

- EXPLANATION**
-  Chromite ore
Cutoff about 5 percent Cr₂O₃
 -  Dunite
 -  Saxonite, including small masses of dunite
 -  Diorite
 -  Contact
 -  Fault, showing dip and relative movement
 -  Strike and dip of layering in ore
 -  Strike and dip of sheeting
 -  Strike and dip of joints
 -  Strike of vertical joints
 -  Bureau of Mines diamond-drill hole, showing dip and horizontal projection
 -  Bureau of Mines trench
 -  Open pit
 -  Adit
 -  Shaft
 -  Dump
