 end, C. W., 1.
 Bathymetric, orogenic movements:
 Gillson, 4.
 British Columbia: Peacock, 8; Williams,
 M. Y., 15.
 California: Grant, 17.
 Coal, Permo-Carb. and sea level: Shep-
 ard, 43.
 Drainage evolution, S. Appalachians:
 Thompson, H. D., 2.
 Drowned forests: Lyon, C. J., 1.
 Fossils in deep-sea cores: Henbest, 12.
 Greenland: Odell, 3; Vogt, T., 1.
 Hawaii: Jones, A. E., 1; Stearns, 22;
 Waesche, 6; Wentworth, 47.
 Idaho: Capps, 14.
 Knickpoints and valley-in-valley forms:
 Johnson, 34.
 Lagoon deposits: Lucke, 3.
 Louisiana: Russell, R. J., 11, 16, 28.
 Maine: Chadwick, 33; Sayles, 7.
 Manitoba: Johnston, W. A., 14.
 Marine terraces, nonglacial: Antevs, 1.

Changes of level—Continued.

- Massachusetts: Brown, T. C., 6; Gold-
 thwait, J. W., 3, 5; Horner, 1;
 Macar, 2.
 Michigan: Evans, O. F., 8.
 New England: Jones, W. F., 1.
 Newfoundland: Betz, 1; Flint, 25.
 New Jersey: Kummel, 1; Lucke, 2, 4.
 North America, late-glacial: Wright, W.
 B., 3.
 Offshore bars: Price, 22.
 Oregon: Barr, 2.
 Pensacola shore line: Leverett, 10.
 Pleistocene: Cooke, C. W., 10.
 Polar elevation and last ice age: Hills,
 G. F. S., 2.
 Preglacial sea levels, determination:
 Miller, A. A., 1.
 Regressive sandstones: Sears, J. D., 1.
 Salt-marsh border and coast stability,
 Mass.: Goldthwait, J. W., 3.
 Sea level changes: Daly, R. A., 3; John-
 son, D. W., 4, 25; Lane, 8; Marmer,
 3; Shepard, 39; Wanless, 13.
 Sea level and climatic changes: Wanless,
 13.
 Submarine canyons, origin: Shepard, 23.
 Continental shelves: Treasher, 4.
 Swinging sea level of ice age: Daly,
 R. A., 3.
 Tidal inlets: Hitchcock, C. B., 1.
 Tilting from glacial melting: Gutenberg,
 8.
 Utah: Adams, T. C., 1.
 Washington: Reagan, 2.
 West Virginia: Friddle, 4.
 Charophyta, Rocky Mt. continental fms.:
 Peck, 15.
 Chattanooga shale, Okla.: Leatherock, 2.
 Cheek teeth of rodents: Wood, A. E., 12.
 Chelonia. See also Reptilia.
 Turtle, Cret., Mont.: Case, 24.
 Chemical composition, meteorite accretions:
 Watson, F. G., Jr., 2.
 Chert. See also Flint.
 Arkansas: Giles, 10.
 California: Taliaferro, 10.
 Depositional environment: Gunnell,
 E. M., 6.
 Formation: Gunnell, E. M., 6; Laird, 6;
 Roy, C. J., 2; Runner, D. G., 8;
 Taliaferro, 10; Tarr, 6, 22; Wood-
 ward, 7.
 Illinois: Schultz, J. R., 1.
 Michigan: Dustin, 2.
 Missouri: Bastin, 5.
 Nature, origin, Ontario: Laird, 6.
 Ohio: Westgate, 4.
 Oklahoma: Gardner, J. H., 2; Giles, 10.
 Ontario: Laird, 6.
 Paleozoic: Woodward, 7.
 Tennessee: Wilson, C. W., Jr., 16.
 TVA area: Spain, 4.
 Tri-State mining dist.: Fowler, C. S., 4,
 8, 10; Roy, C. J., 2.

Areas described.

- Alma dist.: Singewald, Q. D., 7.
 Bonanza mining dist.: Burbank, W. S., 4.
 Book Cliffs coal field: Erdmann, 1.
 Carter Lake area: Stagner, H. R., 1.
 Galena Mtn.: Vanderwilt, 2.
 Golden area: Johnson, J. H., 9.
 Jamestown dist.: Hill, E. B., Jr., 1.
 Lake Albion area: Wahlstrom, 1.
 Logan mine, Boulder County: Van Be-
 veren, 1.
 Magnolia mining area: Wilkerson, 5.
 San Juan Mts.: Atwood, W. W., 1.
 San Juan area: Cross, C. W., 2.
 Table Mtn. area: Waldeschmidt, 7.

Economic geology.

- Alma dist.: Singewald, Q. D., 7.
 Anticlines, Hiawatha gas field, Colo., and
 Baggs, Wyo.: Bradley, W. H., 12.
 Arrastre Basin vein systems: Burbank,
 7.
 Aspen mining dist.: Rohlfing, 1.
 Batholith, Twin Lakes: Chapman, E. P.,
 2.
 Beryl-molybdenite deposit: Landes, 19.
 Bonanza mining dist.: Burbank, W. S., 2.
 Book Cliffs coal field: Erdmann, 1.
 Boulder area: Green, T. H., 1.
 Boulder Co. coal: Helmke, 1.
 Breckenridge mining dist.: Behre, 18;
 Lovering, 15.
 Building stones: Balcom, 1.
 Calumet dist.: Rainwater, 1.
 Calumet iron mine: Behre, 21.
 Camp Bird mine: Boydell, 3.
 Caribou magnetite deposits: Henderson,
 C. W., 1.
 Climax molybdenum deposits: Butler,
 B. S., 4, 5, 9; Staples, L. W., 1;
 Vanderwilt, 3.

Colorado—Continued.

Underground water—Continued.

Steamboat Springs area : Blackmer, 1.

Water from wells : Waring, 4.

Colorado Plateau ore deposits : Butler, B. S., 3.

Columbite, morphology of crystals : Taylor, E. D., 1.

Colusite, Colo. : Berman, H., 9 ; Nelson, R., 1.

Compaction.

Clays and shales, gravitational : Hedberg, 1.

Oil migration : Athy, 2.

Comstock Lode, Nev. : Knochenbauer, 1 ; Milton, 4.

Concretions.

Arizona : Bryan, J. J., 1 ; Campbell, I., 4.

Arkansas, Fayetteville shale : Giles, 12.

Barite, Yazoo clay, La. : Hanna, M. A., 9.

Calcareous : Mathias, 4 ; Stow, 1.

California, sand : Edwards, S. C., 1 ; Hyde, E. M., 1 ; Schenck, 8.

Cave : Stone, R. W., 12.

Centripetal : Brown, W. H., 2.

Clay rhizoconcretions : Rousseau, 1.

Colorado, Fox Hills fm. : Mathias, 2, 4.

Cone-in-cone : Schaub, 11.

Connecticut : Tarr, 18.

Cylindrical structures : Hawley, 11.

Fayetteville sh., Ark., Okla. : Giles, 9, 12.

Formative processes : Burt, F. A., 7.

General : Bassler, 20 ; Reed, R. D., 5 ; Tarr, 5, 6.

Georgia : Cooke, C. W., 5.

Kansas : Carpenter, A. C., 1 ; Shaffer, H. L., 1 ; Ward, H. K., 1.

Kentucky, phosphatic : Edmundson, 3.

Lacustrine manganese : Kindle, 19.

Limonite, Iowa : Bates, R. L., 2.

Massachusetts : Tarr, 18.

Mexico, Lower California : Garner, 1.

Missouri, septarian : Swartzlow, 6.

Mt. Signal, Calif. : Hyde, E. M., 1.

New Hampshire : Kindle, 24 ; Tarr, 18.

New York, Onondaga : Schwartz, F. W., 1.

North Dakota, Black Hills : Hamilton, R. G., 1 ; Runner, J. J., 4.

Nova Scotia : Kindle, 24.

Ohio : David, A., 1 ; Greene, G. U., 1 ; Rogers, M., 1.

Oklahoma, Fayetteville sh. : Giles, 9, 12.

Ontario : Hawley, 11 ; Walker, 10.

Pyrite in : Mathias, 3.

Radial calcite, Ga. : Cooke, C. W., 5.

Romney sh., septaria, Va. : Allen, R. M., 1.

South Dakota, metamorphosed : Runner, J. J., 3.

Sphalerite in ironstone : Greene, G. U., 1.

Texas : Burt, 8.

Vermont : Tarr, 17.

Virginia : Allen, R. M., 1 ; Stow, 1.

Vishnu schist, Ariz. : Campbell, I., 4.

Concretions—Continued.

Wyoming : Cassinet, 1 ; McConnell, D., 2, 3.

Cone-in-Cone.

Concretions : Schaub, 11.

Fox Hills fm., Colo. : Boos, C. M., 1.

General : Tarr, 6.

Kansas : Carpenter, A. C., 1.

Louisiana : Tarr, 13.

Manganiferous siderite : Hendricks, 12.

Origin and bearing on concretions and septaria : Schaub, 11.

Conglomerate. See also Sedimentation.

Alberta : Warren, 21.

California : Edwards, E. C., 2 ; Simonson, 2.

Greenland : Wegmann, 10.

Illinois : Willman, H. B., 2.

Massachusetts : Billings, 18.

Montana : Lammers, 4.

Nevada : Sharp, R. P., 4.

New York, Catskill facies : Mencher, 2.

Ontario : Pettijohn, 5.

Pennsylvania : Stose, 20.

Texas : Bay, H. X., 2.

Virginia : Stow, 10.

Wyoming : Knight, S. H., 11 ; Lammers, 4.

Conglomerite : Willard, 5.

Congresses. See also Associations.

16th International Geological : Fabiani, 1 ; Keyes, 312 ; Mendenhall, 2, 6.

Connate waters.

In sands : Pyle, 1 ; Schilthius, 1.

Oil and gas accumulation by : Gardner, J. H., 5.

Relation to oil and gas sands : Bignel, 7.

Connecticut.

General : Longwell, 12.

State Survey biennial reports, 18th—17th : Britton, W. E., 1, 2, 3, 4.

Economic geology.

Hodges nickel prospect : Agar, 3.

Marbles and lms. : Moore, Fred H., 1.

Historical geology.

Beckert gneiss : Agar, 2.

Connecticut Valley : Kitson, J. E., 1.

Danbury gneiss : Agar, 7.

Fifteen Miles Falls Dam : Crosby, 9.

General : Cook, T. A., 1.

Granites and other intrusives : Agar, 9.

Pomperaug Basin : Meiner, 2.

Post-glacial climatic chronology, pollen-analysis : Deevey, 1.

Quinnipiac-Farmington lowland : Lougee, 7 ; Ward, F., 6.

Salisbury dist. : Agar, 5, 8.

Stiles clay pit sec. : Brown, R. W., 2.

Triassic belt : Longwell, 14.

Triassic fossils : Thorpe, 1.

Mineralogy.

Albite : Schaub, 10.

Beryl : Schaub, 10.

Collecting localities : Ewell, W. J., 1.

Gillette quarry minerals : Gillette, S. G., 1.

Manganotantalite : Foye, 1.

Connecticut—Continued.

Mineralogy—Continued.

- Minerals: Brown, S. C., 1; Schaller, 1.
 Monazite: Fenner, 6.
 Prochlorite: Agar, 13.
 Strickland quarry minerals: Zodaq, 24.
 Uraninite: Ingerson, 5.

Paleontology.

- Concretions, Champlain fm.: Tarr, 18.
 Dinosaur tracks: Perry, K. P., 1.
 Fossil wood in glacial drift: Dunbar, 20.
 General: Cook, T. A., 1.
 Lake sediments, pollen: Deevey, 1.

- Geological aspects: Allen, 19.
- Geologic history of mankind: Mather, 2.
- Grand Canyon, Ariz.: Johnson, D. W., 33-a.
- Gulf Coast crude oil: Barton, 46.
- Heteromyid rodents, west. N. Am.: Wood, A. E., 7.
- Horse family: Lull, 5.
- Insecta: Carpenter, 5; Tillyard, 2.
- Irreversibility: Gregory, 24.
- Life, origin: Rehder, 1.
- Life processes: Staley, 1.
- Ligament scars, horses' feet: Smith, N., 1.
- Mammalia: Gregory, 26; Scott, W. B., 4; Simpson, 30.

Evolution—Continued.

- Man: Gregory, W. K., 1, 15, 19, 28; Hooton, 1; Romer, 5; Schlaikjer, 9.
 Man and primates: Gregory, 28.
 Man and the vertebrates: Romer, 5.
 Megalichthys cranium: Eaton, T. H., Jr., 2.
 Merycoidodonts, phylogeny: Thorpe, 8.
 New concept: Osborn, 23.
 New Hampshire, White Mts. magma: Chapman, R. W., 1.
 North American phacopid Trilobita: Delo, 12.
 Ocean: Keyes, 359.
 Orthogenesis: Werner, 4; Wood, H. E., 2d, 17.
 Our face: Gregory, W. K., 1.
 Paleontologic devel. and ecology: Fenton, 13.
 Paleontology and evolution: Keith, Sir A., 1.
 Patterns, phylectic evolution: Simpson, 40.
 Pelecypoda: Schenck, 24.
 Pelvis, fish to man: Gregory, 19.
 Petroleum: Barton, 28.
 Phylogeny, heteromyid rodents: Wood, A. E., 1.
 Vertebrate: Hamlett, 1.
 Plants and evolution: Darrah, 16.
 Plants, seed, descent: Wieland, 5.
 Pollen grains: Wodehouse, 4.
 Principles of paleontology: Osborn, 24.
 Proboscidea: Osborn, 24, 29, 36, 38.
 Reef corals: Gerth, 1.
 Rhinoceroses, amynodont: Wood, H. E., 2d, 17.
 Seed plant descent: Wieland, 5.
 Sirenia: Simpson, 18.
 Skulls, vertebrate: Gregory, 17.
 Spirifer: Fenton, C. L., 10, 12.
 Stage: Schenck, 30.
 Stegocephalia: Case, 11.
 Tempskya: Read, C. B., 14.
 Tetrápods, origin: Westoll, 2.
 Titanotheres: Osborn, 23.
 Trilobita: Delo, 11, 2; Weller, 27.
 Trituberculy: Gregory, 14.
 Up from the ape: Hooton, 1.
 Variation, supra-specific: Simpson, 42.
 Vertebrata: Gregory, 11, 17, 20; Romer, 18.
 White Mts. magma ser., N. H.: Chapman, R. W., 1.
 Yellowstone Nat. Park: Howard, A. D., 8.

Evolution and the moral order: Ashley, 19.

Excursions.

- Angeles Crest highway, Calif.: Van Arminge, 9.
 Bighorn Basin-Yellowstone Valley Conf.: Tomlinson, 10.
 California, San Fernando Valley-Pacoma Canyon: D'Arcy, 5.
 Columbia River Gorge, Wash.: Barr, 1.
 Cuba, field guide: Palmer, R. H., 6.

Excursions—Continued.

- International Geol. Cong., 16th: Pfordte, 1.
 Kansas Geol. Soc. field confs.: Ball, 14; Borden, 1.
 Mexico, mineral localities: Stewart, W. O., 1, 2, 3.
 Michigan, Lake Superior dist.: Michigan Acad. Sci., 3; Anonymous, 118.
 Southern Peninsula: Michigan Acad. Sci., 1, 2.
 Mississippi Valley, Upper: Sutton, 13; Trowbridge, 15; Twenhofel, 15; Weller, 18.
 Moscow, Idaho, area: Scheid, 3.
 New England intercollegiate: Billings, M. P., 2; Fisher, L. W., 8; Foye, 2, 4, 5; Perkins, 13.
 New York: Koenig, 1; Marelli, 1; O'Connell, 1; Reimann, 12; Whitcomb, 8; Anonymous, 30.
 Oregon: Davis, F. L., 1; Smith, W. D., 10.
 Pennsylvania geologists' confs.: Cleaves, 7; Whitcomb, 8; Willard, 14.
 Trinidad geol. confs.: Hedberg, 4; Kugler, 6.
 Tri-State Geol. Field Confs., upper Mississippi Valley: Sutton, 13; Trowbridge, 15; Twenhofel, 15; Weller, 18.
 Exfoliation, hypogene: Farmin, 3.
 Exhibits in geology, importance: McGill, 14.
 Experimental investigations.
 Acmite, fusion relations: Bowen, N. L., 3.
 Agates, fms.: Caben, 1.
 Albite-fayalite system: Bowen, N. L., 15.
 Alkali sulfide solutions action on minerals: Lindner, 2.
 Alteration, pyrite to pyrrhotite: Stevens, R. E., 2.
 Aluminum and silicosis: Emmons, R. C., 11.
 Amphiboles, regeneration: Grigorley, 1.
 Bacterial genesis of hydrocarbon from fatty acids: Thayer, L. A., 1.
 Bentonite and metabentonite: Davis, F. A. W., 1.
 Biochemical reduction of sulfate waters: Thiel, 1.
 Bomb for hydrothermal experimentation: Morey, G. W., 3.
 Chalcocite-stromeyerite-argentite relations: Schwartz, 14.
 Clastic sediments, porosity and permeability: Fraser, H. J., 4; Muskat, 2.
 Clay colloids, cause of bedding: Keller, 6.
 Clay minerals, synthesis: Ewell, R. H., 1.
 Formation in laboratory: Norton, F. H., 2.
 Clay shs., weathering: Hind, 1.
 Clays, structure of water layers in: Hendricks, S. B., 4.

Experimental investigations—Continued.

- Colloids, clay, cause of bedding: Keller, 6.
- Compressibility measurements: Birch, F., 1, 2.
- Connate water in oil and gas sands: Dunlap, 1; Schilthuis, 1.
- Copper arsenides, natural vs. artificial texture: Schwartz, 23.
- Copper, native, deposition: Page, L. R., 3.
- Pyritic, origin: Kania, 4.
- Sulphide minerals: Gaudin, 6.
- Cores, marine, telescoping: Emery, K. O., 2.
- Creep of rocks: Griggs, 10.
- Crystal growth and solution under local stress: Russell, G. A., 1.
- Crystallography, potassium tetrathionate: Tunell, 10.
- Danburite: Morey, G. W., 1.
- Deformation of rocks: Griggs, 4, 8; Mott-Smith, M. C., 1.
- Deformation, single calcite crystals: Griggs, 6.
- Determination, saturation of oil sands: Hillis, 3.
- Differential compacting: Nevin, 1.
- Diffusion and ore deposits: Duffell, 1.
- Earth deformation: Quirke, 1.
- Earthquake, man made: Ulrich, F. P., 3.
- Earth vibrations caused by quarry blasts: Lee, 9; Thoenen, 3.
- Elastic properties of rocks: Ide, 2, 3.
- Elasticity, rocks, massive minerals: Birch, 5.
- Electrical blasting caps for seismog. prosp.: Rolland, 1.
- Equilibrium relationships, iron-oxygen: Greig, 4.
- Erosion, sandy river bed: Wright, C. A., 1.
- Etch figures: Honess, 5.
- Exfoliation of rocks, fatigue: Griggs, 5.
- Explosives for seismog. prosp.: Farren, 1.
- Fail of columns in earthquakes: Clements, 5.
- Feldspars, weathering: Norton, F. H., 1.
- Flow, oil-gas through sands: Reid, L. S., 1.
- Fluids through sands: Plummer, 18.
- Folding: Clark, 23; Mitchell, R. H., 1; Straley, 6.
- Fractures in clay cake: Wisser, 2.
- Freezing soils: Taber, 4.
- Galenite and pyrrhotite, deformation: Osborne, 12.
- Gas-fluids through porous media: Muskat, 4.
- General: Adams, L. H., 3.
- Geophysical Lab. repts.: Day, 1.
- Geysers, origin: Sherzer, 1.
- Glasses, altered to montmorillonite: Hauser, 1.
- Gold: Frondel, 15; Milner, R. L., 1; Ogryzlo, 1.

Experimental investigations—Continued.

- Granite, age by helium: Keevil, 1.
- Ground vibrations near blasts: Leet, 18.
- Heat conduction, dissimilar rocks: Lovering, 21.
- Hydrothermal experiments, copper: Park, 1.
- Hydrothermal oxidation and leaching: Dick, L. E., 1; Gruner, 8.
- Hydrothermal solutions, potassium chloride: Benedict, 1.
- Igneous rocks: Balk, 13; Bowen, 11.
- Iowa, rampart bldg. around lakes: Stookey, D. W., 1.
- Iron and copper sulfides: Foreman, 1.
- Kaolin minerals from feldspar: Badger, 1.
- Laboratory experimentation: Moses, 1.
- Lakes, artificial, shore processes: Evans, 11.
- Lead and zinc minerals: Kristofferson, 1.
- Lightning spalling: Lauder milk, 10.
- Limestones: Howard, H. V., 1, 5.
- Lithium distrib.: Strock, 3.
- Maghemite and ferric oxides: Newhouse, 14.
- Magmas: Bowen, 20.
- Magmatic stoping: Grout, 17.
- Magnetite crystals from meteoric solutions: Spiroff, 4.
- Manganese minerals: Trengove, 1.
- Massachusetts, Quincy granite wave velocity: Leet, 4.
- Matter, behavior under extreme conditions: Bridgman, 2.
- Meteoric iron, fused: Buddhue, 13.
- Mine, Colorado School of Mines: Read, J. B., 1.
- Minerals: Bridgman, 4; Crowley, Arthur J., 1; Staples, 6.
- Missouri Valley loess area: Musgrave, 2.
- Molding sands, durability: Casberg, 1.
- Montmorillonite to feldspar: Gruner, 25.
- Mountain bldg.: Douglas, 9; Griggs, 11.
- Mud crack expts.: Kindle, 35.
- Mud-cracked layers, curvature: Bradley, W. H., 10.
- Muscovite: Gruner, 34.
- Nepheline-albite-silica in fayalite: Bowen, 14.
- Nevada, cinnabar darkening in sunlight: Dryer, R. W., 2.
- New England, earthquake travel times: Leet, 16.
- Seismic studies of crust: Slichter, 7.
- Oil sands, shales and rock: Halbouty, 5; Jakosky, 8; Lockwood, 1; Rand, W. P., 1; Uwatoko, 1.
- Oolitic lms. hydrolytic dissociation: German, F. E. E., 2.
- Ore shoots: Douglas, 1, 3.
- Origin of petroleum: Berl, 3; Rand, W. P., 1; Stadnichenko, 4.
- Orogeny: Link, 5.
- Overburden depth determination: Keys, 4.
- Overthrusts and buttresses: Lammers, 2.

Experimental investigations—Continued.

- Peridotites: Sosman, 1.
 Permeability of rocks: Fraser, H. J., 7; Hassler, G. L., 1.
 Petrographic correl. of oil sands: Russell, R. D., 12.
 Petroleum, core testing: Landsberg, 10.
 Origin: Berl, 2; Carlson, A. J., 4; Rand, W. P., 1; Stadnichenko, 4.
 Physical properties, typical rocks: Griffith, 3.
 Planetary deformation of earth: Dennis, C. E., 1.
 Porosity and permeability: Graton, 8; Tickell, 5.
 Potential-drop ration method: Mitera, 2.
 Pothole erosion: Alexander, H. S., 1.
 Propagation, waves in lms.: Ewing, 5.
 Pyrite oxidation: Bain, 13.
 Pyrrhotite, other sulfides: Hewitt, R. L., 1, 2.
 Quarry blasting: Byerly, 26; Ewing, 5; Thoenen, 4.
 Quartz-cristobalite conversion: Cole, S. S., 1.
 Quartz orientation, deformed rocks: Griggs, 9.
 Radium in granites: Piggot, 1.
 Rates of wear, common minerals: Cozzens, A. B., 1.
 Red bed bleaching: Keller, W. D., 1.
 Reflection patterns: Rieber, 9.
 Reflection seismology: Hollister, J. C., 1.
 Resistivity, curves, interpretations: Manhart, 1.
 Measurements, artificial beds: Swartz, J. H., 5.
 Rigidity, rocks, under pressure: Birch, 4.
 Rock-forming silicates with water components: Goranson, 8.
 Salt domes: Escher, 1; Link, 4; Ritz, 1; Van Tuyl, 1.
 Sand, compressibility: Botset, 1.
 Craters, significance: Macqueen, 1.
 Oil-flow and water content: Van Wingen, 1.
 Permeability: Mavis, 1.
 Transported by wind: O'Brien, 4.
 Seismograms from shaking table: Dyk, 1.
 Serpentine minerals: Gruner, 32; Selfridge, 1.
 Shape-sorting of sand grains by wind: MacCarthy, 14.
 Shearing experts.: Boos, C. M., 2; Bridgman, 1; Larsen, 22; Rand, W. P., 1.
 Silicates: Bowen, 14, 17; Goranson, 5; Morey, G. W., 2.
 Silicate-water systems: Goranson, 5.
 Silicosis, mineralogic study: Emmons, R. C., 9.
 Silver sulfide minerals: Gaudin, 4.
 Soft-rock deformation: Rettger, 3.

Experimental investigations—Continued.

- Soil freezing: Taber, S., 2.
 Solubility of water in granite magmas: Goranson, R. W., 2.
 Solution flow and min. fm.: Newhouse, 16.
 Striations on etched lms.: Dunn, 14.
 Structural relations, converging strata: Ireland, 1.
 Structure inv.: Stone, A. T., 1.
 Sulfides, solubility to 400° C.: Verhoogen, 3.
 Suspension currents and mud slides: Stetson, 14.
 System CaO-MgO-SiO₂ reactions: Taylor, N. W., 1.
 System MgO-FeO-SiO₂: Bowen, 10.
 Thermal expansion, typical rocks: Griffith, 2.
 Thorium-uranium ratios and lead origin: Keevil, 3.
 Three-dimensional experts., earth deformation: Link, T. A., 1.
 Tin sulfides and compounds: Gaudin, 5.
 Transfusion of matter: Adams, F. D., 1.
 Travel times, waves in granite: Birch, 3.
 Varve deposition: Fraser, H. J., 1.
 Velocity determinations: Green, C. H., 1.
 Velocity of sound vs. temperature in rocks and glasses: Ide, 4.
 Velocity variation in earth model: Birch, 4-a.
 Vermiculites: Davis, F. A. W., 1; Hendricks, S. B., 3.
 Visual presentation, wave patterns: Rieber, 6.
 Wave tank study: Evans, 19.
 Well gage as seismograph: Blanchard, F. B., 1.
 Wind-faceted pebbles, fm.: Schoewe, 10.
 Wind transportation effect on min. grains: Marsland, 1.
 Wyoming, Sundance sand porosity: Nichols, H. D., 1.
 X-ray method study, hexagonal system: Barnes, W. H., 1.
 Young's modulus of rocks: Ide, 1.
 Explorations, east Greenland: Schuchert, 29.
 Exploring with explosives: Heiland, 16.
 Fabricated diagrs.: Ives, 10.
 Face of the earth: Schuchert, 41.
 Facetation, Great Basin Mts.: Keyes, 5.
 Facies, strat. paleontology: Kindle, 22.
 Faecal pellets, marine sediments: Moore, H. B., 1.
 Fairbanks area lode deposits: Hill, J. M., 2.
 Fairport oil field, Kans.: Allan, T. H., 1.
 Fake methods, geophys. prosp.: Blau, 1.
 Fanglomerates, Nev.: Sharp, R. P., 4.

Faulting.

- Alabama : Jones, W. B., 16, 21; Park, 5; Wissler, 5.
- Alaska : Capps, 12, 13; Lasky, 1; Reed, J. C., 18; Smith, P. S., 12; Tuck, 7; Waring, 6; Washburn, 4.
- Alberta : Hume, 11, 22, 23, 27, 29, 32; Link, 11, 12; Sanderson, 4; Willis, R., 4.
- Appalachian geosyncline : Ver Wiebe, 14.
- Appalachian Mts. area : Straley, 7.
- Arctic America : Bentham, 2; Downes, 1.
- Arizona : Butler, 17, 18, 19, 21; Davis, W. M., 4; Fowler, 14; Garrett, S. K., 1; Gilluly, 17, 20; Harrell, 2; Hernon, 1; Keyes, 251; Kuhn, 1; Longwell, 23; Peterson, N. P., 1, 2; Reber, 1; Rubly, 1; Short, 6; Smith, H. T. U., 10; Tenney, 6; Trischka, 4; Wilson, E. D., 8; Wilson, R. A., 1; Anonymous, 179.
- Arkansas : McKnight, 2; Rankin, C. L., 1; Reed, J. C., 16; Stearn, 11.
- Atlantic and Gulf Coastal Plain : Stephenson, 24.
- Barite area, Tenn. : Laurence, 3.
- Basin Range hypothesis : Keyes, 256.
- Bathymetric compilation, Calif. coast : Shepard, 33.
- Bedding-planes, econ. importance : Böhre, 22.
- Bighorn Basin-Yellowstone Valley area : Thom, 23; Anonymous, 117.
- Bradford field, Pa.-N. Y. : Fettke, 11.
- Breccia, cuneiform, from faulting : White, C. H., 1.
- British Columbia : Bancroft, 1; Cleveland, 1; De Béthune, 3; Goranson, E. A., 3; Hedley, M. S., 1; Horwood, 3; Joralemon, 3; Kerr, F. A., 20; Nelson, H. E., 1; Peacock, 8; Rice, 4, 5; Sharpstone, David C., 1; Stevenson, 5; Wright, L. B., 5.
- Caliche as a fault indicator : Cuyler, 3.
- California : Anderson, C. A., 8; Andrews, P., 2; Ashauer, 1; Bartosh, 3; Benioff, 5, 6; Callaghan, 15; Canfield, 1; Clark, B. L., 5, 12, 19; Clements, 6; Curry, 3, 4; Davis, 27; De Béthune, 5; Dudley, 2; Eaton, 9; Erwin, 3, 4; Grant, 17; Gregersen, 1; Gutenberg, 13; Henderson, L. H., 3; Henny, 5, 7; Herold, 8; Hewett, 16; Hill, M. L., 1, 2, 4; Hopper, 1; Johnston, W. D., Jr., 7; Kelley, 8, 10; Koch, T. W., 1; Lawson, 12; Louderback, 9, 12; Matthes, 24, 32; Mayo, 12, 15; Mielenz, 1; Miller, R. H., 1; Miller, W. J., 12, 14, 16; Morse, R. R., 1; Nash, 1; Noble, L. F., 2, 4; Oakeshott, 1; Putnam, 5; Raguin, 1; Reed, 25; Reiche, 1; Sanders, 4; Shepard, 31, 33, 47, 53; Soper, 4; Stanton, W. L., Jr., 2; Swartzlow, 5-a; Taft, 3; Taliaferro, 14; Waters, 8; Webb, 4; Willis, 17, 18; Anonymous, 60.

Faulting—Continued.

- Canada : Alcock, 13; Cox, 3; Kindie, 40; Moore, E. S., 23.
- Central America : Sonder, 1.
- Champlain Valley, N. Y., Vt. : Rodgers, 2.
- Colorado : Barbour, G. B., 1; Bassett, 3; Behre, 16, 32; Boos, 15; Burbank, 12, 16; Cross, C. W., 2; Goddard, 5; Green, T. H., 1; Haskell, 2; Heaton, 5, 8; Johnson, D. W., 4; Koschmann, 6; Lavington, 3; Loughlin, 11; Lovering, 20, 26, 30; Moehlmann, 6; Rohlfing, 1; Singewald, Q. D., 11; Stark, 7, 8, 12; Thomas, H. D., 3; Thompson, W. O., 7; Toppan, 3; Upson, J. E., 1, 2; Vanderwilt, 9, 11; Van Tuyl, 18; Walker, S. M., 1; Wilkerson, 4, 5.
- Crystalline schists, Pa., Md. : Jonas, 12.
- Cuba : Ortego y Ros, 1; Schürmann, 2; Taber, 13; Vermont, 4.
- Cumberland thrust block, Va., Ky., Tenn. : Rich, 16.
- Diamond drill cores : Wissler, 3.
- Dip reflections showing : Campbell, F. F., 2.
- Domes : Balk, 9.
- Effects on dams, Calif. : Louderback, 9.
- En échelon faulting : Clark, F. R., 1; Link, T. A., 2; Nevin, 2; Sherrill, 1.
- Epithermal precious metal deposits : Nolan, 4.
- Fault-movement rate : Blackwelder, 41.
- Fault-noise indications of earthquakes : Patterson, W. D., 1.
- Feather joints : Cloos, E., 5.
- Flaws and tear faults : Gill, 5.
- Folding, faulting in ss. through gliding : de Terra, 1.
- Fracturing of rocks without displacement : Sutton, 6.
- General : Bloesch, 4; Reid, H. F., 1; Willis, 1.
- Georgia : Kesler, 4.
- Glaciers, Mt. Crillon area, Alaska : Washburn, 4.
- Gogebic iron dist., Mich.-Wis. : Atwater, 5.
- Gold deposits, Ontario : Mather, W. B., 1.
- Grabens and associated phenomena : Rich, 27.
- Greenland : Bentham, 1; Büttler, 4, 5; Cleaves, 3; Holtedahl, 1; Korh, 12; Maync, 1; Odell, N. E., 5; Schaub, H. P., 1; Wager, 5; Wegmann, 8, 9.
- Gulf Coast oil fields : Kornfeld, Jos. A., 2.
- Hawaii, ash fms. : Wentworth, 44.
- Idaho : Anderson, 15, 23; Capps, 14; Kirkham, 5; Livingston, D. C., 1, 4; Reed, J. C., 19; Ross, C. P., 29; Shenon, 17, 18; Stearns, 27; Wilson, R. A., 5.
- Igneous rocks, structural behavior : Balk, 13.
- Illinois : Cady, G. H., 7, 8; Weller, 23.

Faulting—Continued.

- Indiana: Freed, 1; Shrock, 11; Whitlatch, 1.
 Inertia in low-angle faulting: Stevens, E. H., 1.
 Interpretation, from min. fractures: Fraser, 8.
 Iowa: Keyes, 356, 370.
 Jamaica: Kuchler, 1.
 Kansas: Melton, 12; Rich, 1; Ver Wiebe, 18.
 Kentucky: Jones, D. J., 3; McFarlan, 13; Rhoades, 2; Russell, W. L., 15; Souder, 1; Wesley, 1, 3; Wheeler, G., 5.
 Keystone faults: Crosby, 2.
 King's Mtn. area, N. C. and S. C.: Frink, 1.
 Lake Champlain area: Quinn, A. W., 1.
 Lake Superior area: Merrill, J. A., 1.
 Location by radioactivity: Lane, 22.
 Lowlands and Ouachita Provs.: Ruedemann, P., 3.
 Louisiana, Darrow salt dome: Cook, C. E., 1.
 Maine: Chadwick, 33; Haff, 4.
 Manitoba: Ambrose, 2, 3; Stockwell, 10, 11.
 Mapping: Johnson, C. H., 2; Salvatori, 2.
 Maryland: Broedel, 1; Cloos, 14; Dryden, 4; Jonas, 4.
 Massachusetts: Billings, M. P., 1, 18.
 Mechanics of: Hulin, 8, 9.
 Mexico: Arnold, R., 2; Díaz, 1; Donald, R. T., 1; González, J., 1; Imlay, 2, 7, 10, 12; Kane, 2; Kellum, 10; Kelly, W. A., 10; King, R. E., 6; Perera Castillo, 1; Valentine, W. G., 1; Wisser, 2; Woodford, 6.
 Michigan: Broderick, 12; Dickey, R. M., 5; Dutton, C. E., 5; Lamey, 8.
 Minnesota: Sandberg, 1; Sleight, 1.
 Mississippi Valley area: Bastin, 20.
 Missouri: Farrar, 2; Graves, 1; Grohskopf, J. G., 2; Tarr, 21.
 Montana: Billings, 16; Clapp, C. H., 3; Collier, 3; Dyson, 3; Hart, L. H., 2; Hurlbut, 10; Lammers, 2; Langton, 1; Pardee, 9, 11; Parker, F. S., 2; Perry, E. L., 5; Pierce, 7; Ray, J. C., 3; Reeves, F., 1; Rouse, 7; Sahinen, 4; Skeels, 1; Spiroff, 3; Swanson, R. W., 2; Wilson, C. W., Jr., 4, 11.
 Movement of fault blocks: Ambrose, 1.
 Moyle-Lenia overthrust: Kirkham, 6.
 Nebraska: Condra, 20; Cook, H. G., 15.
 Nevada: Callaghan, 7; Cameron, E. N., 2; Campbell, D. F., 1; Engeln, von, 12; Ferguson, 6, 7, 10; Gianella, 9; Jenny, 1; Kerr, P. F., 16; Longwell, 6, 15, 16, 36; Nolan, 2, 8, 9; Page, B. M., 1; Sharp, R. P., 3, 4, 5.
 New Brunswick: Alcock, 18; Shaw, E. W., 1.
 New England: Wheeler, G., 1.

Faulting—Continued.

- Newfoundland: Bain, 18; Betz, 1; Bryan, A. M., 1; Cooper, J. R., 1, 2; Espenshade, 1; Foley, F. C., 1; Heyl, 1, 2; Jewell, 2; Twenhofel, 29, 39, 40.
 New Hampshire: Billings, 10, 13; Hadley, J. B., 1.
 New Mexico: Bryan, 35; Cabot, 1; Church, F. S., 1; Dake, C. L., 4; Dunham, 3; Hunt, C. B., 2, 4, 4-a; Keyes, 334; Lasky, 14, 16; Needham, 11; Paige, 1; Reich, 5; Schmitt, 10; Smith, H. T. U., 4; Smith, J. F., Jr., 2; Stott, 1.
 New York: Balk, 11; Berkey, 13; Berry, G. W., 1; Bradley, 16, 19; Cannon, R. S., 1; Gallagher, 1; Hudson, G. H., 1; Megathlin, 2, 3; Whitcomb, 11-a.
 Nomenclature: Murray, G. E., Jr., 1; Straley, 1.
 Normal and reverse: Glll, 4.
 North America: Boesch, H. H., 3; Butler, 16; Waters, 13.
 North Carolina: Frink, 1; Goldston, E. F., 1; Murray, G. E., Jr., 4, 6; Prouty, 7.
 Northwest Territories: Cameron, 5; Furnival, 3; Hawley, 13; Henderson, J. F., 5; Kidd, 7; Lord, C. S., 1; Ryan, J. P., 1.
 Nova Scotia: Bailey, H. B., 2; Cameron, H. L., 1; Messervey, 16; Squires, 2.
 Ohio: Bucher, 15-a; Harper, J. L., 1.

Idaho: Carpenter, J. T., 2; Fernquist, 3; Walcott, 5.
Jasper: Bell, O. J., 1; Walcott, 4.
Maine: Palache, 23.
Menitoite: Ward, T. W., 6.
Michigan: Dustin, 1, 3.
Minerals, metals, and gems: Verrill, 1.
Montana: Howard, J. W., 1; Murdock, 1.
New Hampshire: Chandler, 1, 2.

Gems—Continued.

- North Carolina: McIntosh, F. G., 2;
 Pratt, J. H., 1.
 Ohio: Schiefer, 1.
 Opal: Melhase, 22.
 Oregon: Dake, H. C., 7; Melhase, 22;
 Randolph, 1.
 Quartz, precious: D'Arcy, 3.
 Sapphires: Howard, J. W., 1; Murdock,
 1.
 South Dakota: Lincoln, 1.
 Topaz: Chandler, 1, 2; Palache, 23;
 Peacock, 9.
 Tourmaline: Randolph, 14.
 Washington: Fernquist, 2.
 Zircon: Randolph, 3.

Genera, methods of comparison: Phleger, 8.

Genesis of ores. See Ore deposits, origin.

Geochemical prosp.: Rosaire, 15.

Geochemistry.

- Alteration, pyrite to pyrrhotite: Stevens,
 R. E. 2.
 Bacterial genesis of hydrocarbon:
 Thayer, L. A., 1.
 Chloride brine concentration: Russell,
 W. L., 9.
 Copper deposits, Mich.: Wells, R. C., 1.
 Dolomite, Ohio cave: Lord, R. C., 1.
 Genesis, elements: Lewis, G. N., 1.
 Geochemical prosp.: Rosaire, 15.
 Glauconite from biotite: Galliber, 12.
 Heat of solution, potash minerals: Rich-
 ardson, L. T., 1.
 Hydrogen-ion concentration from sili-
 cates: Stevens, R. E., 1.
 Hypogene ore deposits and electrode po-
 tentials: Butler, B. S., 2.
 Iron and copper sulfide experts: Fore-
 man, 1.
 Limestone precipitation by submarine
 volcanic action: Kania, 1.
 Minerals deposited from sea water:
 Wells, R. C., 5.
 Potash-rich rocks, origin: Terzaghi,
 R. A. D., 3.
 Potassium occurrence: Urry, 2.
 Present trends: Wells, R. C., 14.
 Prospecting: Rosaire, 15.
 Radium occurrence: Urry, 2.
 Rock sampling for chemical analysis:
 Grout, 8.
 Salinity, Chesapeake Bay water: Wells,
 R. C. 2.
 Solutions and geol. processes: Ingerson,
 1.
 Solvency, organic acids of oxides of iron:
 Harrar, 1.
 Sulfate reduction, deep subsurface
 waters: Ginter, 3.
 Uranium: Urry, 2.

Geo-chronology, internat.: De Geer, G. J., 2.

Geodes.

- Illinois: McKinley, W. C., 2, 3.
 Indiana: Von Osinski, 1.
 Geodesy in geophys. research: Bowie, 27.

Geodetic operation, U. S., 1933-35: Bowie,
 22.

Geodynamics, data: Hixon, 2.

Geographic distribution.

- Continental migrations, Sauropoda,
 Mammalia: Osborn, 26.
 Faunas, Eocene, West Indies, equatorial
 America: Berry, E. Willard, 3.
 Silurian, Ord.: Foerste, 2.
 Tertiary, marine, Pacific Coast: Clark,
 B. L., 3.
 Molluscan provs., west U. S.: Henderson,
 J., 5.

Geoid, spheroid, and isostasy: Lambert, W.,
 D., 3.

Geologic age.

- Appalachian Mts. region: Ashley, 34.
 Ontario, Blue Mtn. intrusive: Keith,
 M. L., 4.
 Uraninite, Beaver Lake, Northwest Ter-
 ritories: Bruner, 2.

Geologic basis for time scale: Keyes, 495.

Geologic climate. See Paleoclimatology.

Geologic educ.: Swartz, C. K., 4.

Geologic evidence of floods: Hinds, 30.

Geologic factors in mine valuation: McLaugh-
 lin, 9.

Geologic field trips: Gwynne, 7.

Geologic formations, tables. See also Corre-
 lation.

- Alabama: Barksdale, J., 2; Jones, 16, 20.
 Alberta: Ball, M. W., 1; Evans, C. S., 1;
 Hake, 2; Heiland, 19; Howells, 1;
 Hume, 1, 25, 26, 29, 31, 32; Link,
 6; MacKay, 4, 8, 9, 12; Moore,
 P. D., 3; Russell, 31, 34-a, 34-b,
 36; Rutherford, R. L., 3; Sande-
 rson, 4; Slipper, 2; Warren, P. S.,
 10; Williams, M. Y., 2.
 Antillean-Caribbean area: Schuchert, 31.
 Appalachians: Boesch, H., 2; Four-
 marier, 7; Resser, 20.
 Arizona: Brown, W. H., 4; Gilluly, 17;
 Hernon, 1; Holm, 1; Keyes, 317,
 320, 428; Lausen, 1; Ransome, 3;
 Stoyanow, 5; Tenney, 4; Wilson,
 E. B., 8; Anonymous, 16.
 Arkansas: Cronis, 2, 23; Hazzard, R.
 T., 2; Hendricks, 8; Kans. G. Soc.,
 6; Keyes, 393; McKnight, 2;
 Spooner, 4.

Atchison sh. vs. Wabaunee, Iowa-Kans.:
 Keyes, 393.

Atlantic Coastal Plain, Pleist.: Richards,
 H. G., 14.

Big Horn Basin-Yellowstone Valley
 area: Anonymous, 117.

British Columbia: Armstrong, J. E., 1,
 2; Bancroft, 1; Bostock, 1; Cairnes,
 13, 15, 17; Davis, N. F. G., 1;

 Natural gas: Ley, 2.
 Nature and devel. of sci.: Connelly, 9.
 North America, devel. and present status: Mendenhall, 10.
 Possible research program: Fenneman, 8.
 Principles and processes: Emmons, W. H., 14.
 Relation to pedology: Veatch, J. O., 2.
 Source book in: Mather, 28.
 Geology and chemistry: Bowen, 21.
 Geology and civil eng.: Hotchkiss, 6.
 Geology and clay research: Ries, 8.
 Geology and education: Bevan, 23.
 Geology and engineering: Berkey, 25; Hotchkiss, 6; Legget, 1.
 Geology and geophysics: Brace, 4; Longwell, 28-a; Rosaire, 10.
 Geology and history: Merriam, 16.
 Geology and Nat. Park Service: Ludlum, 1.
 Geology as a profession: Ekblaw, 12.
 Geology for the layman: MacLean, 1.
 Geology from original sources: Agar, 15.
 Geology, geography, and soils: Smith, J. E., 12.
 Geology in engineering: Berkey, 25; Hotchkiss, 6; Legget, 1.
 Geology in litigation: Moore, E. S., 25.
 Geology in mine valuation: Thurlow, 1.
 Geology in modern life: Behre, 28; Mansfield, G. R., 28.
 Geology in park devel.: Rothrock, H. E., 1.
 Geology in prospecting, Quebec: Bell, L. V., 15.
 Geology in war: Gonzales, E. M., 1; Portillo, 1.
 Geomagnetism applied to explor.: Stearn, 1.
 Geomorph. geol. structure model: Meyer, A. H., 2.
 Geomorphogeny. See also Physiographic geology.
 Continental genesis: Willis, B., 4.
 Mid-Atlantic ridge: Washington, 3.
 Geomorphology. See also Physiographic geology.
 Continental nuclei: Longwell, 3.
 Deserts, mountainous: Davis, 28.
 General: Cressey, 2; Johnson, 41; Meyerhoff, 28; Worcester, P. G., 5.
 Glacial: Engeln, von, 13.
 Gulf Coast geosyncline: Russell, R. J., 22.
 North America, W.: Penck, 1.
 Oscillation theory of diastrophism: Longwell, 7.
 Permanence of continents and oceans: Raymond, P. E., 2.
 Tropics, humid: Krynlne, 4.
 Virginia: Bevan, 9.
 Geon: Woodward, H. P., 1.
 Geophysical abstracts: Ayvazoglou, 1.
 Geophysical explor.: Broderick, 1.
 Geophysical interpretations: Blackburn, M. S., 1.
 Geophysical Lab. repts.: Day, 1.
 Geophysical measurements, Mich.: Keck, 1.
 Geophysical methods aid in construction work: Stipe, 1.
 Geophysical prospecting.
 Absorption and radiation by rocks: Eve, 1.
 Abstracts: Ayvazoglou, 1; Lee, F. W., 3.
 Adjustable filter, seismic waves: Pirson, 1.
 Aerial photography in geology and geophysics: Logan, J., 3.
 Aids in mining: Kelly, 16.
 Alabama: Adler, 2; Eby, J. B., 6; Jenny, 5.

Geophysical prospecting—Continued.

- Alberta: Heiland, 19.
 Amherst ss., moisture: Born, W. T., 1.
 Analysis, seismic profiles: Roman, 4.
 Anisotropy: Pirson, 4.
 Anomalies, heavy: Heiskanen, 1.
 Anthracite prosp.: Ewing, 6.
 Appalachia: Ewing, 14-a; Thom, 19, 22.
 Appalachian Mts. area: Gillingham, W. J., 2; Straley, 7.
 Applications of potential methods: Leonardon, 1.
 Arbuckle Mts., Okla.: Harding, R. L., 1.
 Areal mapping by refraction shooting: Gardner, L. W., 1.
 Arizona: Lundberg, 10.
 Arkansas: Freeman, L. J., 1.
 Atlantic Coastal Plain: Ewing, 10, 15; Leet, 13; Miller, B. L., 10; Rust, W. M., Jr., 1.
 Barbers Hill salt dome, Tex.: Barton, 19.
 Bibliography: Heiland, 9.
 Bottom-hole data determination: Schlumberger, 3.
 Boulder Dam area: Lee, 7.
 Brunton compass attachment: Wilson, J. H., 1.
 Buried river channels: Ellsworth, E. W., 3; Wilcox, S. W., 1.
 Calculation of ground motion from seismograms: Wilson, H. A., 1.
 California: Dick, J. A., 1; Henderson, J., 12; Jakosky, 7; Jenkins, 18; Mills, 1; Newhouse, 14; Pratley, 1; Salvatori, 1; Uhrig, 2; Vaughan, F. E., 2; Anonymous, 77.
 Canada: Eve, 3; Kelly, 17; Lundberg, 8; Miller, A. H., 6.
 Cap rock, Hoskins dome, Tex.: Barton, 23.
 Carolina Bays: McCarthy, 13; Prouty, 23.
 Carolina Coastal Plain: MacCarthy, 8, 10.
 Choice of geophys. methods: DeGolyer, 3; Rieber, 3.
 Chromite deposits: Oregon: Allen, J. E., 2.
 Coastal plain inv.: Woollard, G. P., 4.
 Colorado: Heiland, 5; Levings, 1; Wantland, 3.
 Continental borders, gravity studies: Swick, 3.
 Continental and oceanic structure: Field, 24.
 Continents: Thom, 17.
 Control of surveys: Barton, 4.
 Correlations: Card, 2; Pirson, 8; Van Orstrand, 3.
 Cuba: Dickerson, 4.
 Dams, earth: Heiland, 22.
 Deep drilling: Eby, 11.
 Depth calculations, seismic: Beers, 1.
 Depth determinations: Harris, S., 1; Rosenweig, 1.
 Depth factors: Evjen, 1.

Geophysical prospecting—Continued.

- Depth of strata: Harris, S., 1.
 Determination of gravity, torsion balance: Barton, 20.
 Developments since 1935: Rosaire, 11.
 Dip-needle surveys: Brant, A. A., 1; Campbell, F. F., 2; Pirson, 7; Rosaire, 8; Stearn, 2; Swanson, 4.
 Dip reflections on faults, Gulf Coast: Campbell, F. F., 2.
 Dipping strata, effect on resistivity: Aldredge, 1.
 Directional radio ore instrument: Rose, R. B., 2.
 Drill holes, explor. and heat measurements: Deussen, 5; Leonardon, 3.
 Earth crust, structure determination: Gutenberg, 17.
 Earth resistivity: Card, 1; Hotchkiss, 2; Hubbert, 3, 4, 5; Keller, W. D., 2; Lee, F. W., 1; Shue, 1; Tagg, G. F., 1; Watson, R. J., 4; Wenner, 1.
 Earth structure: Hodgson, 16.
 Earth transients, elec.: Stratham, 1.
 Elastic properties of rocks: Ide, 2, 3.
 Elastic wave explor.: Rieber, 2, 4.
 Electric explor.: Bruckshaw, 1; Crosby, 1; Fink, 1; Focken, 1; Gilchrist, 1; Karcher, 2; Kelly, S. F., 11; Lundberg, 1, 6; Rust, W. M., Jr., 2; Sawdon, 1; Schlumberger, 1, 2; Sundberg, 1; Anonymous, 163.
 Drill holes: Anonymous, 163.
 Gold: Kelly, S. F., 5; Kihlstedt, 1.
 Petroleum: Jenny, 1; Lundberg, 5; Peters, L. J., 1; Rosaire, 4, 6.
 Ore: Lundberg, 1, 5; Mason, M., 1; Rogers, A. H., 1.
 Electrical well-logging: Houston G. Soc., 2; Sawdon, 1.
 Electric resistance method: Tagg, 1.
 Equipotential surface curvature: Slotnick, 1.
 Eötvös torsion balance: Barton, D. C., 1, 2; George, P. W., 1; Heiland, 3.
 Exploring down: Kelly, S. F., 11.
 Explosives for: Barab, 1; Farren, 1; Heiland, 16; Loving, 1; Rolland, 1.
 Fake methods: Blau, 1.
 Faults, location, mapping: Hubbert, 5; Johnson, C. H., 2; Salvatori, 2.
 Fault-noise indications of earthquakes: Patterson, W. D., 1.
 Field magnetometer: Aguerrevere, 1.
 Field problems, reflection seismology: Pugh, 1.
 Florida: Jenny, 5.
 Foundation eng. by geophysics: Johnson, F. M. S., 1.
 General: Barton, D. C., 1, 2; Belluigi, 1; Bergman, 1; Clark, R. P., 1; DeMille, 1; Eby, 7, 9; Eickelberg, 1; Eve, 5; Fleming, 2; Gabriel, 9; Gonzalez, E. M., 1; Heiland, 7, 12; Henderson, L. H., 1; Isham, 1; Ja-

Geophysical prospecting—Continued.

General—Continued.

Crystalline rocks: Crickmay, G. W., 22.

Geologic fms.: Smith, R. W., 2.

Geologic map: Georgia G. S., 1.

Kaolins, sed.: Munyan, 2.

Kyanite: Smith, R. W., 6.

Ordovician altered volcanics and clays: Kay, G. M., 13.

Pennsylvanian: Wanless, 17.

Pine Mtn. quartzites: Adams, G. I., 3.

Stone Mtn. area: Lester, J. G., 1.

Taliedega pre-Camb. ser.: Crickmay, G. W., 11.

Southern Appalachians: Crickmay, G. W., 16; Resser, 21.

Mineralogy.

Clay, Attapulgas: Kerr, P. F., 19.

Garnets in granite-gneiss: Lester, J. G., 2.

Gems: McKinley, 4.

General: Hawkins, 10; Mitchell, L., 1.

Graves Mtn.: Johnston, W. D., Jr., 9, 11; Zodac, 28.

Hydrothermal mineralization: Johnston, W. D., Jr., 9.

Kyanite: Crickmay, G. W., 6, 7; Johnston, W. D., Jr., 11; Prindle, 2.

Metabentonite: Laurence, 1.

Mineral resources: Furcron, 7.

Georgia—Continued.

Mineralogy—Continued.

Opal, hyalite: Chapman, J. R., 1.

Rock wool: Furcron, 8.

Sienna deposits: Kesler, 4.

Vermiculites: Hunter, C. E., 2; Prindle, 2; Smith, R. W., 4.

Paleontology.

Archaeoceti, Tert.: Kellogg, 9.

Cambrian, restricted: Resser, 21.

Casteroides: Cahn, 3.

Coral reefs: McGlamery, 1.

Fauna, Pamlico Pleist.: Richards, H. G., 14.

Foraminifera: Cushman, 26.

Loxococoncha, Eocene: Murray, G. E., Jr., 3.

Mammoths, mastodons: Mitchell, L., 3.

Ostrea, large: Howe, 27.

Pectinidae, Tert.: Rowland, H. I., 1; Tucker, 8.

Uvigerina, Eocene: Cushman, 1.

Petrology.

Crystalline rocks: Crickmay, G. W., 5, 19, 22.

Garnets: Lester, J. G., 2.

Graves Mtn. area: Zodac, 28.

Mylonites: Crickmay, 5.

Stone Mtn. area: Lester, J. G., 1.

Physical geology.

Batholith, Elberton: Calhoun, 1.

Beach sands: Martens, 8.

Caves: Crickmay, G. W., 17.

Concretions, calcite: Cooke, C. W., 5.

Earthquake, 1/1/35: Crickmay, G. W., 8, 10.

Radial calcite concretions: Cooke, C. W., 5.

Sienna deposits: Kesler, 4.

Stone Mtn. area: Lester, J. G., 1.

Physiographic geology.

Coosa lowlands: Wright, F. J., 10.

Erosion: Crickmay, G. W., 11; Ireland, 6.

Lyell gully erosion record: Ireland, 6.

Sienna deposits: Kesler, 4.

Stone Mtn. area: Crickmay, G. W., 9; Lester, J. G., 1.

Underground water.

Crystalline rocks: Crickmay, G. W., 19.

General: Smith, R. W., 7.

Ground water, chem. character: Foster, M. D., 1.

Warm springs: Hewett, 13.

Geosynclines, Gulf Coast, Appalachians: Price, W. A., 16.

Geosynclines and geo-basins, origin: Rich, 28.
Geothermal evidence, deductions: DeLury, 19.

Geotherms: Lane, 11.

Germanium: Papish, 1.

Geysers. See also Underground water.

Basins and ig. emanations: Allen, E. T., 6.

Bore-hole inv., Yellowstone Nat. Park: Fenner, 14.

Geysers—Continued.

- California: Jaggard, 19; Keathley, 1.
 General: Allen, E. T., 1-a; Day, 10.
 Mechanism: Day, 6.
 Mexico, Ixtlan: Salazar Salinas, 4.
 Nevada: Nolan, 5.
 Nomenclature of eruptions: Fix, P. T., 1.
 Old Faithful: Bauer, C. M., 6.
 Origin: Sherzer, 1.
 Volcanoes, geysers, and hot springs: Day, 10.

- Virginia, geog. and topog. mapping: Roberts, 27.
 Mineral res. devel.: Boyle, R. S., 2.
 Shenandoah Valley: Bevan, 27.
 Volcanoes, study of: Day, A. L., 9.
 Washington Geol. Survey: Glover, 7.
 Western mining: Ransome, 4.
 West Virginia, anticlinal theory: Price, P. H., 1, 6.
 University Dept. Geology: Tilton, 1.
 Willamette, Oreg., meteorite: Pruett, 3.
 Wisconsin Geol. Survey: Bean, 2.
 Yellowstone Canyon: Howard, A. D., 3.
 Holothuroidea: Croneis, 14, 10; Hanna, G. D., 12; McGlamery, 4.
 Homer oil field, La.: Spooner, 1.
 Homonyms and nomenclators: Oehser, 1.
 Homotaxial principle in geology: Keyes, 340, 346.

Honduras.

Historical geology.

General: Sapper, 5.

Paleontology.

- Eomontipora, Cret.: Gregory, J. W., 4.
 Mammalia, Pliocene: Olson, 4.
 Hopeite: Wolf, C. W., 3.
 Horizon slope calculation, reflecting prosp.: Pentz, 1.
 Hornblends: Barnes, V. E., 1; Miller, F. S., 3.
 Horned ruminants of N. Am.: Thorpe, 12.
 Horse, geol. history and evolution: Riggs, E. S., 1.
 Hot springs. See also Thermal waters.
 General: Day, 11.
 Yellowstone Nat. Park.: Allen, E. T., 2, 5, 6-a; Day, 8; Ross, C. S., 25.
 Huronian. See Pre-Cambrian.
 Huronian problems: Lawson, 1.
 Howlite: Van Amringe, 11.
 Hydrogenation and petroleum origin: Pratt, W. E., 1.
 Hydrographic causes of climate changes: Parr, 1.
 Hydrothermal alteration.

California, Balaklafa chonolith: Seager, 1.
 Colorado, Alma dist.: Singewald, Q. D., 9.

Georgia, Cartersville dist.: Kesler, 4.
 Idaho, Coeur D'Alene district: Shenon, 18.
 Florence dist.: Reed, J. C., 19.

Lead, zinc minerals, experiments: Kristofferson, 1.
 Minnesota Pigeon Pt. area: Bastin, 16.

Montana, Ruby Gulch gold area: Dyson, 3.
 New Mexico, Virginia mining area: Lasky, 13.

New York, magnetites: Alling, 11.

Hydrothermal alteration—Continued.

- Ontario, aplites with cobalt-silver ores: Bastin, 8.
 Riebeckite: Froberg, 4; Hawley, 12.
 Silicate minerals: Syromyatnikov, 1.

Hydrothermal leaching, iron ores: Royce, 4.

Hydrothermal metamorphism, geyser basins: Fenner, 10.

Hydrothermal solutions, potassium chloride: Benedict, 1.

Hydrozoa.

- Camptostroma: Ruedemann, 18.
 Fauna Niagara nodules, Ill.: Grubbs, 1.
 Hydrocorallinae, N. J.: Richards, H. G., 6.
 Jellyfish, Grany Canyon: Van Gundy, 2.
 Ontario, Ord.: Caley, 1.

Hydrachyidae, revision: Wood, H. E., 8.

Hyrax, optical properties: Hanna, 23.

Ice age. See also Glacial geology.

Coming: Taber, C. A. M., 1.

Ice agent of rock weathering: Grawe, 3.

Ice ages (ancient).

Inclusions, origin: Grout, 20.

Interpretative petrology: Buddington, 16; Dake, 14.

Jamaica: Matley, 2, 5; Trechmann, 9.

Kansas: Carpenter, A. C., 1.

Kings Mtn. area, N. C. and S. C.: Frink, 1.

Labrador: Kranck, 3; Odell, 4, 6; Wheeler, E. P., 2d, 1, 2.

Lake Superior region: Merrill, J. A., 1.

Louisiana: Fisk, 7.

Lowlands, S.-cent. and Ouachita Provs.: Ruedemann, P., 3.

Magnetic stoping: Grout, 17.

Magmatism: Ellis, R. W., 5.

Maine: Chadwick, 33; Fisher, L. W., 11; Jenks, W. F., 2; Smith, E. S. C., 2; Trefethen, H. T., 1.

Manitoba: Baker, W. F., 1; Bruce, 4; Downie, 1; Stockwell, 5, 6, 7, 9, 10, 11; Tanton, 6-a; Wright, J. F., 1, 12, 21.

Maryland: Cloos, 6, 12, 14; Knopf, E. F. B., 2.

Massachusetts: Billings, 18; LaForge, 1.

Mauna Loa, Hawaii, laval flows: Jaggar, 37.

Mechanical analysis, thin-sec.: Krumbein, 7.

Metomorphic terminology: Erwin, 6.

Metamorphism and ig. action: Read, H. H., 1.

Metchosin volcanics, Wash., Oreg.: Weaver, 11.

Mexico: Arnold, R., 2; Blázquez, L., 3; Burri, 1; Cumming, 3; Díaz, 1; Donald, R. T., 1; Flores, T., 1, 5, 10; González, J., 1; Hernandez, 2, 3; Hirschi, 2, 5; Hisazumi, 1; Imlay, 4, 7, 10, 12; King, P. B., 26; King, R. E., 6; Kellum, 10; Kelly, S. F., 5; Müllerried, 25; Muir, J. M., 3; Ordóñez, 5, 6; Pastor, 1; Perera Castillo, 1; Santillán, 5; Schmitt, H., 2; Schürmann, 1; Singewald, Q. D., 12; Staub, 3; Valentine, W. G., 1; Vivar, 2; Wandke, 2; Watson, 9; Woodford, 6.

Michigan: Ayres, 1; Butler, B. S., 1; Dickey, R. M., 1; Lamey, 2, 4, 8.

Minerals of volcanic rocks: Melhase, 19.

Minnesota: Balk, 8; Bastin, 16; Grout, F. F., 2, 10, 22, 23; Richarz, 2; Sandberg, 4; Sanders, C. W., Jr., 1; Schwartz, 13, 29; Sleight, 1; Stark, 16; Swanson, R. W., 1; Tatge, 1; Thiel, 13.

Miquelon Is., West Indies: Aubert de la Rue, 1, 2, 3.

Mississippi embayment: Moody, C. L., 8.

Igneous and volcanic rocks—Continued.

- Mississippi Valley area: Bastin, 20; Tolman, 16.
- Missouri: Bridge, 2; Conselman, 1; Dake, C. L., 1; Graves, 1; Mullenberg, 1; Singewald, J. T., Jr., 5; Tarr, 9, 16; Tolman, 8, 10.
- Models of: Anonymous, 130.
- Montana: Clapp, C. H., 3; Dickey, F. H., 2; Gibson, R., 1, 2; Howland, 2; Hurlbut, 10; Jones, R. H. B., 1; Langton, 1; Larsen, E. S., 2, 15; Lorain, 1; Lovering, 1; Pardee, J. T., 2; Parsons, W. H., 4; Pierce, 7; Reeves, F., 1, 3; Sahinen, 4; Schafer, 3; Shenon, 1, 15; Skeels, 1; Spiroff, 3; Vhay, 2; Wolff, 6.

- Concretions limonite : Bates, R. L., 2.
 Loess : Cuthbert, 1.
 St. Peter ss. : Thiel, 9.

Physical geology.

- Caves, Galena fm. : Bretz, 9.
 Earthquakes : Seeburger, 4.
 General : Keyes, 421.
 Geological complex : Osborn, W. G., 1.
 Ramparts around lakes : Stookey, D. W., 1.
 Redfield anticline : Condra, 17.
 Red Oak fault : Keyes, 370.
 Tectonic features : Keyes, 57.
 Teleseismic recording : Seeburger, 1.
 Unconformity, Henrietta group : Cline, 3.

Physiographic geology.

- Aftonian interglacial horizon : Kay, G. F., 2.
 Ashawa till sheet : Keyes, 164.
 Audubon Co. Pleist. : Yoho, 1.
 Buchanan interglacial : Keyes, 77.
 Climatic cycles and glacial recession : Smith, J. E., 13.
 Concretions, limonite : Bates, R. L., 2.
 Des Moines glacial sec. : Keyes, 34.
 Des Moines River, glacial : Keyes, 328, 331, 381.
 Drainage changes : Keyes, 217.
 Duration, glacial-interglacial ages : Kay, G. F., 12.
 General : Keyes, 421.
 Glacial deposits : Keyes, 35.
 Glacial history : Keyes, 421.
 Glacial outlook : Keyes, 36.
 Iowan glacial epoch : Keyes, 63.
 Iowan gravels : Miller, P. T., 1.
 Iowan loess and till : Keyes, 138 ; Sardeson, 2.
 Iowan-Wisconsin drift sheets, ages : Kay, G. F., 8.
 Loveland loess : Kay, G. F., 15, 16, 17 ; Keyes, 215, 233.
 Maquoketa natural bridge : Keyes, 17.
 Maryville lowland : Keyes, 487.
 Middle River traverse : Goshorn, A., 4.
 Patrician glacial interval : Keyes, 234.
 Pebble band, Iowan till, origin : Kay, G. F., 10.
 Peneplanation, driftless area : Keyes, 302.
 Peorian loess : Kay, G. F., 15, 16, 17.
 Pleistocene : Carman, 4 ; Kay, G. F., 1, 4, 6, 12, 13 ; Smith, J. E., 7.
 Post-Illinoian, pre-Iowan loess : Kay, 3.
 Pre-Wisconsin valley : Wood, L. W., 6.
 Rate of last ice withdrawal : Keyes, 329.
 Recessional stages, Altamont-Gary area : Smith, J. E., 2.

Iowa—Continued.

 North Carolina: Murray, G. E., Jr., 4; Vitz, 1.
 Northwest Territories: Furnival, 3; Henderson, J. F., 3.
 Ontario: Bartley, 2; Bateman, J. D., 2; Bruce, 25; Derry, 10; Harding, 4; Horwood, 9; Hurst, 10; Lindner, 1; Perdue, 1; Pettijohn, 15; Phemister, 1; Quirke, 18-a, 18-c; Reid, J. A., 3; Satterly, 4; Thomson, James E., 8; Thomson, R., 2; Yates, 1.
 Oregon: Buddington, 14; Callaghan, 10; Gilluly, 7, 16; Goodspeed, 10, 13, 20.
 Organic sediments and derived oils: White, 26.

Metamorphism—Continued.

- Pennsylvania: Fraser, D. M., 5, 11, 15; Postel, 2; Stadnickenko, 4.
 Pyroclastics: Bramlette, 3.
 Quebec: Auger, 2; Bannerman, 4; Freeman, B. C., 7; Lowther, 1; McKenzie, 4; Mawdsley, 6; O'Neill, 4; Osborne, 22, 24, 26; Stevenson, J. S., 2; Tolman, 12; Weeks, L. J., 5-a.
 Replacement, dikes and sills: Goodspeed, 6.
 Replacement shells around batholiths: Freeman, B. C., 5.
 Retrogressive, and phyllonitization: Knopf, E. F. B., 4.
 Saskatchewan: Weeks, L. J., 9.
 Serpentine-country rock contacts: Phillips, A. H., 3.
 South Carolina: Kesler, 1.
 South Dakota: Gustafson, J. K., 1.
 System CaO-MgO-SiO₂ reactions: Taylor, N. W., 1.
 Tectonic, Appalachians: Becker, H., 3.
 Texas: Stenzel, 9.
 Transfusion of matter: Adams, F. D., 1.
 Tri-State dist.: Fowler, 7.
 Ultrabasic intrusions: Hess, H. H., 5, 6.
 Ultrametamorphism and anatexis: Sederholm, 3.
 Utah: Gilluly, 5.
 Vermont: Bain, G. W., 7, 17; Foyles, 5; Jacobs, E. C., 3.
 Virginia: Furcron, 9; Hess, H. H., 4; Holden, R. J., 7.
 Washington: Culver, 6; Goodspeed, 16, 18; Waters, 4, 14.
 West Virginia: Heck, E. T., 5.
 Wyoming: Horberg, 1.
 Yellowstone Nat. Park: Fenner, 11, 18.
 Yukon: Bostock, 6; Johnston, J. R., 2.
 Metamorphism and igneous action: Read, H. H., 1.
 Metasomatism: Anderson, G. E., 2.
 Meteor craters.
 Arizona: Barringer, 2; Bingham, W. F., 2; Blackwelder, 29; Boon, 7; Delenbaugh, 1; Spencer, L. J., 2, 4; Stutzer, 1, 2.
 Carolina Bays: Cooke, C. W., 13, 17; Johnson, 38; Melton, 10; Wylie, 5.
 General: Fairchild, 21; Nininger, 26.
 Meteorite craters and cryptovolcanic structures: Boon, 3.
 Meteorite scars, Carolina: Cooke, C. W., 13, 17; Johnson, D. W., 38.
 Meteoritic craters and structures: Albritton, 6; Boon, 5.
 Nördlinger Ries crater cf. Arizona: Stutzer, 2.
 Odessa, Tex.: Monnig, 1.
 Spanish Fork Canyon, Utah: Schneider, 5.
 Texas: Barringer, 1; Nininger, H. H., 2.

Meteorites.

- Adams County, Colo. : Nininger, 14.
 Age of : Buddhue, 28; Fisher, C., 1; Oepik, 1.
 American Mus. Nat. History coll. : Reeds, C. A., 15.
 Annual deposit on earth : Wylie, 9.
 Archie, Mo. : Haynes, 1; Nininger, 35, 43.
 Arizona, Meteor Crater : Boon, 7; Colvocoresses, 1; Fairchild, 6; Jakosky, 2; Lundberg, 10; Russell, H. N., 1; Wylie, 7.
 Prehistoric meteorite : Brady, L. F., 1.
 Athens, Ala. : Wylie, 6; Hampton, L. D., 1.
 Bacteria in meteorites : Farrell, 1; Lipman, 2, 3; Nininger, 22; Roy, 11, 14.
 Ballinger, Tex. : Nininger, H. H., 2.
 Bartlett, Tex. : Bullard, F. M., 6.
 Baxter, Mo. : Nininger, 46, 55.
 Beardsley, Kans. : Nininger, 19; Waldschmidt, 2.
 Bear Lodge, Wyo. : O'Hara, 8.
 Beenham, N. Mex. : Leard, 1.
 Bend, Ill. : Nicholas, H. W., 3; Wilson, B. H., 2.
 Bennet Co., S. Dak. : O'Hara, 9.
 Bibliography : Hamilton, S. H., 1; Leonard, F. C., 2.
 Brenham, Kans. : Nininger, 29.
 Bruno, Saskatchewan : Nininger, 37.
 Campbellsville, Ky. : Young, D. M., 1.
 Canyon Diablo, Ariz. : Brady, 15; Ksanda, 2; Nininger, 61.
 Cape York : Figgins, J. D., 1.
 Carbo, Mexico : Palache, 9.
 Carbon content : Buddhue, 8.
 Carolina Bays : Cooke, C. W., 13, 17; MacCarthy, 13; Prouty, 24, 25, 26.
 Casas Grandes, Mex. : Monnig, 4.
 Catalog of falls : Nininger, A. D., 2.
 Chemical composition, mean : Watson, F. G., Jr., 2.
 Cherokee Springs, S. C. : Perry, S. H., 1, 2.
 Chihuahua, Mex. : Nininger, 11.
 Clarion Co., Pa. : Stone, 14.
 Coe College coll. : Dillé, 1.
 Coldwater, Kans. : Nininger, H. H., 4, 6.
 Collections : Dillé, 1; Gordon, S. G., 1; Nininger, 41; Reeds, 15; Anonymous, 46.
 Composition : Merrill, 5; Nininger, 56.
 Continents, meteoric origin : Bartlam, 1.
 Contributions to sediments : Lane, 40.
 Cooldge, Kans. : Nininger, 53.
 Copper, free, in Greenland meteorite : Buddhue, 9.
 Cotesfield, Nebr. : Nininger, 21.
 Covert, Kans. : Nininger, 12.
 Craters and structures : Boon, 6; Nininger, 56-a.
 Cruz del Aire, Mex. : Heineman, 4.
 Deport, Tex. : Palache, 16.
 Depth, and Great Plains gradation : Nininger, 34.

Meteorites—Continued.

- Discoveries of, Aug. 1933-June 1937 : Nininger, A. D., 1.
 Distribution of : Penniston, 1.
 Double heating : Richardson, D. P., 2.
 Doubtful : Buddhue, 10.
 Duchesne, Utah : Nininger, H. H., 1.
 Elden, Ariz. : Brady, L. F., 3, 14.
 Estes Park, Colo. : Van Valkenberg, H. B., 1.
 Falls : Kban, 1; Nininger, A. D., 2; Nininger, 44; Smead, 1.
 Fayetteville, Ark. : Richardson, D. P., 1.
 Flagstaff, Ariz. : Brady, L. F., 2.
 Formation of craters : Wylie, 7.
 Frequency of falls : Fisher, W. J., 1.
 General : Chapman, E. W., 1; Fairchild, 21; Farrington, 2; Henderson, E. P., 13; Kunz, 2; Leonard, F. C., 1; Lucas, F. A., 1; Merrill, G. P., 1; Nininger, 20; Pruett, 1; Reeds, 10.
 Germanium and arsenic in : Papish, 2.
 Goose Lake, Calif. : Leonard, 6, 7, 8; Watson, F. G., Jr., 3.
 Grant, N. Mex. : Henderson, E. P., 7.
 Harding Co., N. Mex. : Wylie, 3.
 Haviland crater, Kans. : Nininger, 25, 51.
 Helt Township, Ind. : Perry, S. H., 5.
 How to recognize : Nininger, 31.
 Huizopa, Mex. : Nininger, 16.
 Impact : Boon, 2; Buddhue, 24, 26.
 Inclusions : Buddhue, 16.
 Institute for research on : Nininger, 33.
 Iron, age : Evans, R. D., 4; Urry, 10.
 Iron, composition : Brady, 14; Buddhue, 4, 7, 15, 20.
 Iron, never fused : Buddhue, 13.
 Kansas since 1925 : Nininger, 42.
 Lanton, Mo. : Cullison, 1.
 Maxaphi, Mex. : Wylie, 4.
 Melrose, N. Mex. : Nininger, 24, 28.
 Metallic etching, preserving : Nininger, 36.
 Meteor Crater, Ariz. : Barringer, 2; Bingham, W. F., 2; Blackwelder, 29; Boon, 7; Dellenbaugh, 1; Fairchild, 6; Spencer, L. J., 2, 4; Stutzer, 1, 2.
 Meteor Crater, Tex. : Barringer, 1.
 Meteor Crater bolide : Fairchild, 6.
 Meteor craters : Fairchild, 21; Nininger, 26.
 Meteoric and supposed craters : Boon, 5.
 Meteorite scars (?) N. C. and S. C. : Cooke, C. W., 13, 17; Johnson, 38; Melton, 10; Wylie, 5.
 Meteoritics, college courses in : Leonard, F. C., 5.
 Mexico : Haro, 1¹; Millerried, 23; Nininger, 9.
 Monahans, Tex. : Buddhue, 31; Nininger, 59.
 Moore Co., N. C. : Henderson, E. P., 10.
 Muroc, Calif. : Nininger, 48, 50.
 Nativitas, Mex. : Nininger, 10.
 Nature and significance : Palmer, C. S., 1.
 New England : Wigglesworth, 1.

Meteorites—Continued.

- Newport, Ark.: Nininger, 15.
 Nickel, weathering loss: Nininger, 52.
 Nininger coll.: Anonymous, 44.
 Nininger Lab. work: Gillespie, D., 1.
 Norfolk, Ark.: La Paz, 1; Nininger, 49.
 North America, distrib.: La Paz, 2.
 Occurrence in sed. rocks: Tarr, 7.
 Odessa, Tex.: Boon, J. D., 8; Nininger, 27.
 Ogallala, Nebr.: Nininger, 17.
 Oklahoma: Monnig, 3.
 Origin: Wimmer, 4; Wylie, 10.
 Osseo, Canada: Marble, 8.
 Oxidation: Buddhue, 30; Nininger, 8.
 Paint Creek, Ohio: Ver Steeg, 21.
 Paragould, Ark.: Wylie, 1.
 Pasamonte, N. Mex.: Foshag, 19; Nininger, 39, 45.
 Peck's Spring, Tex.: Merrill, G. P., 3.

 Galena: Buerger, M. J., 6; Head, R. E., 3; Howell, 33.
 Gallium in zinc minerals: Papish, 3.
 Garnets: Bramlette, 1; Eckel, E. B., 2; Fleischer, 2; Randolph, 2.
 Gems and gem minerals: Foshag, 1; Howell, D. H., 1; Kraus, 4, 9; Martindale, 2.
 General: Buddhue, 3; Frondel, 1, 5; Hawkins, 6; Kraus, 6; Lewis, J. V., 4; Melhase, 5; Thomson, J. Ellis, 16; Vaughan, H., 2.
 Geodes containing petroleum: Anonymous, 181.
 Geology in mine valuation: Thurlow, 1.
 Georgia geol. mus.: Mitchell, L., 2.
 Getting acquainted with minerals: English, G. L., 1.
 Gillespite: Schaller, 2.
 Glauconite: Galliber, 13; Gildersleeve, 4; Gruner, 22.
 Goethite: Gruner, 9; Tunell, 1.
 Gold: Crawford, 11.
 Granites: Seaman, 7; Wahlstrom, 6.
 Graphite: Randolph, 13.
 Gravity separation: Emmons, R. C., 5.
 Grids for non-opaque minerals: Donnay, 14.
 Grunerite: Richarz, 5.
 Gudmundite: Buerger, 29.
 Gypsum: Pohl, 13.
 Halite: Kennard, 3.
 Halloysite: Hendricks, S. B., 2; Ross, C. S., 15.
 Hanksite: Ramsdell, 7.
 Heavy mineral separation: Brown, I. C., 1.
 Heavy minerals, strat. guide: Edson, 6.
 Hematite in muscovite: Frondel, 12.
 Hematite relations: Guild, 3.
 Hopeite: Wolfe, C. W., 3.
 Hornblende: Barnes, V. E., 1.
 Hydrophilite: Slawson, 1.
 Hydrothermal alteration, ig. rocks: Schwartz, 27.
 Hydrothermal solutions, potassium chloride: Benedict, 1.
 Identification by staining: Head, R. L., 2.
 Igneous rocks: Schairer, 7; Shand, 1.
 Ilmenite: Moore, E. S., 24.

Mineralogy—Continued.

- Immersion liquids: West, C. D., 1.
 Inclusions, oriented: Frondel, 12.
 Incrustations: Frondel, 4, 13.
 Index liquids: Glass, J. J., 2; Slawson, 8.
 Indian arrow-point materials: Dustin, 5.
 Indices of refraction measurements: Quirke, 20.
 Industrial minerals and rocks: A. I. M. E., 2.
 Interference, common minerals, tests: Dreyer, R. M., 1.
 Integrowths, bornite-chalcocopyrite: Schwartz, 7.
 Introduction to study of minerals: Law, L. B., 1.
 Iron ores of U. S.: Cooke, S. R. B., 3.
 Iron oxide minerals: Law, L. B., 1.
 Iron valence in pyrite and marcasite: Buerger, 21.
 Isomorphous substitution of elements: Phillips, A. H., 1.
 Isotopes, uranium and lead: Lane, 41.
 Jade identification: Merritt, P. L., 1.
 Jarosite, crystal structure: Hendricks, S. B., 1.
 Jaspers, Lake Superior: Koelnau, 1.
 Joaquinite: Palache, 15.
 Kaolin minerals: Gruner, 30; Ross, C. S., 4, 5, 6.
 Kaolinites: Gruner, 13, 30.
 Kennecott ore minerals: Lasky, 3.
 Krennerite: Tunell, 12.
 Large crystals: Palache, 18.
 Lattice dimensions, amphiboles: Greenwood, 1.
 Lead ores, primary, origin: Holmes, A., 5; Knopf, A., 15; Wells, R. C., 13.
 Lead and zinc minerals, experiments: Kristofferson, 1.
 Leightonite and polyhalite: Peacock, 16.
 Lepidolites: Stevens, R. E., 4; Winchell, 8.
 Leucoxene: Tyler, 5.
 Limonite from molybdenite: Blanchard, 4.
 Lindgrenite: Palache, 30.
 Linnacite sulfides: Tarr, 17.
 Lithium distrib.: Strock, 3.
 Luminescence, mineral: Brown, W. L., 4; Gunnell, E. M., 2, 5.
 Maghemite or oxymagnite: Winchell, 5.
 Magma and its products: Knopf, 17.
 Magnesian amphibole: Bowen, 4.
 Magnetites: Greig, 5; Guild, 3; Perry, E. L., 8; Schwartz, G. M., 2, 5.
 Manganese: Harper, M. F., 2; Murata, 2; Smitheringale, 1.

- Petrofabric diagrs.: Haff, 3.
- Phosphates, field test: Oakes, 1.
- Phosphorescent minerals: Zodac, 11.
- Phosphosiderite symmetry: McConnell, 6.
- Photography, nat. color: Shaub, 12.
- Photography, petrographic thin secs.: Crook, W. J., 1.
- Photo-phosphorescence: Brown, W. L., 2.
- Plagioclase feldspars: Alling, 2.
- Plagioclases: Meen, 1.
- Platinum group: Buddhue, 6.
- Platinum in meteorites: Hawley, F. G., 1.
- Pleochroic baloes: Henderson, G. H., 2, 3.
- Polarity in magnetite: Walker, T. L., 6.
- Polarizing vertical illuminator: Osborne, 9.
- Polishing apparatus for ore minerals: Murdoch, 8.
- Polymorphs of sulphur: Morse, H. W., 2.
- Polymorphous forms, genesis: Bloom, 1.
- Potash fields, N. Mex., Tex.: Schaller, 1.
- Potash minerals: Schaller, 8.
- Precious metal elements: Fraser, H. J., 6.
- Pre-Dana and contemporary lit.: Wilson, B. H., 1.
- Present trends: Palache, 34.
- Projection diagrams: Wright, F. E., 1.
- Projection, direct, optic figs.: Quirke, 18.
- Protactinium, terrestrial, meteoritic: Evans, R. D., 6.
- Pseudocubic quartz crystals: Tarr, W. A., 2.
- Psilomelane: Cooke, S. R. B., 1; Ramsdell, 3.
- Pyrite: Bain, 18; Buerger, M. J., 8; Guild, 2, 3; Mathias, 1.
- Pyroxenes: Barth, 4; Sundius, 2; Winchell, 10.
- Pyrrhotite: Hewitt, R. L., 1, 2; Schwartz, 19.
- Quartz: Dake, 26; Frondel, 3; Furnival, 4; Goodspeed, 5; Hulin, 10; Meen, 4, 5; Moehlman, 3; Mohler, N. M., 2; Randolph, 5; Tarr, W. A., 1; Van Amringe, 1; Wayland, 2.
- Quartz-dioptase-garnet veinlets: Goodspeed, 5.

Mineralogy—Continued.

- Radioactive elements: Wells, R. C., 10.
- Radium content, Pacific Ocean water and sediments: Evans, R. D., 5.
- Rare elements, concentration: Zies, 6.
- Rare metals and minerals: Hess, F. L., 12.
- Rates of wear, common minerals: Cozens, 1.
- Reflectivity and color: Parrish, 1.
- Refractive index determination: Emmons, R. C., 3; Slawson, 7.
- Research, mineralog. trend: Tarr, 23.
- Residues, insoluble, from acetic acid: St. Clair, D. W., 1.
- Rhythmic banding: Cooke, C. W., 1.
- Ring-agate vs. eye-agate: Wilson, B. H., 3.
- Rock analysis method: Goldman, F. H., 1.
- Rock crystal: Zodac, 17, 21.
- Rock-making minerals: Runner, 16.
- Rock-slicing machines: Shaub, 5.
- Rock weathering study: Goldich, 2.
- Roebblingite: Blix, 1.
- Römerite: Wolfe, 2.
- Rosilwal method, modal rock determination: Larsen, 14.
- Salt domes, ceramic deposits: Steinmayer, 3.
- Sampling minerals in polished secs.: Haycock, 1.
- Sands, Mississippi River and tributaries: Russell, R. D., 10, 13.
- Satin spar: Hills, V. G., 1.
- Schiller structure: Colony, 7.
- Scientific illustration: Ridgway, J. L., 1.
- Sedimentary rocks: Pettijohn, 6, 14.
- Sediments, mineral analysis: Pettijohn, 16.
- Sediments, X-ray analysis: Mehmehl, 1.
- Selective incrustation: Frondel, 2.
- Seleniferous soils shown by plants: Beath, 4.
- Selenium, microchemical test: Evans, M. H., 1.
- Sepiolite: Schaller, 21.
- Serendibite, N. Y.: Larsen, 8.
- Serpentines: Gruner, 26, 32; Selfridge, 1; Wells, F. G., 1.
- Shearing experiments: Larsen, 22.
- Silica, chert and flint: Gunnell, E. M., 6.
- Silicates: Berman, 5, 8; Flint, E. P., 1; Gruner, 10; Morey, G. W., 2; Stevens, 3; Swartz, C. K., 5.
- Silicon: Staples, 5.
- Silicosis: Colony, 6; Emmons, R. C., 9.
- Silicification: Randolph, 7.
- Sillimonite group: Riddle, 1.
- Silver, distrib. in ores: Lasky, 9; Warren, H. V., 7.
- Silver minerals: Gaudin, 5; Stephens, M. M., 1.
- Slate, X-ray analysis: Anderson, H. V., 1.
- Smaltite: Short, M. N., 2.
- Solution, colloidal dispersion of minerals in water: Nutting, 4.

Mineralogy—Continued.

- Sodium, potassium chlorides, determination: Slawson, 2.
 Sodium carbonate hydrates: Pabst, 1.
 Specific gravity by index liquids: Meen, 2.
 Spectrograph: Lee, O. I., 2; Stow, 5; Wright, T. A., 1.
 Spectrographic analysis: Ussery, 1.
 Spectroscopic analysis: Claussen, 1.
 Sphalerite: Mitchell, E. M., 4; Palache, 17.
 Spherulites: Colony, 4; Morse, H. W., 1; Wilkinson, W. D., 3.
 Spodumene: Blank, E. W., 2.
 Spotting specimens for cat. nos.: Warthin, 12.
 Staining minerals: Gaudin, 1, 2.
 Standardizing crystal form names: Wherry, 3.
 Stibnite and orpiment, Nev.: Palache, 8.
 Stilpnomelane: Gruner, 23, 31.
 Structural crystallography: Rogers, 12.
 Structural petrology: Lovering, 29.
 Subsoil meteorites: Nininger, 58.
 Succession, temperature, mineral fm.: Lindgren, 15.
 Sulfides: Gruner, 6; Tarr, 17.
 Sulfo salts: Gruner, 7; Palache, 37.
 Sylvanite: Tunell, 12.
 Symmetry classes: Rogers, A. F., 5.
 System Cu-Fe-S: Merwin, 2.
 System $\text{Cu}_2\text{-S-CuS}$ solid phase: Buerger, N. W., 5.
 Table of minerals: Kelly, V. C., 2; Anonymous, 96.
 Tables for mineral determination: Eakle, 3; Ellis, R. W., 1; Rosenholz, 1.
 Taenite: Buddhue, 32.
 Tellurobismuthite: Frondel, 17.
 Temperature of magmas: Larsen, 2.
 Ternary system, leucite-diopside-silica: Schairer, 6.
 Testing minerals by spectroscope: Cutting, 1.
 Textbook: Dana, 1; Ford, W. E., 1.
 Thin-section mineralogy: Rogers, 11.
 Thorium-uranium ratios and lead origin: Kevvii, 3.
 Thullite: Northrop, 6.
 Tin sulfides and compounds: Gaudin, 5.
 Tourmalines: Brown, L. S., 1; Buerger, 25; Frondel, 11; Tompkins, 1; Ward, G. W., 1.
 Translation gliding in crystals: Buerger, M. J., 1, 2.
 Tremolite, role of water in: Posnjak, 2.
 Triboluminescent zinc sulfides: Gunnell, E. M., 4.
 Tungsten: Newhouse, 10; Van Horn, 2.
 Turquoise: Kollida, 2.
 Twin lamellae, dolomite: Parsons, 8.
 Ultra-violet absorption: Mohler, N. M., 1.
 Universal stage, modified: Emmons, R. C., 4.

Mineralogy—Continued.

- Uranium: Lane, 23; Palache, 26.
 Vanadium in lead deposits: Newhouse, 10.
 Variscite-metavariscite: McConnell, 7.
 Vermiculites: Gruner, 20; Hendricks, S. B., 3.
 Violarite: Short, M. N., 1.
 Virginia, Potomac River sediments: Hoffman, J., 1.
 Volcanic rocks, minerals: Melhase, 19.
 Wave lengths of minerals: Dake, 23.
 West Virginia, Potomac River sediments: Hoffman, J., 1.
 Wolframite: Guild, 2.
 Wollastonite: Schairer, 5.
 X-ray study, akermanite: Schairer, 5.
 Antlerite: Richmond, 6; Waldo, 2.
 Brochantite: Waldo, 2.
 Calcite-rhodochrosite ser.: Krieger, 1.
 Cobalt, arsenides and antimonides: Holmes, R. J., 1.
 Diopside: Schairer, 5.
 Nickel, arsenides and antimonides: Holmes, R. J., 1.
 Pseudowollastonite: Schairer, 5.
 Quartz: Clark, G. L., 2.
 Silica minerals: Hurlbut, 5.
 X-rays in mineralogy: Peacock, 18.
 Zeolites: Winchell, 13.
 Zincite in manganese: Frondel, 16.
 Minerals, magnetic properties: Davis, C. W., 3.
 Minerals in medicine: Jones, A. C., 1.
 Mining for oil: Rich, 24.
 Mining geology.
 Aerial reconnaissance and mapping: Eliel, 3.

 Quebec: Bell, L. V., 14; Cooke, H. C., 11; Hawley, 6.
 Types of deposits: Butler, 22.
 United States: Rusakov, 1.

Monazite: A. I. M. E., 2.

Montana.

Areas described.

- Argenta area: Shenon, 1.
 Ashland coal field: Bass, 3.
 Bannack area: Shenon, 1.
 Big Horn Co.: Knappen, 2; Thom, 14.
 Big Snowy Mts.: Reeves, F., 3.
 Carbon Co.: Knappen, 2.
 Choteau Co.: Pierce, 7.
 Coopers Lake quad.: Clapp, C. H., 6.
 Crow Indian Reservation: Thom, 14.
 Hill Co.: Pierce, 7.
 Kevin-Sunburst oil field: Collier, 1.
 Liberty Co.: Pierce, 7.
 McCone Co.: Collier, 3.
 Mizpah coal field: Parker, F. S., 2.
 North Moccasin Mts.: Bixt, 1.
 Red Lodge coop. research area: Thom, 6.
 Rochester mining dist.: Sahinen, 4.
 Rosebud coal field: Pierce, 6.
 Sheridan coal field: Baker, A. A., 2.
 Tobacco Root Mts.: Tansley, 1.
 Trail Creek-Canyon Mtn. area: Skeels, 1.

Economic geology.

- Agate: Harstad, 2.
 Alabandite: Hewett, 2.
 Argenta area: Shenon, 1.
 Asbestos: Bowles, O., 4.
 Ashland coal field: Bass, 3.
 Badger Pass mining dist.: Sabinen, 1.
 Baker-Glendive anticline: DeWolf, 4.
 Bannack area: Shenon, 1.
 Big Horn Basin oil and gas fields: Emery, W. B., 3; Field, R. M., 4.
 Big Horn Co.: Thom, 14.
 Block P mine: Spiroff, 3.
 Boulder batholith: Jones, R. H. B., 1.
 Butte mining dist.: Dickey, F. H., 2; Hart, L. H., 2; Perry, E. S., 4.
 Chouteau Co.: Pierce, 7.
 Chromite: Jones, V. E., 1; Salo, 1; Schafer, 8.
 Clay: Warde, 2.
 Coal: Collier, 3; Dobbin, 8; Parker, F. S., 2; Pierce, 2.
 Colorado geosyncline: Harris, G. W., 1.

Montana—Continued.

Economic geology—Continued.

Cut Bank oil field: Perry, 12; Stewart, H. A., 1.
 Deep drilling results: Bartram, 4.
 Elk Basin oil and gas field: Bartram, 1.
 Flathead mine: Shenon, 2.
 Forsyth coal field: Dobbin, 3.
 Gold: Corry, A. V., 1; Crawford, 5, 9;
 Gibson, R., 1; Gilbert, F. C., 2;
 Grassmuck, 1; Jones, V. E., 2;
 Lorain, 1.

Helena area minerals: Pardee, 4.
 Hill, Co.: Pierce, 7.
 Hog Heaven mining dist.: Shenon, 15.
 Kevin-Sunburst oil field Collier, 1;
 Howell, W. F., 1.
 Liberty Co.: Pierce, 7.
 Manganese: Gilbert, F. C., 3.
 Metasomatic replacement deposits: Ray,
 J. C., 1.
 Mineral resources: Sahinen, 2.
 Mining geology at Butte: Linforth, 1.
 Mizpah coal field: Parker, F. S., 2.
 Natural gas: Bartram, 7; Dobbin, 10;
 Perry, 8, 17, 18; Pierce, 2; Rowe,
 J. P., 1.

Neihart mining dist.: Schafer, 1.
 New World dist.: Lovering, 1.
 Nickel: Howland, A. L., 2.
 Nonmetallic minerals: Kriegel, 1.
 Oil fields: Bartram, 5; Link, 10; Perry,
 18; Romine, 1.
 Petroleum: Bartram, 5; Brainerd, 6;
 Dobbin, 10; Link, 10.
 Ore genesis: Shenon, 12.
 Ornamental stone: Mansfield, G. R., 13.
 Phosphate rock: Mansfield, G. R., 1, 10;
 Pardee, J. T., 9; Sabinen, 3.
 Placer mining: Dingman, 1.
 Platinum: Howland, 2.
 Rainy Creek dist.: Pardee, J. T., 2.
 Richey-Lambert coal field: Parker, F. S.,
 1.
 Rochester mining dist.: Sabinen, 4.
 Rocky Mts. area: Uren, 2.
 Rocky Mts. phosphate field: Mansfield,
 G. R., 10.

Rosebud coal field: Pierce, 6.
 Ruby Gulch gold dist.: Dyson, 3.
 Sapphires: Howard, J. W., 1; Murdock, 1.
 Silver, first production: Gilbert, F. C., 1.
 Southeastern Mont.: Perry, 15.
 Spring Hill gold mine: Jones, V. E., 2.
 Stillwater complex: Howland, 2.
 Tobacco Root Mts.: Tansley, 1.
 Vein system, Butte: Ray, J. C., 3.
 Vermiculite: Kriegel, 2.
 York-Confederate Gulch area: Anony-
 mous, 8.

Historical geology.

Algal reefs, bioherms, Belt ser.: Fenton,

Nemaha Mts. oil field, Kans.: Thomas, C. R., 1.

Nepheline-albite-silica in fayalite: Bowen, 19.
Nephrite.

Washington: Anonymous, 188.

Wyoming: Anonymous, 194.

Neptunite, Calif.: Buttengenbach, 1.

Nevada.

Gypsum cave: Stock, 9.

Areas described.

Brucite area, Paradise Range: Callaghan, 2.

Cherry Creek dist.: Schrader, 3.

Goodsprings quad.: Hewett, 4.

Pioche dist.: Westgate, 6.

Scossa mining dist.: Jones, J. C., 3.

Searchlight dist.: Callaghan, 13.

Spruce Mtn. dist.: Schrader, 3.

Economic geology.

Alabandite: Hewett, 2.

Alunite: Helneman, 5.

Austin ores: Merritt, C. A., 2.

Bonanza King mine area: Campbell, D. F., 1.

Borax: Esselink, 2.

Boulder Dam area minerals: Hewett, 12.

Brucite: Callaghan, 2.

Cave Valley: Schrader, 2.

Cherry Creek dist.: Schrader, 3.

Chief dist.: Callaghan, 7.

Clays: Hodge, 24.

Colorado Plateau ore deposits: Butler, B. S., 3.

Comstock Lode area: Ferguson, 8; Gianella, 5, 9; Knochenhauer, 1; Lyman, 1.

Contact mining dist.: Schrader, 6.

Copper: Bateman, 5; Crawford, A. L., 1, 3; Knopf, A., 9; Nolan, 7.

Cottonwood Canyon deposits: Ferguson, 10.

Delamar dist.: Callaghan, 8.

Diatomite: Mulryan, 2.

Gold: Calkins, 3; Rott, 1; Tolman, C. F., 2.

Horse Canyon: Schrader, 5.

Humboldt Range: Cameron, E. N., 2; Jenney, 1.

Limestones: Hodge, 24.

McCoy mining dist.: Schrader, 5.

Magnesia ores: Hodge, 24.

Manganese: Hewett, 6.

Metal, nonmetal occurrences: Stoddard, 1.

Mineral resources: Carpenter, J. A., 1.

Minerals, nonmetallic: Fulton, J. A., 1.

Mining dists.: Ferguson, H. G., 1; Vandenberg, 2, 3, 4.

Pioche dist.: Wheeler, 11.

Nevada—Continued.

Economic geology—Continued.

Placer mining: Smith, A. M., 2; Vandenberg, 1.

Quicksilver deposits: Schuette, C. N., 1, 3.

Rio Tinto copper deposit: Crawford, A. L., 1, 3.

Robinson mining dist.: Pennebaker, 1.

Scheelite-leuchtenbergite vein: Kerr, P. F., 14.

Scossa mining dist.: Jones, J. C., 3.

Searchlight dist.: Callaghan, 13.

Silica deposits: Hodge, 24.

Silver City area: Ferguson, 8; Gianella, 9; Smith, A. M., 1.

Singatse Range channel: Penrose, R. J., 1.

Spruce Mtn. dist.: Schrader, 3.

Tonopah dist.: Nolan, 2, 8.

Tungsten: Kerr, P. F., 9, 17, 20.

Tuscarora mining dist.: Nolan, 9.

Tybo dist.: Ferguson, 5.

Historical geology.

Bonanza King area: Campbell, D. F., 1.

Boulder Reservoir floor: Longwell, 23.

Cambrian: Deiss, 10; Wheeler, 11.

Cedar Mtn.-Fish Lake Valley beds, corals: Stirton, 8.

Cedarville fm.: LaMotte, 9.

Chief dist.: Callaghan, 7.

Comstock Lode area: Ferguson, 8; Gianella, 5, 6; Knochenhauer, 1.

Correlations, Tert. fms.: Carpenter, J. T., 1.

 Parasaurolophus: Wiman, 2.
 Plants, Shelter Cave deposit: Fosberg, 1.
 Pre-Amerindian quarries and imple-
 ments: Bryan, 42.
 Pseudococculi: Denison, R. H., 2.
 Pyelorchampus: Miller, Alden H., 4.
 Reptilia: Gilmore, 14; Romer, 22.
 Road-runner: Howard, H., 2.
 Rodents, Tert.: Wood, A. E., 10.
 San Juan Basin: Gilmore, C. W., 2.
 Spirifer, Organ Mts.: Greger, 1.
 Turkey, Tert.: Needham, 5.
 Turtles, Cret.: Wiman, 4.
 Vertebrata: Hay, 6; Needham, 5; Welles,
 1.
 Vertebrata and human remains: Hay,
 6.
 Xiphonax, insect larva?: Cockerell, 7.

New Mexico—Continued.

Petrology.

- Ceja del Río Puerco: Bryan, 35.
 Doña Ana County: Dunham, 3.
 Great white sands: Gould, 18.
 Lordsburg dist.: Lasky, 14.
 Organ Mts.: Dunham, 3.
 Pasamonte meteorite: Foshag, 19.
 Pencatite: Hunt, W. F., 2.
 Pewabic mine area: Schmitt, 10.
 Questa molybdenite: Vanderwilt, 12.
 Sands, gypsum, origin: Potter, F. C., 2.
 Virginia mining dist.: Lasky, 11.
 White sands, heavy minerals: Needham, 12.
 Xenoliths, Organ batholith: Dunham, 4.

Physical geology.

- Abiquiu quad.: Smith, H. T. U., 4.
 Bayard area: Lasky, 12.
 Carlsbad Caverns: Haas, 2.
 Cave, Guadalupe Mts.: Burnet, 1.
 Ceja del Río Puerco: Bryan, 35.
 Chupadera beds, folding: Talmadge, 6.
 Conchas Dam: Crosby, 15.
 Doña Ana County: Dunham, 3.
 Erosion: Bryan, K., 1; Church, F. S., 1.
 Fault border, Sangre de Cristo Mts.: Cabot, 1.
 Fault scarps, Organ Mts.: Reiche, 5.
 Flow units in basalt: Nichols, R. L., 4.
 Ice cave in lava: Peck, A. P., 1.
 Ice, perpetual, under lava: McClary, 1.
 Iron ores, Chupadera Mesa: Keyes, 386.
 Joints, curved columnar, volcanics: Hunt, 6.
 Lavas: Nichols, 7, 10.
 Little Hatchet Mts., min. res.: Lasky, 16.
 Lordsburg dist.: Lasky, 14.
 McCartys basalt flow: Nichols, 12.
 Malpais lava flow: Just, 2.
 Moreno Valley: Smith, J. F., Jr., 2.
 Mount Taylor field: Hunt, C. B., 2, 4, 4-a.
 Oolites, Carlsbad Caverns: Hess, F. L., 1.
 Organ Mts.: Dunham, 3.
 Pecos mine: Stott, 1.
 Pegmatites: Just, 3.
 Pewabic mine area: Schmitt, 10.
 Pisolites, spring deposit: Northrup, 2, 3.
 Postbolson faulting: Dake, C. L., 4.
 Questa molybdenite deposits: Vanderwilt, 12.
 Río Grande depression: Needham, 11.
 Sandia Mts. structure: Keyes, 334.
 Santa Rita dist.: Paige, 1; Spencer, A. C., 1.
 Sediments, South Canadian River: Sidwell, 6.
 Solution-faceted lms. pebbles: Bryan, K., 5.
 Squeeze-ups of lava: Nichols, R. L., 5.
 Temperature gradients, Perm. basin: Lang, W. T. B., 1.

New Mexico—Continued.

Physical geology—Continued.

- Tijeras Canyon clastics: Keyes, 437.
 Tyrone copper dist.: Paige, 1.
 Valles volcano crater: Ross, C. S., 30.
 Ventifacts: Needham, 7.
 Virginia mining dist.: Lasky, 13.
 Viscosity of lavas: Nichols, 11; Ross, C. S., 20.
 Volcanoes, Pliocene: Williams, H., 11.

Physiographic geology.

- Canjilon Divide landslides: Smith, W. S. T., 2.
 Ceja del Río Puerco: Bryan, 35.
 Chama Valley: Smith, H. T. U., 5.
 Colorado Delta: Bateman, 6.
 Earth patterns: Turley, 1.
 Erosion surface, ancient: Church, F. S., 1; McCann, 1.
 Folsom area: Brown, B., 2.
 General: Davis, W. M., 1.
 Glaciation: Ellis, R. W., 6.
 Gypsum dunes: Keyes, 339.
 Gypsum sands: Talmadge, 3.
 Hypsometric map: Northrop, 4.
 Lake San Augustine: Powers, W. E., 13.
 Magdalena dist.: Koschmann, 2; Loughlin, 4-a.
 Meandering arroyos: Leighly, 4.
 Meteoritic scars: Turley, 2.
 Moreno Valley: Ray, L. L., 3.
 Mt. Taylor area: Hunt, C. B., 4-a.
 Pediments: Bryan, 15, 30, 31; Koschmann, 2; Loughlin, 4-a.
 Physiographic provs.: Keyes, 20.
 Red River lobe, Moreno glacier: Ellis, R. W., 4.
 Río Grand depression: Bryan, 36.
 San Jose Valley: Nichols, R. L., 2.
 Scarps, Tularosa Valley: Talmadge, 5.
 Sierra Madre Oriente system: Hill, 7.
 Sinkhole patterns: Melton, 13.
 Tectonics of Southwest: Darton, 13.
 Terraces, Río Puerco: Bryan, 31.
 Tertiary hist., High Plains: Van Tuyl, 2.
 Valles Mtn. volcanic center: Ross, C. S., 9.
 Zuni Mts.: Keyes, 155.
 Zuni Salt Lake: Darton, 5.
 Zuni uplift: Keyes, 124.

Underground water.

- Artesian supply control: Meinzer, 12.
 Earth tides, by well water: Robinson, T. W., Jr., 5.
 Fluorine in drinking water: Clark, J. D., 1.
 General: Piper, 5.
 Ground water: Theis, 3, 5, 10, 11; Waring, 3; White, W. N., 1.
 Hot Springs Basin: Powell, W. C., 2.
 Lea County: Nye, 1.
 Major Johnson Springs: Theis, 12.
 Mimbres Valley: Theis, 11; White, W. N., 1.
 Ogallala fm., Llano Estacado: Theis, 5.

New Mexico—Continued.

Underground water—Continued.

- Pecos River Valley: Robinson, T. W., Jr., 6.
Portales Valley: Theis, 9.
Rio Grande depression: Bryan, 36; Theis, 7, 13.
Roswell artesian basin: Brown, R. H., 1; Fledler, 1, 2; Morgan, A. M., 1.
Sandoval Co.: Renick, 3.
Underground water inv.: Piper, 8.

New York.

- Black mud shales, paleocology: Ruedemann, 27.
Boulders, Long Is.: Gager, 1.
Field conference: Whitcomb, 8.
Field work near New York City: Arnold, H. J., 1.

Areas described.

- Berne quad.: Goldring, 11.
Capital (Albany) dist.: Ruedemann, 7.
John Boyd Thacher Park: Goldring, 7.
Newcomb quad.: Balk, 5.
New York City area: Berkey, 13.

Economic geology.

- Adirondacks, magnetites: Newland, 4; Osborne, 18.
Antwerp quad.: Buddington, 8.
Bradford oil field: Cathcart, 11; Fettke, 9, 11; Newby, 1.
Devonian sh.-Oriskany sand drilling: Bennett, J., 1.
Emery deposits: Butler, J. W., Jr., 2; Gillson, 6; Zodac, 25.
Feldspar: Sbaub, 1.
Gold prospects: Newland, 10.
Golden granite, Peekskill: Fluhr, 3.
Gravel: Nevin, 3.
Gypsum: Brown, J. S., 1, 7; Newland, 2.
Hammond quad.: Buddington, 8.
Iron ores: Miller, W. J., 20; Ruedemann, 12; Stratton, 1.
Limonites: Newland, 13; Ruedemann, 12.
Lowville quad.: Buddington, 8.
Magnetic study, iron deposits: Stratton, 1.
Magnetites: Balk, 14; Dale, N. C., 1; Gallagher, 1.
Medina fm.: Hartnagel, 3.
Mineral res.: Newland, 3, 19.
Mineral waters: Whitnall, 3.
Mining-quarry industries, 1927-33: Newland, 6, 14.
Natural gas: Bradley, 13; Brewer, C., Jr., 1; Brown, J. S., 1, 7; Garrett, S. G., 1; Lucke, 1; Newland, 7, 8, 15, 20; Robinson, J. F., 3, 4; Torrey, P. D., 1, 3, 4, 8.
Oil fields: Brewer, C., Jr., 1; Cathcart, 11; Fettke, 9, 11; Newby, 1.
Oriskany crude oils: Hamilton, 3.
Oriskany ss. gas and oil poss.: Bennett, J., 1; Bradley, 19; Fettke, 12; Garrett, S. G., 1.
Oswegatchie quad.: Dale, 5.

New York—Continued.

Economic geology—Continued.

- Petroleum devel.: Brewer, C., Jr., 1; Lawrence, A. A., 1; Newland, 7.
Piseco Lake quad.: Cannon, R. S., 1.
Potsdam quad.: Reed, J. C., 5.
Salt: Brown, J. S., 1, 7; Hartnagel, 2.
Sand and gravel: Nevin, 3.
Siderite: Ruedemann, 12.
Slate: Larrabee, 1.
Watkins quad.: Bradley, 13.
Zinc mine, Balmat: Brown, J. S., 2.

Historical geology.

- Adirondacks: Alling, 3; Balk, 2; Buddington, 3, 5, 11, 22, 23; Kay, G. M., 1, 5; Longwell, 14; Miller, W. J., 13; Rodgers, 3.
Allegany State Park: Thwaites, 8.
Allegheny cuesta: Dale, 4.
Anorthosite, Adirondacks: Miller, W. J., 13.
Antwerp quad.: Buddington, 8; Gilluly, 13.
Appalachian orogeny: Pepper, 1.
Baltimore & Ohio route: Grimsley, 1.
Berne quad.: Goldring, 11.
Black River group: Young, F. P., Jr., 1.
Black Rock forest: Denny, 2.
Bradford oil field: Fettke, 9, 11.
Cambrian: Resser, 18.
Catskill delta: Chatwick, 15, 18, 19.
Catskill facies: Mencher, 2.
Catskill fm.: Chadwick, 9, 19.
Catskill name, history and value in geology: Chadwick, 31.
Catskill region: Chadwick, 15.
Catskills: Cooper, 25.
Cayuga valley: Fairchild, 15.
Champlain valley: Rodgers, 2.
Chazy fm.: Cooper, 25.
Chemung fm.: Chadwick, 23; Curry, H. D., 1; Eller, E. R., 2; Tester, 1.
Chemung is Portage: Chadwick, 23.
Cherts, Ord.: Ruedemann, 35, 40.
Clinton fm.: Sanford, 5.
Clinton group: Sanford, 8.
Cobourg, Ord.: Sproule, 1.
Correlation by graptolites: Decker, 14.
Correlations, Grenville ser.: Bain, 20.
Correlations, Hamilton group: Willard, 45.
Devonian: Chadwick, 17, 22, 27, 28, 30; Fettke, 2, 8; Wedel, 1.
Dutchess Co.: Balk, 11.
Eastern N. Y.: Cooper, G. A., 10.
Emery deposits: Butler, J. W., Jr., 2.
Erosion, Manlius-Helderberg ser.: Smith, B., 2.
Excursion, geol.: Marell, 1.
Finger Lakes area: Fox, I. W., 1.
General: Torrey, 5.
Genesee country: Payne, T. G., 1.
Genesee River: Fairchild, 19.
Genesee Valley: Fairchild, 18.
Geological summary: Rodgers, 4.
Granite phacoliths: Buddington, 3.

 Gogebic iron dist., Mich.-Wis.: Atwater, 8, 5.
 Goethite, hematite, stability relations: Gruner, 9; Tunell, 1.
 Gold: Bell, L. V., 6; Bruce, 26; Connolly, 6; Dougherty, 2, 3; Ferguson, H. G., 2, 4; Fetzer, 1; Freise, 1; Froberg, 1; Frondel, 15; Graton, 13; McLaughlin, 8; Mather, W. B., 1; Milner, R. L., 1; Park, 7; Reid, J. A., 1.
 Hematite, magnetite, pyrite, chalcopyrite, relations: Guild, 3.
 History: Adams, F. D., 7.
 Hydrothermal deposits: McLaughlin, 5.
 Hydrothermal depth-zones: Graton, 4, 6.
 Hydrothermal solutions: Benedict, 1.
 Hypogene deposits: Butler, B. S., 2; Singewald, J. T., Jr., 9.
 Idaho: Anderson, A. L., 4, 5, 7, 18, 23; Bailey, H. D., 1; Dickey, F. H., 2; Lorain, 2; McConnel, 1; Reed, J. C., 14; Ross, C. P., 7, 31; Shenon, 16, 17, 18.
 Igneous rocks and minerals, correlates: Buddington, 7.
 Ilmenite in copper deposits: Greig, 2.
 Inclusions, dislocated, in veins: Douglas, C. B. E., 1.
 Influence of replaced rock: Butler, 7.
 Intergrowth, bornite, chalcopyrite: Schwartz, 3, 7.
 Iron: Aldrich, H. R., 1; Burchard, 5; Foreman, 1; Gruner, 8, 9, 12, 13, 28; Hawley, 9; Hayes, A. O., 1; Hewett, 3; Hickock, 5; Lake Superior Iron Ore Assoc., 1; Lasky, 5; Leith, C. K., 2; Moore, E. S., 4; Nishio, 1; Richarz, 4; Royce, 4, 5; Schwartz, 5; Singewald, J. T., Jr., 1; Zapffe, 3.
 Iron-manganese concretions: Hewett, 3.
 Jamesonite, sphalerite, tetrahedrite, oxidation: Anderson, F. M., 1.
 Kennecott ores, colloidal origin, Laskey, 3.
 Kentucky, magmatic ore dist.: Robinson, L. C., 5.
 Lake Superior region: Gruner, 28; Lake Superior Iron Ore Assoc., 1; Nishio, 2; Royce, 4, 5; Zapffe, 3.
 Lead ores, primary: Holmes, A., 5; Knopf, A., 15; Wells, R. C., 13.
 Lead-zinc deposits: Behre, 14, 23, 24, 25, 27, 30; Bell, J. M., 3; Fowler, G. M., 1, 2, 6, 10; Krieger, 2; McKnight, 1; Sales, 1; Scott, E. R., 1; Tuck, 2.

Ore deposits—Continued.

- Limonite: Blanchard, R., 1, 3; Boswell, 1; Newland, 13; Stone, J. B., 1.
 Liquid inclusions: Yuster, 1.
 Lodestone, genesis: Bandy, 1; Gruner, 6; Newhouse, 1.
 Magma and ore deposits: Osborne, 27.
 Magmatic differentiation: Bowen, 5.
 Magmatic segregations: Singewald, J. T., Jr., 10.
 Magnetite: Callaghan, 1; Davis, C. W., 3; Guild, 3; Merritt, 5; Moore, E. S., 13.
 Magnetite, hematite, pyrite, chalcopyrite, relations: Guild, 3.
 Maine, Blue Hill area: Gillson, 5.
 Manganese: Harper, M. F., 2; Hewett, 9; Holden, 3; Savage, W. S., 2.
 Manitoba: Baker, W. F., 1; Bruce, E. L., 2; Shepherd, F. D., 1; Stockwell, 9, 10, 11; Wright, 21.
 Massachusetts, Taconic limonites: Newland, 13.
 Mechanics of metasomatism: Bain, 15.
 Mesothermal gold deposits: Connolly, 6.
 Mesothermal silver-lead-zinc deposits: McKnight, 1.
 Metallization from basic magmas: Hullin, 3.
 Metals primordial segregation: De Lury, 28.
 Metasomatic replacement deposits: Ray, J. C., 1.
 Mexico: Bastin, 13; Flores, 7; Kelley, 3; Krieger, 6, 7, 9; Riley, L. B., 1; Santillán, 11; Schmitt, H., 2, 5; Singewald, Q. D., 12; Tenney, 5; Wandke, 2.
 Michigan: Broderick, T. M., 9, 10, 12; Calumet & Hecla Con. Copper Co., 1; Dickey, R. M., 2; Dutton, 5; Klein, 1; Mich. Acad. Sci., 3; Royce, 2; Swanson, 5.
 Microscopic exam. of ores: Erimesco, 1; Short, 3.
 Microscopic relations, magnetite, hematite, pyrite, chalcopyrite: Guild, 3.
 Mineral assoc., high-temperature: Buddington, 9; Butler, 14.
 Mineral deposits: Lindgren, 7.
 Mineral veins, origin: Behre, 17.
 Mineral zoning, Trias.: Newhouse, 8.
 Mineralization, primary, changes: Stočes, 2.
 Minerals and superheated water: Crowley, Arthur J., 1.
 Mining geology: Schmitt, 9.
 Minnesota: Royce, 2; Sandberg, 5; Stark, 2.
 Mississippi Valley region: Bastin, 20; Graton, 7.
 Missouri: Ball, S. H., 1; Buehler, 3; Meyer, C., 1; Rust, G. W., 1; Tarr, 14, 21, 24, 28.

Ore deposits—Continued.

- Molybdenite, Colo.: Staples, L. W., 1.
 Montana: Dickey, F. H., 2; Dyson, 3;
 Gibson, R., 1; Hart, L. H., 2; Jones,
 R. H. B., 1; Jones, V. E., 2; Lorain,
 1; Ray, J. C., 3; Sahinen, 4;
 Schafer, 3; Shenon, 12, 15; Spiroff,
 3.
 Muscovite: Gruner, 34.
 Nevada: Bateman, 5; Calkins, 3; Cal-
 laghan, 13; Cameron, E. N., 2;
 Campbell, D. F., 1; Ferguson, H. G.,
 1, 10; Kerr, P. F., 12, 17; Merritt,
 C. A., 2; Nolan, 9; Pennebaker, 1;
 Schrader, 6; Westgate, 6.
 Newfoundland: Espenshade, 1; George,
 P. W., 2; Newhouse, 4.
 New Hampshire, pegmatite dikes: Me-
 gathlin, 1.
 New Jersey, zinc ores: Bowen, W.
 C., 1.
 New Mexico: Dunham, 3; Krieger, 7;
 Landon, 2; Lasky, 12, 13, 14, 16;
 Schmitt, 5, 6, 10; Spencer, A. C., 1;
 Stott, 1; Vanderwilt, 12.
 New York: Alling, 11; Bryson, J. S., 2,
 4; Dyson, 1-a; Gallagher, 1; Mil-
 ler, W. J., 20; Newland, 13.
 Nickel: Bastin, 18; Freeman, B. C., 1.
 Nickel-cobalt-silver ore type: Bastin, 18.
 North America, copper deposits: Butler,
 16.
 Lead and zinc deposits: Sminnov, 1.
 Ore dists.: Billingsley, P., 5.
 North Carolina, gold: Bryson, 7.
 Northwest Territories: Furnival, 5;
 Hawley, 18; Kidd, 7; Ryan, J. P., 1.
 Nova Scotia, gold: Newhouse, 15.
 Occurrence of: Porter, C. A., 2.
 Oklahoma: Fowler, 6; Speer, J. H., 1;
 Williams, A. J., 1.
 Oklahoma-Kansas mining field: Fowler,
 6.
 Ontario: Bartley, 1; Bastin, 8; Bate-
 man, J. D., 3; Bothwell, 1; Bruce,
 24; Burrows, 3; Burwash, 6; Col-
 lins, 7; Corless, 1; Cormie, 1; Dad-
 son, 2, 4; Emmons, W. H., 10;
 Flaherty, 2; Horwood, 10, 11;
 Hurst, 10, 11; Kindie, E. D., 1;
 Langford, 3, 4; Moore, E. S., 15, 16;
 Osborne, F. F., 2; Reid, J. A., 3, 4;
 Robson, 1; Spearman, 3; Thomson,
 James E., 13, 14, 15, 16; Young,
 J. W., 1.
 Ontario-Quebec, pre-Camb. gold areas:
 Spearman, 3.
 Ore, location: Harvey, 1.
 Microscopic research: Haycock, 5.
 West U. S.: Anderson, J. C., 1; Locke,
 5.
 Ore and orogeny: Billingsley, P., 4.
 Ore and structure: Andrews, E. C., 1;
 Bichan, 2; Burbank, 8; Butler, 10;
 Newhouse, 3.
 Ore bodies, environment: Wisser, 4.
 Localization: Bruce, 18.

Ore deposits—Continued.

- Ore deposition: Porter, C. A., 1;
 Wandke, 1.
 Ore deposits, relation to structure: An-
 drews, E. C., 2; Bichan, 2; Bur-
 bank, 8; Butler, 10; Hullin, 1; New-
 house, 3.
 Zone of flowage: Andrews, E. C., 1.
 Ore from magmas or deeper: Graton, 12.
 Ore genesis and shoots: Hullin, 1.
 Ore mineral assoc.: Merwin, 1.
 Ore minerals, origin criteria: Schwartz,
 10.
 Ore shoots: Douglas, G. V., 1, 3; Hullin,
 1.
 Ore solutions chemistry: Schmedeman,
 1.
 Oregon: Callaghan, 10; Goodspeed, 7, 8,
 17; Hodge, 17; Oregon Dept. Geol-
 ogy, 1; Pratt, A. F., 1; Schuette,
 C. N., 5.
 Outcrops: Eby, J. H., 1.
 Oxides, manganese, and ground water:
 Hewett, 11.
 Paragenesis in valuing deposits: Stočas,
 1.
 Pegmatites: Landes, 23; Schaller, 15.
 Pennsylvania: Miller, B. L., 15; Staples,
 J. M., 1; Yaklish, 1.
 Physical-chemical factors: Ross, C. S.,
 12.
 Placers, west U. S.: Pardee, F. G., 5.
 Platinum, allied metals, Canada: O'Neill,
 3.
 Plumbojarosite, Okla.: Ransome, A. L.,
 1.
 Pneumatic processes: Fenner, 7.
 Porphyries and ore deposits: Singewald,
 Q. D., 9.
 Pressure zones and ore deposits: Wright,
 L. B., 1.
 Pseudo-eutectic textures: Lindgren, 2;
 Schwartz, 6.
 Pyrite, magnetite, hematite, chalcop-
 yrite, relations: Guild, 3.
 Pyrometamorphic deposits: Knopf, A.,
 6.
 Quebec: Backman, 1, 2; Bell, L. V., 12,
 14, 15, 16; Derry, 11; Gunning, 15;
 Gussow, 1; Hawley, 10; McGer-
 rigle, 5; Okulitch, 13; O'Neill, 4, 6;
 Osborne, 29, 30; Ross, S. H., 1; Stev-
 enson, J. S., 2; Suffel, 3; Wilson,
 H. S., 1; Wilson, M. E., 17.
 Quicksilver: Ross, C. P., 34; Schuette,
 C. N., 4; Vaupell, 1.
 Relations, ore deposits and batholiths:
 Emmons, W. H., 5.
 Replacements: Schouten, 1; Shaub, 4.
 Rhode Island, Copper Hill mine: Quinn,
 5.
 Rock-ore association: De Lury, 27.
 Rutile, Va.: Ross, C. S., 16.
 Saskatchewan: Alcock, 17; Cameron, A.
 E., 3; Cooke, H. C., 24.
 Schistose sulfide ores: Newhouse, 2.

Ore deposits—Continued.

- Secondary enrichment, Cananea, Mexico: Elsing, 1.
 Serpentinization: Chawner, 1; Hess, H. H., 5, 6.
 Silver: Anderson, 16; McKnight, 1.
 Solvents, organic acids on iron oxides: Harrar, 1.
 Solution flow, mineral fm.: Newhouse, 16.
 Source of metals: Sabsay, 1.
 Source of ore: Fletcher, A. R., 2.
 South Dakota, Black Hills: Gardner, E. D., 2; Tullis, 6; Wright, L. B., 3, 4.
 South Dakota-Wyoming, Black Hills gold: Wright, L. B., 4.
 Structural control of: Hulin, 1; Koerberlin, 1.
 Succession of minerals, temp. of fm.: Lindgren, 15.
 Sulfide ores: Emmons, W. H., 1; Gruner, 15; Kania, 3; Shenon, 3; Verhoo-gen, 3.
 Sulfide sols and copper: Kania, 3.
 Supergene cassiterite: Koerberlin, 2; Singewald, J. T., Jr., 6.
 Supergene enrichment: Emmons, W. H., 6.
 Supergene martite: Geijer, 1.
 Synthetic sulfide ore replacement: Ray, J. C., 2.
 Tectonic position, Rocky Mtn. ore dists.: Billingsley, P. R., 2, 3.
 Taylor's theory, petroleum-coal genesis: Gale, H. S., 1.
 Temperature of fm.: Boydell, 3.
 Tennessee, zinc: Currier, 3.
 Texas, brown iron: Eckel, 11.
 Textures, pseudo-eutectic: Anderson, 17.
 Theories of fm.: Cooke, H. C., 14.
 Thorium-uranium ratios and lead: Keevil, 3.
 Tri-State dist.: Fowler, 5, 7, 13; Ridge, 1; Tarr, 15.
 United States, copper, vanadium-uranium, silver deposits: Koerberlin, 3.
 United States, W., sed. ore deposits: Fischer, R. P., 2.
 Unsupported inclusions: Talmage, 2.
 Uranium, etc. sed. deposits: Hess, F. L., 6.
 Utah: Andrews, W. B., 1; Callaghan, 9, 11; Gilluly, 5; Johnson, E. S., 1; McEuen, 1; Nolan, 6; Stringham, 2; Wells, F. G., 10.
 Vanadium, etc., lead deposits: Newhouse, 10.
 Vein solutions: Berg, G., 1; Newhouse, 6.
 Vermont limonites: Newland, 13.
 Virginia: Brown, W. H., 3; Currier, 2, 3; Holden, 7; Kearfoot, 1; Park, 6.
 Volatiles, role in ore genesis: Weed, 2.
 Washington: Culver, 14; Richarz, 6.
 Waters, magmatic, meteoric: Lindgren, 12.

Ore deposits—Continued.

- Western States: Finch, J. W., 3.
 Wisconsin: Behre, 14, 23, 24, 25, 27, 30; Dickey, R. M., 4; Royce, 2; Scott, E. R., 1.
 Wisconsin-Illinois lead-zinc dist.: Behre, 14, 23, 24, 25, 27, 30; Scott, E. R., 1.
 Wyoming, Black Hills, gold: Wright, L. B., 3.
 Zinc: Palache, 1; Tarr, W. A., 3; Ulrich, 8.
 Zinc-lead ores: Behre, 14, 23, 24, 25, 27, 30; Bell, J. M., 3; Currier, 1, 3; Fowler, G. M., 1, 2, 6, 10; Krieger, P., 2; McKnight, 1; Sales, 1; Scott, E. R., 1; Tuck, 2.
 Zones, ore: Butler, G. M., 4.
 Zoning, hypogene in lodes: Emmons, W. H., 11.
 Ore deposits of the Western States: Graton, 9.
 Ore micr. research: Haycock, 5.
 Ore minerals, micr. study: Schwartz, 26.
 Ore shoots. See Economic geology (general); Ore deposits, origin.
 Ore solutions chemistry: Schmedeman, 1.
 Ore zones: Butler, G. M., 4.
 Oregon.
 Bibliography of geology: Hodge, 18.
 Biennial rept., 1st, 37-38: Strayer, 1.
 Bureau Mines rept. 21-22: Parks, H. M., 1.
 Geological excursion: Smith, W. D., 10.
 Lava cast forest: Alford, 1.
 Owyhee tunnel: Bryan, K., 3; Hines, 1; Smith, W. D., 2.

 Lane Co.: Smith, W. D., 11.
 Lava Cast Forest: Anonymous, 177.
 Legumes: Brown, R. W., 16.
 Mahonia: Arnold, 21.
 Mammalia: Colbert, 6; Elftman, 1; Fur-
 long, 2; Gazin, 4; Packard, 8;
 Scharf, 1; Wilson, R. W., 14.
 Man, early: Cressman, 1.
 Marine shells: Lewellen, 2.
 Miocene leaves, fruits, seeds: Brown,
 R. W., 8.
 Mollusca: Henderson, J., 1, 9; Turner,
 F. E., 5.
 Mustelid: Hall, E. R., 6.
 Nothocyon: Hall, E. R., 5.
 Oak, Quercus: Berry, 33.
 Oligocene, marine: Packard, 7.
 Painted Hills, John Day area: Lewel-
 len, 1.
 Peccaries: Colbert, 6.
 Pelecypoda: Schenck, 32.
 Petrified woods: Forbes, P. L., 2.
 Pleurotomarid: Schenck, 12.
 Pseudotsuga: Arnold, 18.
 Raninidae: Rathbun, 8.
 Rodents: Wilson, R. W., 14; Wood, A. E.,
 8, 10, 14.

Oregon—Continued.

Paleontology—Continued.

- Rudistids: Lupper, R. L., 1; Packard, 3.
 Stratigraphy and Mollusca: Turner, F. E., 5.
 Tereido wood: Lazell, 2; Wharton, J. R., 1, 2, 4.
 Tilia: LaMotte, 5.
 Tritropidoceras: Schenck, 4.
 Trout Creek flora: MacGinitie, 1.

Petrology.

- Albite granite, Sparta: Gilluly, 7.
 Baker quad.: Gilluly, 16.
 Basalt crystallization: Fuller, 8.
 Basaltic flows alteration: Fuller, 7, 15.
 Batholiths, Wallowa Mts.: Goodspeed, 4.
 Cascade Range: Buddington, 14; Thayer, T. P., 3.
 Collapsed pumice: Fuller, 12.
 Gold quartz veins, Cornucopia: Goodspeed, 8, 17.
 Heavy minerals, plutonic rocks: Reed, J. C., 1.
 Hornfels-granodiorite, Cornucopia: Goodspeed, 17.
 Keratophyres: Gilluly, 12.
 Lava flows alteration: Fuller, 7, 15.
 Malheur Co.: Renick, 2.
 Newberry Volcano: Williams, H., 9.
 Obsidian: Forbes, P. L., 1.
 Olivine, basaltic flows: Fuller, 16.
 Porphyroblasts: Goodspeed, 9, 14.
 Pumice: Becker, C. P., 1; Fuller, 12.
 Quaternary rocks: Piper, 15.
 Recrystallization, xenoliths: Goodspeed, 2.
 Sand: Thomas, C. E., 1.
 Spherulites: Wilkinson, W. D., 1, 2, 3.
 Tertiary rocks: Piper, 15.
 Umpqua fm. basalts: Wells, F. G., 9.
 Wallowa Mts.: Goodspeed, 4, 20.
 Xenoliths, recrystallization: Goodspeed, 2.

Physical geology.

- Basalt-latitude, contemporaneous activity: Fuller, 14.
 Cape Lookout area: Barr, 2.
 Cascade Mts.: Buddington, 14; Callaghan, 10; Thayer, T. P., 2, 3.
 Cascade Plateau prov.: Hodge, 22.
 Columbia River Basin: Hodge, 25; Landes, H., 1.
 Crater Lake: Allen, J. E., 1; Atwood, W. W., Jr., 11; Waesche, 5; Williams, H., 12, 14.
 Dekkas volcanics: Wheeler, 12.
 Earthquakes, 1846-1938: Treasher, 10, 11.
 Fissure eruptions, Bend: Nichols, 9-a.
 Fumaroles: Holdredge, 2; Phillips, K. N., 1.
 Gold quartz veins, Cornucopia: Goodspeed, 17.
 Granodioritic blocks formed by metamorphism: Goodspeed, 13.
 Great Basin lake sediments: Shrock, 8.

Oregon—Continued.

Physical geology—Continued.

- Harney Basin: Piper, 14, 17.
 Hornfels-granodiorite, Cornucopia: Goodspeed, 10.
 Horst-graben structure: Fuller, R. E., 1.
 John Day region: Buwalda, 19.
 Keratophyres: Gilluly, 12.
 Lane Co.: Smith, W. D., 11.
 Lava Cast Forest: Anonymous, 177.
 Lava flows, Tert.: Fuller, 15.
 Metchoshin volcanics: Weaver, 11.
 Mines handbook: Oregon Dept. Geology, 1.

Quaternary—Continued.

- Colorado, Helisoma : Henderson, J., 12.
 Connecticut.
 Littorina : Knight, J. B., 9.
 Marl deposits : Cooper, G. A., 1.
 Cuba.
 Aves : Wetmore, 6.
 Foraminifera : Thalmann, 5.
 Ground sloths : Matthew, 11.
 Guantanomo Bay area : Vaughan, 21.
 Mecoliotia : Clench, 2.
 District of Columbia plants : Berry, 38.
 Fauna, Pacific Coast, evolution : Howell, A. B., 1.
 Fernando group, Calif. : Waterfall, 1.
 Florida.
 Avifauna : Wetmore, 15.
 Bat : Allen, G. M., 2.
 Diatoms in peat : Hanna, 26.
 Edentates : Holmes, W. W., 1.
 Fauna, marine Pleist : Richards, 21.
 Flagler Beach : Connery, 1.
 Foraminifera : Cole, W. S., 6.
 Mammalia : Gut, 2; Simpson, G. G., 6, 8, 10.
 Marine Pleist. : Richards, 18, 19, 21.
 Mollusca : Mansfield, W. C., 22.
 Parelephas : Osborn, 15.
 Terrapene : Barbour, T., 3.
 Trachemys : Gilmore, 3.
 Folsom culture, Lindenmeier site : Bryan, 45.
 Fossils in deep-sea cores : Henbest, 12.
 Georgia, mammoths, mastodonts : Mitchell, L., 3.
 Glacial, postglacial veg. : Sears, 9.
 Greenland, Mytilus : Noe-Nygaard, 2.
 Gulf Coastal Plain fauna : Richards, 21.
 Gulls, Pleist., distrib. : Miller, L. H., 1.
 Hair, ground sloth : Hausman, 1.
 Hawaii.
 Mollusca : Ostergaard, 2.
 Oysters, Pleist. : Ostergaard, 1.
 Idaho.
 Erethizon : Wilson, R. W., 10.
 Mammals : Schultz, J. R., 3.
 Rodent fauna : Wilson, R. W., 4.
 Sloths : Gazin, 14.
 Illinois.
 Aves : Smith, C. R., 1.
 Cervalces : Galbreath, 2.
 Bog fauna : Riggs, E. S., 3.
 Flora, interglacial and postglacial : Fuller, G. D., 2.
 Forests, Pleist. : Voss, 1.
 Lake Chicago, Glenwood stage : Ball, 9.
 Mammoth, Pleist. : Baker, F. C., 13.
 Mastodon : Smith, C. R., 1.
 Mollusca : Baker, F. C., 1, 3, 9, 15.
 Pleistocene forests : Voss, 1.
 Polygyra : Baker, F. C., 12, 17.
 Pomatiopsis : Baker, F. C., 8.
 Trumpeter swan : Wetmore, 34.
 Vertebrata : Galbreath, 1; Smith, C. R., 3.

Paleontology—Continued.

Quaternary—Continued.

- Indiana.
 Bacon's Swamp, pollen analysis : Otto, J. H., 1.
 Bogs, pollen analysis : Houdek, 1, 3; Howell, J. W., 1; Otto, J. H., 1; Richards, R. R., 1.
 Flora, postglacial : Potzger, 3.
 Cervalces : Gazin, 23.
 Kokomo bog, pollen analysis : Howell, J. W., 1.
 Lake sediments, pollen : Houdek, 3.
 Mammalia : Lyon, M. W., Jr., 1, 3.
 Peat bogs, pollen analysis : Houdek, 1.
 Pollen analysis in bogs : Houdek, 1, 3; Howell, J. W., 1; Otto, J. H., 1; Richards, R. R., 1.
 Postglacial flora : Potzger, 3.
 Symbos : Lyon, M. W., 4.
 Iowa.
 Mastodon tusk : Cable, 3, 4.
 Ruminants, Pleist. : Hay, 1.
 Kansas.
 Cynomys : Hibbard, 7.
 Elephant graveyard : Schaffner, D. C., 3.
 McPherson Co. : Nininger, 7.
 Pitomys : Hibbard, 6.
 Vertebrata : Harnly, 1; Hibbard, 8.
 Kentucky, Pleist. : Cooper, C. L., 2.
 Lagomorphs, Calif., Oreg. : Wilson, R. W., 14.
 Louisiana.
 Caldwell Parish : Huner, 1.
 Corals : Wells, J. W., 4.
 Flora, Pleist. : Brown, C. A., 1.
 Florida Parishes : Fisk, 4.
 Mollusca : Richards, 19, 20.
 Mosses : Steere, 1.
 Winn Parish : Huner, 1.
 Maine, Yarmouth fauna : Whitcomb, 10.
 Mammalia, Columbia Basin : Beck, 11.
 Mammalia, Pleist., N. Am.-Eurasia : Colbert, 4.
 Maryland.
 Cumberland Cave fauna : Gazin, 6; Gidley, 8.
 Cypress swamp, Talbot : Berry, C. T., 4.
 Mammalia, Cumberland Cave : Gidley, 8.
 Taurotragus : Gazin, 6.
 Tursteps : Blake, S. F., 1.
 Massachusetts.
 Cape Cod area : Woodworth, J. B., 4.
 Flora, glacial sediments : Sayles, 9.
 Mastodons : Frick, 4.
 Mexico.
 Fauna, Magdalena Bay : Grant, 11; Jordan, 1.
 Fossil bed, Mexico City : Díaz Lozano, 3.
 Mollusca : Hertlein, 8; Palmer, R. H., 4.
 San Quintin Bay : Manger, 1.

Paleontology—Continued.

Quaternary—Continued.

- Michigan, Elephas : Case, 15.
 Minnesota.
 Biotic community, late Pleist. : Cooper, W. S., 4.
 Flora, Pleist. : Rosendahl, 1.
 Man, Pleist. : Jenks, A. E., 4.
 Mosses : Williams, R. S., 1.
 Mississippi, musk ox : Hay, 7.
 Missouri.
 Mollusca : Greger, 2.
 Picea : Hansen, E. B., 1.
 Mollusca, Pleist., Recent : Shimek, 3.
 Montana, Mollusca : Russell, L. S., 21.
 Nebraska.
 Beaver, giant : Barbour, 9.
 Camel, giant : Barbour, 24, 36.
 Casteroides : Wood, A. E., 16.
 Fauna, Pleist. : Anonymous, 93.
 Gigantocamelus : Barbour, 36.
 Gyraulus : Baker, F. C., 18.
 Hastings area : Cook, 10.
 Mammalia : Barbour, 9, 13, 14, 18, 23, 24, 25, 33, 34, 35; Cook, 4; Schultz, C. B., 2; Wood, A. E., 16.
 Mastodon : Barbour, 18, 23.
 Musk oxen : Barbour, 14.
 Ovibovine : Barbour, 25.
 Rhinoceroses : Cook, 4.
 Nevada.
 Clark Co. : Simpson, 26.
 Egg, Pleist. : Wetmore, 46.
 Elephant : Stock, 12.
 Gypsum Cave : Harrington, M. R., 2.
 Oreamnos : Stock, 59.
 Smith Creek Cave : Howard, H., 8; Stock, 59.
 Spizaetus : Howard, H., 8.
 Newfoundland, Pleist. fauna : Richards, 17.
 New Jersey.
 Flora, Pensauken fm. : Berry, 51.
 Hydrocorallines : Richards, 6.
 Marine fossils : Richards, 5.
 Pensauken fm. flora : Berry, 51.
 New Mexico.
 Antelopes : Stock, 8, 14.
 Birds from cave deposits : Howard, H., 6; Wetmore, 19.
 Burnet Cave fauna : Schultz, C. B., 3.
 Clovis area : Antevs, 17; Clarke, W. T., Jr., 1; Howard, E. B., 4; Lohman, K. E., 4; Stock, 55.
 Clovis fauna : Howard, E. B., 4.
 Clovis lake clays : Antevs, 17.
 Cryptoglaux : Howard, H., 3.
 Diatoms, Clovis lake beds : Lohman, K. E., 4.
 Guadalupe Mts. : Burnet, 1.
 Man, near Folsom : Figgins, 6.
 Mollusca : Clarke, W. T., Jr., 1.
 Pyelorhampus : Miller, Alden H., 4.
 Road runner : Howard, H., 2.
 New York.
 Diatoms : Lohman, K. E., 6.
 Foraminifera : Shupack, 1.

Paleontology—Continued.

Quaternary—Continued.

- New York—Continued.
 Fraxinus : West, G. F., 1.
 Mollusca : Richards, H. G., 1.
 North America.
 Flora, W., Cenozoic : Chaney, 35.
 Horned ruminants : Frick, 5.
 Mammalia, Pleist. : Hall, E. R., 8.
 Pleistocene : Hay, 1-a.
 Rodents : Wilson, R. W., 15.
 Snakes : Gilmore, 23.
 North Carolina.
 Diatoms : Henbest, 11.
 Foraminifera : Henbest, 11.
 Mollusca : Henbest, 11.
 Ohio, Pleist. willow : Berry, E. Willard, 13.
 Oklahoma.
 Elephant wallow : Price, L. L., 2.
 Elephas : Stovall, 4.
 Euceratherium : Stovall, 14.
 Peccary : Johnston, C. S., 1.
 Symbolos : Stovall, 11.
 Tapirus : Stovall, 4.
 Ursus : Stovall, 6.
 Ontario.
 Mollusca : Baker, F. C., 7.
 Valvata : La Roche, 1.
 Oregon.
 Elephants : Avery, O. P., 2.
 Forests : Sanborn, 3.
 Mammalia : Elftman, 1; Packard, 8.
 Paleogeology and Cenozoic mammals : Schultz, C. B., 7.
 Parelephas, Fla. : Osborn, 15.
 Pennsylvania.
 Mastodon : Price, P. H., 4.
 Mollusca : Brooks, S. T., 1.
 Taxodum : Richards, 4.
 Plant life S. of ice front, glacial epoch : Hollick, 5.
 Pleistocene.
 Fauna : Hay, 5.
 Life : Walker, B., 1.
 Mammalia : Hay, 3; Scott, W. B., 1.
 Proboscidea, descent : Osborn, 36.
 Puerto Rico.
 Chiroptera : Anthony, 1.
 Edentata : Anthony, 2.
 Insecta : Anthony, 1.
 Rodentia : Anthony, 2.
 Quebec, Mingan Is. : Twenhofel, 31.
 Rodents, Calif., Oreg. : Wilson, R. W., 14.
 Saskatchewan.
 Gyraulus : Baker, F. C., 11.
 Mollusca : Mozley, 1; Russell, L. S., 20.
 South Carolina.
 Horry clay fauna : Cooke, C. W., 20.
 Mollusca, Intracoastal Waterway : Mansfield, W. C., 16.
 Pamlico fm. fauna : Cooke, C. W., 20.
 Texas.
 Artifacts with extinct mammals : Sellards, 41.

 Silicates, constitution, classn.: Berman, 8.
 Slate, X-ray analysis: Anderson, H. V., 1.
 Solubility affected by pressure: Gibson, R. E., 2.
 Solubility, water in granite magma: Goranson, R. W., 2.
 Spectrographic analysis, apparatus: Ussery, 1.
 Sphericity, roundness, rock particles: Wadell, 3.
 Spillite and average metabasalt: Fairbairn, 3.
 Staining for rock analysis: Keith, M. L., 1.
 Stilpnomelane, composition, structure: Gruner, 31.
 Streaks, deep-zone gneisses: Quirk, 8.
 Structural petrology: Fairbairn, 9, 12; Griggs, 7; Knopf, E. F. B., 8, 9; Lovering, 29.
 System Cu-Fe-S: Merwin, 2.
 System MgO-FeO-SiO₂: Bowen, 10.
 Tables, rock and mineral determination: Ellis, R. W., 1.
 Tektites, origin theory: Buddhue, 12.
 Terminology of sediments, fine-grained: Twenhofel, 25.
 Medium-grained: Allen, 16.
 Texas, salt-dome cap rock: Hanna, M. A., 8.
 Tourmaline: Kollida, 1; Randolph, 14; Warner, T. W., Jr., 1.
 Virginia, Potomac River sediments: Hoffman, J., 1.
 Volcanic domes: Williams, H., 5.
 Volcanic rocks, minerals: Melhase, 19.
 Volume, shape, position, rock fragments, in gravel: Wadell, 9.
 West Virginia, Potomac River sediments: Hoffman, J., 1.
 Xenoliths and intrus. rock fabrics: Ingerson, 7.
 Zebra rock: Trainer, 2.
 Zeolites, Winchell, 13.
- Petrotectonics.
 British Columbia, Shuswap terrane: Gilluly, 9.
 Ontario, Claire River syncline: Fairbairn, 5.
 Quebec, Shawinigan Falls area: Osborne, 24.
- Phenacite, morphology, paragenesis: Pough, 1.
 Phenocryst: Erwin, 2; Whitcomb, 6.
 Phoronida, Scolithus: Fenton, M. A., 6.
 Phosphate.
 Alberta: Telfer, 1.
 Arizona: Hurlbut, 4.
 British Columbia, Telfer, 1.
 Canada: Dadson, 1; Spence, 1.

Phosphate—Continued.

- Cayman Island: Matley, 1.
 Field, test: Oakes, 1.
 Florida: Roundy, 2.
 General: Jacob, K. D., 1; Johnson, B. L., 9; Mansfield, G. R., 9.
 Idaho: Campbell, C. D., 4.
 Industrial minerals and rocks: A. I. M. E., 2.
 Mexico: Dovalina, 1.
 Montana: Pardee, 9; Sabinen, 3.
 Oklahoma: Oakes, 2.
 Phosphoria fm.: Branson, C. C., 5; Mansfield, G. R., 23.
 Rocky Mts. field: Mansfield, G. R., 10.
 South Carolina: Watkins, J. Henry, 1.
 Stratigraphic markers, deposits of: Oakes, 3.
 Tennessee: Cayeux, 1; Smith, R. W., 3; Whitlatch, 11.
 Tennessee Valley area: Spain, 6.
 United States: Mansfield, G. R., 1.
 Utah: Williams, J. Stewart, 2.
 Western States: Mansfield, G. R., 14.
 Phosphorescent minerals: Zodac, 11.
 Phosphoria fm.: Branson, C. C., 1, 5; Mansfield, G. R., 23.
 Photogrammetry, applied: Anderson, R. O., 1.
 Photographing walls of boreholes: Kelly, 21.
 Photography, minerals, nat. color: Shaub, 12.
 Phylectic evolution patterns: Simpson, 40.
 Phyllonization: Knopf, E. F. B., 4.
 Physical chemistry in stratigraphy: Mansfield, G. R., 23.
 Physical geology (general). For areal see names of States.
 Ablation of high snow fields: Matthes, 21, 23.
 Abrasion work, river ice and glaciers: Wentworth, 15.
 Abyssal assimilation: Grout, 5.
 Adirondack rocks, metamorphism vs. flowage: Buddington, 13.
 Algal reefs and oolites: Bradley, W. H., 3, 5.
 Alluvial islands: Rubey, 7.
 Alteration of wall rocks: Butler, 7.
 Amygdaloids, cavity fillings: Morris, F. K., 1.
 Amygdules, pseudo-amygdules: Morris, F. K., 2.
 Anomalies, vertical intensity: Somers, 2.
 Anorthosite, intrus. power: Miller, W. J., 8.
 Anosma or squeeze-ups: Colton, 4.
 Antillean-Caribbean area: Schuchert, 31.
 Appalachia: Nelson, 6.
 Appalachian geology: Bevan, 38.
 Appalachian geomorphic history: Woodward, 14.
 Appalachian geosyncline: Morris, 4.

Physical geology—Continued.

- Appalachian Piedmont deformation: Campbell, M. R., 1.
 Appalachian structure: Price, P. H., 2; Seidl, 1.
 Appalachians, N., folding: Sherrill, 2.
 Arroyo running in desert: Brown, W. H., 1.
 Assiniboine sed. cycle: Keyes, 311.
 Asthenolith theory: Willis, 16.
 Atlantic Coast level changes: Townsend, C. W., 1.
 Atlantic Coastal Plain: Groeber, 1; Miller, R. L., 10; Stephenson, 24.
 Atlantic and Caribbean: Groeber, 1.
 Atlantic and Gulf Coastal Plain: Stephenson, 24.
 Auto-traction hypothesis: De Lury, J. S., 3, 4.
 Bacterial genesis, hydrocarbon from fatty acids: Thayer, L. A., 1.
 Baer's law, significance: Russell, R. J., 4.
 Banding in fissure veins: Fraser, D. M., 4; Shaub, 2.
 Barrier beach development: Melton, 24.
 Basaltic, ellipsoids: Fuller, 6.
 Basaltic lava flows: Jones, A. E., 8.
 Basalts, extrusive, columnar: Conard, 2.
 Basin Range problem: Keyes, 256; Longwell, 30.
 Basin Range structure: Gianella, 4; Keyes, 19.
 Basin Ranges: Keyes, 140.
 Batholithic intrusions: Brock, R. W., 1.
 Batholiths: Dresser, 3; De Lury, 4.
 Bathygenetic, orogenetic movements: Gillson, 4.
 Beach cusps: Evans, 13.
 Beach erosion studies: Brown, E. I., 1.
 Beach-pebble abrasion, transportation: Landon, 1.
 Beach sands, Atlantic coast: MacCarthy, 3.
 Beach sands, rounding: MacCarthy, 5.
 Bedding plane movements: Behre, 13.
 Black shale, N. Y.: Hard, E. W., 1.
 Breccia, coneiform, from faulting: White, C. H., 1.
 By-passing, discontinuous sedimentation: Eaton, J. E., 1.
 Calcium carbonate precipitation, Great Bahama Bank: Black, 5.
 Caldera fm.: Williams, H., 13.
 Calvert tilting, Coastal Plain: Dryden, 1.
 Canyons, major, Rocky Mtn. area: Atwood, W. W., Jr., 12.
 Carbon minerals and volcanism: Buddhue, 26.
 Carbonation vs. silication: Holden, 8.
 Cave pearls, origin: Davidson, S. C., 1.
 Caverns, formation: Mallott, 9; Swinerton, A. C., 4.

Physical geology—Continued.

Caverns—Continued.

Ice caves, sink holes, nat. bridges:
Henderson, J., 7.

Solution in lms.: Henderson, J., 6.

Cavernous rock surface of desert:
Blackwelder, 9.

Channel-contraction, effect on stream-
bed: Straub, 4.

Chert and flint, concretions, cone-in-
cone: Tarr, 6.

Clay galls, origin: Burt, F. A., 3.

Cleavage, parajointing: Donnay, 1.

Cleavage, schistose, Appalachians:
Fourmarier, 7.

Cliff fold: Mathews, 12.

Coal as recorder of metamorphism:
Campbell, M. R., 7.

Columnar structure in lms.: Roy, S.
K., 3.

Compaction of sediments: Trask, 9.

Concretions: Tarr, 5.

Cone-in-cone: Boos, C. M., 1; Schaub,
11; Tarr, 6.

Continental drifting: Longfellow, 1;
Russell, B., 1; Shand, 3; Taylor,
9; Waterschoot van der Gracht, 1.

Continents, form, drift, rhythm: Watts,
1, 2.

Convection and form: Hills, G. F.
S., 1.

Fragmentation: Barrell, 1.

Stratigraphic evidence on tectonics:
Moore, 35.

Cordilleras, American: Arkell, 1; Stille,
5.

Correlation, late glacial, Conn. Valley-
Great Lakes: Lougee, 4-a.

Creep of rocks: Griggs, 10.

Cretaceous geosyncline and Laramide
orogeny: Parker, 7.

Criteria, inclusions, plutonic rocks:
Grout, 20.

Crustal movements: Teichert, 1.

Crustal shortening: Johnson, V., 1.

Cryptovolcanic structure, Mid-continent.
Bucher, 15.

Cycles, orogeny and erosion: Baulig, 4.

Data of geodynamics: Hixon, 2.

Deep-focus earthquakes: Lynch, 8; Mc-
Murry, 1; Slichter, 4; Stech-
schulte, 6.

Deflation in deserts: Blackwelder, 10.

Deflection of streams by earth's rotation:
Glock, 11.

Deformation and temperature: Nutting,
1.

Deformation of earth's crust: Bucher,
8, 19; Moore, 30; Nutting, 1.

Deposition, sediments in lakes by gla-
cial streams: Engeln, von, 3.

Desert varnish, origin: Laudermilk, 2.
Desiccation features, humid climates:
Krynine, 2.

Development, drainage systems: Glock,
8.

Physical geology—Continued.

Diachistic dikes and ore deposits: Spurr,
1.

Diastrophism, intrusion: De Lury, 16.

Differential compaction: Foley, L., 1;
Nevin, 1, 4; Spieker, 1.

Differential flow, silicate rocks: Quirke,
9.

Dikes, dilation, replacement: Goodspeed
19.

Dip of beds, determination: Johnson,
C. H., 3.

Dolomite formed in Ohio cave: Lord, R.
C., 1.

Domes, fracture system: Balk, 9.

Drowned forests, New England, Nova
Scotia: Lyon, C. J., 1.

Earth cracks, Miss.: Monroe, 2.

Earth deformation: Hubbert, 12.

Earth distortion: De Lury, 11.

Earth interior: Daly, 12.

Earth strength: Leith, A., 2.

Earth structure theory: Hodgson, 7.

Earthquakes: Gianella, 10.

Deep-focus: Davison, C., 3; Guten-
berg, 21; Leith, A., 2; Slichter, 6.

Distribution: Davison, C., 3.

Dynamic causes: Brunner, 6.

Epicenters, location: Taber, 12.

Geological significance: Leith, A., 2.

Pacific Coast, 1769-1928: Townley, 1.

Prediction: De Montauk, 1.

Strength of earth: Leith, A., 2.

Earthquakes, volcanoes, volcanism:
Heck, 37; Sánchez, 11.

Elastic properties of rocks: Goranson, 4.

Elevation, depression, crustal, causes:
De Lury, 18.

En échelon fault belts: Clark, F. R., 1.

Energy sources, crustal movements:
Heim, 2.

Eolian sands, rounding: MacCarthy, 9.

Evaporation, high altitudes, latitudes:
Church, J. E., 1.

Exfoliation of rocks: Farmin, 3; Griggs,
5.

Face of the earth: Schuchert, 41.

Faults.

Bedding-plane, economic importance:
Behre, 22.

Belts, an échelon: Clark, F. R., 1.

Effect on veins: Eby, J. H., 2.

General: Bloesch, 4.

Geosynclinal boundary: Ver Wiebe,
14.

Movements, mechanics: Hulin, 8, 9.

Origin: Reid, 8.

Rate of movement, Great Basin:
Blackwelder, 41.

Trough sedimentation: Clark, B. L., 7.

Fault and vein intersections: Murphy,
P. R., 1.

Feather joints: Cloos, E., 5.

Festoon cross lamination: Knight, S.
H., 3.

First rains: Hadding, 1.

Physical geology—Continued.

- Flaws and tear faults: Gill, 5.
 Flood erosion: Jacobs, 1.
 Flotation of mts.: Lawson, 10.
 Flow cleavage, folded beds: Swanson, 6.
 Flow in solids: De Lury, 9.
 Flow lines, planes, plastic masses: Fraser, D. M., 3.
 Flow units, basalt: Nichols, R. L., 4.
 Folding, minor, and deformation: Lowe, W. F., 1.
 Small-scale, adjustments: Straley, 6.
 Folding and faulting in ss.: Terra, de, 1.
 Folding and faulting of strata: Reid, H. F., 1.
 Folds, minor, and deformation: Lowe, W. F., 1.
 Parallel, measurements: Mertie, 4-a.
 Folds produced by slumping: Pierce, 1.
 Force, to move particles on stream bed: Rubey, 13.
 Forces in earth's crust: Gutenberg, 34.
 Forest fires, geol. importance: Crickmay, C. H., 4.
 Formation, ore deposits: Bastin, 19.
 Formative processes, concretions: Burt, 7.
 Frost heaving: Taber, 4, 5, 6.
 Fundian fault vs. glaciers: Shepard, F. P., 2.
 Gases in rocks: Birch, R. E., 1; Shepherd, E. S., 1.
 General: Daly, 16, 20; Fitzhugh, 1; Mather, 15; Richards, H. F., 1; Smith, W. D., 3.
 Geologic periods, diastrophic circuits: Keyes, 435.
 Geologic structures: Cloos, 11; Willis, B., 1.
 Geomorphology: Lobeck, 5.
 Gulf Coast salt structures: Ritz, 1.
 Mountainous deserts: Davis, 28.
 Geosynclines, Gulf Coast, Appalachians: Price, W. A., 16.
 Geosynclines and geobasins, origin: Rich, 28.
 Geyser theory, Bunsen's: Sherzer, 1.
 Giant current ripples, fluvial gravel: Thiel, 4.
 Gondwana land bridges: Schuchert, 25.
 Graben faulting: Rich, 27.
 Granitic rocks, origin: Collins, 10.
 Granodioritic blocks from metamorphism: Goodspeed, 13.
 Gravel channels, buried, location: Crampton, 1.
 Gravity observations and basement structures: Thom, 15.
 Great Basin structure: Eaton, J. E., 4.
 Great Lakes Basin: Shepard, 41.
 Grooving of rocks by sand-laden currents: Blackwelder, 26.
 Ground water in determining geol. structure: Soper, E. K., 1.

Physical geology—Continued.

- Hoarfrost and glacial growth: Ahlman, 1.
 Hydrothermal alteration, ig. rocks: Schwartz, 27.
 Ice, agent of weathering: Grawe, 3.
 Ice as a rock: Blackwelder, 18.
 Ice caves: Harrington, E. R., 1; Smith, J. E., 5.
 Ice James, sub-Arctic rivers: Wentworth, 17.
 Igneous intrusions, mechanics of: Schwartz, 27.
 Igneous metamorphism of coal beds: McFarlane, 1.
 Igneous rocks, Mississippi Valley: Tolman, 16.
 Origin and mineralogy: Schairer, 7.
 Structural behavior: Balk, 13.
 Igneous rocks and depths of the earth: Friedlaender, C., 1.
 Ilmenite, alteration: Moore, E. S., 24.
 Imbricate arrangement, pebbles, pre-Camb. conglom.: Pettijohn, 1.
 Impressions, ice crystals in Lake Bonneville beds: Mark, 1.
 Inclusions, dislocated, in veins: Douglas, C. B. E., 1.
 Inertia, low-angled faulting: Stevens, E. H., 1.
 Influence of replaced rock: Butler, 7.
 Initial dips peripheral to resurrected hills: Bridge, 1.
 Inorganic marine lms.: Gee, 2.
 Insolation hypothesis, rock weathering: Blackwelder, 32.
 Interpretation, fault movements, from mineral fractures: Fraser, D. M., 2.
 Intracrystalline solution process: Stockdale, 3.
 Intrusions, mechanics of: Loewinson-Lessing, 1; Schwartz, 27.
 Isostasy, ideal, departures from: Daly, 19.
 Isotasy and mtn. bldg.: Hoffman, 7.
 Isthmian links: Willis, 10.
 Jointing, systematic, sed. rocks: Parker, J. M., 2.
 Joints, curved columnar, volcanic rocks: Hunt, 6.
 Knickpoints, cyclical significance: Meyerhoff, 19.
 Knickpoints and valley-in-valley forms: Johnson, 37.
 Laboratory manual for: Alexander, H. S., 2; Putnam, W. C., 1.
 Lake, Cladophora, and coal balls: Allen, F. H., 1; Huntsman, 1; Kindle, 23.
 Landslides.
 Analysis and control: Hennes, 1.
 Agriculture and eng.: Sharpe, C. F. S., 6.
 Related phenomena: Ladd, G. E., 2; Sharpe, C. F. S., 2, 3.

Physical geology—Continued.

Land slips, subsidence, and rock-falls:
Ladd, G. E., 2.

Land subsidence, causes: Harris, F. R.,
1; Meinzer, 23.

Land tilt: Delaney, 2.

Lava domes: Jaggar, 28.

Lava tree casts and molds: Finch,
R. H., 5.

Lava viscosity: Kinsley, 1.

Lightning spalling: Lauder milk, 10.

Lime-secreting algae: Howe, M. A., 2;
Kindle, 26.

Limestone.

Development of porosity: Howard,
H. V., 5.

Precipitation by submarine volcanic
action: Kania, 1.

Solution and slope effects: Smith,
J. F., Jr., 1.

Limestone caverns, origin: Davis, 10.

Log jams, Red River: Guardia, 1.

Lowering of playas by deflation: Black-
welder, 20.

Lowlands, S.-cent. and Ouachita provs.:
Ruedemann, P., 3.

Magmas.

Cycles: MacCarthy, 1.

Formation, locus: De Lury, 14.

From subsidence: De Lury, 6.

General: Bowen, 20.

Origin, movement in strong earth:
De Lury, 26.

Primary, ultramafic: Hess, H. H., 11,
13.

Products: Knopf, 17; Singewald,
J. T., 13.

Waves, theory: Lay, 2.

Magmatic cycles: McCarthy, 1.

Magmatic differentiation: Fenner, 15.

Marine lms., fm.: Field, 8.

Metallogenesis and crustal theory: De
Lury, 10.

Metamorphic belt, cent. Appalachians:
Jonas, 1.

Metamorphic orogeny: Willis, B., 6.

Metamorphism and igneous action:
Read, H. H., 1.

Metamorphism, siliceous lms., dol.:
Bowen, 22.

Meteorite scars in ancient rocks: Boon,
4.

Meteoritic craters and structures: Al-
britton, 6; Boon, 6.

Mid-Continent folding: Clark, S. K., 2.

Mid-Continent structure and isostasy:
Harlton, 10.

Migmatites: Trefethen, 4.

Mississippi Delta: Trowbridge, A. C., 3.

Mississippi River: Haas, 1.

Mississippi Valley: Atwater, 2; Eakin,
2; Trowbridge, A. C., 2.

Missouri, striated rock, St. Francis Val-
ley: Wentworth, 30.

Mobile belts of earth: Bucher, 4.

Physical geology—Continued.

Morphological significance, stream tur-
bulence: Leighly, 1.

Motion, compressional phase, earth-
quakes: Sharpe, J. A., 1.

Mountain-building theory: Griggs, 11.

Mountain building on unsymmetrical
earth: Gunn, 3.

Mountains, origin: Longwell, 33.

Movements in earth's crust: De Lury, 7.

Mowry shale, origin: Rubey, W. W., 2.

Mud crack casts: Bradley, W. H., 7.

Mud-cracked layers, curvature: Bradley,
W. H., 10.

Mud stalagmites: Malott, 6.

Nashville-Ozark domes arch: Wilson,
C. W., Jr., 19.

New England structures, intrusions:
Keith, 8.

Nuées ardentes, mechanics: Finch, 11.

Oceans, origin, evolution: Keyes, 323,
359.

Oil fields and continental spreading:
Wade, 1.

Oolites, Great Salt Lake: Mathews, A.
A. L., 3.

Ore bodies, localization: Bruce, 18.

Organic acids, action on lms.: Murray,
A. N., 1.

Origin of caverns: Davis, 8; Swinnerton,
A. C., 5.

Orogenic overthrusting, desert ranges:
Keyes, 116.

Orogeny caused by radioactive heating:
Rich, 25.

Oscillation theory of diastrophism:
Longwell, 7.

Oscillatory, movements, Appalachians:
Ruedemann, 5.

Overthrusting, underthrusting, discrim-
inated: Lovering, 12.

Overthrusts, metamorphic terrane:
Balk, 10; Knopf, E. F. B., 6.

Ozark, Mtn. area: Groshkopf, J., 1;
Schottenloher, 2.

Paleozoic fms., pulsation theory: Schuch-
ert, 49.

Pebble wear, Jarvis Is. beach: Went-
worth, 11.

Pebbles, rounded in geyser tube: Nichols,
R. L., 1.

Pedestal rocks, Appalachian Piedmont:
Crickmay, G. W., 13.

Peneplains, fm.: Rich, 22.

Pensacola shore-line deformation: Lever-
ett, 10.

Periodicities, seismic, criteria: Blake, 7.

Peridotites, intrusion-temperature: Sos-
man, 1.

Serpentinized, distribution: Hess, H.
H., 16.

Permeability, measurement and value:
Nevin, 6.

Pisolites, polyhedral: Shrock, 4.

Plains, rock, base, depositional: Melton,
20.

Physical geology—Continued.

- Planational terms: Glock, 6.
 Planes of lateral corrasion: Johnson, D. W., 9.
 Plastic deformation and creep of solids: Nádal, 2.
 Plasticity, rocks under pressure: Griggs, 1.
 Polygonal cracking in granite: Leonard, 3.
 Porosity, reef lms., origin: Lloyd, E. R., 2.
 Limestones: Murray, A. N., 2.
 Rocks: Lamar, 3.
 Vectoral permeability, resistance to erosion: Landon, 3.
 Power to move continents: Munroe, G. W., 1.
 Principles, structural geology: Nevin, 5.
 Problems of physical geology: Dutton, Clarence E., 1.
 Profiles, buried valleys, Ohio, Tenn., Cumberland Rivers: Rhoades, 1.
 Pseudo-eutectic textures: Schwartz, 6.
 Pyramidal jointing in shale: Sheldon, P. G., 2.
 Quartz "dikes": Furnival, 4.
 Quartz surfaces, chemical activation: Nutting, 2.
 Radioactivity: Willis, 8.
 Rain-wash erosion, humid regions: Lawson, 5.
 Rare elements, concentration: Zies, 6.
 Rates of wear, common minerals: Cozzens, 1.
 Red-bed bleaching: Keller, W. D., 1.
 Red beds, origin: Baker, C. L., 3.
 Rhythmic banding: Cook, C. W., 1.
 Rhythmic bedding, Monterey, Calif.: Bramlette, 4.
 Rift valley types: Willis, 13.
 Rillensteine: Laudermilk, 5.
 Ripple marks: Kindle, 14.
 Rise of molten rock: Miller, W. J., 7.
 Rock expansion, spontaneous: Bain, G. W., 3, 20-b.
 Rock features from glacial movement: Glock, 3.
 Rock foliation: Fairbairn, 7.
 Rock-forming silicates with water components: Goranson, 8.
 Rock plains, arid regions: Johnson, D. W., 20.
 Rock records of meteorites: Anonymous, 145.
 Rock resistance and interfluvial degradation: Rich, 9.
 Rock structure, ancient volcanoes: Hunt, 7.
 Rock surfaced grooved by sand-laden currents: Blackwelder, 26.
 Rock-weathering insolation hypothesis: Blackwelder, 32; Jeffreys, 3.
 Rocky Mts. area: Atwood, W. W., 7, 10; Chamberlin, 19; Keyes, 288; Lugn, 8.

Physical geology—Continued.

- Rocky Mts.-Great Plains cycles: Lugn, 8.
 Roots of volcanoes: Daly, 18.
 Rotational stress, crustal deformation: Baker, C. L., 15.
 Rupture formation of joints: Bridgman, 3.
 St. Croixan ss., origin: Graham, W. A. P., 3.
 Salt deposits, inland basins: Jones, J. C., 1.
 Salt-dome problem: Van Tuyl, 1.
 Salt domes, meteor craters, cryptovolcanic structures: Washburne, 5.
 Salt marshes and coastal stability: Goldthwait, J. W., 1.
 Sand structures, shallow-water: Kindle, 30.
 Sands, Mississippi River, shape: Russell, R. D., 9.
 Schistosity: Fourmarier, 1, 2.
 Schuchert's tectonic ideas: Strahov, 1.
 Sea bottom samples, Cabot Strait: Kindle, 13.
 Sea level studies: Johnson, D. W., 4.
 Secondary oolite: Swartzlow, 1.
 Sedimentation, relation to faulting: Longwell, 25.
 Sediments.
 Continental shelves: Shepard, 6.
 Deep sea, magnitude: Twenhofel, 2.
 Deformed by ice thrust: Glock, 4.
 Reworked by running water: Thiel, 5.
 Seismic activity, megashear zones: Keith, B. A., 3.
 Seismology and structural geology: Thom, 9.
 Selenite fragments, criteria of wind action: Schoewe, 7.
 Sensitivity to tilt, seismograph: Delaney, 1.
 Shafts, vertical lms. caves: Pohl, 12.
 Sheet and stream floods: Davis, 29.
 Shutterridges, characteristic of active faults: Buwalda, 17.
 Sierra Nevada: Lawson, 8; Locke, A., 8.
 Silicates, ig. rocks, research on: Bowen, 17.
 Silicate-water system and osmotic pressure: Goranson, 6, 7.
 Silt in Rio Grande: Flock, 1.
 Slickensides: Morse, W. C., 3.
 Slump scarps: Finch, R. H., 7.
 Soft-rock deformation: Rettger, 3.
 Soil, cost in rock and time: Twenhofel, 37.
 Soil freezing experiments: Taber, S., 2.
 Solubility affected by pressure: Gibson, R. E., 2.
 Solution-faceted lms. pebbles: Bryan, 5.
 Solution in permanent peneplanation: Ward, F., 2.
 Solvent denudation overestimated: Lane, A. C., 2.
 Sorting power, wind, waves: Henderson, J., 2.

Physical geology—Continued.

- South Dakota, Harney Peak granite: Balk, 4.
- Spontaneous rock expansion: Bain, G. W., 3, 20-b.
- Squeeze-ups of lava: Nichols, R. L., 5.
- Stalactites, growth: Ellis, R. W., 3; Johnston, W. D., Jr., 2; Richards, G., 1; Ver Steeg, 10.
- Stalagmites, growth: Edwards, H. M., 1; Ver Steeg, 10.
- Status, importance, isostasy: Hixon, 1.
- Strain ellipsoid theory: Foley, L. L., 2; Griggs, 2; Leith, A., 3; Link, T. A., 3; Mead, W. J., 2.
- Strain and relief: Bain, 9.
- Stream work: Rubey, 5.
- Strength of rocks under high pressure: Griggs, 2.
- Strike and dip determinations: Hubbert, 2.
- Structural behavior, ig. rocks: Barton, 47.
- Structural features, Cordillera: King, 15.
- Structural, magmatic processes: Hoffman, 8.
- Structural petrology: Fairbairn, 9, 12; Griggs, 7; Knopf, E. F. B., 8, 9; Lovering, 29.
- Stylolites: Stockdale, 3, 11.
- Submarine canyons, depth changes at heads: Shepard, 57.
- Origin: Johnson, 44.
- Submarine volcanism: Kania, 2.
- Submountain structure, desert range: Keyes, 23.
- Subsidence, salt domes: Sellards, 13.
- Subsidence and ground movement: Crane, 1.
- Syngenetic nodules, Cret. shales: Roy, C. J., 1.
- System CaO-MgO-SiO₂: Taylor, N. W., 1.
- Tectonic metamorphism, S. Appalachians: Becker, H., 3.
- Tectonic relations, N. Am.-Europe: Stille, 3.
- Tectonics and erosion: Bailey, E. B., 2.

 Tetrapods, Greenland: Westoll, 2.
 Origin: Westoll, 2.
 Texas fauna: Howard, C. A., 1.
 Fish spine: Moore, R. C., 6.
 Titanichthys dental elements: Hussakof, 2.
 Triassic.
 America, western: Hesse, 9.
 Interior, western: Branson, E. B., 11.
 Pennsylvania: Bryant, 5.
 Trinidad: Trechmann, 7.
 Tully fm., N. Y.: Wells, J. W., 11.
 Utah: Branson, E. B., 12; Tanner, V. M., 1.
 Jefferson fm. fauna: Branson, E. B., 12.
 Vertebrates, Coso Mts., Calif.: Schultz, J. R., 5.
 Wyoming.
 Beartooth Butte: Bryant, 3, 4.
 Eocene: Bates, W. N., 1; Hesse, 17; Thorpe, 16.
 Permian sharks: Branson, C. C., 7.
 Phosphoria fm. fauna: Branson, C. C., 6.

Pisces—Continued.

Xiphactinus, Tex.: Price, L. L., 1; Stovall, 2.

Xiphias?, Md.: Berry, E. Willard, 2.

Pisolites, polyhedral: Shrock, 4.

Pitchblende.

New York, Peekskill: Zodac, 29.

Northwest Territories.

Beaverlodge Lake: Haycock, 3.

Eldorado mine: Ryan, J. P., 1.

General: Jolliffe, A. W., 1.

Great Bear Lake: Kidd, D. F., 1, 5, 7; Marble, 6, 9; Merkel, 1; Pochon, 1; Spence, 10, 13.

Hottah Lake: Spence, 13.

Rae, Mackenzie dist.: Kidd, 7.

Silver deposits: Furnival, 5.

Placers.

Alaska.

Circle area: Mertie, 19.

Copper River area: Moffit, 8, 9.

Eagle area: Mertie, 19.

Fortymile area: Mertie, 19.

General: Smith, P. S., 12.

Geologic features: Mertie, 22.

Kodiak Island area: Capps, 12.

Koyukuk region: Ohrenschall, 2.

Platinum, Goodnews Bay: Mertie, 18.

Ruby-Kuskokwim area: Mertie, 14.

Slana-Tok dist.: Moffit, 11.

Tanana River area: Moffit, 8.

Valdez Creek dist.: Tuck, 9.

Yukon-Tanana area: Mertie, 16.

Arizona, identification: Fansett, 3.

British Columbia.

Bridge River mining area: Cairnes, 15.

Canadian Nat. Rys. area: Kerr, F. A., 18.

Cariboo dist.: Cockfield, 16; Hanson, 9; Lay, 3.

Central mineral dist.: Hedley, M. S., 2.

Cranbrook area: Rice, H. M. A., 4.

Eagle-McDame area: Hanson, 13.

Eastern mineral dist.: Sargent, 1.

Keithley Creek area: Lang, A. H., 7.

Kettle River area: Cairnes, 17.

Northeastern mineral dist.: Lay, 4.

Southern mineral dist.: Hedley, M. S., 2.

Vancouver Island: Bancroft, 1.

California.

General: Jenkins, 18.

Sierra Nevada: Jenkins, 15.

Southern: Sampson, R. J., 3.

Colorado.

Golden area: Van Tuyl, 18.

Roscoe area: Wantland, 3.

Tincup mining dist.: Goddard, 3.

Columbia River Basin, Wash.-Oregon: Landes, H., 1.

Dominican Republic: Lengweiler, 2.

Examination of: Graves, 1.

General: Fitzhugh, 1.

Gold nuggets in: McKinlay, 1.

Placers—Continued.

Gold prospecting: Jacy, 1; Storms, 1.
Gravel channels, buried, location: Crampton, 1.

Idaho.

Bayhorse region: Ross, C. P., 31.

Dixie dist.: Capps, 14.

Edwardsburg area: Shenon, 16.

Florence mining dist.: Reed, J. C., 19.

Gold: Lorain, 3.

Murray area: Shenon, 17.

Thunder Mtn. area: Shenon, 16.

Warren dist.: Reed, J. C., 14.

Mexico, gold: Barrera, 5.

Bajada: Webber, B. N., 2.

Montana, Butte dist.: Dickey, F. H., 2.
Nevada.

Gold: Vanderburg, 1.

Lander Co.: Vanderburg, 4.

Singatse Range channel: Penrose, R. J., 1.

Tuscarora dist.: Nolan, 9.

New Mexico, Bayard area: Lasky, 12.

Oregon.

Applegate River area: Treasher, 3.

Baker quad.: Gilluly, 16.

Northeastern: Oregon Dept. Geology, 1.

Quebec.

Eastern Tps. area: McGerrigle, 5.

Mount Megantic area: McGerrigle, 4.

Streams, gold in: Crampton, 2.

Virginia, gold, Piedmont: Park, 6.

Yukon, Laberge area: Bostock, 11.

Mining development, 1938: Bostock, 12.

Placoderms, Greenland: Stensiö, 1.

Plains, desert: Blackwelder, 22.

Planetary deformation of earth: Dennis, C. E., 1.

Planetesimal hypothesis: Jeffreys, 2; Keyes, 7; MacMillan, 1; Willis, B., 5.

Development: MacMillan, 1.

Meteoritic agglomeration: Keyes, 7.

Planktonic faunas, Paleozoic: Reed, R. D., 20; Ruedemann, 16; Schuchert, 33.

Plant distrib. guide to age determination: Chaney, 25.

Plant fossils in the making: Anonymous, 134.

Plants, fossil. See also Paleobotany.

Collecting and preserving: Sanborn, 4.

Plastic deformation and creep of solids: Nádai, 2.

Plasticity, rocks under high pressure: Griggs, 1.

Platinum.

Alaska.

Goodnews dist.: Mertie, 21.

Placers, Goodnews Bay: Mertie, 18.

Canada, general: O'Neill, 3.

Timiskaming sub-prov.: Collins, 12.

Colorado, general: Anonymous, 176.

La Plata dist.: Eckel, E. B., 10;

Anonymous, 165.

Idaho, Snake River: Hite, 1.

Platinum—Continued.

Meteorites, content of: Hawley, F. G., 1.
Mexico.

Aranjuez area: González, J., 1.

General: Santillán, 12.

Mequitil Valley: Flores, 9.

Montana, Stillwater igneous complex:
Howland, 2.

Ontario, Renfrew Co.: Freeman, B. C., 4.

5; Greer, L., 1; Harcourt, 4; Harding, W. D., 2, 4, 5; Hawley, J. E., 2, 4; Horwood, 9, 10, 11, 12; Hurst, 1, 4, 5, 9, 10, 11, 12; Kelth, M. L., 4; Kidd, D. F., 4; Kindle, E. D., 1; Kindle, L. F., 2, 3; Kranek, 1; Laird, H. C., 2, 3, 5, 7, 8, 9, 10; Langford, 1, 4; Matheson, 1; Maynard, J. E., 1; Merritt, P. L., 2; Moore, E. S., 2, 6, 8, 10, 11, 16, 17; Moorhouse, 1, 3; Osborne, 3, 31; Perdue, 1; Pettijohn, 7, 8, 9, 15; Prest, 1; Quirk, 3, 7, 21; Rickaby, 1, 3, 4, 6; Ringsleben, 1; Rittenhouse, 3; Robson, 1; Sandberg, 2; Satterly, 3; Savage, W. S., 1; Spearman, 3; Suffel, 2; Tanton, 1, 5; Thomson, James E., 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, 14, 15, 16, 17; Thomson, R., 4; Tolman, C., 1; Tuck, 2; Williams, M. Y., 14; Wilson, M. E., 10, 11, 13, 18; Anonymous, 121, 149.
- Ontario-Manitoba boundary: Derry, 6.
- Pegmatites, age, distrib.: Landes, 20.
- Pennsylvania: Bascom, 1, 3, 5, 6; Berkeley, 12; Fraser, 11, 12, 15; Jonas, 4, 9; Knopf, E. F. B., 3; Mackin, 4; Miller, B. L., 4, 7, 8, 13, 15; Stose, G. W., 1, 8, 11, 12, 15, 17, 21, 22; Ward, F., 5; Watson, E. H., 6; Willard, 55, 58.
- Pre-Ordovician age by helium method: Lane, 29.
- Quebec: Auger, 1, 2; Backman, 1; Bannerman, 4, 6; Bell, A. M., 1; Bell, L. V., 3, 4, 7, 10, 11, 12, 14, 15, 16; Bruce, 7; Butterfield, 1; Conolly, H. J., 1; Cooke, H. C., 11, 12; Denis, 1, 2, 3, 4, 5, 6, 7, 8; Derry, 10, 11; Douglas, 4; Dresser, 6; Faessler, 2, 3, 4, 5, 6, 7, 9, 12, 13, 16; Gill, 3, 7; Glissow, 1; Gunning, 12, 13, 22, 24; Hawley, 7, 8, 10; Hendreson, J. F., 1, 2; Lang, A. H., 3, 4, 5; Laverdière, 1, 4, 6; Longley, 1, 2, 3, 4; Lowther, 1; McGerrigle, 8; Mackenzie, 1, 4, 5; Malouf, 1; Mawdsley, 1, 6; Moore, E. S., 5; Norman, 6, 7, 9, 10; O'Neill, 4, 5, 6; Osborne, 16, 17, 20, 21, 22, 23, 26, 29, 30; Price, P., 3; Retty, 1, 2, 3, 4, 5, 6; Ross, S. H., 1; Shaw, G., 1; Snider, 4; Spearman, 3; Tolman, C., 2, 3, 6, 15; Weeks, L. J., 5-a; Wilson, H. S., 1; Wilson, J. T., 6, 7; Wilson, M. E., 12, 14, 17, 18, 19.
- Replacement shells around batholiths: Freeman, B. C., 5.
- Research, prog. and scope: Sederholm, 2.
- Rhode Island, Copper Mine Hill: Quinn, 5.
- Rio Grande depression, Colo.-N. Mex.: Bryan, 36.

Pre-Cambrian—Continued.

- Rocky Mts. area: Bartram, 10; Warren, P. S., 1.
- Saskatchewan: Alcock, 13, 16, 17, 19; Cameron, A. E., 3; Canada, G. S., 1; Keith, M. L., 3; McLearn, 4; Ross, S. H., 2; Satterly, 1; Sproule, 2, 3, 5; Stockwell, 1; Weeks, 9; Wright, 16, 19.
- South Carolina: Keith, Ar., 2.
- South Dakota: Connolly, 3; Cummings, J. B., 2; Runner, J. J., 3, 5, 8; Stobbe, 1; Taylor, G. L., 3; Tullis, 5, 6, 7; Wright, L. B., 3.
- Southwestern U. S.: Effinger, 4.
- Taconic Olenellus fauna: Keyes, 268.
- Tennessee: Born, 5; Laurence, 4.
- Texas: Baker, 24; King, 19, 29; Sel-lards, 28; Stenzel, 9, 10, 12.
- Uinta Mts., Utah-Colo.: Forrester, 1.
- Unconformity, Mississippi Valley: Atwater, 2.
- United States.
- Buried surface: Moss, 3.
- Southeastern: Lloyd, S. J., 1.
- Western, orogeny: Hinds, 29.
- Utah: Blackwelder, 38; Dane, 7; Dobbin, 17; Eardley, 2, 12, 14; Hintze, 2.
- Vermont: Foyles, 3; Jacobs, 2, 3; Krieger, M. H., 1; Perry, E. L., 1.
- Virginia: Bevan, 9, 15, 37-a; Brown, C. B., 3; Cady, R. C., 4; Furcron, 3, 4, 9; Jonas, 3, 5, 7, 14; Moore, C. H., Jr., 3; Sears, C. E., Jr., 3; Stose, A. J., 1; Stose, G. W., 6, 13, 20-a; Thiesmeyer, 5-a; Woodward, 8.
- Washington: Culver, 6; Park, 9.
- West Virginia: Price, P. H., 8-a, 14.
- Wisconsin: Aldrich, H. R., 1; Atwater, 4; Bates, R. E., 4; Dickey, R. M., 4; Gwynne, 1; Hotchkiss, W. O., 1; Leith, 10; Raasch, 2; Royce, 2; Stark, 3, 12; Thwaites, F. T., 2, 6; Wang, 1.
- Wyoming: Baker, 27; Beckwith, 4, 5; Bostock, 4; Blackwelder, 38; Bradford, C. E., 1; Fanshawe, 1; Gwynne, 6; Hares, 3; Horberg, 1; Johnson, G. D., 1; Jones, C. T., 2; Lammers, 6; Lees, E. J., 1; Love, J. D., 1; Nace, 2; Wilson, C. W., Jr., 3; Wright, L. B., 3.
- Yukon: Bostock, 6, 11; Johnston, J. R., 1, 2; Lees, E. J., 2.

Precious metal elements, ore tests: Fraser, H. J., 6.

Precious stones.

- American gem minerals: McIntosh, F. G., 3.
- Amethysts, Colo.: Caplan, 3.
- Asterism: Walcott, A. J., 2, 3.
- Canada, semi-precious and ornamental stones: Parsons, 13.

Precious stones—Continued.

- Gem minerals.
- American: McIntosh, F. G., 3.
- California: Sperisen, 1.
- Idaho: Olson, B. H., 1.
- Identification: Howell, D. H., 1.
- Oregon: Dake, 19.
- General: Rogers, 19; Whitlock, 9.
- Industrial minerals and rocks: A. I. M. E., 2.
- Opal: Melhase, 20; Randolph, G. C., 9.
- Oregon: Melhase, 20; Anonymous, 57.
- San Francisco collection: D'Arcy, 2.
- Staurolite, Va.: Roberts, 21.
- Sunstone, Oreg.: Anonymous, 57.
- Turquoise, Ariz.: Crawford, W. P., 2.
- Valuation and prices, history: Ball, S. H., 4.
- Virginia, staurolite: Roberts, 21.
- Pre-Devonian structural zones, Scotland-America: Jonas, 8.
- Prehnite, N. J.: Anonymous, 164.
- Premonitory fms.: Washburne, 1.
- Pribilof Is., rocks: Washington, 4.
- Primary banding, basic plutonic rocks: Coats, 1.
- Primates. See Mammalia.
- Priority vs. usage, geol. terms: Keyes, 261.
- Problems, petroleum geology: Wrather, 2.
- Proboscidea. See also Mammalia.
- Evolution: Osborn, 29.
- Profile mapping: Jakosky, 10.
- Projection, diag., figs.: Quirke, 18; Wright, F. E., 1.
- Proper names, nomenclature and classn.: Wadell, 10.
- Prospecting handbook: Walker, J. F., 8.
- Prospecting in Canada: Canada, G. S., 2.
- Prospector's guide: Manitoba Dept. Mines, 1.
- Protactinium, terrestrial, meteoritic: Evans, R. D., 6.
- Protaspides of trilobites: Raymond, 16.
- Protozoa. See also Foraminifera: Invertebrates, (general).
- Fauna, Kansas coal field: Williams, J. S., 12.
- Fusulinidae, distrib.: Berry, E. Willard, 7.
- Permian fusulinids, Tex.: Dunbar, C. O., 3.
- Primitive fusulinids, Mid-continent: Skinner, 2.
- Sea balls, Sil., Ill.: Croneis, 46.
- Silicoflagellates, Calif.: Hanna, 19.
- Wedekindia: Dunbar, C. O., 2.
- Protractor to show structure: Postel, 3.
- Pseudo-eutectic textures: Anderson, 17; Schwartz, 6.
- Pseudoleucite, Mont.: Larsen, 23.
- Pseudomorphs.
- California.
- Gold-bearing hematite: Esselink, 3.
- Montmorillonite after feldspar: Landermilk, 6.
- Quartz fluorite: Murdoch, 2.
- Silica fluorite: Murdoch, 3.

Pseudomorphs—Continued.

- Chalcedony, agate, after prehnite: Casperson, 2.
 Dolomite, castellated: Merritt, 4.
 Galena replacing rootlet, Ill.: Allen, V. T., 6.
 Halite crystal casts, Pa.: Miller, B. L., 9.
 Mineral, in Am. Mus.: Frondel, C. 6.
 Quebec, after spinel: Osborne, 28.
 Spodumene to kaolinite, S. Dak.: Schwartz, 21.
 Vein quartz, of cross-fiber asbestos: Thiesmeyer, 2.
 Fauquier Co.: Thiesmeyer, 2.
 Washington, coprolites: Major, 1.
- Pteropoda.**
 American Tert.: Collins, R. E. L., 2.
 Barbados: Trechmann, 10.
 Centropleura, Vt.: Howell, 30.
 Puercan series, Cret.: Keyes, 135.
- Puerto Rico.**
 Geology: Meyerhoff, 4.

Areas described.

Fajardo dist.: Meyerhoff, 3.

Economic geology.

- General: Meyerhoff, 10.
 Manganese, origin: Harper, M. F., 2.
 Mineral deposits: Low, B., 1.
 Mineral resources: Britton, N. L., 1;
 Eckel, E. C., 4; Meyerhoff, 9; Ray,
 H. C., 1, 2.

Historical geology.

- Fajardo dist.: Meyerhoff, 5.
 General: Maury, 1; Meyerhoff, 10.
 Pre-Oligocene stratigraphy: Meyerhoff, 2.

Mineralogy.

- General: Ray, H. C., 3.
 Magnetite: Colony, 5.

Paleontology.

- Chiroptera: Anthony, 1.
 Corals, Tert.: Coryell, 1.
 Corvus: Wetmore, 3.
 Edentata: Anthony, 2.
 Insectivora: Anthony, 1.
 Nesotrochia: Wetmore, 2.
 Oreopeleia: Wetmore, 2.
 Polyborus: Wetmore, 2.
 Rodentia, Pleist.: Anthony, 2.
 Tyto, caves: Wetmore, 3.

Petrology.

- General: Ray, H. C., 3, 4.
 Sands, white quartz: Thorp, J., 2.

Physical geology.

- General: Meyerhoff, 10.
 Karst topography: Meyerhoff, 25.
 Pepino Hills: Thorp, J., 1.

Pystographic geology.

- General: Meyerhoff, 10.
 Karst topog.: Meyerhoff, 25.

Underground water.

- Karst topography: Meyerhoff, 25.

- Pulaski overthrust, Va.: Woodward, 11.
 Pulpstone, W. Va.: Smith, W. L., 1.
 Pulsation theory, N. Am.: Grabau, 3, 4, 5.

Pumice.

- Industrial minerals and rocks: A. I.
 M. E., 2.
 Oregon: Becker, C. P., 1; Fuller, 12;
 Moore, B. N., 4, 5, 8.

Pyrite.

- Alabama: Adams, G. I., 4.
 Illinois: Born, K. E., 2.
 Ontario: Thomson, J. Ellis, 19.
 Oxidation: Bain, 13.

Pyrites, Cuba, crystals: Huerta, 1.

Pyroaurite, Ontario: Ellsworth, 11.

Pyroclastic rocks: Wentworth, 18.

Zeolitic alteration: Bramlette, 2.

Pyrophyllite.

- Industrial minerals and rocks: A. I.
 M. E., 2.

Newfoundland: Vhay, 1.

North Carolina: Burgess, B. C., 1;
 Stuckey, 12.

South Carolina: Bryson, 8; Stuckey, 12.

Pyroxenes.

- Greenland: Deer, 1.
 Triclinic manganiferous: Sundius, 2.

Pyrrhotite, paragenesis: Blanchard, 5;
 Schwartz, 19; Spence, 15.

Quadra Is., British Columbia: Ellsworth, 7.

Quakertown-Doylestown dist., N. Y.-Pa.:
 Bascom, 1.

Quartz.

- Arizona: Johnson, R., 1.
 Arkansas: Toothaker, 3.
 British Columbia: Walker, 18.
 California: Johnston, W. D., Jr., 14;
 Kennard, T. G., 2.
 Clastic, orientation: Wayland, 2.
 Colorado: Hurlanek, 1; Rogers, 27.
 Content, industrial dusts: Hulin, 10.
 Correlation, deformation: Fairbairn, 13.
 Dikes: Furnival, 4.
 Etching: Meen, 3.
 Forms: Van Amringe, 1.
 General: Dake, 26; Van Amringe, 1.
 Geodes containing petroleum: Anonymous, 181.
 Georgia, Graves Mt.: Zodac, 28.
 Greenland: Moos, von, 2.
 Minnesota: Zodac, 23.
 Nevada: Garaventa, 1.
 New York: Hollister, J. S., 1; New-
 land, 16; Zodac, 19, 20.
 North Carolina: Bryson, 7-a.
 Northwest Territories: Furnival, 2.
 Nova Scotia: Messervy, 6.
 Ontario: Walker, 16.
 Orientation, deformed rocks: Griggs, 9.
 Tectonites: Fairbairn, 14.
 Pacific Northwest: Hodge, 24.
 Paramorphs of: Moehliman, 3.
 Pennsylvania: Zodac, 22.
 Porphyroblasts in hornfels: Goodspeed,
 9.
 Precious: D'Arcy, 3.
 Rhode Island: Flagg, 1.
 Rock crystal, inclusions: Zodac, 18.

Quartz—Continued.

- Silica deposits, Calif.-Nev.-Canada:
Hodge, 24.
Smoky, study: Mohler, N. M., 2.
South Dakota, Black Hills: Tullis, 7.
Temperature of formation in veins:
Meen, 5.

Quartzite.

- Greenland: Moos, von, 2; Wegmann, 10.
Nova Scotia: Messervey, 6.
Oklahoma: Hickock, 1.
Ontario: Bruce, 25.

Quaternary. See also Glacial geology; Paleontology, Quaternary.

 Ocean movements affecting: Fleming, R. H., 1.
 Oceanography and submarine geology: Sverdrup, 1.
 Ohio: Mitchell, 7; Pettijohn, 3, 4.
 Ohio River flood deposits: Mansfield, G. R., 25.
 Ontario, Lake Erie: Kindle, 20.
 Oolites: Davidson, S. C., 1; Swartzlow, 4.
 Oregon, Great Basin lake sediments: Shrock, 8.

Sedimentation—Continued.

- Organic content, recent sediments: Trask, 10, 33, 42.
- Organic structures in sediments: Galliher, 6.
- Oriskany ss.: Stow, 11.
- Ouachita Mts., Ark.-Okla.: Keyes, 469.
- Pacific island sediments: Wentworth, 9.
- Packing, differential, and bedding: Keller, 12.
- Passage, turbid water through Lake Mead, Ariz.-Nev.: Grover, 1.
- Pebbles, orientation in sed. deposition: Krumbein, 25.
- Periodicity, epeirogenic movements: Born, A., 1.
- Petrology, marine sediments Mid-Atlantic Coast: Cohee, 1.
- Phase sampling of sediments: Apfel, 4.
- Phases of, Gulf area: Steinmayer, 1.
- Phosphate: Mansfield, G. R., 9.
- Physiography, sedimentation, and oil geology: Rich., 17-a.
- Physics, application: Van Orstrand, 4.
- Porosity and permeability: Graton, 8.
- Precipitation, calcium carbonate in lakes: Williams, F. T., 1.
- Principles of: Twenhofel, 33.
- Profile, buried valleys, Ohio, Tenn., Cumberland Rivers: Rhoades, 1.
- Quartz sand, rounded, off New-England: Stetson, 7.
- Radium content, ocean bottom sediments: Piggot, 3.
- Pacific Ocean, water, sediments: Evans, R. D., 5.
- Rate, continuity, of deposition: Twenhofel, 30.
- Recent marine sediments: Trask, 15.
- Recent sediment studies: Twenhofel, 36.
- Red beds, W.: Krynine, 9.
- Relation of faulting to: Longwell, 25.
- Rio Grande, silt carried: Flock, 1.
- Rip currents: Shepard, 29.
- River gravel: Campbell, M. R., 3.
- Rivers, sed. characteristics: Straub, 1.
- Rock bottom area, Massachusetts Bay: Hough, J. L., 1.
- Rock fans, pediments: Rich, 19.
- Rocky Mts., Great Plains, cycles: Lugn, 8, 9, 10.
- Salinity changes, Chesapeake Bay: Wells, R. C., 2.
- Sand bodies, location of: Rich, 29.
- Sand, floating, makes swash marks: Evans, 14.
- Sand grains, character: Ries, 7.
- Sands, Mississippi River: Russell, R. D., 10, 13.
- Scavengers, marine, sedimentational effect: Dapples, 2.
- Sea-bottom samples, Cabot Strait: Kindle, 13.

Sedimentation—Continued.

- Sediment diversion, branching channels: Matthes, G. H., 2.
- Sedimentary data presentation: Krumbein, 24.
- Sedimentary environments: Anderson, G. E., 3.
- Sedimentary fragments, classn., bibliography: Williams, L., 2.
- Sedimentary particles, shape, bibliography: Russell, R. D., 11.
- Sedimentary petrography: Thiel, 15.
- Sediments.
- Ancient, study of: Poor, 8.
- Continental shelves: Shepard, 6; Thiel, 5.
- Deep-sea, magnitude: Twenhofel, 2.
- Floating on fresh water: Evans, 12.
- Marine, salinity-calcium carbonate relation: Trask, 34.
- Organic content: Trask, 10, 21, 22, 33, 42.
- Pipette analysis: Rittenhouse, 6.
- Seasonal, ann. accumulation: Thiesmeyer, 5.
- Siliceous, notes, 1934-35: Tarr, 20.
- Size frequency distrib.: Krumbein, 6, 9, 11.
- United States continental shelf: Stetson, 17, 19.
- X-ray analysis: Mehmel, 1.
- Sediments and exponential curves: Krumbein, 14.
- Sedimentation analysis, factors: Galliher, 10.
- Settling velocities, sand, gravel, silt: Rubey, 8.
- Silt problem: Stevens, J. C., 1.
- Silt studies: Bryan, 11.
- Silting.
- Colorado River: Fortier, 1.
- Lake Austin, Tex.: Taylor, T. U., 1.
- Reservoirs: Brown, C. B., 4; Eakin, 5; Poor, 5; Taylor, T. U., 2.
- Rivers: Bryan, 6.
- Size distrib., heavy minerals in ss.: Rubey, 9.
- Size frequency distrib.: Krumbein, 6, 9, 11, 21; Wentworth, 41.
- Soil Conservation Service studies: Brown, C. B., 5.
- Soil, cost in rock and time: Twenhofel, 37.
- Solids, settling velocity: Wadell, 6.
- Transportation in open channels: U. S. Bur. Reclamation, 1.
- Sorting, in swash and backwash: Evans, 18.
- River sediments: Straub, 5.
- Source, beach sands, Long Is., N. J.: Colony, 3.
- South Canadian River, N. Mex.-Tex.: Sidwell, 6.
- South Dakota: Connaughton, 1; Glymph, 6.
- Spring pits: Quirke, 6.

Sedimentation—Continued.

- Sporangites, Dev., redeposited in Lake Michigan: Hough, J. L., 2.
- Stanford Univ. studies: Blackwelder, 42.
- Stream dynamics: Lane, E. W., 1.
- Streams, load-carrying, energy balance: Knapp, R. T., 1.
- Structure and creep: Stearn, 10.
- Structures in sediments: McKee, 12.
- Studies in: Brown, C. B., 5, 6.
- Sulfur cycle in: Galliher, 8.
- Recent sediments: Trask, 3.
- Terminology.
- Coarse sediments: Wentworth, 32.
- Fine-grained mech.: Twenhofel, 25.
- Medium-grained: Allen, 16.
- Siliceous sediments: Tarr, 27.
- Texas: Albritton, 9; Gebb, 1; Glymph, 5; Reed, E. L., Jr., 1; Richards, 22; Shuler, 3; Sidwell, 3.
- Thermal overflow, thallophytes, rock building: Setchell, 1.
- Transportation.
- Bed-load by streams: O'Brien, M. P., 1.
- Debris by streams, and turbulence: Leighly, 2.
- Detritus by moving water: Hjulström, 1.
- Marine sediments: Raymond, 7.
- Silt by streams: O'Brien, M. P., 2.
- Travertine-forming organism: Howe, M. A., 1.
- Treatise on: Twenhofel, 7.
- Trinidad, sed. volcanism: Kugler, 1.
- Tropics, humid: Krynlze, 4.
- Types of sediments: Twenhofel, 18.
- Turbulence and debris-transp. by streams: Leighly, 2.
- United States, E. continental shelf: Stetson, 17, 19.
- Utah, Great Salt Lake: Eardley, 11; Hansen, G. H., 4.
- Varved clays, deposition, alteration: Burwash, 10.
- Varved sediments: Anteys, 5; Bradley, 17; Burwash, 10; Collet, 2; MacClintock, 9.
- Pleistocene lake, Neb.-N. Dak.: MacClintock, 9.
- Varves, non-glacial: Bradley, 17.
- Virginia: Barnes, F. F., 4; Brown, C. B., 7; Stow, 2, 13; Wells, R. C., 12.
- Volume, shape, position, rock fragments in openwork gravel: Wadell, 9.
- Washington, Wilson Creek: Hough, 5.
- Water transp., sand clastics: Miller, E. B., 1.
- Wave tank study: Evans, 19.
- Wisconsin: Conger, 3; Krumbein, 16; Twenhofel, 10, 24, 34, 38.
- Wyoming: Parsons, W. H., 3.
- Sedimentation, relation to faulting: Longwell, 25.
- Sedimentation, rec. of environment: Fenton, 13.
- Sedimentation study, field sampling: Otto, 4.
- Sediments, continental shelf, mid-Atlantic States: Shepard, 22.
- Sediments, deep-sea, magnitude: Twenhofel, 2.
- Seismic depth calculations: Beers, 1.
- Seismic-electric prosp.: Belluigi, 2.
- Seismic explor., difficult areas: Cunningham, G. M., 3.

- Cuba: Jover y Anido, 1.
- Deductions, deep-focus earthquakes: De Lury, 23.
- Deep earthquakes: Brunner, 1.
- Deepfocus earthquakes: Blake, A., 3; Gutenberg, 21, 27; Lynch, 3, 8; Macelwane, 23; McMurtry, 1; Slichter, 4, 6; Sohon, 3; Stechschulte, 2, 3.
- Deepfocus seismograms: Sohon, 3.
- Depth calculations, seismic: Beers, 1.
- Depth changes: Gutenberg, 36.
- Depths of strata, seismograph determination: Harris, S., 1.
- Determination, earthquake epicenters: Hodgson, 6.

Seismology—Continued.

- Discontinuities, earth mantle: Gutenberg, 4.
 Dispersion, first seismic waves: Sommer, 1.
 Earth, crust: Adams, L. H., 8; Gutenberg, 11, 22, 24; Macelwane, 15.
 Interior: Heck, 46; Macelwane, 27.
 Layered, vibrations: Slichter, 5.
 Earth core theory: Lynch, 6.
 Earth physics: Fleming, J. A., 1.
 Earth structure: Hodgson, 7, 18.
 Earth vibrations from quarry-blasting: Thoenen, 3.
 Earth waves, travel times: Ewing, 4.
 Earthquake, deep, 5/26/32: Brunner, 3.
 Eureka, Calif., 6/6/32: Stoneley, 1.
 June 24, 1935: Blum, 1.
 Earthquake belts and submarine topography: Heck, 36, 44.
 Earthquake body waves: Macelwane, 9.
 Earthquakes.
 America, NE., July-Dec., 1937: Leet, 14.
 April 1935-March 1936: Eickelberg, 3.
 Characteristics: Brunner, 5.
 Coastal Plain, N. Am.: Heck, 42-a.
 Deep-focus: Blake, A., 2; Gutenberg, 21, 27; Landsberg, 2; Lynch, 3, 8; Macelwane, 23; McMurtry, 1; Slichter, 4, 6; Sohn, 3; Stechschulte, 2, 3.
 Deep- and shallow-focus: Landsberg, 2.
 Diurnal periodicity: Davison, C., 2.
 Dynamic causes: Brunner, 6.
 Field inv.: Wood, H. O., 9.
 First motion: Byerly, 1.
 Forces on dams: Morris, S. B., 1.
 Forecasting: Keyes, 165.
 Geologic significance: Leith, A., 2; Thom, 20.
 Hawaiian, travel times: Jones, A. E., 6.
 Investigations: Gilmore, M. H., 1.
 Magnitude scale, instrumental: Richter, C. F., 2.
 Notes on: Seismol. Soc., 2.
 Origin, genetic system: Landsberg, 4.
 Pacific Coast, 1769-1928: Townley, 1.
 Periodicity: Bayley, 9.
 Prediction: Heck, 43.
 Recorded in artesian wells: Leggette, 3.
 Records, intermediate, far: Byerly, 15.
 Waves: Macelwane, 10, 11, 12; Reid, H. F., 3; Warne, 1.
 Earthquakes and moon angles: Stetson, H. T., 2.
 Earthquakes and moon phases: Stetson, H. T., 1.
 Earthquakes and submarine geology: Heck, 36.
 Earthquakes and W. mtn. area: Heck, 41.
 Elastic waves velocity, granite, norite: Leet, 5.

Seismology—Continued.

Perkins Co.: Searight, 3.

Placer gold: Anderson, D. L. M., 1.

Pierre gas field: Wing, 2.

Rocky Mtn. area: Uren, 2.

Sand: Rothrock, 7.

Selenium: Pugsley, 1.

Spodumene: Schwartz, 4.

Stoneville coal area: Searight, 4.

Tantalum: Johnson, A. I., 2.

Tin: Cummings, J. B., 1; Gardner, E. D., 2.

Tungsten: Cummings, J. B., 2.

Historical geology.

Artesian conditions, W.-cent.: Rothrock, 15.

Badlands, color records: Germann, J. C., 1.

Big Badlands: Clark, J., 3.

Black Hills: Chamberlin, 10; Cloos, 9; Dillé, 2; Friedman, 1; Kansas G. Soc., 2; Runner, J. J., 5, 8; Taylor, G. L., 3; Thompson, M. L., 4; Tullis, 5; Wright, L. B., 3.

Black Hills-Big Horn-Beartooth area, gravity anomalies: Chamberlin, 10.

Cedar Creek anticline: Dobbin, 11.

Chadron fm.: Clark, J., 3.

South Dakota—Continued.

Historical geology—Continued.

- Chilson anticline: Rothrock, 5.
 Crepicephalus horizon, Deadwood fm.: Meyerhoff, 8.
 Day Co.: Rothrock, 13.
 Deadwood fm.: Furnish, 2.
 Fox Hills-Lance contact: Dobbin, 4.
 General: Searight, 1.
 Geologic map: Kirby, M. E., 1.
 Gold deposition, Black Hills: Wright, L. B., 3.
 Grant Co.: Rothrock, 10.
 Harding Co.: Rothrock, 16.
 Lake Kampeska area: Rothrock, 8.
 Lance-Fort Union correl.: Andrews, D. A., 3.
 Log wildcat well, Pennington Co.: Littlefield, 1.
 Microfossiliferous Cret. sec.: Cushman, 19.
 Minnelusa, Black Hills: Dillé, 2.
 Mississippian-Pennsylvanian contact: Meyerhoff, 11.
 Missouri Valley: Gries, J. P., 1.
 Nemo dist.: Runner, J. J., 5.
 Niobrara fm.: Loetterle, 1.
 Ordovician fossils, Deadwood fm.: Furnish, 2.
 Pegmatites, Tinton: Hess, F. L., 14.
 Pennsylvanian, Black Hills: Thompson, M. L., 4.
 Perkins Co.: Searight, 3.
 Pierre fm.: Searight, 5.
 Pierre gas field: Wing, 2.
 Potter Co.: Russell, W. L., 6.
 Pre-Cambrian: Cloos, 9; Runner, J. J., 5; Taylor, G. L., 3.
 Rocky Mtn. area: Uren, 2.
 Selenium deposits: Pugsley, 1.
 Stoneville coal area: Searight, 4.
 Tungsten mines: Cummings, J. B., 2.
 Uraninites and age determination: Khlopin, 1.

Mineralogy.

- Bennet Co. meteorite: O'Harra, 9.
 Beryl: Lincoln, 1.
 Black Hills: Johnson, A. I., 1, 2;
 O'Harra, 7; Overman, 1; Runner, J. J., 6; Schwartz, 22; Tullis, 6, 7;
 Ulke, 2; Wayland, R. G., 1.
 Cesium biotite, Custer Co.: Hess, F. L., 5.
 Cumingtonite: Wayland, R. G., 1.
 Iron sulfides, paragenesis: Schwartz, 22.
 Lithium: Hess, F. L., 15.
 Minerals of pegmatites: Connolly, J. P., 1; Johnson, A. I., 1.
 Morinite: Runner, J. J., 6.
 Paragenesis, iron sulfides: Schwartz, 22.
 Pegmatites: Apssouri, 1; Connolly, 4; Hess, F. L., 14; Johnson, A. I., 1; Runner, J. J., 6; S. Dak. Plann. Bd., 2; Stobbe, 1; Tullis, 7.
 Sand-calcite crystals: Connolly, 4.
 Selenium: Moxon, 1, 2; Pugsley, 1.

South Dakota—Continued.

Mineralogy—Continued.

- Tantalum: Johnson, A. I., 2.
 Tin: Gardner, E. D., 2.
 Tourmaline: Buerger, 25.

Paleontology.

- Alligators: Barbour, T., 1; Mook, 4.
 Allognathosuchus: Patterson, B., 1.
 Aves, Miocene: Miller, Alden, H., 8, 9.
 Badlands: Bump, J. D., 1, 2.
 Bathornis: Wetmore, 41.
 Black Hills floras: McIntosh, A. C., 1.
 Buteo: Wetmore, 30.
 Calianassa: Rathbun, 4.
 Camels: Bump, J. D., 3; Gregory, J. T., 3.
 Carnivora, Miocene: Loomis, 4.
 Cats, sabre-tooth: Jepsen, 6.
 Cephalopoda: Miller, 35.
 Chadron fm.: Clark, J., 3.
 Collecting fossils: Martin, H., 1.
 Collections, School of Mines Mus.: Bump, 4.
 Coprolite: Stovall, 8.
 Crepicephalus horizon, Deadwood fm.: Meyerhoff, 8.
 Cupressinoxylon: Lutz, 1.
 Deadwood fm. faunas: Meyerhoff, 8, 12, 15.
 Dinosauria: Anderson, S. M., 1; Bump, 6; Wieland, 3.
 Tracks: Anderson, S. M., 1.
 Dogs, phylogeny: Loomis, 10.
 Entelodonts: Loomis, 5.
 Floras.
 Colgate mbr., Fox Hills: Brown, 23.
 Harding Co., lower Lance: Berry, 44.
 Foraminifera: Anderson, H. W., 1.
 Fossil Cycad Nat. Monument: Wieland, 23; Anonymous, 109.
 Fusulinids: Thompson, M. L., 4.
 Geomyid rodents: Wood, A. E., 14.
 Hoplophoneus: Wood, H. E., 2d, 1.
 Leptomeryx: Hernon, 1.
 Mammalia: Richardson, G. H., 1; Scott, W. B., 3.
 Merycoidodonts: Phleger, 10.
 Mesobippus: Schlaikjer, 1, 2.
 Metamydon: Wood, H. E., 2d, 13.
 Microfauna, Sully mbr., Pierre fm.: Searight, 6.
 Microfossiliferous Upper Cret. sect.: Applin, 1.
 Micropaleontology, Niobrara fm.: Loetterle, 1.
 Nannaotragulus: Loomis, 7.
 Ordovician fossils, Deadwood fm.: Furnish, 2.
 Oreodon unborn twins: Hernon, 2.
 Oreadont skeletons: Loomis, 8.
 Ostracoda: Harper, M. F., 1; Roth, 12.
 Pinoxylon: Read, C. B., 4.
 Pliauchenta: Gregory, J. T., 1.
 Rhinoceroses: Wood, H. E., 2d, 2.
 Rodentia: Wood, A. E., 17.
 Schaubeumys: Wood, A. E., 6.

South Dakota—Continued.

Paleontology—Continued.

Mexico, ann. repts.: González, E. M.,
2; Santillán, 8.
Michigan G. S., history: Martin, H.
M., 2.
Mineral industry, devel.: Loughlin, 10.
Mississippi State Geologist's bienn.
repts.: Lowe, E. N., 1; Morse, 5.
Missouri State Geologist's repts.: Bueh-
ler, 1, 2, 4, 5, 8, 9.
Montana, Bur. Mines and Geology:
Anonymous, 80.
National and local magnetic surveys:
Heck, 39.
Newfoundland, Geologist's rept. 1929:
Baker, H. A., 1.
Geological Survey revived: Snelgrove,
7.
North Carolina, Div. Mineral Res. rept.:
Bryson, 1.
Ohio, radio transmission survey: Higy, 1.
Oklahoma G. S.: Cooper, C. L., 1.
Biennial rept., 1935-36: Dott, 9.
Oregon G. S., 1st. bienn., 1937-38:
Strayer, 1.
Pennsylvania G. S.: Ashley, 22; Logue,
1; Stone, 19; Anonymous, 91.
Establishment: Mendenhall, 9.
Topographic and Geologic Survey,
1919-30: Ashley, 2.
Public works activities and services,
U. S. G. S.: Mansfield, W. C., 10;
Sears, J. D., 2.
Science Advisory Bd. rept. on U. S. G. S.,
1934: Leith, 9.
Service: Bain, 12.
South Dakota State Geologist's repts.:
Rothrock, E. P., 3.
State geol. surveys: Moore, 43.
State and nat. geol. surveys: Leighton,
11.
State res. survey, model: Leighton, 23.
Territorial surveys, data in Wash., D. C.:
Fryxell, 8.
Texas, Big Bend area: Crimmins, 1.
Texas G. S. activities: Sellards, 9.
Division of Nat. Res.: Schoch, 1.
United States G. S., ann. repts.: Menden-
hall, 3; Smith, G. O., 1.
History, activities: Boero, 1.
Section of Geophysics: Lee, 10.
Water Res. Br.: Follansbee, 2.
Value of: Roberts, H. M., 1.
To nonmining community: Agar, W.
A., 1; Agar, W. M., 11.
Vermont State Geologist's 21st rept.,
1937-38: Jacobs, 2.
Washington G. S. bienn. repts.: Culver,
2, 3, 5, 7, 13.
History: Glover, 7.

Surveys—Continued.

- Wisconsin State G. S., bienn. repts., 15th-
17th: Wis. G. S., 1.
Biennial repts., 18th-21st: Bean, 3.
State geol. surveys: Bean, 2.
Wyoming State Geologist's repts.: Mar-
zel, 1, 2.
Surveying from the air, scope and limits:
Miller, O. M., 1.
Suspension currents and mud slides: Stetson,
14.
Suzorite, British Columbia: Campbell, C. D.,
6.
Syenite.
New Hampshire: Quinn, 3.
Ontario: Davis, N. B., 1; Quirk, 13.
Tables for mineral determination: Eakle, 3.
Tables of formations. See Geologic forma-
tions, tables.
Taconian orogeny: Schuchert, 11.
Taconic Olenellus fauna: Keyes, 268.
Taconic quad., Mass.-Vt.-N. Y.: Prindle, 1.
Taenite: Buddhue, 32.
Takilma-Waldo and Blue Creek dists.: Shenon,
6.
Taku River dist., British Columbia: Kerr,
F. A., 3.
Talc.
British Columbia: Cairnes, 15.
California: Burchfiel, 1.
Georgia: Crickmay, G. W., 18.
Industrial minerals and rocks: A. I. M.
E., 2.
North Carolina: Bryson, 7-a; Greaves-
Walker, 2; Money-maker, 4; Stuckey,
7, 10.
Ontario: Wilson, M. E., 7.
Pennsylvania: Miller, B. L., 15.
Quebec: Archambault, 1.
South Carolina: Bryson, 8.
Vermont: Bain, 10.
Virginia: Burfoot, 1, 1-a.
Washington: Merten, 1; Willson, H., 3.
Talking pictures in geology: Cronis, 25.
Talus, Front Range, Colo.: Ives, 12.
Tantalum, S. Dak.: Johnson, A. I., 2.
Teaching. See Education; Study and teach-
ing.
Technique. See also Mineralogy; Paleon-
tology; Petrology.
Abrasives, grading: Vanderwilt, 1.
Accessory stage for microscope: Lamar,
2.
Acetic acid to get insoluble residues: St.
Clair, D. W., 1.
Acid treatment of rocks: Anonymous, 28.
Aerial mapping: Eliel, 1, 2; Gardner,
L. W., 1; Talley, 1.
Aerial photog. equipment, devel.: Meyer,
W. H., Jr., 1, 2; Patton, R. S., 2.
Aerial photog. surveys: Jackson, K. B., 1.
Aerial photogs. in geol. mapping: Eng-
lish, W. A., 2.
Aerial photogs., geol. interpretation:
Nouhuys, 1.

Technique—Continued.

- Aerial photography: Kerr, R. C., 1.
Improvements: Bruce, H. T., 1.
Aerial recon. and contour mapping: Ellef, 2, 3.
Alidade and plane table in geol. surveys: Mather, 27.
Ammonium chloride sublimate apparatus: Cooper, C. L., 8.
Ammonoids, Paleozoic, drawing sutures: Elias, 20.
Amphiboles, accuracy of chem. analyses: Larsen, 20.
Analysis, mech., of sediments: Krumbein, 10.
Anisotropism, metallic minerals: Sampson, E., 1.
Appalachians, folded, map study: Itter, 2.
Apparatus, precision determination of lattice constants: Buerger, 23.
For reproducing ammonite suture lines: Lupher, A. W., 1.
Applying reagents under microscope: Osborne, 8.
Auto planetabing method of mapping: Meyer, A. H., 1.
Bentonites, correl. by mech. analysis: Dorrell, 2.
Biaxial crystals, model: Rogers, 13.
Biaxial minerals: Lane, J. H., Jr., 1.
Birefringence determination of minerals: Emmons, R. C., 10.
Block diags.: Ives, 8.
For mining geology: Johnston, W. D., 12, 15; Nolan, 10.
Blowpipe analysis: Kelley, 7.
Bomb for hydrothermal experiments: Morey, G. W., 3.
Bottom sampling apparatus: Hough, 6.
Bottom-hole pressure: Wright, H. F., 1.
Brunton compass attachment for measuring magnetic intensity: Wilson, J. H., 1.
Bubbles, removal from old thin secs.: Keller, 5.
Calaverite, Colo., etch tests: Short, 5.
California, spectrographic exam. of quartz: Kennard, T. G., 2.
Canada, aerial surveying: Peters, F. H., 1.
Canada balsam, quick drying: Coombs, H., 1.
Cartography for mining geology: Schmitt, 4.
Cell to determine crystal-grains refractive indices: Saylor, 1.
Cellophane as slide cover: Tester, 8.
Centrifuge tube for heavy-mineral separation: Taylor, G. L., 2.
Chalcocite types, carbon arc identifying: Stephens, 3.
Clastic rocks, pressure-chamber disaggregation: Taylor, G. L., 1.
Clay minerals: Grim, 3.
Cleaning micro. fossils: Tolmachoff, 2.
Clerici's solution, restandardizing: Hawkins, H. H., 1.

Technique—Continued.

- Clinometer rule: Williams, T. B., 1.
Coal, preparing thin secs.: Thiessen, 10.
Collecting fossils: Martin, H., 1.
Color charts: Behre, 5.
Conodonts, preparing: Gunnell, F. H., 5.
Construction of geol. model: Gould, D. B., 1.
Contouring ore bodies: Conolly, H. J. C., 1.
Contouring the subsurface: Banks, W. G., 1.
Copper sulfides, identifying: Gaudin, 6.
Core analyses, interpretation: Hornkol, 1.
Core analysis: Pyle, 3.
Core drill, large, for geol. explor.: Moneymaker, 6.
Cores from ocean bottom, apparatus: Piggot, 6, 8; Varney, 1; Anonymous, 114.
Examination, Calif.: Barbat, 1.
Cores, orientation: Johnson, C. H., 8; Roberts, D. C., 2; Vacquier, 1.
Sidewall sampling: Leonardon, 5.
Correlation, by gamma-ray well logging: Howell, L. G., 1.
By insoluble residues, Cambro-Ord. lms., Lehigh Valley: Hills, J. M., 1.
Spectrographic, oil-well waters: Hasler, M. F., 1.
Subsurface method, Calif.: Rankin, W. D., 1.
Subsurface paleontologic, Gulf Coast: Kornfeld, M. M., 1.
Criteria, marine, nonmarine sediments: Crowley, A. J., 2.
Cross-section, plotting, measurements: Wentworth, 7.
Crystalline rocks, Md., interpretation: Cloos, 14.
Crystals.
Atomic arrangement: Buerger, 28.
Drawings: Schaller, 28.
Space-group determination: Donnay, 19.
Structure models: Buerger, 14; Gruner, 11.
Datum for magnetometer mapping: Farnham, F. C., 2.
Depth calculations, seismic: Beers, 1.
Depth finding, magnetic triangulation: Stearn, 5.
Descriptions of new species, methods: Schenk, 2.
Determinations.
Densities and porosities: Brankstone, 1.
Mean sea level: Marmer, 1.
Quantitative, detrital quartz and feldspar: Russell, P. G., 6.
True dip in pits, graphic method: Rich, 23; Weisbord, 2.
Detrital grains, handling, determination: Partridge, 1.
Device for holding: Howard, A. D., 3.

Technique—Continued.

- Diamond drill cores, interpretation :
Wisser, 1, 3.
- Diatomaceous earth, preparation : Shropshire, 1.
- Dielectric separation of mineral grains :
Berg, G. A., 1.
- Dip construction, Rich simplification :
Woolnough, 2.
- Dip determination graphically : Rich, 4.
- Dip-needle surveys, interpretation :
Brant, A. A., 1.
- Dip of beds, determination : Johnson, C. H., 3.
- Dip problems, simplified determination :
Fisher, D. J., 11.
- Dip reflections on faults, Gulf Coast :
Campbell, F. F., 2.
- Dip shooting calculation method : Pirson, 7.
- Directional radio ore instruments for geophys. prosp. : Rose, R. B., 2.
- Dispersion, fine-grained sediments for mech. analysis : Krumbein, 4.
- Double variation apparatus : Emmons, R. C., 6 ; Fisher, D. J., 2.
- Drill cuttings, coll., interpretation : Richards, J. T., 1.
- Microscopic exam. : Lukert, 1.
- Drill holes, explor. : Leonardon, 6.
- Ear ossicles in fossil crania, preservation : Evans, T. H., 1.
- Earthquake accelerometers, tests : McComb, 4.
- Earthquake inv. : Gilmore, M. H., 1.
- Earth-resistivity, interpretations : Rosenzweig, 1 ; Watson, R. J., 4.
- Eclipse plate for petrog. microscope :
Lang, W. T. B., 8.
- Electric counter for thin-sec. analysis :
Hurlbut, 9.
- Electrical logging : Gillingham, W. J., 1.
- Electrical prosp. : West, S. S., 1.
- Instruments : Bruckshaw, 1.
- Etch figure inv. with optically active solvents : Honess, 5.
- Etch figures, interpretation : Wherry, 5.
- Etch tests, calaverite, krennerite, sylvanite, Colo. : Short, 5.
- Etching, Illinois coal, chrome-sulfuric acid : McCabe, W. S., 1.
- Etching and preserving, metallic meteorites : Nininger, 36.
- Exploration for oil fields : Howard, W. V., 8.
- Explosives for geophys. prosp. : Loving, 1.
- Exposure determination, photomicrography : Henbest, 5.
- Fabric criteria for ripple marks : Ingerson, 8.
- Fabricated diagrs. : Ives, 10.
- Factor in mech. analysis, fine-grained sediments : Galliber, 7.

Technique—Continued.

- Feldspar twins, determination : Emmons, R. C., 12.
- Feldspathoids, staining method : Shand, 4.
- Field photography for geologists :
Thwaites, 9.
- Flow lines, planes, in plastic masses :
Fraser, D. M., 3.
- Fluorescent lamp : Anonymous, 159.
- Folds, 3-dimensional, graphic treatment :
Eardley, 10.
- Foraminifera.
- Camera lucida drawings : Richards, G. S., 1.
- Concentration : Carson, 1.
- Handling and picking : Birch, D. C., 1.
- Making prints of : Bakx, 1.
- Making thin secs. : Tolman, F., 1.
- Recovery by flotation : Anonymous, 81.
- Sorting stage : Ellis, B. F., 2.
- Formations, chem. composition, effect on acidizing wells : Love, W. W., 1.
- Fossils, handling in field and laboratory :
Allen, J. E., 3 ; Camp, 9.
- Making thin secs. : Murata, 1.
- Plants, transfer study method : Darrah, 21.
- Serial sectioning apparatus : Zdansky, 1.
- Small, cleaning method : McNair, 6.
- Friable material, thin secs. : Hite, 2.
- Gas prosp. method : Sokolov, 1.
- Gem-stone material, identification : Howell, D. H., 1.
- Genera, method of comparison : Phleger, 8.
- Geologic age calculations : Keevil, 5.
- Geologic instruction, lab. equipment : Cronels, 19.
- Geologic interpretation from well cuttings : Whiteside, 1.
- Geologic mapping from air : Desjardins, 2.
- Geologic structure determination : Kelly, P. C., 1.
- Geology and geophysics, structure determination : Longwell, 28-a.
- Geophysical data, interpretation : Blau, 3.
- Geophysical delineation of structure :
Kelly, 22.
- Geophysical explor. : Eby, 13.
- Geophysical interpretations : Blackburn, M. S., 1.
- Geophysical inv., Atlantic Coastal Plain :
Ewing, 10 ; Rust, W. M., Jr., 1.
- Geophysical prosp. : Eby, 7, 9 ; Hare, 1 ; Joyce, 1 ; Klipsch, 1 ; Landsberg, 15 ; Lee, 8 ; Rose, 3, 4 ; Stubbe, 1 ; Wantland, 4.
- Apparatus, testing : Hare, 1.
- Magnetometer : Joyce, 1 ; Wantland, 4.
- Multiple recording : Klipsch, 1.
- Sonoragraph : Rieber, 8 ; Sawdon, 2 ; Uren, 1.

Technique—Continued.

Magnetometer—Continued.

- Water search: Lee, 8.
 Geosonograph explor.: Rieber, 8; Sawdon, 2; Uren, 1.
 Gold prosp.: Jacy, 1.
 Field test: Douglas, 7, 8.
 Ores, micr. study: Haycock, 4.
 Placers, handling: Fansett, 3.
 Goniometer, 2E: Quirke, 14.
 Gradiometer, magnetic: Roman, 3.
 Grains, transfer from one liquid to another: Calkins, 2.
 Gravimeter, design, operation: Bryan, A. B., 2; Mott-Smith, L. M., 1.
 Gravity instruments for rapid measurement: Hoskinson, 2; Peterson, R. S., 1.
 Gravity separation: Emmons, R. C., 5.
 Gravity surveys, West Indies: Ewing, 13.
 Grids to determine nonopaque minerals: Donnay, 14.
 Ground motion measurement by reflection recording: Gardner, D. H., 1.
 Heavy liquids, equipment for reclaiming: Cohee, 2.
 Heavy minerals, comparison: Rittenhouse, 7.
 Separation: Brown, I. C., 1.
 Horizon slope calculation, reflection prosp.: Pentz, 1.
 Hotchkiss superdip magnetometer: Stearn, 3, 6.
 Hyrax, synthetic resin for mounting: Cameron, E. M., 1; Hanna, G. D., 14, 15.
 Ideal immersion liquids: Buerger, 7.
 Identification of minerals by staining: Head, 2.
 Igneous rock texture demonstration: Hoover, W. F., 2.
 Illuminator, critical microscopy: Uber, 1.
 Vertical, for mineral photography: Legge, 1.
 Illustrating fossils: Hanna, 15.
 Geologic articles: Hooker, 1.
 Imbedding fossils in paraffine for cleaning: Cooper, G. A., 12.
 Impregnation, porous material for study: Waldo, 3.
 Immersion liquids: Buerger, M. J., 7; Buerger, N. W., 3; West, C. D., 1.
 Indices, refraction, measurements: Quirke, 20.
 Index liquids, standardization: Glass, J. J., 2.
 Individual explor., substrata deposits: Rose, R. B., 1.
 Insoluble-residue method, econ. application: McQueen, 9.
 Isopach contouring, faulted fms.: Atwater, 6.
 Jamin effect in oil production: Wright, R., 1.
 Kilauea, Hawaii, crack measurement and tilt: Waesche, 2.

Technique—Continued.

- Land surfaces, average-slope determination: Wentworth, 6.
 Long shots with alidade: Hillis, 1.
 Lucite mounting medium, uses: Bell, J. F., 3; Shrock, 16.
 Magnetic, elec. anomalies, delineation: Gilchrist, 4.
 Magnetic separation, rocks and minerals: Ryan, C. W., 2.
 Magnetic susceptibility measurement: Wantland, 2.
 Making structure models: Gordon, S. G., 2.
 Making thin secs. of fossils: Murata, 1.
 Mapping oil pools: Sanders, T. P., 1.
 Maps, new mounting method: Mackin, 6.
 Marking rocks, minerals, fossils: Hubbard, 11.
 Measuring temperatures in deep wells: Van Orstrand, 2.
 Measuring in reflected polarized light: Zeiler, 1.
 Measuring refractive index: Von Schlichten, 1.
 Measurement, shapes of rock particles: Tester, 4.
 Measurements in block diagrs.: Ives, 11.
 Mechanical analyses for dynamic interpretation: Spieker, 12.
 Mechanical analysis, sediments: Gripenberg, 1; Krumbein, 1, 2; Otto, 5; Rittenhouse, 1; Spieker, 12; Toltman, C. F., 1; Trask, 5.
 Sand, for correl. purposes: Gardescu, 1.
 Metals, field tests for: Fansett, 1, 2.
 Meteorites, slicing and polishing: Ingalls, 2.
 Methods in petroleum geology: Tickell, 2.
 Methods of prosp.: Helland, 23.
 Methods, studying fluctuations: Wenzel, 6.
 Microbarograph, electromagnetic, uses: Macelwane, 25.
 Microdetermination of minerals: Blank, 7.
 Hardness determination: Blank, 6.
 Streak of minerals: Blank, 5.
 Microfaunal tech., Paleozoic rocks: Dunn, 13.
 Microfossils, marcasitized, pyritized, handling: Borger, 1.
 Sorting apparatus: Franke, A., 1.
 Microhardness of minerals, Mohs scale: Hodge, H. C., 1.
 Micromounts: Wills, 1.
 Microscope, inverted metallographic: O'Neill, J. P., 1.
 Polarizing, use of: Fox, W. A., 1.
 Universally movable tube: Sueno, 1.
 Microscopic determination, or minerals: Short, 3.
 Quartz and untwinned oligoclase-andesine: Dodge, T. A., 2.

Technique—Continued.

- Mineral grains, mounting on slides: Smith, H. T. U., 11.
- Specific gravity determination: Jahns, 3.
- Mineralography at Harvard: Graton, 11.
- Minerals, biaxial, determination axial angles: Smith, H. T. U., 3.
- Determination by specific gravity: Berman, 10; Kerr, P. F., 15.
- Powdered, separation: Rosenholtz, 2.
- Reflectivity and color measurements: Parrish, W., 1.
- Refractive indices by immersion method: Slawson, 7.
- Removal of iron oxide coatings: Drosdoff, 1.
- Specific gravity determination: Berman, 10.
- Models, nuclear crystal structure: Fisher, D. J., 12.
- Mollusca, index method for comparing fanules: Schenck, 25.
- Mountain structure, lab. studies: Mitchell, R. H., 4.
- Mounting medium: Galliher, 1.
- Mounting polished surfaces in bakelite: Fuller, H. C., 1; Krieger, 4.
- Multiple grinding, thin sec. chips: Wentworth, 34.
- Multiple seismometers, use of: McDermott, 4.
- Nitrocellulose sec., fossils, rocks: Fenton, M. A., 7.
- Nomogram for apparent dip: Johnson, C. H., 1.
- Nomogram for settling velocity of spheres: Rouse, H., 1.
- Nonopaque minerals, determinative grids for: Donnay, 18.
- Oil sands, correl. by fluorescence: Melhase, 10.
- Current resistivity: Jakosky, 8.
- Gulf Coast, characteristics: Halbouty, 5.
- Physical analysis: Nutting, 3.
- Opaque minerals, determination: Farnham, C. M., 1.
- Optical analysis of immersion methods: Saylor, 2.
- Optical instruments for mineralogists: MacNelly, 1.
- Ore bodies, magnetic, depth determination: Keys, 3.
- Ore minerals, micr. study of: Schwartz, 26.
- Ore research microscope: Haycock, 5.
- Orientation, accurate, thin sec.: Ingerson, 3.
- Orientation, minerals in rocks: Pabst, 2, 4.
- Ostracoda, photography of: Swain, 1.
- Ovals of revolution for anisotropic media: Quirke, 23.
- Paleobotanical microtechnique: Noé, 11.
- Peel method: Darrah, 10.

Technique—Continued.

- Paleographic wall maps: Patton, L. T., 3.
- Paleontology, coll. methods: Schuchert, 51.
- Methods: Reed, 28.
- Pebbles, axes measurements: Krumbein, 26.
- Sphericity determination: Pettijohn, 10.
- Peel method, paleobotany: Darrah, 10.
- Pendulums, astatized, for gravity measurements: Ising, 1.
- Percentage representation, heavy mineral frequencies: Dryden, 2.
- Permeability, reservoir rocks, measurement: Hassler, G. L., 1.
- Perspective block diagrs.: Secrist, 3.
- Petrofabric analysis: Ingerson, 6.
- Petrofabric diagrs., preparation, interpretation: Haff, 3; Winchell, H., 1.
- Petrographic methods: Milton, 1.
- Soil labs.: Fry, 1.
- Petrographic microscope: Emmons, R. C., 2.
- Petroleum, core testing: Hillis, 3; Landsberg, 10.
- Determination of, in cores: Hillis, 3.
- Discovery, transient and soil analysis: Steinmann, 1.
- Early explor.: Goodrich, 3.
- Evaluation by index of refraction: Hedberg, 3.
- Exploration by soil analysis: Hoffman, 6.
- Methods for finding: Bignell, 3.
- Permeability measurements: Clough, 1.
- Prospecting: DeGolyer, 13.
- Source beds, means of recognition: Trask, 32.
- Phase sampling of sediments: Apfel, 4.
- Photographic slide mount for microscope: Plummer, H. J., 1.
- Photographing walls of boreholes: Kelly, 21.
- Photography for mineralogist: Stephens, M. M., 2.
- Photography in radioactivity: Wilkins, 1.
- Photography of petrog. thin sec.: Crook, W. J., 1.
- Physiography, new presentation: Atwood, W. W., Jr., 8, 9.
- Piprine as immersion medium: Martens, 5.
- Plagioclase determination: Emmons, R. C., 8; Ho, 1.
- Plane of projection, shift in gnomonic projection: Wright, F. E., 3.
- Plane-polarized light, micr. work: Osborne, 13.
- Plants, fossil, collecting, preserving: Sanborn, 4.
- Polarizing vertical illuminator: Osborne, 9.

Technique—Continued.

- Polaroid for photographing large thin secs.: Shaub, 7.
 Polished thin secs., ore and rock: Grondijs, 1.
 Polishing apparatus for ore minerals: Murdoch, 8.
 Pollen analysis: Cain, 1.
 Pollen, fossil, separation from peat: Geisler, 1.
 Porosity, oil sands, determination: Tallafarro, D. B., Jr., 1.
 Porosity and saturation studies: Barnes, K. B., 1.
 Portable thin section machine: Flagler, 1.
 Portraying coal-field structure: MacKay, 7.
 Pre-Cambrian determination, Lake Superior: Tyler, 4.
 Precious metal elements, microchem. tests for in ores: Fraser, H. J., 6.
 Preparation, clay samples for elutriation: Postel, A. W., 1.
 Paleobotanical secs, by peel method: Graham, R., 1.
 Paleontologic illus.: Reeside, 8.
 Projection diags.: Wright, F. E., 1.
 Rocks and minerals: Reberholt, 1.
 Preservation, fragile specimens: Toothaker, 1.
 Projection, diags., preparation: Wright, F. E., 1.
 Dip angle on profile sec.: Foley, 6;
 Herold, S. C., 3.
 Direct, optic figs.: Quirke, 18.
 Protractor: Fisher, 19.
 Propagation of seismic waves, computation: Muskat, 5.
 Prospecting, geochem. methods: Pirson, 10.
 Protractor to show structure: Postel, 3.
 Psilomelane and manganite, identification: Cooke, S. R. B., 1.
 Quantitative micr. analysis: Thompson, J. Ellis, 3, 5.
 Quantitative micr. methods: Alling, 7;
 Thackwell, 1.
 Quartz content, indust. dusts: Hulin, 10.
 Quartz spectrograph, study of opaque minerals: Haycock, 2.
 Quartz wedge substitute, polarizing microscope: West, C. D., 2.
 Radioactivity measurements: Landsberg, 13.
 Ray filter for photographer: Blackwelder, 21.
 Recent sediments, studies: Twenhofel, 36.
 Recovery, Paleozoic arenaceous Foraminifera: Secrist, 1.
 Reflection, longitudinal wave pulses: Muskat, 6.
 Patterns, complex, and geol. source: Rieber, 9.
 Seismic instruments: Helland, 20.
 Seismograph: McDermott, 2.

Technique—Continued.

- Refractive index determination method: Emmons, R. C., 3.
 Refractive index liquids: Rogers, 10.
 Refractometer, high index: Emmons, R. C., 7.
 Relief map, new type: Troxell, 7.
 Reservoir-sedimentation studies: Eakin, 4.
 Residues, insoluble, strat. guide: McQueen, 4.
 Resin, high index for mounting: Alexander, J. A., 1; Keller, 3.
 Resistivity determination: Roman, 1.
 Resolution of combined effects: Elkins, 1.
 Road-material survey methods: Runner, D. G., 1.
 Rock analysis method: Goldman, F. H., 1.
 Rock, porous, impregnation for thin secs.: Huene, R. von, 1.
 Rock quality, petrog. study: Runner, 15.
 Rock sampling for chem. analysis: Grout, 8.
 Rock saw: Vanderwilt, 7.
 Rock saw, improved: Vanderwilt: Emigh, 1.
 Rock slicing machine: Shaub, 5.
 Rotary type, sample splitter: Wentworth, 26.
 Rubber casts, molds, of fossils: Fischer, A., 1.
 Salt dome prosp.: Peters, J. W., 1.
 Sample splitter, Jones, improvements: Otto, 3.
 Sample washer for microfossils: Driver, 1.
 Sampling, heavy minerals: Cogen, 1;
 Otto, G. H., 1, 2.
 Incoherent sands for porosity study: Fraser, H. J., 3.
 Minerals in polished secs.: Haycock, 1.
 Sand, mech. analysis: Emery, K. O., 1.
 Scale models for geol. structure study: Hubbert, 10.
 Scientific illus.: Ridgway, 1.
 Sectioning for micr. exam.: Ragatz, 1.
 Sections, polished, making, mounting, filing: Shaub, 6.
 Oriented, small single crystals: Buerger, 18.
 Sedimentary data presentation: Krumbein, 24.
 Sedimentary lab., portable: Henson, 1.
 Sedimentary rocks, correl. by radioactivity: Landsberg, 14.
 Sedimentation study, field sampling: Otto, 4.
 Sediments, analysis by heavy liquids, centrifuges: Berg, E. L., 1.
 Ancient, study of: Poor, 8.
 Argillaceous: Bray, R. H., 1.
 Indurated, thin sec. mech. analysis: Krumbein, 7.
 Mineral analysis: Pettijohn, 16.
 Pipette analysis: Rittenhouse, 6.
 Sampling: Krumbein, 5.

Technique—Continued.

Sediments—Continued.

- X-ray analysis: Mehmehl, 1.
 Seismeter inv., Montserrat: Perret, 6.
 Seismic depth calculations: Beers, 1.
 Seismic prosp.: Adler, 3; Gabriel, 8; Tracy, 1.
 Seismic reflections, interpretation: Marr, 1.
 Seismograph, prosp. instrument: Benioff, 2, 4; Gebhardt, 1; McComb, 3; Macelwane, 26; Nomann, 1; Rutherford, H. M., 7; Slichter, 3.
 Field operations: Ittner, 1.
 Theory problems: Blake, 6.
 Seismographing for oil: McKinney, 1.
 Seismological Lab., Pasadena, Calif.: Benioff, 3.
 Seismometer: Delaney, 4; Irland, 1; McComb, 1; Slichter, 2; Wenner, 3.
 Seismoscope: Jaggard, 41.
 Selective stains in paleontology: Henbest, L. G., 2.
 Selenium, microchem. tests for: Evans, M. H., 1.
 Sensitivity to tilt, seismographic: Delaney, 1.
 Serial sectioning of fossils: Simpson, 23.
 Shale, bituminous, carbon, hydrogen determination: Hoots, 5.
 Shapometer for measuring pebbles: Tester, 5.
 Silicate structures, atomic packing models: Dorris, 1.
 Silver sulfides, identification: Gaudin, 4.
 Size frequency distrib.: Krumbein, 7, 9, 21; Wentworth, 30.
 Slotted templet to show crustal movement: Eardley, 13.
 Soil surveying for oil: Stormont, 1.
 Sorting river sediments: Straub, 5.
 Source beds of petroleum, discovery: Trask, 36, 38.
 Specific gravity, determination: Landes, 3; Meen, 2.
 Scale: Roedder, 2.
 Spectrograph: Stow, 5.
 In mineralogy: Wright, T. A., 1.
 Spectrographic analysis, apparatus, Use, 1.
 Galenas, sphalerites, pyrites: Clausen, 1.
 Identification of minerals: Lee, O. I., 2.
 Spores in coal, study method: Darrah, 14.
 Spotting specimens for catalogue nos.: Warthin, 12.
 Staining methods: Gabriel, A., 1.
 Drill cuttings for differentiation: Keller, 7.
 Minerals: Gaudin, 1, 2.
 Rock analysis: Keith, M. L., 1.
 Stannous oxide, etching reagent for iron ores: Hickok, 1.
 Stereoscopic crystal drawing: Fisher, 14.

Technique—Continued.

- Strata, thickness between dips: Ickes, 1.
 Stratigraphic prosp., soilane, eltran: Rosaire, 12.
 Strike and dip, graphic solution: Kitson, H. W., 1; Nettleton, 1.
 Structural measurements data, field work: Chapman, C. A., 2.
 Study of shark teeth: Carroll, 1.
 Submarine observations: Fox, L. S., 2.
 Submarine surveying: Rude, 1.
 Subsurface contouring: Lauer, 1.
 Sulfide minerals, identification: Gaudin, 3.
 Table for polishing ores: Hatton, 1.
 Temperature measurements: Deussen, 10.
 Terrain representation: Cooke, H. L., 1.
 Testing minerals by spectroscope: Cutting, 1.
 Texas, East Basin, source beds indication: Trask, 31.
 Textures, film study: Appel, 1.
 Thin sec. mineralogy: Rogers, 11.
 Thin sections: Head, 1; Murray-Hughes, 1.
 Accurate orientation: Ingerson, 3.
 Component measurement by planimeter: Marsh, 2.
 Crystal color determination: Huene, R., von, 2.
 Polished: Dounay, 2.
 Oriented, preparation: McNair, 6.
 Weathered rock: Anonymous, 40.
 Three-layer resistivity problems, interpretation: Wetzel, 1.
 Tiltmeter, recording: Eller, W. H., 1.
 Tilts, 2, stereographic projection: Fisher, 18.
 Time chart, pipette analysis: Krumbein, 8.
 Tin sulfides and compounds, identification: Gaudin, 5.
 Torsion balance data, interpretation: Klaus, 1.
 Torsion balance terrain corrections: Ku, 1.
 Torsion gravity meter: Wright, F. E., 6.
 Transients in electrical prosp.: Hawley, P. F., 1.
 Tray for micr. exam. opaque objects: Cullison, 2.
 Universal stage, for microfossils: Schenk, 1.
 Modified: Emmons, R. C., 4.
 U-stage axial angle apparatus: Fisher, 15.
 Varved clays: Rittenhouse, 2.
 Velocity determinations by reflection profiles: Green, C. H., 1.
 Vertical seismograph: Benioff, 1.
 Volume determination by mercury: Gealy, 1.
 Washing sediments: Stow, 4.
 Well cores, exam. and rept. on: McGlamery, 5.

Technique—Continued.

Well cores, exam., etc.—Continued.

Laboratory orientation by magnetic polarity: Lynton, 2, 3.

X-ray crystal analysis and petroleum geology: Reynolds, D. H., 1.

X-ray, identification of ore minerals: Waldo, 1.

In mineralogy: Peacock, 18.

Method for estimating quartz: Clark, G. L., 2.

Method to distinguish space groups, hexagonal system: Barnes, W. H., 1.

Powder camera: Buerger, 12.

Tectonic map, U. S., proposed: Longwell, 20.

Tectonic relations, N. Am.-Europe: Stille, 3.

Teeplite, Calif.: Gale, W. A., 1.

Tektites, origin theories: Buddhue, 12.

Teleconnection, geochronology and hist. time: De Geer, E. H., 1.

Tellurides, Colo., Magnolia dist.: Wilkerson, 4, 5.

Tellurium, Canada.

Tellurides: Thomson, J. Ellis, 17.

Timiskaming subprov.: Collins, 12.

Tellurobismuthite, redefinition: Frondel, 17.

Temperature gradients in oil wells: Van Orstrand, 7.

Temperature measurements, cementation control and correl.: Deussen, 10.

Temperature of meteorites: Watson, F. G., Jr., 5.

Tennessee.

Areas described.

Hardin County: Jewell, 1.

North-central: Piper, 3.

Reelfoot Lake: Glenn, 2.

Economic geology.

Appalachian oil and gas fields: Ashley, 28.

Barite: Laurence, 3; Penhallegon, 1; Whitlatch, 17.

Bauxite: Whitlatch, 12.

Bentonite and metabentonite: Davis, F. A. W., 1.

Ceramic materials: Whitlatch, 19, 20.

Clay Co.: Born, 11.

Clays: Collins, R. E. L., 1; Eckel, E. C., 6; Mansfield, G. R., 21; Roberts, J. K., 2; Spain, 2; Whitlatch, 7, 9, 10, 16.

Brown iron ores: Born, K. E., 1; Burchard, 8.

Copper, Ducktown dist.: Kendall, 1; McNaughton, 1; Ross, C. S., 23.

Iron ores, brown: Born, K. E., 1; Burchard, 8.

Limestone: Whitlatch, 13.

Manganese: Rankin, H. S., 1; Whitlatch, 14.

Marble: Hall, G. M., 3; Prouty, 4; Oder, 3; Walls, 1.

Tennessee—Continued.

Economic geology—Continued.

Metabentonites: Caldwell, R., 1; Davis,

F. A. W., 1; Laurence, 1.

Mineral resources: Born, 5; U. S. G. S., 4.

Molding sand: Whitlatch, 15.

Natural gas: Bailey, W. F., 3; Born, 7;

Jenny, 12; Pond, W. F., 3; St.

Clair, S., 1.

Petroleum: Bailey, W. F., 1; Born, 7;

Jenny, 12; Pond, W. F., 3; Roberts,

J. K., 1; St. Clair, S., 1.

Phosphates: Cayeux, 1; Mansfield, G. R.,

1; Smith, R. W., 3; Spain, 6.

Pyrite in Holston marble: Hall, G. M., 3.

Sand: Born, 9; Whitlatch, 15.

Slates: Amick, 1.

Structure in oil fields: Lusk, 1.

Structure of marble deposits: Prouty, 4.

Tennessee River Basin, min. res.: U. S.

G. S., 4.

Tinsley's Bottom oil field: Roberts, J. K., 1.

Tripoli deposits: Spain, 1, 5; Whitlatch, 11.

Zinc ores: Currier, 3; Newman, M. H., 2; Ulrich, 8.

Historical geology.

Appalachian coal fields: Wanless, 16-a.

Black River group: Wilson, C. W., Jr., 17.

Black shale ser.: Pohl, 9.

Cambrian, restricted, S. Appalachians: Resser, 21.

Central Basin: Bassler, 8.

Chattanooga black shales: Keyes, 444.

Chattanooga shale: Klepser, 2; Swartz, J. H., 2.

Clay Co.: Born, 11.

Cretaceous: Born, 4.

Curdsville lms. zone, Hermitage fm.: Wilson, C. W., Jr., 18-a.

Dam sites, Tennessee River, etc.: Wentworth, 3.

Devonian: Peoples, 1; Pohl, 6, 7; Swartz, J. H., 1, 3.

Devonian-Mississippian boundary: Swartz, J. H., 1, 3.

Fenster, Johnson Co.: Laurence, 4.

Flynn Creek disturbance: Wilson, C. W., Jr., 12.

Forked Deer Creek area: Hall, G. M., 7.

Fort Payne chert: Wilson, C. W., Jr., 16.

General: Born, 5; Kansas G. Soc., 8.

Geologic cross sec.: Hazzard, R. T., 1.

Geologic map: Pond, W. F., 2.

Great Smoky fm.: Money maker, 5.

Hermitage fm.: Wilson, C. W., Jr., 20.

Howell structure, Lincoln Co.: Born, 10. Kimmswick, Giles Co.: Born, 6.

Knox dolomite: Oder, 4.

Middle Tenn.: Bailey, W. F., 2.

Morris dam site: Berkeley, 17.

Mississippian Pohl, 5.

Nashville dome: Mehl, 2; Wilson, C. W., Jr., 7, 10.

Tennessee—Continued.

 Oil fields, Tex.-La.: Anonymous, 147.
 Sequence, W. N. Am.: Clark, 21.
 Series, La.-Tex.: Thomas, P., 1.
 Florida: Blanchard, W. G., 1; Campbell, R. B., 3; Cole, 15; Cooke, C. W., 1, 24; Cushman, 22; Mansfield, W. C., 9, 23; Thomas, P., 2.
 Fox Hills-Lance contact: Dobbin, 4.
 Georges Bank, canyons: Stetson, 10.
 Georgia: Cooke, C. W., 21; Griffin, R. H., 1; Munyan, 2.
 Great Basin: Axelrod, 6.
 Greenland: Bentham, 2; Blerther, W., 1; Cleves, 3; Koch, L., 1, 2, 10, 12; Kruger, H. K. E., 2; Maync, 1, 2, 3; Moos, A. von, 1; Noe-Nygaard, 3; Odell, 5; Ravn, 1; Rittman, 1; Teichert, 8, 14; Vischer, 1; Wager, 1, 3, 4; Waldschmidt, 7; Wegmann, 8.

Tertiary—Continued.

- Green River epoch: Bradley, W. H., 2.
 Guadeloupe: Barrabé, 2, 4.
 Guatemala: Termer, 6.
 Gulf Coast: Barton and Sawtelle, 1;
 Halbouty, 10; Houston, G. S., 3;
 Howe, 29; Russell, R. J., 22.
 Hawaii, Is. of Oahu: Stearns, 15.
 Hipparion, Pliocene indicator: Stirton,
 22.
 Idaho: Anderson, A. L., 1, 5, 9, 13, 23;
 Capps, 14; Currier, 4; Kirkham, 4,
 9, 11, 14; Mansfield, G. R., 2; Reed,
 J. C., 14; Ross, C. P., 16, 22, 31;
 Shenon, 16, 17, 18; Stearns, H. T.,
 21, 27; Umpleby, 1.
 Illinois: Kansas G. Soc., 12; Moulton,
 4; Weller, J. M., 24, 25; Weller, S.,
 4.
 Ione fm., Calif.: Allen, V. T., 2.
 Iowa: Keyes, 370.
 Jamaica: Küchler, 1; Trechmann, 2, 9.
 John Day fm., age: Hodge, 10.
 Kansas: Elias, 2, 7, 19; Landes, K. K.,
 2, 28; Moss, 2; Pierce, 9; Rutledge,
 1, 2; Ver Wiebe, 22; Wilhelm, C. J.,
 1; Wing, 1.
 Kentucky: McFarlan, 16; Roberts, 12,
 14; Wesley, 1.
 Lake Uinta, Utah-Colo.: Bradley, 15.
 Lillis fm., Calif.: Hanna, 27.
 Lithology, selected fossiliferous sedi-
 ments: Howard, A. D., 1.
 Louisiana: Alexander, 12; Bauern-
 schmidt, 3; Bornhauser, 1; Chaw-
 ner, 3; Clark, C. C., 1; Cook, C. E.,
 1; Crider, 2; Deussen, 2, 9; Doering,
 1; Ellisor, 7; Fergus, 1; Fisk, 2;
 Gordon, D., 2; Grage, 1; Halbouty,
 3; Howe, H. V., 3, 6, 19, 21; Huner,
 1; Israelsky, 6; Mix, 1; Moody, F.
 H., 1; Ruedemann, P., 3; Shearer,
 H. K., 1; Shreveport G. Soc., 2;
 Taylor, R. E., 3; Teas, 2; Thomas,
 G. D., 1; Todd, J. D., 3; Whitte-
 more, 3; Woodruff, 4.
 Maryland: Cooke, C. W., 7; Darton, 14,
 15; Dryden, 9, 11, 12; Monroe, 6;
 Stephenson, L. W., 6, 23-a.
 Massachusetts: Chute, 1; Woodworth,
 J. B., 2.
 Mexico: Cumming, 3; Díaz, 1; Díaz Lo-
 zano, 4; Donald, R. T., 1; Flores, 5;
 Gibson, J. B., 1; González, J., 1;
 Hisazumi, 1; Imlay, 12; Jones, T. S.,
 1; Kane, 1, 2; Kellum, 10, 13; Kelly,
 W. A., 10; Keyes, 354; King, R. E.,
 5, 6; Morgan, H. J., Jr., 1; Muir, 5;
 Santillán, 5, 15, 16; Singewald, Q.
 D., 8; Staub, 3; Tatam, 1; Thal-
 mann, 7, 9, 10; Villatoro, 2; Vivar,
 3; Watz, 6; Warner, J. L., 1; Wis-
 ser, 2.
 Minnesota: Sardeson, 31, 45.
 Miocene-Pliocene boundary: Maxson, 12.
 Miocene volcanism: Gale, H. S., 2.

Tertiary—Continued.

- Mississippi: Blanpied, 2; Fisk, 8; Fos-
 ter, V. M., 1, 5; George, W. O., 1;
 Grim, 7; Lamar, 4; Lowe, E. N., 2;
 Mellen, F. F., 3; Monroe, 1, 3, 9;
 Morhinvog, 1; Morse, H. N., 1;
 Morse, W. C., 8, 11; Munroe, D. J.,
 2; Shreveport G. Soc., 1, 3.
 Missouri: Farrar, 1, 2; Kansas G. Soc.,
 12.
 Modelo fm., Calif.: Hudson, F. S., 1.
 Montana: Baker, A. A., 4; Bass, 3;
 Collier, 3; Dickey, F. H., 2; Dobbin,
 4; Hall, G. M., 1; Knappen, 2; Lang-
 ton, 1; Lovering, 1; Neely, 2; Park-
 er, F. S., 1, 2; Perry, 14, 15; Pierce,
 6; Renick, 1; Sahinen, 4; Scott,
 H. W., 12; Sharp, 11; Shenon, 15;
 Simpson, 38; Skeels, 1; Stow, 12;
 Thom, 14; Wilson, C. W., Jr., 2,
 11, 15.
 Nebraska: Colbert, 7; Condra, 14; Cook,
 15; Effinger, 1; Johnson, F. W., 2;
 Lugin, 12, 14; Meade, G. E., 1;
 Noble, E. B., 2; Schultz, C. B., 4, 6.
 Nevada: Calkins, 3, 4; Callaghan, 13;
 Cameron, E. N., 2; Campbell, D. F.,
 1; Ferguson, 8; Gianella, 9; Jenney,
 1; Kerr, P. F., 17; Nolan, 8;
 Rott, 1; Sharp, R. P., 4, 5; Stirton,
 8; Thayer, T. P., 3; Vander-
 burg, W. O., 1; Westgate, 6.
 Newfoundland: Twenhofel, 40.
 New Jersey: Kummel, 2; Richards, 8.
 New Mexico: Anderson, C. C., 1; Bryan,
 35, 36; Church, F. S., 1; Dane, 3;
 Denny, C. S., 3; Dunham, 3; Ellis,
 R. W., 7; Hunt, C. B., 1, 2, 4; Just,
 3; Keyes, 305; Lasky, 12, 14, 16;
 McCann, 1; Matthew, 17; Renick,
 3; Schmitt, 10; Smith, H. T. U., 4;
 Smith, J. F., Jr., 2; Spencer, A. C.,
 1; Talmadge, 7; Williams, H., 11;
 Winchester, 3.
 New York: Fairchild, 18; Kaye, C. A., 1;
 Sanford, J. H., 1.
 Nicaragua: Burri, 3, 4.
 North America, copper deposits: But-
 ler, 16.
 Cordillera and Caribbean area:
 Waters, 13.
 Time scale: Wood, H. E., 2d, 16.
 North Carolina: McCampbell, 1; Mur-
 ray, G. E., Jr., 5; Prouty, 20.
 North Dakota: Andrews, D. A., 1, 6.
 Northwest Territories: Williams, M. Y.,
 12.
 Oahu: Stearns, 14.
 Ohio: Desjardins, 1-a.
 Oil fields, distrib. and continental
 spreading: Wade, 1.
 Oil sands, Gulf Coast: Halbouty, 5.
 Oklahoma: Ham, 1; Savage, D. E., 1;
 Stovall, 12.
 Oligocene, Coastal Plain, Tex.-La.: El-
 lisor, 2.

Tertiary—Continued.

- Oligocene-Eocene boundary: Scott, W. B., 10.
 Oligocene-Miocene boundary: Cooke, C. W., 23.
 Ontario: Horwood, 10.
 Oregon: Buwalda, 19; Callaghan, 3, 10; Fuller, 15; Gilluly, 4, 16; Goodspeed, 20; Hodge, 22; Holdredge, 3; Layfield, 1; Mackay, D. K., 1; Merriam, J. C., 10; Moore, B. N., 8; Oregon Dept. Geology, 1; Piper, 4, 14, 17; Renick, 2; Schenck, 9; Smith, W. D., 11; Stearns, 7; Thayer, T. P., 3, 5; Turner, F. E., 1, 3, 5; Weaver, 11; Wells, F. G., 9; Wilkinson, W. D., 4.
 Ozark province: Cozzens, 2.
 Panama: Coryell, 15; MacDonald, D. F., 1; Sapper, 7; Wolff, E. L., von, 2.
 Pectinidae, index fossils, southeast U. S.: Mansfield, W. C., 12.
 Pennsylvania: Itter, 1; Stose, G. W., 21; Watson, E. H., 6; Willard, 55.
 Pleistocene-Pliocene boundary: Cross, R. K., 1.
 Polar elevation and last ice age: Hills, G. F. S., 2.
 Post-Keweenawan, age by helium: Urry, 8.
 Puerto Rico: Meyerhoff, 3, 4, 10.
 Quebec: McGerrigle, 4.
 Restorations, geol. landscapes: Reid, G. A., 1.
 Rhode Island: Woodworth, J. B., 2.
 Rio Grande depression, Colo.-N. Mex.: Bryan, 36.
 Rocky Mts. area: Atwood, W. W., 10, 11; Bartram, 10; Osborn, H. F., 1; Uren, 2.
 Rodessa oil field, Tex.-La.-Ark.: Ivy, 1.
 Sabine uplift: Easton, 6.
 St. Lawrence River history: Gill, 6-a.
 St. Martin, West Indies: Molengraaff, G. A. F., 1.
 Saskatchewan: Fraser, F. J., 6; McLearn, 16; Sternberg, 4; Williams, M. Y., 2; Worcester, W. G., 5.
 Sespe fm., Calif.: Reed, R. D., 1.
 South Carolina: Cooke, C. W., 17; Glen, 4; Taber, 14, 18.
 South Dakota: Connolly, 3; Meyerhoff, 21; Pugsley, 1; Rothrock, 16; Schwartz, 22; Searight, 3, 4; Tullis, 5, 6; Wright, L. B., 3.
 Southwestern U. S.: Effinger, 4.
 Sparta-Wilcox oil field, Tex.-La.: Williams, N., 6.

Tertiary—Continued.

- Tennessee: Born, 4, 5, 11; Wells, F. G., 2; Whitlatch, 8.
 Sands, Quat., High Plains: Huffington, ton, 10; Blackburn, W. C., 1; Bowling, L., 1; Brace, 1; Burford, 1; Chadwick, 1; Cheney, 14; Cooper, H. H., 2; Dalton, 1; Decker, C. L., 2; Denison, A. R., 2; Deussen, 1, 2, 13; Doering, 1; Eby, 8; Eckel, 11; Ellisor, 5; Ferguson, W. B., 1; Fish, L., 1; Frost, J. M., III, 1, 2; Gardner, J. A., 3, 6, 8, 13; Getzendaner, A. E., 1; Getzendaner, F. M., 1; Halbouty, 6, 7, 11; Hamner, 1; Hanna, M. A., 12, 13; Harvey, C. J. C., 1; Heath, 2; Israelsky, 6; Ivy, J. S., 1; Jones, C. T., 1; Jones, R. A., 1, 7, 9; Kidd, G., 1; King, 19; Ley, 4; Leyendecker, 1; Liddle, 3; Lonsdale, 7, 10; McCallum, 1; McCollum, L. F., 1; Maley, 1; Meyer, W. G., 1; Michaux, 1; Patterson, J. M., 2; Plummer, F. B., 12, 14; Post, E. S., 2; Reed, L. C., 12; Renick, 4, 5; Sayre, 4, 6; Sheldon, I. R., 1; Stamey, 1; Stenzel, 13, 16, 17; Todd, J. D., 3; Trenchard, 1; Weeks, A. J., 3; Weeks, A. W., 1; Wendlandt, 1, 2; Woodruff, 4; Wrather, 1; Zavoico, 4, 7.
 Texas and Louisiana Gulf Coast: Deussen, 2.
 Tilt, secondary, problem: Spieker, 11.
 Trinidad: Halse, 1; Illing, 1; Kugler, 4; Lehner, 1; Schmid, 1; Skelton, 1.
 United States, Atlantic Coastal Plain: Meyerhoff, 25-a.
 Volcanic ash: Landes, 27.
 Utah: Baker, A. A., 5; Bradley, W. H., 9-a; Callaghan, 9, 12; Dobbin, 17; Eardley, 2, 12; Fisher, D. J., 7; Gilluly, 5; Gregory, H. E., 1, 4, 6; Hinds, 26; Kay, J. L., 1; Leggette, 2; Nolan, 6; Peterson, O. A., 3; Schoff, 2; Spieker, 2, 4, 7; Thorpe, 14; Williams, H., 11.
 Valentine question: Johnson, F. W., 1; Lugin, 13; Stirton, 24.
 Varved clay, Odgen Valley, Utah: Leggette, 2.
 Varves, duration of Eocene: Bradley, W. H., 4.
 Virginia: Brown, W. R., 2; Cederstrom, 2; Furcron, 9; Mansfield, W. C., 1, 6; Roberts, 15, 16; Stephenson, L. W., 6, 23-a.

Tertiary—Continued.

- Washington: Chappell, 2; Coombs, 3; Culver, 1, 6; Daniels, J., 1; Felts, W. M., 4; Flint, 19; Goodspeed, 12, 15; Hammer, A. A., 1; Hoffman, 3; Houghland, 1; Kirkham, 14; Merriam, J. C., 10; Park, 9; Schuchert, 48; Treasurer, 1, 5; Warren, W., 1; Weaver, 6, 7, 8, 11; Wilson, H., 1.
- West Indies: Rutten, L. M. R., 6, 9; Trechmann, 6.
- Wyoming: Bauer, C. M., 4; Beckwith, 4; Bradley, W. H., 12; Brainerd, 5; Dobbin, 1, 2; Fanshawe, 1; Hares, 2; Horberg, 1; Jepsen, 2, 3, 9, 10; Johnson, G. D., 1; Jones, C. T., 2; Love, J. D., 1, 2, 4, 5, 6; Meyerhoff, 21; Nace, 1, 2; Nightingale, 1, 3; Parson, W. H., 1, 2; Rouse, 3, 6; Schlaikjer, 3; Stevens, E. H., 2; Veatch, 1; Wood, H. E., 2d, 9; Wright, L. B., 3.
- Yellowstone Nat. Park: Howard, A. D., 6.
- Yukon: Bostock, 6, 11; Johnston, J. R., 1, 2; Lees, E. J., 1, 2.
- Testudinata. See Reptilia.
- Tetradymite, Calif.: Webb, R. W., 2.
- Texas.

Bibliography and subject index: Sellards, 28.

Boulders, Haymond fm.: King, P. B., 11.

Erratic boulders, Carb.: King, P. B., 6; Sellards, 17.

Geological observations: Roemer, 1.

Geological Survey activities: Sellards, 9.

Guidebook, Southern Pacific Lines, New Orleans-Los Angeles: Darton, 4.

Lignite in dol.: Bauernschmidt, 1.

Malakoff image: Sellards, 8.

Meteor, 6/23/28: Sellards, 9.

Torsion balance surveys: Barton, 17.

Areas described.

Atacosa Co.: Lonsdale, 7.

Bell Co.: Adkins, 4.

Big Bend area: Schoffelmayer, 1.

Clay Creek salt dome: Heath, 2.

Coastal Plain W. of Brazos River: Deussen, 1.

Frio Co.: Lonsdale, 7.

Glass Mts.: King, P. B., 5.

Grayson Co.: Bullard, 2.

Hemphill Co.: Reed, L. C., 2.

Inspiration Pt., Palo Pinto Co.: Shuler, 4.

Montague Co.: Bullard, 2.

Rio Grande area: Trowbridge, 6.

Stonewall Co.: Patton, L. T., 1.

Western Tex.: Darton, 2.

Wise Co.: Scott, G., 6.

Economic geology.

Accumulation, oil, Stephens Co.: Es-
gen, 1.

Amarillo gas field: Cotner, 2.

Amelia oil field: Hamner, 1.

Anahuac oil and gas field: Leyendeck-
er, 1.

Texas—Continued.

Economic geology—Continued.

Aragonite in salt-dome cap rock: Hanna,
M. A., 11.

Ark-La-Tex oil and gas field: Easton, 8.

Barbers Hill salt dome: Barton, 25;

Halbouty, 11; Judson, 2; Murphy,
P. C., 2.

Baringer Hill pegmatite: Landes, 14.

Barite: Baker, C. L. 12; Barnes, V. E., 7.

Benavides field: Bowles, R. C., 1.

Ben Bolt oil field: Davidson, J. P., 1.

Bend arch dist. gas fields: Kendrick, 2.

Bentonite: Baker, C. L., 11.

Big Bend area: Schoffelmayer, 1.

Big Lake oil pool: Hennen, 1; Sel-
lards, 14.

Big Spring oil fields: Carpenter, C. B., 1.

Bituminous lms., ss., porosity: Utter-
back, D. D., 1.

Bleaching clays: Phillips, D. M., 1.

Boggy Creek salt dome: McLellan, 1;
Storm, L. W., 1.

Bottom-hole pressure, East Texas oil
fields: Foran, 1.

Brenham salt dome: Burford, 1.

Bryson oil field: Bowen, J. P., 1.

Buckeye field: Brucks, 3.

Canyon beds oil production: Adams, H.
H., 1.

Cedar Pt. field: Wilson, J. M., 2.

Cenozoic oil zones: Dalton, 1.

Chalk, McFadden Beach salt dome: Ta-
tum, E. P., Jr., 1.

Chapel Hill pool: Lahee, 18.

Chlorides, rare mercury: Ross, C. P., 29.

Cinnabar: Lonsdale, 2.

Clalborne oil poss.: Owens, 2.

Clay Creek salt dome: Ferguson, W. B.,
1; Goldman, 5; Heath, 1.

Clays: Hagner, 1; Potter, A. D., 1;
Schoch, 1.

Coastal Plain oil fields: Bignel, 1.

Cole field: Short, R. T., 1.

Conroe oil fields: Michaux, 1; Smith,

Eugene R., 1; Williams, L. H., 1;

Williams, N., 1; Zavoico, 4; Anony-
mous, 147.

Correlations by Foraminifera: Nuttall, 5.

Correlations, N.-cent. oil wells: Johnson,
H. L., 1.

Darst Creek oil field: Jones, R. A., 6;

McCallum, 1; Row, 1.

Disseminated oil, Corpus Christi: Price,
W. A., 4.

Driscoll pool: Sheldon, I. R., 1.

Duval Co.: Sayre, 6.

Earth temperatures, N.-cent. Tex.:
Barnes, V. E., 3.

East Texas Basin source beds: Trask,
31.

East Texas oil fields: Cheney, G; Dally,
1; Gugelmeyer, 1; Hudnall, 1;

Levorsen, 3; McFarland, P. W., 2;

Minor, H. E., 8; Moos, A., 40n, 1;

- Stephenville, Cret.: Ball, O. M., 4, 5.
- Tornillo Creek: Dorf, 11.

Folsomoid point by mammoth bones:
Bryan, 40.

Footprints.

- Clear Fork Valley: Moodie, 6.
- Hondo Creek, Bandera Co.: Houston, S. H., Jr., 1.

Red beds: Moodie, 3, 7.

Foraminifera: Albritton, 1, 3; Alexander, C. I., 6; Cushman, 1, 5, 11, 21, 26; Garrett, J. B., Jr., 3, 4; Gravell, 2, 3; Israelsky, 6; Kornfeld, M. M., 3; Milton, 2; Plummer, H. J., 2, 8; Tappan, 1.

Fusulinidae: Barnes, V. S., 5; Bradfield, 2; Cronels, 34; Dunbar, C. O., 3, 5, 15; Henbest, 9, 10; Schuchert, 47; Thomas, N. L., 4; White, M. P., 2.

Gastropoda: Gardner, 16; Girty, 11; Nelson, L. A., 1.

Guadryinella: Plummer, H. J., 3.

General: Whitney, F. L., 1.

Geology: Plummer, 14; Sellards, 27, 28.

Glass Mts.: King, R. E., 3.

Gonoloboceras, revision: Elias, 20.

Guadalupan fauna: Keyes, 405.

Hindeastraea: Hoffmeister, J. E., 1.

Index fossils: Calahan, 1.

Invertebrata, Carb.: Williams, J. S., 11.

Labidosaurus: Olson, E. C., 3.

Leaves, dicotyledonous: Ball, O. M., 3.

Lepidocyclus texana horizon: Gravell, 4.

Linters: Stephenson, 20.

Loxocochocha: Murray, G. E., Jr., 3.

Lysorophus: Olson, 5.

Lyttonia: Huang, 1.

Machaerodus: Burt, W. H., 2.

Madracis: Wells, J. W., 7.

Malone fauna, age: Albritton, 2, 8.

Maloniphyllum: Okulitch, 7.

Mammals, Quat.: Howard, C. A., 2.

Man, early: Pearce, 1.

Marginulina: Cushman, 1; Garrett, J. B., Jr., 2.

Marine Pleist.: Richards, 22.

Megallichthys brain case: Romer, 19.

Microfaunas.

Eocene-Oligocene zones: Harris, 9.

Flour Bluff oil field: Harris, 10.

Fort Worth fm.: Constant, W. L., 1.

Index fossils: Thomas, 12.

Oil well, E. Tex. field: Quesenberry, 1.

Middens, buried, Little Wichita River Basin: Witte, 1.

Midway fauna: Gardner, J. A., 2, 8.

Mollusca: Clarke, W. T., Jr., 2; MacNeill, F. S., 1, 3; Palmer, K. E. H. V., 2.

Mustelids: Gazin, 21.

Myiodon: Johnston, C. S., 4.

Texas—Continued.

Paleontology—Continued.

Nannipus: Johnston, C. S., 8.

Navarro-Taylor contact: Plummer, H. J., 9.

Noetinae: MacNeill, F. S., 7.

Olivellites: Fenton, 48.

Omphalotrochus: Girty, 5.

Orbitulina: Davis, L. M., 1; Lynch, S. A., 1; Silvestri, 1.

Osteoborus: Johnston, C. S., 10, 11; Stirton, 9.

Ostracoda: Alexander, C. I., 1, 10, 11, 13, 14; Coryell, 5, 6, 7; Delo, 1; Hartton, B. H., 1; Howe, 8; Moore, R. C., 4; Sutton, 16.

Ostrea: Harris, 8; Stephenson, L. W., 1.

Ostreidae: Stephenson, L. W., 12.

Paleobotany, Eocene: Ball, O. M., 2.

Palo Pinto Co.: Plummer, 17.

Parafusulina: Dunbar, 11.

Parapavo: Miller, L. H., 19.

Pectinidae: Rowland, H. L., 1.

Pedicellariae: Geis, 3.

Pediomyx: Stirton, 17.

Pelecypod, transposed hinge: Newell, 12.

Pennsylvania: Lee, W., 1.

Permian: Lee, W., 1.

Phytosaurs: Case, 9, 14.

Plant localities: Kirn, 1; Parks, H. B., 1.

Platycrinid columnals: Moore, 47.

Pliohippus: Stirton, 23.

Pseudorthoceraidae: Flower, 9.

Pteranodon: Gilmore, 15.

Radiolaria: Aberdeen, 1.

Reefs, Carb.: Plummer, 25.

Reptilia: Case, 7; Gould, C. N., 7; Mathews, 14; Romer, 22.

Roemer's Paleozoic types, redescription: Bridge, 8.

Rudistids: Adkins, 2; Stephenson, 21.

Sauropod tracks: Bird, R. T., 1.

Seymouria: White, T. E., 1.

Spermatodus: Westoll, 3.

Spongiae: King, R. H., 1, 4.

Stegocephalians: Case, 7, 8.

Synthetoceras: Stirton, 6.

Taylor fm. fauna: Adkins, 1.

Teleoceras: Johnston, C. S., 3.

Textularia: Davis, F. E., 1.

Theromorph: Broom, 1.

Tingia: Darrah, 18.

Tracks, Pliocene: Johnston, C. S., 2.

Tree ferns: Atkinson, W. E., 1.

Trimeorachis: Case, 16.

Trinity beds, land-type fossils: Wieland, 14.

Turricula: Stenzel, 16.

Turrids: Harris, G. D., 4.

Uvigerina: Cushman, 1.

Valvulinidae: Cushman, 29.

Verneulinidae: Cushman, 29.

Vertebrata: Hesse, 16-a; King, 22; Romer, 13; Sellards, 40; Wood, H. E., 2d, 12.

Virgulinidae: Cushman, 29.

Physiographic geology—Continued.

- Pleistocene glaciation: Blackwelder, 35.
 Rainbow Bridge: O'Connell, D. T., 3.
 San Juan country: Gregory, H. E., 4.
 Sediments, Great Salt Lake: Eardley, 11.
 Tooele-Rush Valleys: Gilluly, 3.
 Tushar Mts.: Beutner, 1.
 Uinta Mts.: Bradley, W. H., 9-a, 14;
 Mackin, 9; Powers, W. E., 11.
 Wasatch Mts.: Eardley, 3, 4.
 West Mtn.: Eaton, H. N., 2.
 Zion Nat. Park: Gregory, H. E., 6.

Underground water.

- Artesian water, levels, wells: Taylor, G. H., 6.
 Ogden supply: Leggette, 7, 11.
 Earthquakes, effect on ground-water levels: Taylor, G. H., 3.
 Escalante Valley: White, W. N., 2.
 Fluctuations in levels: Taylor, G. H., 4.
 Ground water: Taylor, 5.
 Relieves drought emergency: Taylor, G. H., 2.
 Manganese in thermal springs: Callaghan, 14.
 Ogden Valley: Leggette, 7, 11.
 Recharge possibilities: Redden, 2.
 Salt Lake City area: Leggette, 1.
 San Juan country: Gregory, H. E., 4.
 Seepage, ground water: Jennings, D. S., 1.
 Thermal springs near Wasatch fault: Talmage, 1.
 Water from wells: Waring, 4.

Valdez Creek mining dist., Alaska: Ross, C. P., 10.

Valleys.

- Asymmetrical, Kansas: Bass, 1.
 California, "Lost Valley": Matthes, 16.
 Eastern: Davis, W. M., 6.
 Glacial trough, continental shelves: Shepard, F. P., 3.
 Greenland, east: Poser, 2.
 Kansas, asymmetrical: Bass, 1.
 Rift, geomorphic aspect: Johnson, D. W., 7.
 Submarine: Shepard, 8, 9, 12, 15, 16.
 Mock valleys: Davis, 23.
 Western: Davis, 6.

Vanadium.

- Arizona: Peterson, N. P., 1.
 British Columbia, Quadra Is.: Ellsworth, 7.
 Colorado: Henderson, E. P., 9.
 United States, SW., sed. deposits: Fischer, R. P., 2; Koeberlin, 3.

Varves.

- Bibliography of nonglacial: Bradley, 17.
 Clays, deposition, alteration: Burwash, 10.
 Wisconsin: Ellsworth, E. W., 1.
 Climate and weather cycles: Gillette, 9.
 Coincidence, climate and sea level cycles: Gillette, 5.

Varves—Continued.

- Connecticut: Lougee, 7.
 Cycle indicators: Gillette, 8.
 Dating poss., fossil mammal-artifact locs.: MacClintock, 8.
 Formation: Collet, 2.
 Geologic rhythms: Wanless, 15.
 Glacial marine waters, Mass.: Hyyppä, 1.
 Lake, Pleist., Nebr.-N. Dak.: MacClintock, 9.
 Long range correl.: Coleman, 2.
 Massachusetts, glacial marine: Hyyppä, 1.
 Nebraska, Pleist.: Lugin, 15; MacClintock, 9.
 New Hampshire: Lougee, 9.
 Nonglacial marine: Bradley, W. H., 9.
 North America, NE.: Antevs, 27.
 Ontario: Satterly, 2, 3; Stanley, 6.
 Seasonal, ann. accumulations: Thiesmeyer, 5.
 Virginia, Fauquier Co. slates: Thiesmeyer, 7.
 Veatchite, Calif.: Murdock, 9; Switzer, 1.
 Vegetation, indicator of geol. fms.: Cuyler, 5.
 Veins.
 Mexico, Alamo dist.: Moehlman, 4.
 Northwest Territories, Great Bear Lake: Furnival, 2.
 Ontario, Porcupine dist.: Reid, J. A., 3.
 Velocity of sound vs. temperature in rocks and glasses: Ide, 4.
 Ventifacts.
 Colorado, fossil: Schoewe, 17.
 Kansas, Pleist.: Smith, H. T. U., 7.
 Massachusetts, Cape Cod: Thiesmeyer, 6.
 New Mexico: Needham, 7.
 United States, locs.: Wentworth, 29.
 Ventura Ave. oil field, Calif.: Hertel, 1.
 Vermes. See also Invertebrates (general).
 Arizona, Toroweap, Kaibab fm.: McKee, 11.
 California, serpulid: Howell, 28.
 Coprolites, Ind.: Shrock, 6.
 General: Croneis, 21.
 Georges Banks: Stephenson, 13.

- Carmacks dist.: Bostock, 6.
 Glaciation, depth of frost and ice veins, Keno Hill: Wernecke, 1.
 Laberge area: Bostock, 11.
 Pelly River area: Johnston, J. R., 1.
 Teslin-Quiet Lake area: Lees, E. J., 2.

Physiographic geology.

- Carmacks dist.: Bostock, 6.
 Glaciers: Washburn, 3.
 Laberge area: Bostock, 11.
 Pelly River area: Johnston, J. R., 1.
 Shapes, glacial and ice-jam cobbles: Wentworth, 40.
 Teslin-Quiet Lake area: Lees, E. J., 2.

Zeballos River area, Vancouver Is., British Columbia: Gunning, 11.

Zeolites.

- Manitoba: Brownell, G. M., 3.
 Minnesota: Hanley, 1.
 New Mexico: Needham, 8.

Zinc.

- Arizona: Fowler, 14; Hernon, 1.
 Arkansas: McKnight, 2; Miser, 11; Anonymous, 39.
 Boulder Dam area: Lee, 7.
 British Columbia: Armstrong, J. E., 1, 2; Cairnes, 12, 13, 14, 17; Evans, C. S., 4; Goranson, E. A., 3; Gunning, H. C., 1; Hanson, 1, 11; Hedely, M. S., 2; Kerr, F. A., 18, 20; Kindle, E. D., 2, 3, 4; Lay, 4; O'Grady, 1; Sargent, H., 1, 2.

Zinc—Continued.

- California: Farrel, 1; Kelley, V. C., 10; Webb, R. W., 3.
 Canada: Alcock, 3, 10.
 Colorado: Behre, 32; Burbank, W. S., 3, 4; Chapman, E. P., 2; Cross, C. W., 2; Loughlin, 11, 12; Lovering, 15, 17; Rohlfing, 1; Vanderwilt, 11.
 Columbus River Basin, Wash.-Oreg.: Landes, H., 1.
 Europe-N. Am. correlations: Behre, 33.
 General: Jackson, C. F., 1.
 Hydrothermal exper.: Kristofferson, 1.
 Idaho: Anderson, A. L., 1, 23; Dickey, F. H., 1; McConnell, 1; Ross, C. P., 4, 31; Shenon, 17.
 Kansas: Landes, 34.
 Lead and zinc, upper Mississippi Valley: Banfield, 1.
 Lowlands, S.-cent. and Ouachita provs.: Ruedemann, P., 3.
 Mackenzie, Great Slave Lake Pint Pt. deposits: Bell, J. M., 2, 3.
 Manitoba: Brownell, G. M., 2; Bruce, E. L., 2; Wright, J. F., 1, 2.
 Meso-thermal deposits: McKnight, 1.
 Mexico: Donald, R. T., 1; Edelen, 1; Foshag, 12; Hayward, M. W., 1; Inlay, 10; Santillán, 14.
 Mississippi Valley area: Bastin, 20; Graton, 7; Newhouse, 9.
 Missouri: Dake, C. L., 1; Gleason, 3; Tarr, 21.
 Montana: Dickey, F. H., 2; Lovering, 1; Pardee, 4; Sahinen, 4; Schafer, 1; Spiroff, 3.
 Nevada: Ferguson, H. G., 1, 5; Hewett, 4; Vanderburg, 3; Westgate, 6.
 Newfoundland: George, P. W., 2; Snelgrove, 8.
 New Jersey: Bowen, W. C., 1; Olpp, 1; Palache, 28; Tarr, W. A. 3.

Zinc—Continued.

- New Mexico: Dunham, 3; Krieger, P., 2; Lasky, 16; Ransome, F. L., 3; Schmitt, 10; Spencer, A. C., 1; Stott, 1.
 New York: Brown, J. S., 2; Dyson, J. L., 1-a.
 North America: Sminnov, 1.
 Nova Scotia: Messervey, 10.
 Oklahoma: Fowler, 6; Speer, 1; Tarr, 11; Weidman, 2.
 Ontario: Bannerman, 1, 2; Burrows, 2; Freeman, B. C., 4; Hawley, 3; Hurst, 2; Moorhouse, 3; Osborne, 3, 31; Phemister, 3; Tuck, 2.
 Ore deposits: Butler, G. M., 4.
 Ore guides, Tri-State dist.: Ageton, R. V., 1.
 Oregon: Callaghan, 10; Smith, W. D. 11.
 Ozark area: Buehler, 10.
 Pebble and ruby jack, fm. temperature, Mo.: Smith, W. S. T., 6.
 Pennsylvania: Blank, E. W., 1; Butler, R. D., 1; Butts, 13.
 Quebec: Bell, L. V., 14; Jones, I. W., 1, 5, 7; Osborne, 30; Wilson, M. E., 14.
 Saskatchewan: Cameron, A. E., 3.
 South Dakota: Tullis, 6.
 Tennessee: Currier, 3; Newman, M. H., 1, 2.
 Tri-State district: Fowler, G. M., 1, 2, 4, 5, 7, 8, 10, 13; Harbaugh, 2; Kansas G. Soc., 10; Leith, 5; Rama Rao, B., 1; Ridge, 1; Tarr, 15.
 United States, W.: Loughlin, 8.
 Utah: Green, J., 1; Nolan, 6; Staples, L. W., 3.
 Virginia: Currier, 2, 3.
 Washington: Hayes, D. I., 1; Park, 9.
 Western U. S.: Loughlin, 8.
 Wisconsin: Behre, 14, 23, 24, 25, 27.
 Zinc-bearing chromite: Donath, 1.
 Zircon crystals in pegmatite, Wis.: Wilcox, R. E., 2.
 Zolarite, Nev.: O'Brien, J. D., 1.
