NOTE

The Geological Survey's "Contributions to economic geology" are published in two parts, one including papers on metals and nonmetals except fuels and the other including papers on mineral fuels. As the subtitle indicates, most of the papers in these volumes are of three classes—(1) short papers describing as thoroughly as conditions will permit areas or deposits on which no other report is likely to be prepared; (2) brief notes on mining districts or economic deposits whose examination has been merely incidental to other work; and (3) preliminary reports on economic investigations the results of which are to be published later in more detailed form. Although these papers set forth mainly the practical results of economic investigations, they include brief theoretical discussions and summary statements of conclusions if these appear to require prompt publication.

CONTENTS

[The letters in parentheses preceding the titles are those used to designate the papers for advance publication]

	Page
(A) The Melrose phosphate field, Montana, by R. W. Richards and J. T. Pardee (published April 13, 1925)-----	1
(B) Geology of a part of western Texas and southeastern New Mexico, with special reference to salt and potash, by H. W. Hoots (published January 7, 1926)-----	33
(C) Platinum near Centennial, Wyo., by F. L. Hess (published January 13, 1926)-----	127
(D) Antimony and quicksilver deposits in the Yellow Pine district, Idaho, by F. C. Schrader and C. P. Ross (published March 18, 1926)----	137
Index-----	165

ILLUSTRATIONS

	Page
PLATE I. Geologic map of the Melrose phosphate field, Mont-----	6
II. Geologic map of the McCarthy Mountain area, Mont-----	26
III. Map showing distribution and thickness of salt beds in western Texas and southeastern New Mexico-----	In pocket.
IV. Depth and percentage of potash in wells in western Texas----	46
V. A, The flat-lying country west of Concho Bluff, southern Ector County, Tex.; B, Muchakooyo Peak, Borden County, Tex.; C, Gray cross-bedded sandstone of upper part of Dockum group, eastern Howard County, Tex.-----	56
VI. A, Typical beds of the Rustler limestone exposed at Red Bluff, southern Eddy County, N. Mex.; B, Dolomites of the Rustler formation in southern Eddy County, N. Mex.-----	90
VII. A, Red thin-bedded sandstone of the Dockum group, Wildhorse Mountain, eastern Howard County, Tex.; B, Red clay and gray cross-bedded sandstone of lower part of Dockum group near Iatan, western Mitchell County, Tex.; C, Quarry of sandstone in lower part of Dockum group at Quito, Ward County, Tex.-----	90
VIII. A, Massive quartzitic Trinity sand exposed along Concho Bluff in western Ector County, Tex.; B, Local unconformable relation of the Trinity sand and Walnut limestone, Signal Peak, southeastern Howard County, Tex.; C, Westward-facing bluffs capped by Cretaceous limestone, southeastern Crane County, Tex.-----	90
IX. A, Unconformity in lower part of Cretaceous limestone, south-central Ector County, Tex.; B, Indurated stream gravel at Moss Springs, southeastern Howard County, Tex.-----	91

PLATE X. Geologic map of a portion of western Texas and southeastern New Mexico.....	In pocket.
XI. Correlation of well logs from Nolan County to Reeves County, Tex.....	In pocket.
XII. Correlation of well logs from Nolan County, Tex., to Eddy County, N. Mex.....	In pocket.
XIII. Correlation of well logs from Fisher County, Tex., to southern Chaves County, N. Mex.....	In pocket.
XIV. Correlation of well logs from Hale County to Sterling County, Tex.....	In pocket.
XV. Correlation of well logs from Pecos County to Childress County, Tex.....	In pocket.
XVI. Correlation of well logs from Chaves County, N. Mex., to Pecos County, Tex.....	In pocket.
XVII. Subsurface structure-contour map of western Texas and southeastern New Mexico.....	In pocket.
XVIII. Sketch and claim geologic map of the vicinity of the quicksilver deposits, Yellow Pine mining district, Valley County, Idaho.....	140
XIX. A, Furnace for heating Smith retort in course of construction at property of the United Mercury Mines Co., Yellow Pine district, Idaho; B, Smith retort; C, Condenser for collecting the quicksilver produced in the Smith retort.....	164
FIGURE 1. Index map showing location of Melrose phosphate field, Mont.....	2
2. Section across phosphate deposit near Melrose, Mont.....	22
3. Cross section through the salt-anhydrite series from the trans-Pecos region to Nolan County, Tex.....	40
4. Map of Centennial Ridge, the Rambler mine and vicinity, Albany County, Wyo.....	128
5. Index map of Idaho showing location of Yellow Pine mining district.....	138
6. Geologic sketch map of the Yellow Pine mining district, Valley County, Idaho.....	145
7. Diagram showing offset faulting of Babbitt Metal vein, Yellow Pine district, Idaho.....	148
8. Plan of principal workings on Hermes claim, Cinnabar group, Yellow Pine district, Idaho.....	160
