MAGNETIC NORTH

EXPLANATION

Phyllite

Greisenized granite

Quartz vein on surface, showing dip Dashed where approximately located, dotted where concealed

Quartz vein in underground workings, showing dip

Fault, showing dip

Underground workings and entry

Shaft

Geology near workings is mostly from underground faces
Assumed elevation 848 meters above sea level at mine office

500 0 2500 METERS

Contour interval 5 meters
Datum is high tide

Topography by P Sudasna and Su-Ban Chai Narong

Geology by Manas Veeraburus
