

LEGEND

- Dolomite
- Hornblende schist
- Gray quartz-biotite schist
(qsf = feldspathic phase)
- Quartzite
- Lantern Hill quartz and other quartz replacements
- Sterling granite gneiss
al = alaskite
pgn = porphyritic
ngn = normal
hg = hornblende
- Amphibolite
- Preston gabbro
pg = porphyritic type
hg = quartz-hornblende type
- Strike and dip
(Only accurate measurements are marked with figures)
- Strike of schistosity in igneous rocks
- Strike of schistosity in sedimentary rocks
- Gabbro contacts
- Other contacts

GENERALIZED STRIKE AND DIP OF ROCKS
IN AREA COVERED BY GEOLOGIC MAP (PLATE II)

Geology by G. F. Loughlin
Surveyed in 1905
