised because dates and data on graphs were incorrect in the original version.
