SELECTED LIST OF GEOLOGICAL SURVEY PUBLICATIONS ON ALASKA

The Geological Survey for more than a third of a century has been investigating the mineral resources of Alaska. As the result of this work, many volumes have been published which contain information on the geology of different parts of the territory. A list of these publications is given in the following table. The list is arranged in alphabetical order, and the entries are arranged so that the reader may be most practical to use in the following table. A few of the more significant publications which are also included in the list and are essential to the study of the subject are: (i) the Albany District, and (ii) the Alaska District. The publications listed in the following table are arranged by subject matter, and are intended to give a general idea of the work done in the various districts of Alaska. The publications listed are as follows:
