GOVERNMENT PRINTING OFFICE
1915

QE75
B9 1
Nos. 580-581
Copeny 2

CONTENTS.

[Arranged according to subjects.]

Introduction.
GOLD AND SILVER:
Gold placers on Wind and Bighorn rivers, Wyo., by F. C. Schrader (published August 4, 1914)
Lode deposits of the Alleghany district, Cal., by H. G. Ferguson (published August 18, 1914)
The Rochester mining district, Nev., by F. C. Schrader (published December 29, 1914)
COPPER:
Notes on the Unaweep copper district, Colo., by B. S. Butler (published March 16, 1914)
The Grand Gulch mining region, Mohave County, Ariz., by J. M. Hill (published June 12, 1914)
LEAD AND ZINC:
The Darwin silver-lead mining district, Cal., by Adolph Knopf (published March 16, 1914)
Some cerusite deposits in Custer County, Colo., by J. F. Hunter (published May 5, 1914)
Ore deposits in the Sawtooth quadrangle, Blaine and Custer counties, Idaho, by J. B. Umpleby (published September 12, 1914)
RARE METALS:
Carnotite near Mauch Chunk, Pa., by E. T. Wherry (published July 31, 1914)
The rutile deposits of the eastern United States, by T. L. Watson (published November 28, 1914)
Phosphates:
The phosphate deposits of South Carolina, by G. S. Rogers (published October 10, 1914)
The Elliston phosphate field, Mont., by R. W. Stone and C. A. Bonine (published December 4, 1914)
Salines:
Salines in the Owens, Searles, and Panamint basins, southeastern California, by H. S. Gale (published January 26, 1915)
MISCELLANEOUS:
A new gypsum deposit in Iowa, by G. F. Kay (published June 12, 1914) Some deposits of mica in the United States, by D. B. Sterrett (published
August 3, 1914)
Publications by Survey authors on metals and nonmetals except fuels, compiled by I. P. Evans (published January 22, 1915)
Index

CONTRIBUTIONS TO ECONOMIC GEOLOGY, 1913.

PART I. METALS AND NONMETALS EXCEPT FUELS.

F. L. RANSOME and HOYT S. GALE, Geologists in charge.

INTRODUCTION.

This volume is the twelfth of a series that includes Bulletins 213, 225, 260, 285, 315, 340, 380, 430, 470, 530, and 540, "Contributions to economic geology" for 1902, 1903, 1904, 1905, 1906 (Pt. I), 1907 (Pt. I), 1908 (Pt. I), 1909 (Pt. I), 1910 (Pt. I), 1911 (Pt. I), and 1912 (Pt. I), respectively. These bulletins are prepared primarily to insure prompt publication of the economic results of investigations made by the United States Geological Survey.

As the subtitle indicates, the papers included are of two classes—
(1) short papers giving comparatively detailed descriptions of occurrences that have economic interest but are not of sufficient importance to warrant a more extended description; (2) preliminary reports on economic investigations the results of which are to be published later in more detailed form.

These papers are such only as have a direct economic bearing, all topics of purely scientific interest being excluded. They have been grouped according to localities or subjects treated, and each group has been issued as an advance chapter as soon as it was ready.

By means of the bibliographies accompanying the several groups of papers, these volumes also serve as a guide to the economic publications of the Survey and afford a better idea of the work which the organization is carrying on for the direct advancement of mining interests throughout the country than can readily be obtained from the more voluminous final reports.

Brief abstracts of the publications of the year are given in the annual report of the Director. The complete list of Survey publications affords, by means of finding lists of subjects and of authors, further aid in ascertaining the extent of the Survey's work in economic geology.

İX

Since 1905 the annual economic bulletin has been printed in two parts, the second part comprising papers on mineral fuels. These volumes for 1906, 1907, 1908, 1909, 1910, 1911, and 1912 are Bulletins 316, 341, 381, 431, 471, 531, and 541. Bulletin 581 forms Part II of the "Contributions" for 1913.

The reports on work in Alaska have been printed in a separate series since 1904, the volumes so far issued being Bulletins 259, 284, 314, 345, 379, 442, 480, 520, 542, and 592.
