EXPLANATION

Stockbridge limestone — ORDOVICIAN

- Ob — Berkshire schist
- Osc — Calcitic part

CAMBRIAN

- Csd — Dolomitic part

ARCHEAN

- AR — Biotite granitoid gneiss
- ? — Area without outcrop
  Age of underlying rock unknown

Geologic boundary, approximate location

Boundary very uncertain

Important outcrop

Lime kiln, active
(Kelley Island Lime & Transport Co.)

Quarry

Loc. 176 = South Dover Marble Co.'s quarry

Topography by U.S. Geological Survey, 1891

MAP OF PART OF CLOVE QUADRANGLE, NEW YORK
SHOWING AREAS OF CALCITIC AND DOLOMITIC LIMESTONES

Subdivision of the Stockbridge limestone by T. Nelson Dale, 1920 (Part of eastern boundary north of Webatuck from W. H. Hobbs)

A. Hoen & Co. Lith. Baltimore, Md.

Scale 1/62,500

1 ½ 0 1 2 3 Miles

Contour interval 20 feet.
Datum is mean sea level.
