

GEOLOGICAL SURVEY

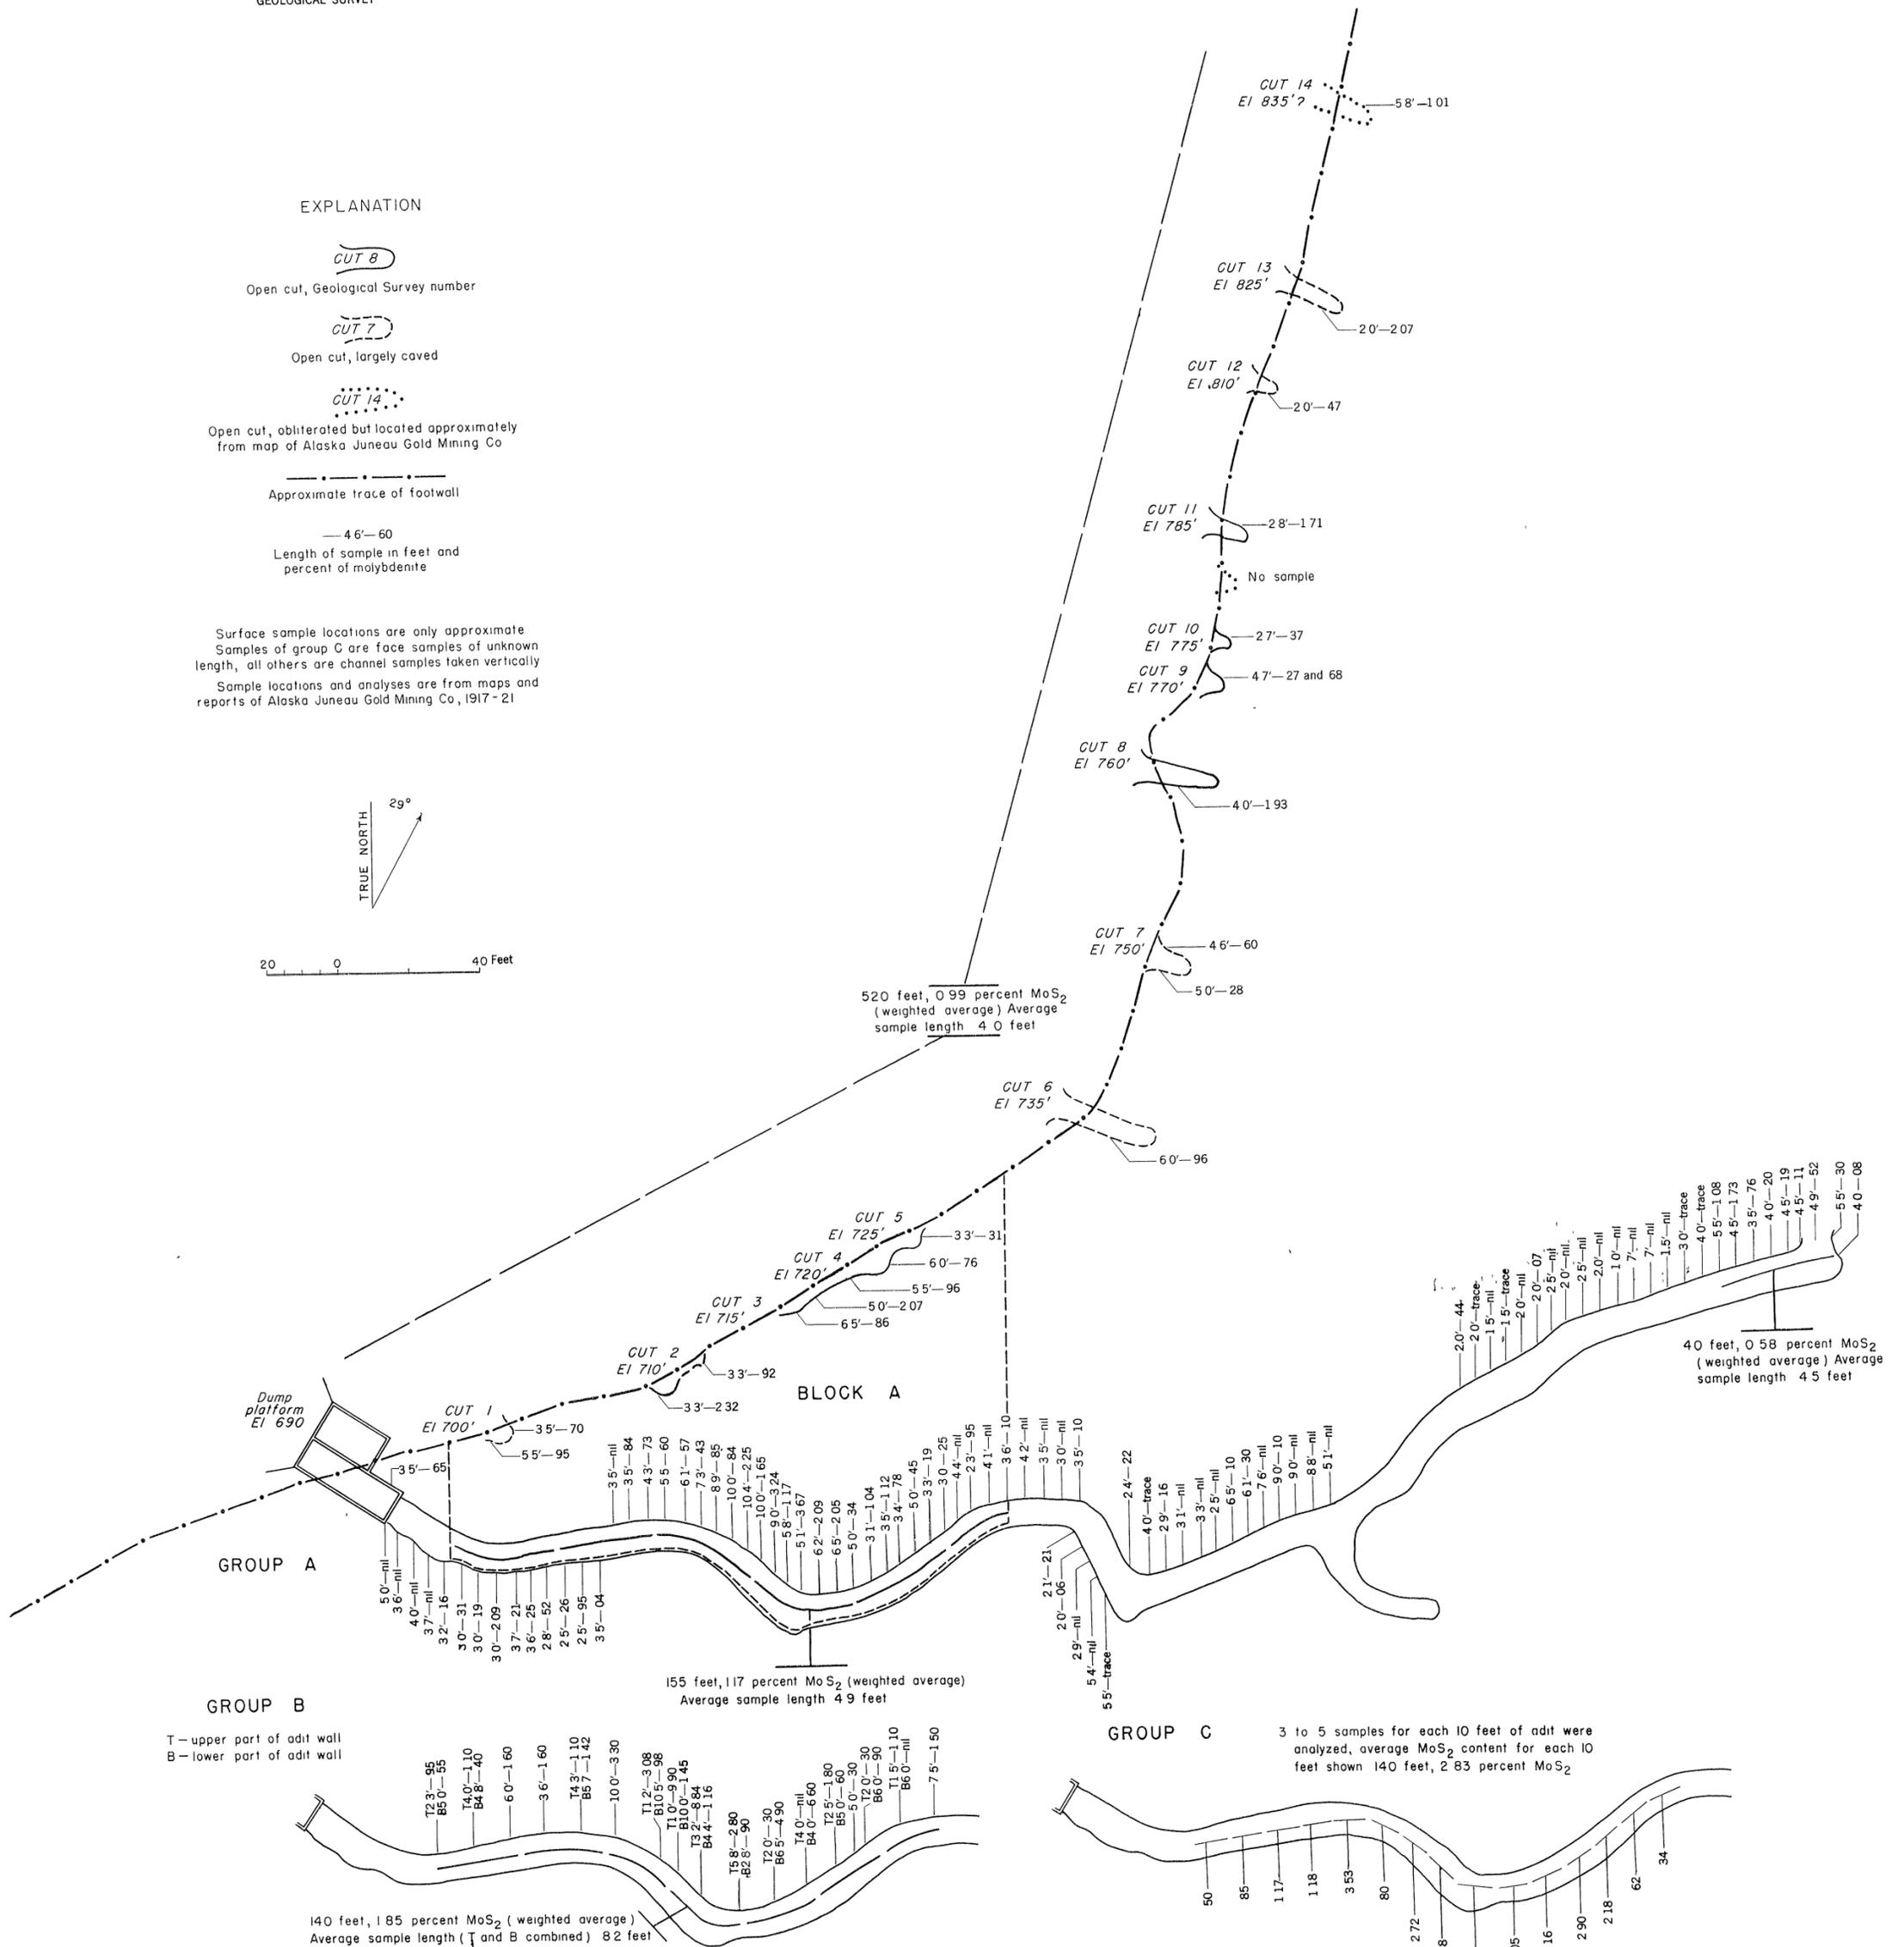

EXPLANATION

-  **CUT B**
Open cut, Geological Survey number
-  **CUT 7**
Open cut, largely caved
-  **CUT 14**
Open cut, obliterated but located approximately from map of Alaska Juneau Gold Mining Co
-  Approximate trace of footwall
-  — 4'6"—60
Length of sample in feet and percent of molybdenite

Surface sample locations are only approximate
Samples of group C are face samples of unknown length, all others are channel samples taken vertically
Sample locations and analyses are from maps and reports of Alaska Juneau Gold Mining Co, 1917-21

20 0 40 Feet

Surveyed by G D Robinson, R A Harris, and A J Bollen, 1943

SAMPLE LOCATIONS AND ANALYSES, SHAKAN MOLYBDENITE DEPOSIT, KOSCIUSKO ISLAND, SOUTHEASTERN ALASKA
