

EXPLANATION

-  Rcs
-  Shinarump member of the Chinle formation
-  Basal contact of the Shinarump member

 20
Field measurement of combined thickness, in feet, of the Hoskinnini and upper part of the Moenkopi formation

 66
Photogrammetrically measured thickness, in feet, of the combined Hoskinnini and upper part of the Moenkopi formation

 5
Strike and dip of beds

 C
Centerline of channel
Dashed where concealed or inferred

 60
7
Isopach lines
Dashed where trend is uncertain; queried where both trend and thickness determinations are uncertain. Isopach interval is 10 ft on the photogeologic map and 5 ft on the field map

A.— Compiled by photogeologic methods

B.— Compiled by field methods
