

- EXPLANATION**
-  Covered areas  
(Soil and alluvium)
  -  Granite
  -  Quartz veins  
(In part tungsten-bearing)
  -  Pegmatite
  -  Graphite-andalusite and sillimanite-  
biotite schists, and quartzites
  -  Strike and dip of beds
  -  Strike and dip of primary foliation
  -  Strike and dip of schistosity
  -  Strike of vertical schistosity
  -  Strike and dip of shear cleavage
  -  Strike of vertical shear cleavage
  -  Boundary of Spokane Tin Co. property
  -  Excavations
  -  Bulldozer trench and dump
  -  Vein numbers referred to in text
  - ZONE I**  
 Pegmatite zone numbers  
referred to in text

100 0 500 Feet

Contour interval 20 feet  
Datum is approximately mean sea level
