

EXPLANATION

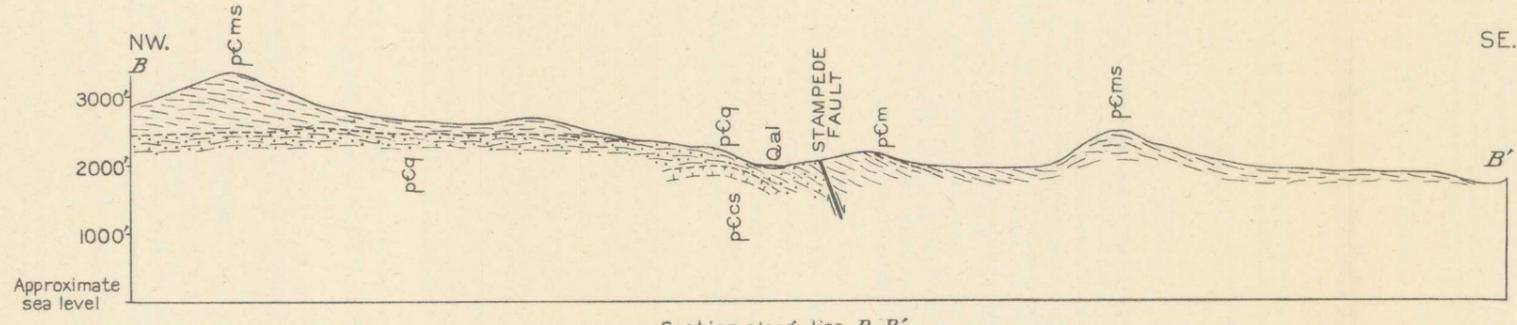

- Low terrace gravels and alluvium
- High terrace gravels
- Basalt
- Phyllite and limestone
- Schistose conglomerate
- Mica schist and undifferentiated schist, pCms, and blue marble, pCm
- Schistose quartzite
- Calcareous schist
- Lower quartzite and schist
- Synclinal axis (Location inferred)
- Anticlinal axis (Location inferred)
- Fault (Solid where certain, dashed where inferred, dotted where concealed)
- Strike and dip of schistosity
- Strike of vertical schistosity
- Prospect
- Trench
