KEY TO DIRECTIONAL NAMES

Directional name break-down for component parts of a 30-minute quadrangle in the absence of assigned names.

Directional name break-down for component parts of a 15-minute quadrangle in the absence of assigned names.

Coordinates in the following listings refer to the southeast corner of the quadrangle.

Quadrangle names were taken from small scale Administrative Index Maps. Some discrepancies have resulted from graphic uncertainties of quadrangle limits as related to state boundaries, causing names to be listed in both states. Normal usage will reveal these and other discrepancies which will be corrected on the master file and consequently on future publications.
