

Outcrop of coal bed (coal lies on dotted side of line).
 Figures indicate measured thickness of beds minus
 twice thickness of partings (see text)

Lines (solid where well located, broken where
 doubtful) connecting points at which coal is of
 same thickness
 (Bed A Lance formation; interval of equal-thickness lines
 6 inches starting with 1' 6"
 Bed M Fort Union formation; interval 2 feet starting
 with 2', but 1' 6" line also shown)

MAP OF TULLOCK CREEK COAL FIELD, TREASURE AND BIG HORN COUNTIES, MONT., SHOWING BY LINES OF EQUAL THICKNESS THE PROBABLE SHAPE AND POSITION OF COAL BEDS A AND M THICKER THAN 1' 6"
