United States Geological Survey.

1. Preliminary map showing geologic structure of parts of Grand and San Juan Counties, Utah, compiled from U. S. Geol. Survey reports in preparation by Arthur Alan Baker and others, surveyed in 1926, 1927, and 1929. Scale, 1: 125,000, or 1 inch to 2 miles. 1931.
2. Preliminary map showing geologic structure of the Monument Valley-Navajo Mountain region, San Juan County, Utah, surveyed in 1928 by Arthur Alan Baker and others. Formation table shown on sheet. Scale 1: 125,000, or 1 inch to 2 miles. 1931.
3. Oil and gas fields of the United States [map]; prepared by George Burr Richardson and others. In two sheets. Scale 1: 2,500,000, or 1 inch to 40 miles. 1932.
4. Mineral resources of the Tennessee River Basin and adjoining areas [map]. Scale 1: 500,000. 1933.
5. Preliminary map showing geologic structure of parts of Emery, Wayne, and Garfield Counties, Utah, surveyed in 1930 and 1931 by Arthur Alan Baker and others. Formation table shown on sheet. Scale 1: 125,000, or 1 inch to 2 miles. 1933.
6. Geologic map of Colorado, by the U. S. Geological Survey in cooperation with the Colorado State Geological Survey Board and Colorado Metal Mining Fund, compiled by Wilbur Swett Burbank and others, edited by George Willis Stose. Scale, 1: 500,000. [Washington, D. C.], 1935.
7. Coal map of the Howe district, Le Flore and Latimer Counties, Okla.: surveyed in 1931 by Thomas Andrews Hendricks and others. Scale 1: 125,000, or 1 inch to 2 miles. 1935.
8. Coal map of the Lehigh district, Coal and Atoka Counties, Okla., surveyed in 1934 and 1935 by Thomas Andrews Hendricks and others. Scale 1: 125,000, or 1 inch to 2 miles. 1935.
9. Coal map of the McAlester district, Pittsburg and Latimer Counties, Okla., surveyed in 1930 and 1931 by Thomas Andrews Hendricks and others. Scale 1: 125,000, or 1 inch to 2 miles. 1935.
10. Coal map of the Stigler-Poteau district, Pittsburg, Haskell, and Le Flore Counties, Okla., surveyed in 1927 and 1928 by William Taylor Thom, Jr., assisted by Pat Rose. Scale 1: 63,360, or 1 inch to 1 mile. 1935.
11. Coal map of the Wilburton district, Latimer County, Okla., surveyed in 1931 by Thomas Andrews Hendricks and others. Scale 1: 125,000, or 1 inch to 2 miles. 1935.
12. Map of parts of Oklahoma and Kansas, showing the distribution of the Bartlesville and Burbank (Red Fork) sands, sheet 3A, prepared by Nathan Wood Bass and others. Kansas portion, except Cowley County, prepared in cooperation with the Kansas Geological Survey. Compiled in 1934 and 1935. Scale 1: 125,000, or 1 inch to 2 miles. 1935.
13. Map of parts of Oklahoma and Kansas, showing the distribution of the Bartlesville and Burbank (Red Fork) sands, sheet 3B, prepared by Nathan Wood Bass and others. Kansas portion, except Cowley County, prepared in cooperation with the Kansas Geological Survey. Compiled in 1934 and 1935. Scale 1: 125,000, or 1 inch to 2 miles. 1935.
14. Map of Osage County, Okla., showing the subsurface geologic structure of the top of the Fort Scott limestone (Oswego lime), the producing rocks in oil and gas wells, and the deepest rocks penetrated in dry holes, sheet 1, prepared by Nathan Wood Bass and others. Compiled in 1934 and 1935. Scale 1: 125,000, or 1 inch to 2 miles. 1935.
15. Map of Osage County, Okla., showing the subsurface geologic structure of the top of the Fort Scott limestone (Oswego lime), the wells producing oil or gas from Ordovician rocks, and dry holes that found Ordovician rocks barren of oil and gas, sheet 2, prepared by Nathan Wood Bass and others. Compiled in 1934 and 1935. Scale 1: 125,000, or 1 inch to 2 miles. 1935.

73. Giant turtle and mososaur found in Alabama: *Science* n. s., vol. 82, no. 2120, Supp. p. 7, August 16, 1935.
74. Index of mineral occurrences in the State of Washington: Washington State Plann. Council Research Pub. 3, 40 pp., October 1935.
75. Labradorite from Nepoktulegatsuk [Tabor's Island]: *Rocks and Minerals*, vol. 10, no. 10, pp. 150-151, 2 figs., October 1935.
76. Geological history of Turkey Run State Park [Ind.] unusually interesting: *Outdoor Indiana*, vol. 2, no. 10, pp. 25, 31, November 1935.
77. Consistent gain in use of geophysical methods shown in California fields: *Oil Weekly*, vol. 30, no. 25, pp. 153, 161-162, 2 figs., November 7, 1935.
78. [Frederick Leslie Ransome, 1868-1935]: *Washington Acad. Sci. Jour.*, vol. 25, no. 11, p. 16, November 15, 1935.
79. Earthquakes in Helena, Mont.: *Earthquake Notes*, vol. 7, no. 3, pp. 2-5 (‡), 2 figs., December 1935.
80. Montana Bureau of Mines and Geology: *Glück Auf*, vol. 1, no. 2, pp. 9, 26-29, 1 fig., port., Butte, Mont., December 1935.
81. Recovery of Foraminifera by means of flotation: *Jour. Paleontology*, vol. 9, no. 8, pp. 745-746, December 1935.
82. Bibliography, Federal and State Geological Surveys' publications on iron ores; Eastern and Southeastern States and Cuba. 8 pp. (‡). U. S. Geol. Survey [1936?].
83. The floods of March 1936 in Pennsylvania. 129 pp. (‡), 5 pls. incl. maps, 27 figs., Pennsylvania Dept. Forests and Waters, 1936.
84. Publications on the geology, mineral resources, and mineral industries of Illinois, 95 pp., Illinois Geol. Survey, 1936.
85. Florida canal: *Eng. News-Record*, vol. 116, no. 1, p. 26, January 2, 1936.
86. Ground water in the Butter Creek area, Umatilla County, Oreg.: U. S. Dept. Interior Press Memo. 110985, 1 p. (‡), January 4, 1936.
87. Limited effect on water supplies expected from Florida canal: *Eng. News-Record*, vol. 116, no. 2, pp. 59-61, 2 figs. incl. index map, January 9, 1936.
88. William Battle Phillips [1857-1918]: *Texas Univ. Bull.* 3501, January 1, 1935, p. 10, 1 pl. port., February 1936.
89. Gold in the southern Appalachians. U. S. Dept. Interior Press Memo. 113781, 10 pp. (‡), February 1, 1936.
90. Edward Salisbury Dana [1849-1935]: *Mineralogist*, vol. 4, no. 3, pp. 20, 22, March 1936.
91. Geological Survey [of Pennsylvania] completes first century of work; studies continue: *Pennsylvania Dept. Internal Affairs Monthly Bull.*, vol. 1, no. 5, pp. 5-8, April 1936.
92. Mount Davis, 3,213 feet above level of sea, is [Pennsylvania] State's highest peak: *Pennsylvania Dept. Internal Affairs Monthly Bull.*, vol. 1, no. 5, pp. 16-22, April 1936.
93. Notice of a new bone bed in the early Pleistocene of Morrill County, Neb.: *Nebraska State Mus. Bull.*, vol. 1, no. 45, p. 450, April 1936.
94. A geologists' Mecca, eastern Washington: *Mineralogist*, vol. 4, no. 5, pp. 9-10, May 1936.
95. Pennsylvania rocks trace back over period of 1,000,000,000 years: *Pennsylvania Dept. Internal Affairs Monthly Bull.*, vol. 1, no. 6, pp. 18-21, May 1936.
96. A simplified table for the recognition of some of the common minerals: *Geol. Soc. Oregon Country News Letter*, vol. 2, no. 11, pp. 12-19 (‡), June 10, 1936.
97. August Frederick Foerste [1862-1936]: *Washington Acad. Sci. Jour.*, vol. 26, no. 6, p. 266, June 15, 1936.
98. Chehalis fossil wood: *Mineralogist*, vol. 4, no. 7, p. 22, July 1936.
99. Commercial and scientific values attached to finds of meteorites: *Pennsylvania Dept. Internal Affairs Monthly Bull.*, vol. 2, no. 2, pp. 8-12, July 1936.
100. Memorial of Conrad Schlumberger [1878-1936]: *Seismol. Soc. America Bull.*, vol. 26, no. 3, p. 287, July 1936.
101. Rocks: *Geol. Soc. Oregon Country News letter*, vol. 2, no. 14, pp. 6-12 (‡), July 25, 1936.

Anonymous—Continued.

102. The dust-bowl area: *Science n. s.*, vol. 84, no. 2170, pp. 113-114, July 31, 1936.
103. Potter County [Pa.] waters travel to Quebec, Norfolk, and New Orleans: *Pennsylvania Dept. Internal Affairs Monthly Bull.*, vol. 2, no. 3, pp. 11-13, August 1936.
104. Geology of White Point field [Tex.] requires careful drilling: *Oil and Gas Jour.*, vol. 35, no. 14, pp. 75-76, 1 fig., August 20, 1936.
105. Subsurface geology in Saxet field [Tex.]: *Oil and Gas Jour.*, vol. 35, no. 14, pp. 72, 74, August 20, 1936.
106. Crooked River Basin, Oreg., yields Tertiary fossils: *Mineralogist*, vol. 4, no. 9, p. 18, September 1936.
107. Spruce cones found [in Illinois]: *Mineralogist*, vol. 4, no. 9, p. 38, September 1936.
108. Charles Kenneth Leith, a biography: *Explosives Engineer*, vol. 14, no. 10, pp. 288-289, 1 pl. port., October 1936.
109. The Fossil Cycad National Monument: *Science n. s.*, vol. 84, no. 2182, pp. 367-368, October 23, 1936.
110. Black Hills petrified cycad forest: *Mineralogist*, vol. 4, no. 11, pp. 7-8, November 1936.
111. The sedimentary rocks: *Geol. Soc. Oregon Country News Letter*, vol. 2, no. 22, pp. 6-8 (†), November 25, 1936.
112. Over 1,000 gallons of water per minute discharged by 24 springs: *Pennsylvania Dept. Internal Affairs Monthly Bull.*, vol. 3, no. 1, pp. 31-32, December 1936.
113. The Timiskaming earthquake: *Earthquake Notes*, vol. 7, no. 3, pp. 5-6 (†), December 1936.
114. Core samples of the ocean bottom: *Carnegie Inst. Washington News Serv. Bull.*, vol. 4, no. 9, pp. 83-87, 1 pl. front., 6 figs. incl. index map, December 6, 1936.

INDEX

[The numbers refer to entries in the Bibliography]

Ablation.

- Greenland, Nugssuak region : Kindle, 36.
- Snow fields, high altitudes : Matthes, 21.
- Snow, western mts. : Matthes, 23.

Abbott Farm site redates : Richards, 20-a.

Abrasives.

- Emery deposits, Peekskill, N. Y. : Zodac, 25.

Georgia, tripoli deposits : Crickmay, G. W., 20, 21.

Illinois, lms. and dolomite : Lamar, 15.

Industrial minerals and rocks : A. I. M. E., 2.

North Carolina : Bryson, 7-a.

Nova Scotia, grindstones : Messervey, 3.

Oklahoma : Ham, 2.

Opaque minerals, emery ores : Bray, J. M., 1.

Absolute scale of geol. ages : Keyes, 347.

Abyssal assimilation : Grout, 5.

Accessory minerals.

Igneous and metam. rocks : Reed, J. C., 9.

Wolfe Mtn. granite, Tex. : McAdams, 1.

Accuracy of analyses, amphiboles, Larsen, 20.

Acmite, fusion relations : Bowen, N. L., 3.

Adamite, Gold Hill, Utah : Staples, 3.

Addresses. See also Miscellaneous.

Alaska, geol. features : Mertie, 22.

Ancient life of the Arctic : Foerste, 15.

Birds of the past : Wetmore, 8.

Borderlands in sci. : Richtmyer, 1.

Canada mining history : Allan, 10.

Carbon dioxide occurrence : German, F. E. E., 1.

Centennial, Dana's System of mineralogy : Kraus, 8.

Classification and duration, Pleist. : Kay, G. F., 9.

Continents, form, drift, and rhythm : Watts, 1, 2.

Contributions to geol. sci. by econ. geologists : Tolman, C. F., 5.

Crazy Mts., Mont. : Wolff, 4.

Crystallography, century of progress : Whitlock, 7.

Deep earthquakes : Slichter, 4.

Deep-focus earthquakes and allied problems : Stechschulte, 3.

Deformation, earth's crust : Bucher, 19.

Dentition, earliest mammalian : Simpson, 37.

Addresses—Continued.

Depths of the earth : Daly, 8.

Development and evolution : Swinerton, H. H., 1.

Dutch geol. inv. in Cuba : Rutten, L. M. R., 2.

Early man in N. Am. : Kay, G. F., 20 ; Woodward, A. S., 2.

Earth, interior : Heck, 46.

Earth physics and geog. papers : Fleming, J. A., 1.

Earth structure and origin : Matber, 29.

Earthquakes in Hawaii : Waesche, 1.

Environment, sedimentation and stratigraphy : Twenhofel, 5.

Erosion, cyclic and noncyclic aspects : Fenneman, 6.

Eutopotroplism : Lane 16.

Evolution, new aspects : Pycraft, 1.

Facies in strat. paleontology : Kindle, 22.

Folded mts., origin : Prouty, 5, 17.

Fluorescence and related phenomena : Melhase, 23.

Frontiers of geology : Geol. Soc. America, 1.

Geochemistry, present trends : Wells, R. C., 14.

Geologic class. and correl. : Chamberlin, 9.

Geological education : Swartz, C. K., 4.

Geological factors in mine valuation : McLaughlin, 9.

Geological Survey of Canada : Gray, F. W., 1.

Geological surveys : Dott, 12.

Geologic-seismologic frontier : Macelwane, 19.

Geologist, and his profession : Bryan, 37.

Geologists, future in petroleum industry : Fuqua, 3.

Geology and chemistry : Bowen, 21.

Geology and clay researches : Ries, 8.

Geology and engineering : Berkey, 25.

Geology and history : Merriam, 16.

Geology and industry : Jillson, 20.

Geology and literature : Collins, 8.

Geology and petroleum : Heroy, 2.

Geology and the State : Mendenhall, 1.

Geology, agent in human welfare : Penrose, R. A. F., 2.

Addresses—Continued.

Mineralogy.

Anothite, Duke Is.: Glass, 5.

Chicago mining area: Reed, J. C., 18.

Epidote, Prince of Wales Is.: Montgomery, A., 3.

Fumarolic incrustations, Valley of Ten Thousand Smokes: Zies, 1.

General: Smith, P. S., 12.

Glacier Bay area: Reed, J. C., 10, 11.

Gold in School of Mines Mus.: Gries, J. P., 1.

Mineral reconn.: Karpinski, 1.

Nickel-bearing sill, Admiralty Is.: Reed, J. C., 17.

Platinum, Goodnews area: Mertie, 21.

Prince of Wales Is.: Henderson, E. P., 12.

Troctolite sill, nickel content: Reed, J. C., 15.

Paleontology.

Actia, Cret., Tert.: Schenck, 27.

Brachiopoda, Camb.: Cooper, 21.

Briscol Camb. fauna: Kobayashi, 2.

Clistocrinus, Carb.: Kirk, 16.

Drepanolepis: Berry, 34.

Faunal lists, Chitina Valley: Moffit, 10.

Fish, Tert., Healy Creek: Schalkjer, 8.

Flora, Pleist., Fairbanks: Chaney, 26.

Floras, Tert.: Hollick, 9.

Forests, interglacial, Glacier Bay: Cooper, W. S., 1, 3.

Frozen fauna: Frick, 3.

General: Smith, P. S., 12.

Ivory, fossil: Budhue, 5.

Mammals and plants, frozen, Pleist.: Chaney, 32.

Paleocyclus, Paleozoic corals: Bassler, 25.

Plant fossils in the making: Chaney, 32-a; Anonymous, 134.

Plants in petroleum "mother rocks": White, C. D., 4.

Pollen analysis, Kodiak bogs: Bowman, P. W., 2.

Poul and Yakataga fms., Oligocene: Clark, 15.

Sequoia, St. Lawrence Is.: Chaney, 8.

Tertiary cycads: Hollick, 8.

Upper Cret. plant beds: Martin, G. C. 1.

Yakataga fauna: Clark, 14.

Yukon-Tanana area: Mertie, 16.

Petrology.

Black sand, Nome Creek: Wilkerson, 1.

Coast Range composite batholith: Kerr, F. A., 9.

Eocene volcanics: Buddington, 6.

Falling Mtn. volcanic activity: Fenner, 17.

Alaska—Continued.

Petrology—Continued.

Fumarolic incrustations, Valley of Ten Thousand Smokes: Zies, 1.

Hornblende, Annette and Duke Is.: Koschmann, 4.

Kodiak Is.: Capps, 13.

Mineral deposits, Glacier Bay: Reed, J. C., 11.

Nickel-bearing sill, Admiralty Is.: Reed, J. C., 17.

Nushagak area: Mertie, 20.

Yukon-Tanana area: Mertie, 16.

Yukon Valley: Eardley, 8.

Physical geology.

Akutan volcano, Aleutian Is.: Finch, 12.

Aniakchak and Veniaminof volcanoes: Knappen, 3.

Anthracite Ridge: Waring, 6.

Bogoslof volcano: Jaggard, 8; Lukens, 1.

Chicago mining area: Reed, J. C., 18.

Chitina Valley area: Moffit, 10.

Coast Range composite batholith: Kerr, F. A., 9.

Craters, Alaskan Pen.: McGavock, 1.

Earthquake, 7/22/37: Bramball, 1; Scott, F. P., 1.

Earthquake history: Heck, 42.

Earthquakes, Kodiak Is. and Dutch Harbor: Jones, A. E., 3.

Eska Creek coal field: Tuck, 7.

Falling Mtn. volcanic activity: Fenner, 17.

Faulting, Kennecott: Lasky, 1.

General: Mertie, 22; Smith, P. S., 12.

Glacier Bay: Cooper, W. S., 2.

Ice jams in sub-Arctic rivers: Wentworth, 17.

Katmai eruption: Chaney, 32-a; Okimura, 1.

Kodiak Is.: Capps, 12, 13.

Lava domes: Jaggard, 28.

Microseisms, January 1, 1929-December 31, 1931, Sitka: Bradford, 6.

Mountain bldg.: Mertie, 5.

Mt. Katmai and Mt. Mageik: Fenner, 4.

Nushagak area: Mertie, 20.

Ruby-Kuskokwim area: Mertie, 14.

St. Paul volcanic Is.: Jaggard, 18.

Shishaldin volcano: Finch, 10.

Slana-Tok area: Moffit, 11.

Troctolite sill, nickel content: Reed, J. C., 15.

Tuffs and other volcanic deposits, Katmai: Fenner, 16.

Valley of Ten Thousand Smokes: Reck, 1; Zies, 1.

Volcanism, pre-Cambrian and Paleozoic: Mertie, 13.

Volcanoes in Nat. Parks: Waesche, 3.

Yukon-Tanana area: Mertie, 16.

Physiographic geology.

Alpine glaciation: Tuck, 6.

Aniakchak and Veniaminof craters: Hubbard, B. R., 1.

Anthracite Ridge coal area: Waring, 6.

Alaska—Continued.

Physiographic geology—Continued.

Arkansas.

- Arkansas Geol. Survey: Branner, 6.
- General: Hall, B. F., 1.
- Report of State geologist: Branner, 9, 14, 18.
- Wealth of State: Branner, 19.

Arkansas—Continued.

Areas described.

- Coal fields: Hendricks, 8.
De Queen, Caddo Gap quads.: Miser, 1.
Ozark Mts.: Schottenloher, 2.
Paleozoic: Croneis, 2.
Southwestern Ark.: Dane, 1.

Economic geology.

- Ark-La-Tex oil and gas field: Easton, 8.
Atlanta oil field: Schmidt, K. A., 1.
Barite: Branner, 7; Parks, B., 1, 2.
Bauxite: Bramlette, 5; Stearn, 4.
Bentonite: Branner, 5; Burchard, 1.
Buckner pool: Link, W. K., 1.
Carbon ratios, Ark.-Okla. coal fields:
Hendricks, T. A., 6; Fisher, D. J., 8.
Cinnabar: Branner, 10; Reed, J. C., 8;
Stearn, 11.
Coal fields: Hendricks, T. A., 7, 8.
Coals, classn.: Hendricks, T. A., 2.
Coastal Plain oil fields: Bignel, 1.
Cretaceous: Shreveport G. Soc., 4.
Diamond fields: Branner, 4.
Garland City pool: McFarland, L. R., 1.
Geomagnetic survey, bauxite area:
Stearn, 4.
Gypsum: Giles, 9.
Hempstead County, oil poss.: Easton, 4.
Irma oil field: Teas, 1.
Magnetic vectors: Jenny, 2.
Magnolia pool: Trager, H. H., 1.
Manganese: Miser, 13.
Metallic minerals: Branner, 2.
Mid-continent oil and gas fields: Miser, 9.
Mineral survey: Branner, 20.
Natural-gas fields: Croneis, 23.
Nonmetallic min. res.: Branner, 8.
Pennsylvanian sedimentation, coal field:
Hendricks, 13.
Petroleum, 1937: Shearer, 5.
Petroleum and natural gas: Bingham,
D. H., 1; Branner, 1, 15; Jenny, 12;
Lloyd, A. M., 2; Miser, 9; Moody, 4,
5; Shearer, H. K., 3; Spooner, 4,
5, 6.
Quicksilver: Hansell, 1; Reed, J. C., 6,
7, 16; Sohlberg, 1, 2; Stearn, 7.
Rodessa field: Clark, C. C., 2; Ivy, 1.
Schuler pool: Weeks, W. B., 1, 3.
Smackover field: Bell, H. W., 1; Free-
man, L. L., 1; Haury, 1; Spooner, 3.
Snow Hill field: Easton, 5; Weeks,
W. B., 4.
Southern Ark., and Coastal Plain:
Weeks, W. B., 2.
Stamps field: Morgan, C. L., 1.
Stephens oil field: Spooner, 2.
Sulphide ores: Eummons, W. H., 1.
Village oil pool: Link, W. K., 2.
Zinc and lead: McKnight, 2; Miser, 11;
Anonymous, 39.

Historical geology.

- Annona chalk: Thomas, N. L., 6.
Archimedes lms.: Keyes, 451.
Ark-La-Tex oil and gas field: Easton, 8.

Arkansas—Continued.

Historical geology—Continued.

- Atlanta oil field: Schmidt, K. A., 1.
Bauxite area: Bramlette, 5.
Bloyd shale: Henbest, 7.
Boone chert: Giles, 10.
Brownstone marl: Stephenson, L. W., 3.
Brownstown fm.: Israelsky, 1.
Buckner pool: Link, W. K., 1.
Carboniferous, proposed dismemberment:
Keyes, 327.
Centerpoint volcanics: Hazzard, R. T., 2.
Chalks, Cret.: Thomas, N. L., 3.
Cinnabar: Stearn, 11.
Coal fields: Hendricks, T. A., 4, 5, 7, 8.
Comanche and pre-Comanche fms.: Haz-
zard, R. T., 2.
Correlations by graptolites: Decker, 13,
14.
Cretaceous: Alexander, 16; Hazzard, R.
T., 4; Shreveport G. Soc., 4;
Thomas, N. L., 3.
Cross sec.: Alexander, 15; Lloyd, A. M.,
3; Purzer, 1.
Diamond fields: Branner, 4.
Fayetteville sh.: Croneis, 5.
Garland City pool: McFarland, L. R., 1.
General: Kansas. G. Soc., 6.
Geologic fms., new names: Weber, 1.
Geologic map: Branner, 3.
Gulf Coastal Plain: Spooner, 4.
Hale Mtn. area: Giles, 2.
Igneous rocks: Croneis, 1, 3.
Index fossils: Calahan, 1.
Izard dolomite: Keyes, 490.
Jackford and Stanley fms.: White, 23.
Johns Valley sh.: Moore, R. C., 24.
Kinderhook, vs. Chouteau: Keyes, 494.
Magnolia pool: Trager, H. H., 1.
Megafossils, Smackover lms.: Adkins, 10.
Mid-continent area: Labee, 8.
Mid-continent oil-field sediments:
Cheney, 3.
Midway group: Alexander, C. I., 12.
Mississippian and Morrow fms.: Roth, 2.
Murfreesboro lms.: Ulrich, 34.
Natural gas fields: Croneis, 23.
Novaculite: Henbest, 8.
Osage fms.: Cline, L. M., 1.
Ouachita boulder problem: Kramer, 6;
Watershoot van der Gracht, van.
12.
Ouachita Mts.: Hariton, 8; Kans. G. Soc.,
4; Miser, 2, 6, 7, 8.
Ouachita Mts. and Bucher's laws: Tom-
linson, 5.
Ozarks: Cozzens, 2; Kans. G. Soc., 1.
Paleozoics, Ouachita: Miser, 9.
Pennsylvanian sedimentation: Hen-
dricks, 13.
Petroleum and gas, 1937: Shearer, 3.
Polk Creek sh.: Decker, 11.
Quicksilver area: Reed, J. C., 16; Stearn,
8.
Rodessa field: Clark, C. C., 2.
St. Peter and older Ord. ss.: Giles, 1.

Arkansas—Continued.

Historical geology—Continued.

- Saratoga chalk: Thomas, N. L., 5.
- Schuler field: Weeks, W. B., 1, 3.
- Silurian: Ball, J. R., 21.
- Smackover oil and gas field: Haury, 1.
- Snow Hill pool: Weeks, W. B., 4.
- Southern Ark. and Coastal Plain: Weeks, M. B., 2.
- Southwestern Ark.: Rankin, C. L., 1.

Faults: Raguin, 1.

Flood, La Canada Valley: Troxell, H. C., 1.

Folding: Clark, B. L., 16, 23.

Fracture systems, Grass Valley: Johnston, W. D., Jr., 7.

Frazier Mtn.: Buwalda, 8.

Garnet Hills, wind abrasion: Stock, 75.

Geothermal gradient, Mother Lode belt: Johnston, W. D., Jr., 5; Knopf, A., 5.

Glass Mtn.: Anderson, C. A., 4; Powers, H. A., 2.

Granodiorite, melted: Knopf, A., 18; Larsen, 24.

Gravel beach cusps: Shepard, 20.

Great Basin lake sediments: Shrock, 8.

Hat Creek lava flow: Anderson, C. A., 12.

Haywards fault: Louderback, 12.

Horizontal displacement, San Andreas fault: Wood, H. O., 1.

Hornblendes, San Marcos gabbro: Miller, F. S., 3.

Inclusions, dislocated, gold-quartz veins: Farmin, 4; Wiebenga, 1.

Intra-septum intrusion, Sierra Nevada: Mayo, 7, 10.

Inyo Range: Anderson, G. H., 7.

Ivanpah area: Hewett, 16.

Kern Canyon fault: Webb, 4.

Kettleman Hills faulting: Hill, M. L., 3, 4.

Klamath Mts.: MacGinitie, 7.

California—Continued.

Physical geology—Continued.

La Jolla sea cliff recession: Vaughan, 14.

Landslides: Hackett, 1; Krauskopf, 1; Miller, W. J., 5.

Lassen Peak: Farmer, 1; Finch, R. H., 1, 4; Hanna, H. C., 1; Holmes, A., 3; Jaggard, 17.

Lassen Volcanic Nat. Park: Keathley, 1; Reck, 2; Swartzlow, 8; Williams, H., 4.

Lava Beds Nat. Monument: Swartzlow, 5-a.

Lava domes: Jaggard, 28.

Long Beach earthquakes: Clements, T., 2; Gutenberg, 9; Heck, 14, 18; Wood, H. O., 6, 7.

Los Angeles Basin, seismic reflections: Gutenberg, 22.

Los Angeles earthquake, 3/11/33: Bois, 1.

Lowering of playas: Blackwelder, 20.

Lucia quad.: Reiche, 1.

Marine sediments: Vaughan, 18.

Mesozoic (?) rocks: Hazzard, 9.

Microseisms, Berkeley: Byerly, 44.

Mojave desert: Davis, 21.

Mojave mining: Schroter, 1.

Mono Craters: Mayo, 12; Putnam, 4.

Monterey Bay sedimentation: Galliber, 11.

Moon, effect on earthquakes: Allen, M. W., 2.

Mt. Diablo area: Clark, 19.

Mt. Shasta: Williams, H., 6, 8.

Mt. View field: Miller, R. H., 1.

Mt. Whitney: Matthes, 24.

Movements on Haywards rift: Buwalda, 4.

Movements, reverse, along faults: Erwin, 3.

Opal stalactites, stalagmites: Anderson, C. A., 9.

Orogeny: Stille, 2, 6.

Overtaken plunge, Sespe-Piru Creek area: Leach, 1.

Panamint Mts.: Davis, 27.

Panamint Valley: Hopper, 1.

Peninsular Range: Miller, W. J., 12.

Periodicity, earth movements, Los Angeles harbor: Leyboldt, 1.

Perris block: Dudley, 2.

Pinnacles Nat. Monument: Andrews, P., 2.

Plutonic intrusions, Sierra Nevada: Durrell, 2.

Primary faulting, Coast Ranges: Clark, B. L., 12.

Quartz basalt eruptions, Lassen Park: Finch, R. H., 4.

Recent earthquakes near Whittier: Wood, H. O., 3.

Reflection seismograph rec.: Salvatori, 1.

Ridge Basin: Eaton, 9.

Ritter area: Erwin, 4.
