

- EXPLANATION**
- Qls Landslide debris
 - Qal Alluvium
 - Tos Opalized sandstone
 - Tcr Cap rock
 - Ts Sandstone
 - Tsh Shale interbedded in sandstone
 - Tsb Basalt
 - Stumped block
- QUATERNARY**
- TERTIARY**
- Contact
 - - - Dashed where approximately located
 - Inclined faults and fractures
 - Showing dip, generally marked by stippled material in and bordering the openings. Dashed where approximately located
 - Vertical fracture
 - Axis of syncline
 - - - Dashed where approximately located
 - ⊕ Strike and dip of beds
 - ⊕ Horizontal beds
 - ⊕ Strike of vertical beds
 - ⊕ Shaft
 - ⊕ Cinnabar visible in minor workings
 - ⊕ PIT
 - ⊕ Tunnel
 - ⊕ Trench
 - ⊕ Quarry
 - ⊕ Dump
 - ⊕ Outside border of underground workings
 - ⊕ Site of structure
 - ⊕ Scraped area
 - ⊕ Approximate position of section corner

Underground workings based mainly on maps of the Idaho Almaden Mines Company

Geology and topography are based on planetable surveys by C. P. Ross and R. P. Full, 1941; C. P. Ross and N. W. Balcom, 1943; and C. P. Ross and Jack Terry, 1954
