Major stratigraphic and time divisions in use by the U.S. Geological Survey

Era	System or Period		Series or Epoch	Estimated ages of time boundaries in millions of years ¹
Cenozoic	Quaternary		Recent	
			Pleistocene	— 1 —
	Tertiary		Pliocene	— 10 —
			Miocene	— 25 —
			Oligocene	— 40 —
			Eocene	— 60 —
Paleocene				
Mesozoic	Cretaceous ²		Upper (Late) Lower (Early)	— 125 —
	Jurassic		Upper (Late) Middle (Middle) Lower (Early)	— 150 —
	Triassic		Upper (Late) Middle (Middle) Lower (Early)	— 180 —
Paleozoic	Permian ²			— 205 —
	Carboniferous systems	Pennsylvanian ²	Upper (Late) Middle (Middle) Lower (Early)	
		Mississippian ²	Upper (Late) Lower (Early)	— 255 —
	Devonian		Upper (Late) Middle (Middle) Lower (Early)	— 315 —
	Silurian ²		Upper (Late) Middle (Middle) Lower (Early)	— 350 —
	Ordovician ²		Upper (Late) Middle (Middle) Lower (Early)	— 430 —
	Cambrian ²		Upper (Late) Middle (Middle) Lower (Early)	— 510 —
Precambrian ²			Informal subdivisions such as upper, middle, and lower, or upper and lower, or younger and older may be used locally.	3, 000—

Terms designating time are in parentheses. Informal time terms early, middle, and late may be used for eras, periods, and epochs where there is no formal subdivision into Early, Middle, and Late. Informal rock terms lower, middle, and upper may be used where there is no formal subdivision of a system or of a series.

¹ Age values given are the Holmes "B" time scale points (Holmes, 1947, p. 145). Dates are rounded to the nearest 5 million years. The errors are unknown, but more recent age determinations by various physical methods are in partial agreement with these values. For a recent compilation of radiogenic dates see selection of Adolph Knopf in Longwell's "Geologic column and scale of time" (1958, AGI 5).

² Provincial series accepted for use in U.S. Geological Survey reports are listed under both the time and the rock units.

GEOLOGIC NAMES OF NORTH AMERICA

INDEX TO THE GEOLOGIC NAMES OF NORTH AMERICA

By DRUID WILSON, GRACE C. KEROHER, and BLANCHE E. HANSEN

INTRODUCTION

Beginning in 1902, the U.S. Geological Survey has published five compilations treating the names of geologic formations and stratigraphic classification and nomenclature:

“North American Geologic Formation Names,” by F. B. Weeks (Bull. 191, 1902).

“The Geologic Time Classification of the United States Geological Survey Compared with Other Classifications, Accompanied by the Original Definitions of Era, Period, and Epoch Terms,” by M. Grace Wilmarth (Bull. 769, 1925).

“Names and Definitions of the Geologic Units of California,” by M. Grace Wilmarth (Bull. 826, 1931).

“Lexicon of Geologic Names of the United States (including Alaska),” by M. Grace Wilmarth (Bull. 896, 1938; reprinted 1951, 1957).

“Geologic Names of North America Introduced in 1936–1955,” by Druid Wilson, W. J. Sando, R. W. Kopf, and others (Bull. 1056–A, 1957).

The demand for compilations of geologic names is well attested by the circumstance surrounding the completion of the first Survey compilation by F. B. Weeks. In 1899, after it became apparent that the task was too great for one compiler, Survey geologists were asked to help, and were apportioned parts of the geologic literature to review. In this way the compilation was completed and published in 1902. The following geologists participated: M. R. Campbell, N. H. Darton, J. S. Diller, G. H. Girty, C. W. Hayes, F. H. Knowlton, F. L. Ransome, G. O. Smith, A. C. Spencer, T. W. Stanton, J. A. Taff, T. W. Vaughan, and David White.

Wilmarth's compilation of terms used in geologic-time classification was published in 1925 and is still invaluable for quotations of the original definitions and descriptions of the standard and other strati-

graphic and time divisions from widely scattered and sometimes unavailable sources. The California names and their annotations published in 1931 were repeated without change in Wilmarth's lexicon of the United States names in 1938. The reprinting of Wilmarth's lexicon in 1951 and 1957 confirms its place in the field of geologic publications. Brevity of format in "Geologic Names of North America Introduced in 1936-1955" made it possible to bring out quickly a compilation intended to be superseded by the first supplement to Wilmarth's lexicon, now in preparation.

In the present report the geologic names of North America, including Greenland, the West Indies, the Pacific Island possessions of the United States, and the Trust Territory of the Pacific Islands, that were published before 1956 are arranged to form a nonalphabetic index to Wilmarth's lexicon and to the "Geologic Names of North America Introduced in 1936-1955." This grouping of the names on the basis of the age and politico-geographic divisions containing the type locality is an easily used key not available elsewhere. The age of each formation (that is, rock unit) named from an area is shown, but not its complete geographic extent. The geologic-time and time-stratigraphic units are grouped together under the major time divisions.

Some names entered in Wilmarth's lexicon have been omitted. They include (a) all paleontologic and descriptive terms, (b) all names of economic units, such as miner's terms, trade names, and subsurface names identical with the names of formal rock units, (c) the names of moraines and other units of which physiography is an essential part of the definition, and (d) the names of orogenies. The American Commission on Stratigraphic Nomenclature (1955, p. 2008) has recommended that the names of moraines and other physiographic units be considered informal and not subject to the rules that apply to stratigraphic names.

The names of the rock units are listed once only—in the geographic area that contains or is assumed to contain the type area or locality. Thus, the Grenville series, a geologic name commonly used in the State of New York, is listed under the Canadian province of Ontario, where its type locality occurs; and the Colorado group or shale, used widely in Canada, is under the State of Colorado. Not all geologic formations end at political boundaries.

In the period of more than 20 years since the compilation of Wilmarth's lexicon, many names have been revised and many names not then accepted for use by the U.S. Geological Survey have been adopted. Adoption of names for use by the U.S. Geological Survey is based on the published and unpublished reports of Federal Survey geologists on areas of the United States and its possessions or trust

territories. The U.S. Geological Survey has had occasion to consider for acceptance or rejection considerably less than one-half of the names of geologic units occurring in the United States. The names of units adopted through 1958 appear in boldface type under their currently designated ages. Changes in the designated rank and age of the named units accepted for use in U.S. Geological Survey reports are shown here as authorized by the Chief Geologist, upon the recommendation of the Geologic Names Committee of the Federal Survey. They embody all changes, published or unpublished, made before July 1, 1959.

Numerous inconsistencies in listed age assignments are apparent in this compilation. These result in part from differences of opinion of the original authors and in part from Survey-accepted revisions and investigations that have been made since the publication of Wilmarth's lexicon. Thus, the inconsistencies illustrate the essential subjectivity of all age assignments and reflect the objectivity that a compiler seeks to attain.

The compilers are responsible for listing changes in the age designations of certain non-Survey names. These are (a) age assignments of a few units whose ages had been listed in general terms; (b) placing under Paleocene some units formerly listed as Eocene; and (c) assignment of some units of Pennsylvanian age to provincial series in conformance to the nomenclature adopted by agreement of the State geological surveys of Iowa, Kansas, Missouri, Nebraska, and Oklahoma and for the most part accepted by the U.S. Geological Survey.

Age changes and future revisions of all units will be considered in supplements to Wilmarth's lexicon, where they can be adequately documented. The first supplement is now in preparation.

The names are grouped under two main categories: (a) geologic-time and time-stratigraphic units, and (b) rock units. Only the time units require explanation. There is general agreement among American geologists as to the major practical stratigraphic and time divisions, if not as to their boundaries. Those in use by most geologists and the U.S. Geological Survey are shown in the table (p. iv). Less agreement exists in the use of the term "series." "Series" has been used as a rock (rock-stratigraphic) term of higher rank than "group," but more commonly as a time-stratigraphic (time-rock) term for a subdivision of a system. In the following reports concerned with stratigraphic classification and nomenclature, "series" has been considered as a part of the time-stratigraphic classification: Schenck and Muller (1941, p. 1421), the American Commission on Stratigraphic Nomenclature (1947, p. 523), Hedberg (1948, p. 452; 1958, p. 1892), Woodring (1953, p. 1082), and Dunbar and Rodgers (1957, p. 297-298). The use of "series" as a time-stratigraphic term has been recom-

mended by the American Commission on Stratigraphic Nomenclature (1956, p. 2006), and the U.S. Geological Survey will consider this usage for acceptance when the Commission adopts the revised Stratigraphic Code.

Because of this variance in usage, the names of most series are listed with both the time and the rock units, but a few names of series that are undefined and have had little or no usage—for example, the Nutrián series of Jurassic age in Arizona—are listed only under the rock units. The names of some series and stages which have been derived from units listed in Wilmarth's lexicon as rock units, and which are currently in wide usage, appear under the time units as a part of the standard sequences of certain periods. These are cited from the various sources from which the standard sequences were taken, and the designation under which they are entered in Wilmarth's lexicon appears in brackets; the **Osage series** [*see* Osage group¹] of Early Mississippian age is an example. Precambrian series that have been used to indicate correlative time are listed with the time units, but the majority of the Precambrian series names are listed only under the rock units.

ACKNOWLEDGMENTS

We are grateful for the cooperation and assistance of George V. Cohee, chairman, and the staff of the Geologic Names Committee during the compilation of this index. Thanks are extended to Ellen James Trumbull for advice on the problems of arrangement and to Allison R. Palmer for advice concerning Cambrian time-stratigraphic terms. Other colleagues to whom we are indebted for helpful suggestions are: Jean M. Berdan, W. A. Cobban, P. E. Cloud, Jr., Helen Duncan, D. L. Durham, J. T. Dutro, James Gilluly, C. B. Hunt, G. E. Lewis, F. S. MacNeil, C. W. Merriam, G. N. Pipiringos, C. A. Repenning, R. J. Ross, Jr., W. J. Sando, G. R. Scott, J. E. Smedley, P. D. Snavely, Jr., Sandra Whalen Stock, Martha Toulmin, J. A. Vedder, and W. P. Woodring.

BIBLIOGRAPHY

Inasmuch as the correlation charts prepared by the Committee on Stratigraphy of the National Research Council, usually referred to as the GSA (Geological Society of America) correlation charts, are the major source of the arrangements of the standard time sequences given under the time units, they are listed here by number as a convenient source of reference. Other references follow, listed alphabetically.

SYMBOLS

Names printed in **boldface** type have been adopted for use by the U.S. Geological Survey.

† Names preceded by a dagger have been either abandoned by their authors or rejected for use by the U.S. Geological Survey.

¹ Names followed by this superscript are in Wilmarth's "Lexicon of Geologic Names of the United States (Including Alaska)" (U.S. Geol. Survey Bull. 896).

² Names followed by this superscript are in "Geologic Names of North America Introduced in 1936-1955" (U.S. Geol. Survey Bull. 1056-A).

Names in use by the U.S. Geological Survey for which the rank or lithic designation has been changed are followed by the former designation in parenthesis, except when the original combination is a part of the currently accepted usage. Examples (both from the Pleistocene names of Kansas):

Pearlette ash ¹ member (of Sappa formation)

Missler member (of Ballard formation); (as member of Meade formation ²)

GEOLOGIC TIME AND TIME-STRATIGRAPHIC (TIME-ROCK) UNITS

Sequences of units commonly used as standards for North America are given under each major time division. They have been assembled from several sources, but mainly from the correlation charts prepared by the Committee on Stratigraphy of the National Research Council.

Certain of the sequences coincide in part or completely with current usage of the U.S. Geological Survey; thus the units adopted are shown in boldface type. A single unit in boldface within a sequence does not indicate that all or other parts of the sequence have been adopted; only those units appearing in boldface type are currently in use by the Survey. In all instances the precise rank and terminology, and certain restrictions in Survey usage, are noted.

TIME TERMS OF NONGEOGRAPHIC ORIGIN

The terms listed below have been proposed for various units of geologic time. The nongeographic origin probably indicates that all were intended for world-wide application. A few have had considerable usage, but most of the terms are currently replaced by standard divisions of geologic time (see table, p. iv). The nongeographic term Phanerozoic has come into usage as a convenient expression covering Cambrian plus all later time. It was proposed as the Phanerozoic or Phanerobiotic eon by Chadwick (1930, p. 48) together with the Cryptozoic or Cryptobiotic eon for all Precambrian time. Harris (1932, p. 489) independently proposed the Phenozoic and Cryptozoic eons for the same spans of time.

CENOZOIC

Pleistocene (glacial)

The following glacial and interglacial stages typically developed[†] in central North America are commonly used as the North American standard sequence (see Cooke and Gardner *in* Cooke, Gardner, and Woodring, 1943, Chart 12):

- { Wisconsin [glacial] stage ¹ (Wisconsin)*
- { Sangamon [interglacial] stage ¹ (Illinois)
- { Illinoian [glacial] stage ¹ (Illinois)
- { Yarmouth [interglacial] stage ¹ (Iowa)
- { Kansan [glacial] stage ¹ (Kansas; standard sections in Iowa)
- { Aftonian [interglacial] stage ¹ (Iowa)
- { Nebraskan [glacial] stage ¹ (Nebraska)

* The U.S. Geological Survey currently has under consideration the usage of time-stratigraphic nomenclature in the Pleistocene epoch.

Pleistocene (glacial)—Continued

The glacial Pleistocene time and time-stratigraphic units listed below have been used or are currently in use:

Central North America

Pleistocene (Wisconsin)

- Almenan subage ² (Kansas)
- Ashawan ¹ (Iowa)
- Bradyan interglacial substage ² (Nebraska)
- Cary substage ¹ (Illinois)
- Cochrane glacial substage ² (Ontario)
- Eldoran epoch and series ¹ (Iowa)
- Farmdale substage ² (Illinois)
- †Hudsonian substage ¹ (Great Lakes region)
- Iowan substage (as stage ¹) (Iowa)
- †Manitoban substage ¹ (Great Lakes region)
- Mankato substage ¹ (Minnesota)
- †Peorian stage ¹ (Illinois)
- †Quebecan substage ¹ (Great Lakes region)
- Scandian subage ² (Kansas)
- Tazewell substage ¹ (Illinois)
- Valders glacial substage ² (Wisconsin)
- †Wabash stage ¹ (Indiana)

Pleistocene (Illinoian and Sangamon)

- Centralian epoch and series ¹ (Illinois)

Pleistocene (Kansan and Yarmouth)

- Ottumwan epoch and series ¹ (Iowa)

Pleistocene (Kansan)

- Mahaskan glacial epoch ¹ (Iowa)

Pleistocene (Nebraskan and Aftonian)

- Grandian epoch and series ¹ (Iowa)

Pleistocene (Nebraskan)

- Adelphian ¹ (Iowa)

Pleistocene ("pre-Nebraskan")

- Gravoisan glacial epoch ¹ (Missouri)
- Moingonan glacial epoch ¹ (Iowa)

Northeastern United States and eastern Canada

Pleistocene

- †Champlain period ¹ (Vermont-New York-Quebec)
- Iroquois stage ¹ (Great Lakes region)
- St. Lawrence stage ¹ (St. Lawrence Valley)
- Toronto stage ¹ (Ontario)
- Warren stage ¹ (Great Lakes region)

Northeastern United States (Atlantic coastal region)

Pleistocene

- Boston glacial substage ² (Massachusetts)
- College Point stage ¹ (Long Island, N.Y.)
- Gardiners stage ¹ (Gardiners Island, N.Y.)
- Heampstead substage ¹ (Long Island, N.Y.)
- Herod substage ¹ (Long Island, N.Y.)
- Jacob stage ¹ (Long Island, N.Y.)
- Jameco stage ¹ (Long Island, N.Y.)
- Jerseyan stage ¹ (New Jersey)
- Lexington glacial substage ² (Massachusetts)
- Manhasset stage ¹ (Long Island, N.Y.)
- Mannetto stage ¹ (Long Island, N.Y.)
- Montauk substage ¹ (Long Island, N.Y.)

Caribbean region

Miocene, late

- Caimitoan stage ² (Dominican Republic)
- Springvalean stage ² (Trinidad)

Oligocene

Stainforth (1953, p. 251) has recognized the use of the Antigua stage (middle Oligocene) and the Anguilla stage (late Oligocene). These stages are based on the Antigua and the Anguilla formations, from the islands of the same names, which are considered by other geologists to be of late Oligocene and early Miocene age, respectively.

Sequence of microfaunal substages proposed for the middle and late Miocene of the central Atlantic Coastal Plain by Malkin (1953, p. 767-768):

<i>Miocene</i>	{	<i>late</i>	{ Yorktownian substage (Virginia)
			{ St. Marysan substage (Maryland)
	{	<i>middle</i>	{ Choptankian substage (Maryland)
			{ Calvertian substage (Maryland)

Western North America

Two sequences of stages are in use for the marine Cenozoic of western North America. The microfaunal stages are based on the chronologic occurrence of species or assemblages of species of foraminifera, believed to be independent of the lithic units in which they are found. The more or less informal megafaunal "stages" are based, according to Durham (1954, p. 23), on the distribution of species of megafossils, mainly mollusks and echinoids, within formations and sequences of formations from which the names of the "stages" are derived. The present arrangement is adapted from the marine Cenozoic correlation chart (Weaver and others, 1944, Chart 11), from later additions to the microfaunal sequence by Natland (1953) and by Mallory (1953; 1954; 1959), and from the charts of Durham, Kleinpell, and Savage (*in* Durham, 1954, p. 25) and Durham, Jahns, and Savage (1954, p. 60). The microfaunal stages proposed for the Pliocene and Pleistocene by Natland have not been fully defined and have not yet been used as widely in publication as the microfaunal stages proposed for the Oligocene by Schenk and Kleinpell (1936) and for the Miocene by Kleinpell (1934; 1935; 1938). The Paleocene and Eocene stages earlier proposed by Mallory were fully defined in 1959. The equivalence of the stages of the microfaunal and megafaunal sequences is fairly well established, but the adherents of the two time scales are not in complete agreement on correlation with the standard major Tertiary divisions. The disparity of the two correlations with the Tertiary divisions is graphically shown below. The spacing of the rules shows only the equivalence of the stages of the two scales; no indication of relative time span is intended. A partly dashed rule indicates doubt concerning precise correlation with the apposed stage. All type areas except those indicated are in California.

Irvingtonian age ² (California)

California

Pliocene (Clarendonian)

Montediablan stage ²

Cerrotejonian stage ²

MESOZOIC

The European stages listed below are commonly used for North America, and according to Longwell (1958, AGI 5) there is no other generally accepted classification. No standard American time classification is given for any of the periods or systems of the Mesozoic on the correlation charts prepared by the Committee on Stratigraphy of the National Research Council.

<i>Cretaceous</i>	{	<i>Late</i>	Maestrichtian	} Senonian
			Campanian	
			Santonian	
			Coniacian	
			Turonian	
	{	<i>Early</i>	Cenomanian	} Neocomian
			Albian	
			Aptian	
			Barremian	
			Hauterivian	
<i>Jurassic</i>	{	<i>Late</i>	Purbeckian	
			Portlandian	
			Kimeridgian	
	{	<i>Middle</i>	Oxfordian	
			Callovian	
			Bathonian	
	{	<i>Early</i>	Bajocian	
Toarcian				
Pliensbachian				
Sinemurian				
			Hettangian	

*We acknowledge advice on locality data from H. E. Wood, 2d chairman of the committee currently revising the continental time scale.

Mesozoic—Continued

<i>Triassic</i>	{	<i>Late</i>	{ Rhaetian Norian Carnian (Karnian)
		<i>Middle</i>	{ Ladinian Anisian (Virglorian)
		<i>Early</i>	{ Scythian (Werfenian)

Cretaceous

The units listed below have been used or are currently in use for parts of the Cretaceous in the areas indicated.

North America

Late Cretaceous

Cordilleran system ¹

Early Cretaceous

†Comanchean system ¹ (Texas)

†Shastan system ¹ (California)

California and Oregon

Early Cretaceous

Shasta series ¹ (California)

Sequence of microfaunal stages proposed for the Late Cretaceous of California by Goudkoff (1945, p. 956-1007):

<i>Late Cretaceous</i>	{	Cheneyan stage ("pre-Martinez Paleocene or post-Moreno Cretaceous"; author favored Paleocene; placed here for convenient listing)
		Ciervian stage
		Ingramian stage
		Tracian stage
		Weldonian stage
		Cachenian stage
		Delevanian stage

Jurassic

Triassic

No geographically derived names of time units based on faunal or physical criteria occurring in the Triassic and Jurassic rocks of North America have been recorded in the Lexicon files.

PALEOZOIC

A number of names have been proposed for units of great magnitude based on physical and faunal criteria occurring in the rocks of North America. Some of them were thought to be more appropriate for North America than the now standard major stratigraphic and time divisions, which are mainly of European derivation. With the exception of the Mississippian and Pennsylvanian systems, few of these units ever gained very wide acceptance, and none is in current use as a period or system. Some encompass parts or all of more than one of the Paleozoic periods or systems and are so listed below; the others are entered under the appropriate age.

Paleozoic

Appalachian system ¹ (Pennsylvania)

†New York system ¹ (New York)

Devonian—Mississippian

†Bradfordian ¹ (Pennsylvania-New York)

Chattanooga series ¹ (Tennessee)

Erian period ¹ (New York)

†Waverlyan system ¹ (Ohio)

Paleozoic—Continued

Silurian-Devonian

- Monroan ¹ (Michigan)
- Yorkian period ¹ (New York)

Ordovician—Silurian

- †Oswegan period ¹ (New York)
- †Hudson period ¹ (New York)

Cambrian—Silurian

- †Mohawk system ¹ (New York)

Cambrian—Ordovician

- Ozarkian system ¹ (Missouri)
- †Potsdam period ¹ (New York)
- †Taconic system ¹ (New York-New England)

Cambrian(?)

- Hudson system ¹ (New York)
- †Taconian ¹ (New York-New England)

Permian

The Permian series commonly in use as the standard sequence in central and southwestern United States (*see* Longwell, 1958, AGI 5) are typically developed in Texas and New Mexico to which they are restricted in use by the U.S. Geological Survey:

- { Ochoa series ² (New Mexico)
- { Guadalupe series [*see* Guadalupe group ¹ (Texas)]
- { Leonard series [*see* Leonard formation ¹ (Texas)]
- { Wolfcamp series [*see* Wolfcamp formation ¹ (Texas)]

Other units:

Central United States

Permian

- Big Blue series ¹ (Kansas)
- Cimmaron series [*see* under Cimmaron group ¹ (Kansas)]
- Minco division ² (Oklahoma)
- Wanette division ² (Oklahoma)

Pennsylvanian

The type area of the Pennsylvanian system is in the northern Appalachian region in Pennsylvania, but a better standard section is in West Virginia (Moore and others, 1944, p. 665). The standard sequence for eastern North America, according to the Pennsylvanian correlation chart (Moore and others, 1944, Chart 6), given below, repeats the major stratigraphic divisions commonly used in the eastern United States, except that the Lee and the Kanawha series take the place of the division usually called Pottsville (p. 666).

- { Monongahela series [*see* under Monongahela formation ¹ (Pennsylvania)]
- { Conemaugh series [*see* under Conemaugh formation ¹ (Pennsylvania)]
- { Allegheny series [*see* under Allegheny formation ¹ (Pennsylvania)]
- { Kanawha series [*see* under Kanawha formation ¹ (West Virginia)]
- { Lee series [*see* Lee formation ¹ or group (Virginia)]

The sequence given for central North America by Longwell (1958, AGI 5) is, with the exception of the Atoka series in place of the Lampasas series, the same sequence given by Moore and others (1944, Chart 6). They state (p. 666) that these series are used also in western North America and are thought to be applicable to the eastern United States and Canada as well. Their use as provincial series by the U.S. Geological Survey is restricted to the mid-continent region:

- | | |
|---|--|
| | Age according to U.S.
Geol. Survey usage |
| <ul style="list-style-type: none"> { Virgil series ¹ (Kansas) { Missouri series [<i>see</i> Missouri group ¹ (Missouri)] { Des Moines series [<i>see</i> Des Moines group ¹ (Iowa)] { Atoka series [<i>see</i> Atoka formation ¹ (Oklahoma)] { Morrow series [<i>see</i> Morrow group ¹ (Arkansas)] | <p style="margin-right: 10px;">} Late</p> <p style="margin-right: 10px;">} Middle</p> <p style="margin-right: 10px;">} Early</p> |

Pennsylvanian—Continued

Other Pennsylvanian time units:

Eastern United States

Pennsylvanian†Pittsburg series ¹ (Pennsylvania)

Central United States

*Pennsylvanian*Kansas period ¹ (Kansas)*Late Pennsylvanian*Kawvian series (epoch) ² (Kansas)*Middle Pennsylvanian*Cygian substage ² (Missouri)Oklan series (epoch) ² (Oklahoma)Venteran substage ² (Missouri)*Early and Middle Pennsylvanian*†Bend series ¹ (Texas)Ti Valley series ² (Oklahoma)*Early Pennsylvanian*Ardian series (epoch) ² (Oklahoma)Lampasas series ² (Texas)Pushmataha series ² (Oklahoma)

Southwestern United States

*Middle Pennsylvanian*Derry series ² (New Mexico)

Mississippian

The type area of the Mississippian system is in the upper Mississippi and the lower Ohio valleys (Weller and others, 1948, Chart 6). The series listed below are given by Longwell (1958, AGI 5) for central North America and, except for the form of the names (i.e., Chesterian, etc.), the same series are given by Weller and others as the standard sequence for North America. Their use as provincial series by the U.S. Geological Survey is restricted to the type Mississippian area.

Age according to U.S.
Geol. Survey usage

}	Chester series [see Chester group ¹ (Illinois)]	}	<i>Late</i>

Western North America

*Middle Cambrian*Albertan system ² (Alberta)Bonnetian age and stage ² (Nevada)*Early Cambrian***Waucoban series ¹** (California)**PRECAMBRIAN***(See also under Time terms of nongeographic origin)*

Properly, Precambrian divisions should not be listed under time units. The perennial use of terms such as era, period, and system, reflects the desire of geologists to suggest by terminology the impressive magnitude of the Precambrian sequence and the long time-span necessary for the deposition of the sediments, the emplacement of the igneous rocks, subsequent metamorphism, and the development of notable unconformities. Criteria for consistent worldwide division of this vast expanse of time are inadequate. Stratigraphically significant paleontologic criteria, used for the rest of geologic time, have thus far not been discovered in Precambrian rocks. Radiogenic methods may eventually provide means for inter-regional correlation when there are enough of them, and with reduction of the margin of error in present techniques. Numeric dating, sometimes called the absolute age as opposed to relative age based on fossils, has been determined by radiogenic methods for numerous Precambrian rocks. Whereas this has upheld some lithologic correlations, the results have more commonly shown the unreliability of physical unity as a basis for time-stratigraphic correlation. As a result, in the current period of intensified radiogenic investigations, the use of time and time-stratigraphic (time-rock) divisions in the Precambrian of North America has declined. Among the authors who have discussed the problems of correlation and time divisions within the Precambrian are Leith (1934, p. 169), Grout and others (1951, p. 1020, 1063–1064), Wilson (1952, p. 201–202), Gill (1952, p. 57–67; 1955, p. 25–29; 1955a, p. 117–124), Woodring (1953, p. 1083), Rodgers (1954, p. 658), Knopf (1955, p. 698–699), and Dunbar and Rodgers (1957, p. 298).

Units more commonly used as standard (i.e., time-stratigraphic) divisions as well as those suggesting great rank are listed below.

Decorah shale¹ or formation

Glenwood shale member (of Platteville formation)¹; shale or formation in Michigan

Guttenberg limestone member¹ (of Decorah formation)

Ion dolomite member¹ (of Decorah formation)

†Julian limestone¹

†Julian series¹

McGregor limestone member (of Platteville formation)¹

Spechts Ferry shale member¹ (of Decorah formation)

Lower Ordovician

Oneota dolomite¹

Winneshiek limestone¹

Cambrian

Hanoverian series¹

Upper Cambrian

Albin shale¹

Allamakee dolomite¹

Hull porphyry¹

Waukon sandstone¹

Precambrian

Ragg quartzite²

Siouan series¹

Split-Rock slate¹

Precambrian (?)

Tipton sandstone¹

Kansas

Quaternary

Gerlane formation¹

Pleistocene and Recent

Sanborn group (as formation¹)

Pleistocene

Atehison formation¹

Baliard formation (C. W. Hibbard, 1958, Am. Jour. Sci., v. 256, no. 1, p. 55, 56)

Belleville formation¹

Chase Channel formation²

Crooked Creek formation²

United States—Continued

Kansas—Continued

Pleistocene—Continued

†Emma Creek formation²

Jones Ranch beds²

Kansan drift¹

Kingsdown silt (as marl¹)

McPherson formation¹

Meade formation (as gravel¹)

Missler member (of Ballard formation); (as member of Meade formation²)

Odee formation²

Pearlette ash¹ member (of Sappa formation)

Peoria silt member (of Sanborn formation)²

†Salt Creek gravel beds¹

Stump Arroyo member (of Crooked Creek formation)²

Vanhem formation²

Tertiary

Abilene conglomerate¹

Pliocene (see also *Miocene*, *Pliocene* and *Pleistocene*; and *Miocene* or *Pliocene*)

Calvert ash bed (in Ash Hollow member of Ogallala formation)²

Dellvale ash bed (in Ash Hollow member of Ogallala formation)²

Fort Wallace ash bed (in Ash Hollow member of Ogallala formation)²

Rawlins ash bed (in Ash Hollow member of Ogallala formation)²

Reager ash bed (in Ash Hollow member of Ogallala formation)²

Reamsville ash bed (in Ash Hollow member of Ogallala formation)²

XI member (of Rexroad formation)²

Pliocene, upper

Rexroad formation²

Pliocene, middle

Delmore formation²

Pliocene, lower

Edson beds (in Ogallala formation)¹

Rhinoceros Hill beds (in Ogallala formation)¹

Miocene, Pliocene, and Pleistocene

†Plains marl¹

Miocene or Pliocene

Woodhouse clay (in Ogallala formation)¹

Cretaceous

Brookville terrane¹

Buckskinian series²

Cawker terrane¹

Gove chalk²

†Medicine beds¹

Pete terrane¹

Rawlinsian series²

Terra Cotta clay member (of Dakota formation)²

United States—Continued

Kansas—Continued

Cretaceous—ContinuedWallace shale ²Wiskanian series ²*Cretaceous*(?)**Hills Pond peridotite** ²*Upper Cretaceous*†Arickaree shale ¹**Blue Hill shale member** (of Carlile shale ¹)**Bridge Creek limestone member** (of Greenhorn limestone) ¹Cockrum sandstone ²**Codell sandstone member** (of Carlile shale) ¹; **member** (of Benton shale in NE Colorado)†Downs limestone (in Greenhorn limestone) ¹Ellsworth formation ²**Fairport chalky shale member** (of Carlile shale) ¹†Fence-post limestone ¹†Fort Hays division or group ¹**Fort Hays limestone member** (of Niobrara formation) ¹†Graham jasper (in Niobrara formation) ¹**Hartland shale member** (of Greenhorn limestone) ¹**Janssen clay member** (of Dakota formation) ²**Jetmore chalky member** (of Greenhorn limestone) ¹Lake Creek shale member (of Pierre shale) ¹**Lincoln limestone member** (of Greenhorn limestone) ¹†Lisbon shale ¹Norton zone (in Niobrara formation) ¹†Osborne limestone ¹**Pfeifer shale member** (of Greenhorn limestone) ¹†Reeder sandstone ¹**Rocktown channel sandstone member** (of Dakota sandstone) ¹†Russell formation ¹Salt Grass shale member (of Pierre shale) ¹**Sharon Springs member** (of Pierre shale) ¹**Smoky Hill chalk or marl member** (of Niobrara formation) ¹Solomon formation ²†Trego zone (in Niobrara formation) ¹†Victoria formation, clays, or shale ¹Weskan shale member (of Pierre shale) ¹

United States—Continued

Kansas—Continued

Lower Cretaceous†Belvidere shale ¹Black Hill shale ¹Blue Cut shale ¹Champion shell bed (in Kiowa shale) ¹**Cheyenne sandstone** ¹; **member** (of Purgatoire formation in Oklahoma)†Corral sandstone (in Cheyenne sandstone) ¹†Elk Creek beds (in Cheyenne sandstone) ¹Fullington shale ¹†Greenleaf sandstone ¹Kent bed ¹Kiowa shale ¹†Kirby clay ¹†Lanphier beds (in Cheyenne sandstone) ¹Marquette member ¹ (of Belvidere formation)**Mentor formation** ¹Natural Corral member ¹ (of Belvidere formation)†Spring Creek clays ¹†Stokes sandstone (in Cheyenne sandstone) ¹†Walker beds ¹Windom member ¹ (of Belvidere formation)*Permian***Admire group** (as shale ¹)Afton limestone member (of Wellington formation) ²†Alma limestone ¹**Americus limestone member** (of Foraker limestone) ¹Annelly gypsum member (of Wellington formation) ²**Bader limestone** (as formation ¹)**Beattie limestone** (as formation ¹)Big Basin sandstone ¹Big Blue group or series ¹Bigelow formation ¹**Blue Rapids shale** ¹**Blue Springs shale** ¹ **member** (of Matfield shale)Bruno limestone ¹Buckeye shale ¹Carlton limestone ¹Cave Creek formation ¹Cedar Hills anhydrite ¹Cedar Hills sandstone ¹†Cedar Point shales and shaly limestones ¹**Chase group** ¹Chicago Mound formation ²Chikaskia member (of Harper sandstone) ²Chisholm Creek shale member (of Wellington formation) ²**Cimarron group** ¹†Cottonwood formation ¹

United States—Continued

Kansas—Continued

Permian—Continued

- Cottonwood limestone**¹ member (of Beattie limestone); limestone in Oklahoma
- †Cottonwood shales¹
- Council Grove group**¹
- Cresswell limestone**¹ member (of Winfield limestone)
- Crisfield member (of Salt Plain formation)²
- †Crusher Hill alternating shales and limestone¹
- Day Creek dolomite**¹; member (of Cloud Chief formation in Oklahoma)
- Dog Creek shale**¹
- Donegal limestone¹
- Doyle shale¹
- Easy Creek shale**¹
- †Elmdale shale¹ or formation¹
- Elmo limestone member¹ (of Wellington shale)
- †Enterprise shale¹
- Eskridge shale**¹
- †Flint Hills division¹
- Florena shale member** (of Beattie limestone); (as member of Garrison shale¹)
- †Florence limestone¹
- Florence limestone member** (of Barneston limestone); (as Florence flint¹)
- Flower-pot shale**¹
- Fort Riley limestone**¹ member (of Barneston limestone)
- Funston limestone**¹
- Gage shale**¹ member (of Doyle shale)
- †Garrison shale¹
- Geuda salt measures¹
- Geuda Springs shale member (of Wellington formation)²
- Grant shale**¹ member (of Winfield limestone)
- Greeley gypsum¹
- Grenola limestone** (as formation¹)
- Hackberry shale¹
- Harper sandstone**¹
- Havensville shale member** (of Wreford limestone)¹
- Herington limestone**¹ member (of Nolans limestone); limestone in Oklahoma
- Highland shale member (of Wellington formation)²
- Hollenberg limestone¹
- Hooser shale**¹ member (of Bader limestone)
- Hope gypsum¹
- Hutchinson salt member** (of Wellington formation); (as Hutchison salt bed¹)

United States—Continued

Kansas—Continued

Permian—Continued

- Janesville shale** (R. C. Moore and M. R. Mudge, 1956, Am. Assoc. Petroleum Geologists Bull., v. 40, no. 9, p. 2273)
- Jenkins clay¹
- Kiger division¹
- Kingman sandstone member (of Harper sandstone)²
- Legion shale member**¹ (of Grenola limestone)
- †Luta limestone¹
- †Manhattan beds¹
- †Manhattan limestone¹
- Marion concretionary limestone¹
- Marion flint¹
- †Marion formation¹
- Matfield shale**¹
- Medicine Lodge gypsum**¹ member (of Blaine formation)
- Milan limestone member (of Wellington formation)²
- Morrill limestone**¹ member (of Beattie limestone)
- †Neosho shale member (of Garrison shale)¹
- Nescatunga gypsum member (of Blaine formation)²
- Neva limestone**¹ member (of Grenola limestone)
- Newbern shale¹
- Ninnescah shale**²
- Nippewalla group**²
- Nolans limestone**¹
- Ogden flint¹
- Oketo shale**¹ member (of Barneston limestone)
- Onaga shale** (as limestone¹)
- †Pearl shale¹
- Prairie Creek limestone lentil (in Geuda Springs shale member of Wellington formation)²
- †Red Bluff sandstone¹
- Runnymede sandstone member (of Ninnescah formation)²
- Sabetha limestone¹
- Sallyards limestone member**¹ (of Grenola limestone)
- Salt Fork division¹
- Salt Plain shale¹
- Sanatorium limestone lentil (in Geuda Springs shale member of Wellington formation)²
- Schroyer limestone**¹ member (of Wreford limestone)
- Shimer gypsum member** (of Blaine formation)¹
- Slate Creek limestone member (of Wellington formation)²
- Solomon gypsum¹
- Stearns shale**¹
- Stone Corral**¹ dolomite

United States—Continued

Kansas—Continued

Permian—Continued**Stovall limestone**¹ member (of

Winfield limestone)

Strickler limestone¹†Strong flint¹†Strong City beds¹**Sumner group**¹†Sun City marble¹†Thrall limestone member (of Foraker limestone)¹**Threemile limestone**¹ member

(of Wreford limestone)

Towanda limestone member (of Doyle shale)¹**Towle shale**¹ member (of Onaga shale)Udall limestone lentil (in Geuda Springs shale member of Wellington formation)²**Wellington formation**¹†Wellington marble¹West Point shale (in Admire shale)¹**Winfield limestone**¹**Wreford limestone**¹*Pennsylvanian*†Allen limestone member¹Altoona limestone¹†Americus beds¹†Barclay limestone¹Bourbon formation¹ or group¹Boyer sand¹ (subsurface)†Burlingame shale¹†Burlington limestone¹†Buxton formation¹†Calhoun limestone¹Caneyville shale¹†Carlyle limestone¹Cave Springs sandstone¹†Chautauqua sandstone¹†Coffeyville limestone¹Columbia Ford limestone¹Concreto shale¹Dashner limestone¹Dodge limestone¹ (subsurface)Dun limestone¹†Dunlap limestone¹†Earlton limestone¹Einstine sandstone¹Elk Falls limestone¹Elm Branch shale¹†Emporia blue limestone¹†Emporia reservoir shales¹†Erie limestone¹Eudora limestone¹†Eureka beds¹†Eureka limestone¹Fall River sandstone¹Frenck shale¹†Garnett limestone¹Gorham sand¹ (subsurface)Hancock sand¹ (subsurface)Humboldt limestone¹Humphrey shale¹

- Auburn shale ¹
- Bachelor Creek limestone ¹ member (of Howard limestone)
- Bern limestone (R. C. Moore and M. R. Mudge, 1956, Am. Assoc. Petroleum Geologist, v. 40, no. 9, p. 2276–2277.
- Big Springs limestone (in Lecompton limestone)¹
- Burlingame limestone member (of Bern limestone); (as member of Wabaunsee formation)¹
- Calhoun shale (as member of Shawnee formation)¹
- Caneyville limestone ¹
- Cedarvale shale member (of Scranton shale)¹
- Clay Creek limestone (in Kanwaka shale)¹
- Coal Creek limestone member (of Topeka limestone)¹
- Deer Creek limestone (as member of Shawnee formation)¹
- Doniphan shale (in Lecompton limestone)¹
- Douglas group ¹
- Dover limestone ¹ member (of Stotler limestone)
- Dry shale ¹ member (of Stotler limestone)
- Du Bois limestone member (of Topeka limestone)¹
- Elgin sandstone; ¹ member (of Vamoosa formation in Oklahoma)
- Elmont limestone ¹ member (of Emporia limestone)
- Emporia limestone ¹
- French Creek shale ¹ member (of Root shale)
- Friedrich shale ¹ member (of Root shale)
- Grandhaven limestone ¹ member (of Stotler limestone)
- Happy Hollow limestone member (of Scranton shale)¹
- †Hartford limestone (in Shawnee formation)¹
- Harveyville shale ¹
- Haskell limestone ¹ member (of Stranger formation)
- Howard limestone ¹; †member (of Shawnee formation)¹
- Iowa Point shale (in Calhoun shale)¹
- Ireland sandstone ¹ member (of Lawrence shale)
- Jackson Park shale member (of Kanwaka shale)¹
- Jim Creek limestone ¹ member (of Root shale)

United States—Continued

Kansas—Continued

Pennsylvanian (Virgil)—Con.

- Jonesburg sandstone member (of Lawrence shale; of Vamoosa formation in Oklahoma); (as member of Nelagoney formation)¹
- Kanwaka shale ¹; †member (of Shawnee formation)¹
- Kereford limestone †member (of Oread limestone)¹
- Lawrence shale ¹; member (of Douglas formation)¹
- Leavenworth limestone member (of Oread limestone)¹
- Lecompton limestone ¹; †member (of Shawnee formation)¹
- Maple Hill limestone ¹ member (of Zeandale limestone)
- Oread limestone ¹; limestone member (of Vamoosa formation in Oklahoma)
- †Osage limestone (in Shawnee formation)¹
- †Osage City limestone ¹
- †Osage City shale (in Shawnee formation)¹
- Oskaloosa shale (in Deer Creek limestone)¹
- Ozawkie limestone (in Deer Creek limestone)¹
- Reading limestone ¹ member (of Emporia limestone)
- Robbins shale member ¹ (of Stranger formation)
- Root shale (R. C. Moore and M. R. Mudge, 1956, Am. Assoc. Petroleum Geologist, v. 40, no. 9, p. 2274 (fig. 1), 2275)
- Sac-Fox subgroup ¹
- Scranton shale ¹; †member (of Shawnee formation)¹
- Severy shale ¹; †member (of Shawnee formation)¹
- Shawnee group ¹; †formation in Missouri and Iowa ¹
- Silver Lake shale member (of Scranton shale)¹
- Soldier Creek shale ¹ member (of Bern limestone)
- Spring Branch limestone (in Lecompton limestone)¹
- Stormont limestone member (of Pierson Point shale)²
- Stranger formation ¹
- Stull shale (in Kanwaka shale)¹
- Tarkio limestone member (of Zeandale limestone); (as member of Wabaunsee formation)¹
- Tecumseh shale ¹ or formation; †member (of Shawnee formation)¹
- Topeka limestone ¹; †member (of Shawnee formation)¹

United States—Continued

United States—Continued

Kansas—Continued

Pennsylvanian (Des Moines)—Con.

Bandera Quarry sandstone member (of Bandera shale)²

Breezy Hill limestone member (of Cherokee shale) of Senora formation in Oklahoma²

Cherokee shale¹

Coalvale cyclothem or formation²

†Columbus sandstone (in Cherokee shale)¹

Croweburg cyclothem or formation²

Englevale channel sandstone¹

Fleming cyclothem or formation²

†Fort Scott coal series¹

Fort Scott limestone¹; †limestone member (of Henrietta formation)¹

†Fort Scott marble series (in Cherokee shale)¹

Idenbro cyclothem (including Idenbro limestone)²

Knifeton cyclothem or formation²

Laberdie cyclothem (including Laberdie limestone)²

Labette shale¹; †shale member (of Henrietta formation)¹

Lake Neosho shale member (of Altamont limestone)²

Little Osage shale member (of Fort Scott limestone)²

Marmaton group¹; †Marmaton formation¹

Memorial shale¹

Mineral cyclothem or formation²

Mine Creek cyclothem (including Mine Creek shale)²

Mulky cyclothem or formation²

Neutral cyclothem or formation²

Norfleet cyclothem (including Norfleet limestone)²

Pawnee limestone¹; member (of Oologah limestone in Oklahoma)

Perry Farm cyclothem (including Perry Farm shale)²

Pilot cyclothem or formation²

Riverton cyclothem or formation²

Rowe formation or coal cycle²

Scammon cyclothem or formation²

Stice cyclothem²

Walter Johnson sandstone member (of Nowata shale)²

Weir cyclothem or formation²

Pennsylvanian (Morrow)

Kearney formation² (subsurface)

Mississippian(?)

Stanhope sand¹ (subsurface)

Lower Mississippian

†Cherokee limestone¹

Cowley formation² (subsurface)

United States—Continued

Kansas—Continued

Lower Mississippian—Continued

Short Creek oolite member (of Boone limestone)¹ or (of Keokuk limestone)

Skelton shale¹ (subsurface)

Watchorn formation² (subsurface)

Devonian or Silurian(?)

Younkin formation¹ (subsurface)

Middle Devonian

Ediger limestone¹ (subsurface)

Silurian

Hollow dolomite¹ (subsurface)

Ordovician

Smock sand¹ (subsurface)

Sluss sand¹ (subsurface)

Stapleton zone¹ (subsurface)

Urschel lime¹ (subsurface)

Ordovician(?)

Engle shale¹ (subsurface)

Kentucky

Pleistocene

Fulton loam¹

Graves Creek formation¹

Hickman group¹

Paducah formation¹

Tennessee River gravels¹

Union formation¹

Tertiary or older

Tip Top sand¹

Pliocene or Pleistocene

Irvine formation¹

Pennsylvanian

Aberdeen sandstone (in Pottsville formation)¹

Baker sand¹ (subsurface)

Battery Rock cyclothem (including Battery Rock sandstone or conglomerate)²

Beattyville shale¹

†Beaver sandstone¹

Bee Spring sandstone¹

Bee Tree shale²

Bald Hill shale (in Henshaw formation)¹

Carthage limestone (in McLeansboro formation)¹

Corbin conglomerate lentil¹ (in Lee formation)

†Curlew sandstone (in Tradewater formation)¹

Deanefield shale (in Pottsville formation)¹

DeKoven formation¹

Dingus limestone (in Pottsville formation)¹

†Dixon formation¹

†Dixon sandstone (in Henshaw formation)¹

Dwale shale¹

Elkins Fork shale¹

Epperson sand¹ (subsurface)

Finnie sandstone (in Tradewater formation)¹

United States—Continued

Kentucky—Continued

Pennsylvanian—Continued

- Finnie Bluff sandstone ¹
- Flat Lick sandstone ¹
- Flat Top Mountain sandstone ¹
- Flint Ridge flint ¹
- Grundy Knob limestone ²
- Hartford limestone ¹
- High Rock sandstone ¹
- Horton sand ¹ (subsurface)
- Jolly limestone (in McLeansboro formation) ¹
- Kendrick shale ¹
- Kinchloe limestone ¹
- Lead Creek limestone ¹
- Lewisport limestone ¹
- Livingstone conglomerate ¹
- Lost Creek limestone ¹
- Magoffin beds ¹
- Mount Gilead sandstone (in Henshaw formation) ¹
- Mount Gilead shale (in Henshaw formation) ¹
- Mulford formation ¹
- Newburg limestone ¹
- Olive Hill fire clay (in Pottsville formation) ¹
- Peach Orchard sandstone ¹
- Pike sand ¹ (subsurface)
- †Pine Mountain group ¹
- Puncheon Creek sandstone ¹
- †Rockcastle group ¹
- Saltlick beds ¹
- Sebree sandstone (in Carbondale formation) ¹
- †Seven Sisters sandstone ¹
- South Carrollton limestone ¹
- Top Hill sandstone ¹
- Vanderburg sandstone (in Henshaw formation) ¹
- Wages sand ¹ (subsurface)
- Williamsburg sand ¹ (subsurface)
- Wild Cat Mountain conglomerate ¹

Upper Pennsylvanian

- Anvil Rock sandstone member (of Lisman formation); (as member of McLeansboro formation) ¹
- Henshaw formation ¹
- Lisman formation ¹
- Madisonville limestone ¹ member (of Lisman formation)
- Providence limestone ¹ member (of Lisman formation)

Middle Pennsylvanian

- Blacksnake sandstone (of Hance formation) ¹
- Catron formation ¹
- Cawood sandstone member (of Hance formation) ¹
- Curlew limestone member (of Tradewater formation) ¹

United States—Continued

Kentucky—Continued

Middle Pennsylvanian—Continued

- Fork Ridge sandstone member (of Mingo formation) ¹
- Hance formation ¹
- Harlan sandstone ¹
- Hignite formation ¹
- Jesse sandstone member (of Catron formation) ¹
- Naese sandstone member (of Lee formation) ¹
- Puckett sandstone member (of Mingo formation) ¹
- Red Spring sandstone member (of Hignite formation) ¹
- Reynolds sandstone member (of Hignite formation) ¹
- Slater sandstone member (of Mingo formation) ¹
- Tradewater formation ¹; group in Illinois
- Whetstone Creek shale member (of Breathitt formation) ¹
- Yellow Creek sandstone member (of Hance formation) ¹

*Lower and Middle Pennsylvanian**Breathitt formation* ¹*Lower Pennsylvanian*

- Caseyville sandstone ¹; group in Illinois
- Rockcastle sandstone or conglomerate member (of Lee formation) ¹

Mississippian

- Atherton clay ¹
- Barlow lime ¹ (subsurface)
- Barlow sand ¹ (subsurface)
- Beaver Creek "sand" ¹
- †Birdsville formation or group ¹
- Brooks bed ¹

- Corder "sand" ¹ (subsurface)
- Eggners Ferry chert ²
- Kentucky shale ¹
- Linietta clay ¹
- Major sand ¹ (subsurface)
- Mammoth Cave series ¹
- Morris Mountain shaly member (of Logan formation) ¹
- Mount Pisgah sand ¹ (subsurface)
- †Ohara limestone member ¹ (of Ste. Genevieve limestone)
- Otter sand ¹ (subsurface)
- Pellville sand ¹ (subsurface)
- Petersville shale ¹
- †Princeton limestone ¹
- Rock House sandstone ¹
- †Shot Pouch sandstone ¹
- Slickford sand ¹ (subsurface)
- Vanceburg black shale ¹
- Vanceburg sandstone member ¹ (of Cuyahoga formation)
- Weir sand ¹ (subsurface)

United States—Continued

Kentucky—Continued

Mississippian—Continued

 West Point member (of Warsaw formation) ¹
Upper Mississippian
Bethel sandstone ¹

 †Big Clifty sandstone ¹

 Bradley sand ¹ (subsurface)

Buffalo Wallow formation ¹

 Clover Creek limestone ¹
Fredonia oolite member (of Ste. Genevieve limestone) ¹

 Garfield sandstone ¹
Gasper formation or oolite ¹

 Girkin formation ¹
Glen Dean limestone ¹
Hardinsburg sandstone ¹

 Jett sand ¹ (subsurface)

 Leitchfield formation ¹

 Leitchfield marl ¹
Levias sandstone member (of Ste. Genevieve limestone) ¹

 †Lockhart formation ¹

 Penrod sand ¹ (subsurface)

Sample sandstone or sandstone member (of Gasper oolite) ¹

 †Sloan Valley limestone ¹
Somerset shale member (of Warsaw formation) ¹
Spann limestone member (of Pennington shale) ¹

 †Stephensport bed ¹

 Stephensport (broad usage) ¹
Tar Springs sandstone ¹

 Tribune sandstone ¹
Wildie sandstone member (of Warsaw formation) ¹
Lower Mississippian

 Athertonville facies (of Brodhead formation) ²

 Bluestone facies (of New Providence formation) ²

 Boone Gap facies (of New Providence formation) ²
Brodhead formation ²

 Caney Creek member (of Brodhead formation) ²

 Christy Creek siltstone member (of Brodhead formation) ²

 Clay City siltstone member (of New Providence formation) ²

 Clementsville limestone member (of Brodhead formation) ²

 Combs Mountain siltstone member (of Brodhead formation) ²

 Conway Cut siltstone member (of Brodhead formation) ²

 Culver Springs shale member (of Brodhead formation) ²

 Cummins Station shale member (of Muldraugh formation) ²

United States—Continued

Kentucky—Continued

Lower Mississippian—Continued

 Dicks River facies (of New Providence formation) ²

 Farmers siltstone member (of New Providence formation) ²

 Forbush Creek facies (of New Providence formation) ²

 Frenchburg siltstone member (of Brodhead formation) ²

 Ginseng siltstone member (of Brodhead formation) ²

 Greasy Creek facies (of Fort Payne formation) ²

 Gum Sulphur siltstone member (of New Providence formation) ²

 Haldeman siltstone member (of Brodhead formation) ²
Holtsclaw sandstone ¹

 Holtsclaw Hill facies (of Brodhead formation) ²

 Hummel facies (of Muldraugh formation) ²

 Indian Fort shale member (of Brodhead formation) ²

 Irvine facies (of Brodhead formation) ²

 Junction City facies (of New Providence formation) ²

 Keith Knob facies (of New Providence formation) ²
Kenwood sandstone ¹

 Lebanon Junction siltstone member (of Brodhead formation) ²

 Liberty facies (of Brodhead formation) ²

 McKinney Knob member (of Brodhead formation) ²

 Maretburg facies (of Muldraugh formation) ²

 Morehead facies (of Brodhead formation) ²
Muldraugh formation ²

 Olive Hill facies (of Muldraugh formation) ²

 Perry Branch siltstone member (of Brodhead formation) ²

 Pilot Knob facies (of Brodhead formation) ²

 Rolling Fork limestone member (of Brodhead formation) ²

 Rothwell shale member (of Muldraugh formation) ²

 Stanton facies (of New Providence formation) ²

 Steels Knob chert facies (of Muldraugh formation) ²
Devonian

 Campton sand ¹ (subsurface)

Houchen Creek limestone ¹ bed (in Hamlin member of Janesville shale)
Howe limestone ¹ member (of Red Eagle limestone)
Hughes Creek shale ¹ member (of Foraker limestone)
Indian Cave channel sandstone bed (in Towle member of Onaga shale); (as sandstone ¹)
Johnson shale ¹
Kinney limestone ¹ member (of Matfield shale)
Krider limestone ¹ member (of Nolans limestone)
Long Creek limestone ¹ member (of Foraker limestone)
Middleburg limestone ¹ member (of Bader limestone)
Oaks shale ¹ bed (in Hamlin member of Janesville shale)
Odell shale ¹

United States—Continued
 Nebraska—Continued
Permian—Continued
Paddock shale¹ member (of Nolans limestone)
Roca shale¹
Salem Point shale member¹ (of Grenola limestone)
Speiser shale¹
Stiine shale¹ bed (in Hamlin shale member of Janesville shale)
West Branch shale¹ member (of Janesville shale)
Wymore shale¹ member (of Matfield shale)
Pennsylvanian
 Ashland limestone¹
 Cedar Creek limestone¹
 Cullom limestone¹
 Fargo limestone¹
 Lehmer limestone member (in Admire shale)¹
 Louisville limestone¹
 Meadow limestone¹
 Miles limestone member¹ (of Falls City formation)
 Nehawka limestone¹
 Oreapolis limestone¹
 Preston limestone¹
 Union limestone¹
Pennsylvanian (Virgil)
 Avoca limestone (in Lecompton limestone)¹
 Beil limestone (in Lecompton limestone)¹
Brownville limestone¹ member (of Wood Siding formation)
 Cass limestone¹
Church limestone¹ member (of Howard limestone)
 Ervine Creek limestone (in Deer Creek limestone)¹
Heebner shale¹ member (of Oread limestone)
 Jones Point shale (in Calhoun shale)¹
 Kenosha shale (in Tecumseh shale)¹
 King Hill shale (in Lecompton limestone)¹
 Larsh shale (in Deer Creek limestone)¹
 Little Pawnee shale member (of Cass formation)²
 Minersville shale member (of Friedrich formation)²
 Morton shale²
Nebraska City limestone¹ member (of Wood Siding formation)
 Nemaha formation, member, or subgroup¹
 Ost limestone (in Tecumseh shale)¹

United States—Continued
 Nebraska—Continued
Pennsylvanian (Virgil)—Continued
 Oteo shale member (of Friedrich formation)²
 Palmyra limestone member (of Friedrich formation)²
 Pierson Point shale¹
 Plattford shale (in Scranton shale)¹
Plattsmouth limestone¹ member (of Oread limestone)
Pony Creek shale¹ member (of Wood Siding formation)
 Queen Hill shale (in Lecompton limestone)¹
 Rakes Creek shale (in Tecumseh shale)¹
 Richardson subgroup¹
 Rock Bluff limestone (in Deer Creek limestone)¹
Rulo limestone¹ member (of Scranton shale)
 Sheldon limestone (in Calhoun shale)¹
 Shoemaker limestone¹
Snyderville shale¹ member (of Oread limestone)
 South Fork limestone¹
 Sturm limestone (in Lawrence shale)¹
 Table Creek shale¹
 Taylor Branch limestone¹
 Turner Creek shale (in Topeka limestone)¹
 Weeping Water limestone (in Oread limestone)¹
 Winnebago shale¹
Wood Siding formation²
Pennsylvanian (Missouri)
 Dyson Hollow limestone zone or member (of Stoner member of Stanton formation)²
 Kiewitz shale (in Stanton limestone)¹
 P. W. A. Quarry limestone member (of Drum formation)²
 Richfield Quarry shale member (of Drum formation)²
Rock Lake shale¹ member (of Stanton limestone)
 Sarpy formation²
South Bend limestone¹ member (of Stanton limestone)
Stoner limestone¹ member (of Stanton limestone)
Mississippian
 Boice shale² (subsurface)
 Nevada

Almont sandstone (in Tongue River member of Fort Union formation) ²

Cannonball marine member (of Fort Union formation); (as member of Lance formation) ¹

Fort Union formation ¹

Great Bend coal group ¹

Medora coal group ¹ (in Tongue River member of Fort Union formation)

Sentinel Butte shale member (of Fort Union formation) ¹

Cretaceous

Breien member (of Hell Creek formation) ²

Jurassic

Kline member (of Nesson formation) ² (subsurface)

Nesson formation ² (subsurface)

Poe evaporite member (of Nesson formation) ² (subsurface)

Mississippian and Devonian(?)

Bakken formation ² (subsurface)

Middle(?) and Upper Devonian

Souris River formation ² (subsurface)

Middle Devonian

Prairie formation (as evaporite) ² (subsurface)

Ohio

Pleistocene

Springfield clay ¹

Pleistocene (Wisconsin)

Chillicothe till ¹

Pleistocene (pre-Illinoian)

Minford silt ¹

Permian

Hostetter limestone ²

Marietta sandstone ¹

Muskingum conglomerate (in Washington formation) ¹

Pennsylvanian

Anderson clay ¹

Athens group ¹

Anthony cyclothem (including Anthony shale and sandstone) ²

Ballou clay (in Allegheny formation) ¹

Barton clay (in Conemaugh formation) ¹

Bear Run member (of Pottsville formation) ¹

Bedford clay (in Pottsville formation) ¹

Bellaire sandstone (in Conemaugh formation) ¹

Big Run sandstone ²

Bloomfield limestone (in Conemaugh formation) ¹

Boggs member (of Pottsville formation) ¹

United States—Continued

Ohio—Continued

Pennsylvanian—Continued

Brill sand ¹ (subsurface)

Buell Run sand ¹ (subsurface)

Cow Run sandstone (in Conemaugh formation) ¹

Door Run shale member (of Allegheny formation) ²

Dresden sandstone (in Pottsville formation) ¹

Fishpot sandstone (in Monogahela formation) ¹

Flag Spring limestone (in Conemaugh formation) ¹

Flint Ridge clay (in Pottsville formation) ¹

Flint Ridge flint (in Allegheny formation) ¹

Flint Ridge limestone ¹

Flint Ridge shale (in Pottsville formation) ²

Fly sandstone ²

Gaysport member (of Conemaugh formation) ¹

Germantown sand ¹ (subsurface)

Goose Run sand ¹ (subsurface)

Gore limestone (in Pottsville formation) ¹

Hamden limestone or member (in Allegheny formation) ¹

†Hanging Rock limestone (in Allegheny formation) ¹

Harlem clay (in Conemaugh formation) ¹

Harrison member (of Pottsville formation) ¹

Hecia sandstone (in Allegheny formation) ¹

Hewetts Branch sandstone (in Allegheny formation) ¹

Hockingport sandstone ²

†Howenstein limestone (in Allegheny formation) ¹

Huckleberry clay (in Pottsville formation) ¹

Kittanning limestone (in Allegheny formation) ¹

Lawrence clay (in Allegheny formation) ¹

Logan fire clay (in Pottsville formation) ¹

Lowell limestone (in Allegheny formation) ¹

Lowellville limestone (in Pottsville formation) ¹

McArthur member (in Pottsville formation) ¹

Macksburg sandstone ¹

Mason clay (in Conemaugh formation) ¹

†Massillon sandstone (in Pottsville formation) ¹

Maxville block ore (in Pottsville formation) ¹

United States—Continued

Ohio—Continued

Pennsylvanian—Continued

Licking shale ¹

Lithopolis member (in Cuyahoga formation)¹

Logan formation ¹

†Logan group ¹

†Logan limestone or flint (in Logan formation)¹

Maxville limestone ¹

†Newtonville limestone ¹

Pleasant Valley member (of Cuyahoga formation)²

Portsmouth member (in Black Hand formation)²

Pretty Run sandstone facies (of Logan formation)²

Racoon shale ¹

Rarden shale member ¹ (of Cuyahoga formation)

Richland limestone and flint ¹

Rittman conglomerate lentil (of Cuyahoga formation)¹

River Styx conglomerate facies (of Cuyahoga formation)²

†Royalton formation ¹

Rushville group ¹

Sagamore sandstone member

(of Bedford shale); (as lentil ¹)

Scioto Valley shale facies ¹ (of Cuyahoga formation)

Scotts Creek flint ¹

Sunbury shale ¹

Tinkers Creek shale facies (of Cuyahoga formation)²

Toboso conglomerate facies ¹ (of Cuyahoga formation)

Vinton member ¹ (of Logan formation)

Warren sandstone ¹

†Waverly conglomerate ¹

Welsh stray sand ¹ (subsurface)

Mississippian and Devonian(?)

†Sunbury calciferous sandrock ¹

†Waverly group ¹

Devonian(?)

Grand Rapids sandstone ¹

Upper Devonian

Chagrin shale ¹

Cleveland member (of Ohio shale); (as shale ¹)

†Erie shale ¹

Huron member (of Ohio shale); (as shale ¹)

Ohio shale ¹

Olentangy shale ¹

†Olmsted shale member (of Cleveland shale)¹

Scioto slates and shales ¹

Middle Devonian

Bellepoint member (of Columbus limestone)¹

Columbus limestone ¹

Delaware limestone ¹

Delhi limestone ¹

United States—Continued

Ohio—Continued

Middle Devonian—Continued

Dublin blue shale ¹

East Liberty bone bed (in Columbus formation)²

Eversole chert ¹

Klondike member (of Columbus limestone)¹

Marble Cliff limestone (in Columbus limestone)¹

Marblehead limestone (in Columbus limestone)¹

Plum Brook shale ²

Plum Creek shale ¹

Prout limestone ¹

Prout series ¹

Sandusky limestone ¹

Silica shale (in Traverse formation)¹

Sylvania sandstone ¹ or **formation**

Tenmile Creek dolomite ²

Venice member (of Columbus limestone)¹

West Jefferson sandstone ¹

Lower Devonian

Austinburg sand ¹ (subsurface)

Cambridge sand ¹ (subsurface)

Holland sandstone ¹

Lucas formation (as dolomite ¹)

Monclova sandstone ¹

Silurian

Beavertown marl (in Brassfield limestone)¹

Harriett formation ²

†Montgomery formation ¹

Stadler sand ¹ (subsurface)

Silurian(?)

Hillsboro sandstone ¹

Upper Silurian

Bass Islands dolomite ¹

Greenfield dolomite ¹ member (of Bass Island dolomite)

Put-in-Bay dolomite member (of Bass Island dolomite)¹

Tymochtee formation (as shale ¹)

Middle Silurian

Bisher formation ¹

Cedarville dolomite (as limestone ¹)

Dayton limestone ¹

Durbin formation ¹

Eaton beds ¹

Euphemia dolomite ¹

Lilley formation ¹

Massie clay ¹

Newburg sand ¹ (subsurface)

Pebbles dolomite ¹

Piqua stone ¹

Springfield limestone ¹ or **dolomite**

West Union limestone ¹

Lower Silurian

Centerville formation ¹

United States—Continued

Ohio—Continued

Upper Ordovician

Arnheim shale¹; formation in Kentucky; limestone in Tennessee

Bellevue limestone member (of McMillan formation)¹

Blanchester division (in Richmond group)¹

Cincinnatian series¹

Clarksville division (in Richmond group)¹

Corryville shale member (of McMillan formation)¹

†Covington group¹

Eden group¹ or formation

Fairmont limestone member (of Fairview formation)¹

Fairview formation¹

Fort Ancient division (in Richmond group)¹

Fulton shale¹

†Hill Quarry beds¹

†Lebanon beds¹

McMicken member (in Latonia shale)¹

McMillan formation¹

Mount Auburn shale member (of McMillan formation)¹

Mount Hope shale member (of Fairview formation)¹

Point Pleasant limestone¹

Turkey Track limestone layer (in Richmond group)¹

Waynesville shale¹; limestone in Kentucky

†Warren beds¹

Upper Ordovician(?)

Belfast bed¹

Middle Ordovician

Bromley shale (in Cynthiana formation)¹ (see p. 622)

†River Quarry beds¹

Oklahoma

Quaternary(?)

†Peaceable sand¹

Pleistocene

Gerty sand¹

Tertiary

Black Mesa basalt¹

Tertiary(?)

†Fort Sill series¹

Pliocene or Pleistocene

Grandfield conglomerate¹

Pliocene, lower

Laverne formation¹

Upper Cretaceous

†Silo sandstone¹

Lower and Upper Cretaceous

Washita group¹

Lower Cretaceous

†Antlers sand¹

Baum limestone member (of Paluxy sand)²

Bennington limestone²

United States—Continued

Oklahoma—Continued

Lower Cretaceous—Continued

Bokchito formation¹

Caddo limestone¹

Camp Supply beds¹

Comet Creek bed¹

Goodland limestone¹

†Indian Territory division¹

Kiamichi formation¹

Upper Jurassic

Exeter sandstone¹

Triassic(?)

Custer formation¹

Permian

Addington formation¹

Altona dolomite member (of Blaine gypsum)¹

†Amphitheater dolomite¹

Antelope Flats member (of Wellington formation)²

Anthony sandstone²

Antioch sandstone¹

Asher formation¹

Auger conglomerate lentil (of Wichita formation)¹

Beaver gypsum¹

Bessie member (of Quartermaster formation)¹

Billings member (of Wellington formation)²

Bison banded member¹ (of Hennessy shale)

Blackwell sand¹ (subsurface)

Blaine gypsum or formation¹

Bu-Vi-Bar bed¹

Caddo sand¹ (subsurface)

Cedartop gypsum member (of Blaine gypsum)¹

Chaney gypsum member (of Blaine gypsum)¹

Chapman dolomite¹

Chickasha formation¹

Cimarron anhydrite²

Cloud Chief formation (as gypsum)¹

Cornish sandstone member¹

Creta dolomite (in Blaine formation)¹

Crouse limestone or formation (as member of Garrison shale)¹

†Cushing limestone member (of Elmdale formation)¹

†Cyril gypsum member¹ (of Greer formation)

†Delphi dolomite¹

Doe Creek sandstone member (of Marlow formation)²

Doxey member (of Quartermaster formation)¹

Duncan sandstone¹

Elk City member (of Quartermaster formation)¹

El Reno group (as formation)¹

Enid formation¹

- Grande Greve limestones ¹
- Mount Joli formation ¹
- Murailles formation ¹
- Needle chert ²
- Needle Mountain group ²
- Needle Mountain limestone ²
- Percé formation ¹
- Percé Rock beds ²
- Porphyry Mountain group ²
- St. Albans limestones ¹

Lower(?) Devonian

- York Lake series ²

Silurian or Devonian

- Eustis porphyry ²

Silurian(?) or Devonian(?)

- St. Juste group ²

Silurian and Devonian

- Dartmouth River series ²
- Grande River-Portage River formation ²
- St. Jean River series ²

Silurian

- Anticosti group ¹
- Beesie formation ¹
- Beesie River formation ¹
- Bouleaux formation (in Chaleur series) ¹
- Cabano River limestone ¹
- Chaleur series ¹
- Chatte River limestones ¹
- Chicotte formation ¹
- Clemville formation (in Chaleur series) ¹
- Gascons formation (in Chaleur series) ¹
- George Pond breccia ²
- Glenbrooke shale ²
- Gun River formation ²
- Indian Point formation ¹
- Jupiter formation ¹
- Jupiter River formation ¹
- La Vielle formation (in Chaleur series) ¹
- Marsouin series ¹
- Peasley Pond conglomerate and sandstone ²
- St. Leon formation ¹
- Sargent Bay limestone ²
- Sayabec formation ¹
- Sherbrooke group ²
- Temiscouata group ¹
- Val Brilliant formation ¹
- West Point formation (in Chaleur series) ¹

Canada—Continued

Quebec—Continued

Middle Silurian

Anse Cascon formation ²

Mount Alexander series ²

Ordovician or Silurian

Ladystep volcanics ¹

Moulton Hill granite ²

Ordovician

Basswood Creek formation ¹

Beauceville series ¹

Beauharnois formation ¹

Becancour River formation ²

Bedford formation ¹

Breault member (of Nicolet River formation) ²

Carmel River member (of Becancour River formation) ²

Charleton formation ¹

Citadel series ¹

Compton formation ¹

Corey limestone ¹

Ellis Bay formation ²

English Head formation ¹

Eustis-Moulton Hill series ²

Farnham limestone ¹

Gamachian series ¹

Iberville formation ¹

Lachine formation ²

Lacolle conglomerate ¹

Leclercville shale ²

Lotbinière shale ²

Magog formation ¹

Matapedia series ¹

Mingan formation ¹

Mystic ¹ (formation)

Nicolet River formation ²

Pierreville member (of Becancour River formation) ²

Pohenagamuk formation ¹

Pontgravé River formation ²

Quebec City formation ¹

Romaine formation ¹

St. Armand limestone ¹

St. Francis series ²

Sr. Hilaire member (of Nicolet River formation) ²

St. Marc limestone ¹

Sherbrooke series ²

Tomifobia slates and limestone ¹

Vaurial formation ¹

Wallace Creek formation ¹

Ordovician(?)

Cabano conglomerate ¹

Frontiere group ²

Gagne Brook series ¹

Maquerean series ¹

Shickshock formation ¹

Weedon schist ¹

Upper Ordovician

Cape Blanc formation ¹

Cape Canon formation ¹

Limekiln conglomerate ¹

Little Indian Pool beds ²

Macastey black shale ¹

Canada—Continued

Quebec—Continued

 Karamat formation ²
 Mejias limestone ²
 Morne Diablo beds ²
 Paradise member (of Cipro formation)²
 Quinam limestone)²
 Retrench marls ²
 Tabaquite series ²
Oligocene(?)
 Ben Lommond formation ¹
Oligocene, upper
 Trinidad Point calcareous clay ²
Oligocene, middle, to Miocene, middle
 Brasso formation ²
Oligocene, middle to upper
 Esmeralda member (of Brasso formation)²

West Indies—Continued
 Trinidad, British West Indies—Con.
Eocene
 Bon Accord conglomerate ²
 Fitt Trace marl ²
 Nariva series ¹
 Soldado Rock formation ¹
Eocene(?)
 Benitie group ²
 Galeota group ²
 Lagoon Navête group ²
 Lagoon Palmiste group ²
Eocene, upper
 Boca de Serpiente formation ²
 Hospital Hill formation ²
 Morne Roche beds ²
 Mount Moriah formation ¹
 Plaisance conglomerate ²
 San Fernando formation¹
 Soldado formation ²
 Ulen Quarry beds ²
 Vista Bella member (of Mount Moriah group)²
Eocene, middle
 Pelican Rock marls ²
Eocene, lower or middle
 Friendship Quarry marl (in Navet formation)²
 Mount Harris beds (in Pointe-à-Pierre formation)²
 Penitence Hill marl (in Navet formation)²
 Pierre Point beds (in Pointe-à-Pierre formation)²
Eocene, lower and middle
 Nariva River marl ²
 Navet formation ²
 Peñal Quarry horizon (in Palo Seco formation)²
Eocene, lower
 Dunmore Hill marl member (of Navet formation)²
 Ramdat marl (in Navet formation)²
 Serpent formation ²
Paleocene
 Chaudiere formation ²
 Cunapo River argiline ²
 Ganteaume conglomerate ²
 Maroc formation ¹
 St. Joseph boulder bed ²
 Soldado formation ²
 Tarouba shale ¹
Paleocene, lower
 Lizard Springs formation ²
Cretaceous or Tertiary
 Parian group ¹
Cretaceous
 La Carriere shale ¹
 Point à Pierre grits ¹
Upper Cretaceous
 Bontour formation ²
 Chert Hill formation ²
 Cunapo-Southern horizon (in Turure formation)²

West Indies—Continued

Trinidad, British West Indies—Con.

Upper Cretaceous—ContinuedGautier formation ²Guayaguayare beds ² (subsurface)Hobsons clay ²Lantern marl (in Chaudiere shale) ²Naparima Hill formation ²Railway Cut marl (in Chaudiere shale) ²San Fernando argiline ²Stack Rock limestone ²Toco Bay beds ²Turure formation ²*Lower Cretaceous*Bon Accord formation ²Cuche formation ²Cuche River beds ²Cumana formation ²Galera formation ²Galera Grit member (of Galera formation) ²Grande Riviere formation ²Grande Riviere Road limestone ²Maridale formation ²Plum Road formation ²San Souci volcanic formation ²Toco formation ²

Zagaya limestone member (of

Toco formation) ²*Lower Cretaceous(?)*Caribbean group ¹*Pre-Cretaceous(?)*Laventille limestone ¹*Jurassic*Cuare limestone ²Maracas beds ²Maraval beds ²

Picon limestone member (of

Laventille formation) ²Rio Seco formation ²*Upper Jurassic*Hollis Reservoir formation ²Quaré limestone (in Hollis Reservoir formation) ²*Jurassic or older*Dragon formation (type locality in Venezuela) ²

Virgin Islands

*Oligocene and Miocene*Kingshill marl ²*Oligocene*Jealousy formation ²*Upper Cretaceous*Mount Eagle volcanics (as series ¹)

Pacific Islands

Detailed information on the geologic formations of all of the smaller islands in the Mid-Pacific area can be found in the Lexique Stratigraphique International, v. 1, Oceanic fascicule 2, Oceanic Proprement Dite.

Pacific Islands—Continued

Caroline Islands (Angaur)

*Pleistocene and Recent*Angaur (Older and Younger) limestone ²

Caroline Islands (Babelthaupt)

*Pleistocene*Palau limestone ²*Pliocene*Airai lignite bearing beds ²*Oligocene*Arumonogui (Almongui) agglomerate ²*Eocene*Aimiriiki (Aimiliiki) agglomerate ²Babelthaupt agglomerate ²Kameset (Gamusetsu) agglomerate ²Ngardok (Galdog) beds ²

Caroline Islands (Eastern)

*Miocene*East Caroline beds ²

Caroline Islands (Fais)

*Pleistocene*Caroline limestone ²Fais limestone ²

Caroline Islands (Garim, island off Yap)

*Pleistocene*Garim limestone ²

Caroline Islands (Kusaie)

*Pliocene*Iisa beds ²*Miocene*Malam (Maremu) beds ²

Caroline Islands (Map)

*Miocene*Map formation ²

Caroline Islands (Peleliu)

*Recent*Ngarekeukl (Galkyoku) limestone ²*Pleistocene*Peleliu limestone ²

Caroline Islands (Ponape)

*Miocene*Metalanim (Matalanim) beds ²

Caroline Islands (Truk)

*Miocene*Getuyoto beds ²

Caroline Islands (Yap)

*Oligocene*Tomil agglomerate ²*Pre-Tertiary(?)*Yap formation ²

Hawaii (Island of Hawaii)

Quaternary (see also *Tertiary, upper, to Quaternary*)Glenwood tuff ²Kapukapu tuff ²Olaa agglomerate ²Waiua formation ²Waimea formation ²

Pacific Islands—Continued

Recent

Huehue flow ²
Keanakakoi formation ²

Recent and Pleistocene, upper(?)

Kamehame basalt ¹

Kau volcanic series ²

Kona tuff formation ²

Puna volcanic series ²

Pleistocene or Recent

Uwekahuna ash ²

Pleistocene and Recent

Hualalal volcanic series ²

Honolulu volcanic series ¹

Pleistocene and Recent(?)

Laupahoehoe volcanic series ²

Pleistocene

Hawi volcanic series ²

Kahuku volcanic series ²

Makanaka drift and stage ²

Pahala ash (as basalt ¹)

Pohakuloa drift and stage ²

Waihu conglomerate ²

Pleistocene(?)

Hilina volcanic series ²

Waa'waa volcanics ²

Tertiary, upper, to Quaternary

Hamakua volcanic series ²

Pliocene(?)

Ninole volcanic series (as basalt¹)

Pololu volcanic series ²

Hawaii (Island of Kahoolawe)

Pliocene(?)

Kanapou volcanic series ²

Hawaii (Island of Kauai)

Pleistocene and Recent

Koloa volcanic series ²

Pleistocene

Palikea formation ²

Pliocene(?)

Haupt formation ²

Makaweli formation ²

Mokuone member (of Makaweli formation) ²

Napali formation ²

Olokele formation ²

Waimea Canyon volcanic series ²

Age(?)

Kauai lavas ²

Waimea conglomerate ²

Hawaii (Island of Lanai)

Pliocene and Pleistocene(?)

Lanai volcanic series (as basalt¹)

Age(?)

Manele basalt ¹

Hawaii (Island of Maui)

Pleistocene or Recent(?)

Lahaina volcanic series ²

Laina volcanics ²

Pleistocene and Recent

Hana volcanic series ²

Pleistocene

Kaupo mud flow ²

Pacific Islands—Continued

Hawaii (Island of Maui)—Continued

Pleistocene(?)

Big Falls picritic basalt ²

Hanawi basaltic andesite ²

Kapaula basaltic andesite ²

Kanae basalt ²

Kilea volcanics ²

Kipahula formation ²

Kuhiwa basaltic andesite ²

Makaino basaltic andesite ²

Makapii basalt ²

Mossman picritic basalt ²

Ohia basalt ²

Paakea basalt ²

Pauwalu basalt ²

Piinaau basalt ²

Waiaaka basaltic andesite ²

Wailuanui basalt ²

Waiokamilo basalt ²

Pleistocene, lower, or Pliocene, upper(?)

Honolua volcanic series ²

Pliocene(?)

Wailuku volcanic series ²

Tertiary, upper(?)

Honomanu volcanic series ²

Kula volcanic series ²

Hawaii (Island of Molokai)

Pleistocene(?)

Kalaupapa basalt ²

Pliocene

West Molokai volcanic series ²

Pliocene(?)

East Molokai volcanic series ²

Hawaii (Island of Niihau)

Pleistocene

Kiekie volcanic series ²

ADDITIONS AND CORRECTIONS TO "ROCK UNITS"

Additions:

The following new units are being used by the U.S. Geological Survey as formations containing earlier named units as members:

Frailles formation (C. A. Kaye, 1959, U.S. Geol. Survey Prof. Paper 317-A, p. 16), Upper Cretaceous of Puerto Rico (p. 616)

Houy formation (P. E. Cloud, V. E. Barnes, and W. H. Hass, 1957, Geol. Soc. America Bull., v. 68, no. 7, p. 810-816), Devonian and Lower Mississippian of Texas (p. 554)

Owens Valley formation (C. W. Merriam and W. E. Hall, 1957, U.S. Geol. Survey Bull. 1061-A, p. 7-12), Permian of California (p. 450)

Recent additions to and revisions of Survey usage made too late to be included in the text:

Genesee formation (as group¹), Upper Devonian of New York (p. 512), containing the following members:

Genesee shale¹ member (p. 512)

Genundewa limestone member (as lentil of Genesee shale¹) (p. 512)

Ithaca member (as shale member of Portage formation¹) (p. 512)

Penn Yan shale member (as Tongue of West River shale²) (p. 512)

Renwick shale member¹ (p. 512)

Sherburne flagstone member (as member of Portage formation¹) (p. 512)

West River shale¹ member (p. 512)

Keyser limestone (as member of Helderberg limestone¹), Upper Silurian and Lower Devonian (?) of West Virginia (p. 571)

McElroy formation (as member of Fayette sandstone¹), upper Eocene of Texas (p. 546), containing the following members:

Dilworth sandstone member (as sand¹) (p. 545)

Manning clay member (as beds¹) (p. 545)

Shublik formation,¹ Middle and Upper Triassic of Alaska (p. 433)

Wells formation,¹ Pennsylvanian and Permian of Idaho (p. 460)

Additions:

- Whitsett formation** (as beds¹), upper Eocene of Texas (p. 546), containing the following members:
Calliham sandstone member (as sand¹) (p. 545)
Dubose member (as sands and clays¹) (p. 546)
Fashing clay member (as clay¹) (p. 546)
Stones Switch sandstone member (as sand¹) (p. 546)

Corrections:

- †Sharon coal group,¹ Lower Pennsylvanian of Maryland, omitted from text
Sugarloaf quartz latite (p. 435), Cretaceous or Tertiary of Arizona (James Gilluly, 1956, U.S. Geol. Survey Prof. Paper 281, p. 90-93), erroneously entered in part A (p. 354) with reference belonging to Sugarloaf series (see below)
Sugarloaf series, Cenozoic of Arizona (H. E. Enlows, 1951, Tulsa Geol. Soc. Digest, v. 19, p. 105-107)

The names listed below are cited under erroneous localities in the text:

- Bromley shale** (in Cynthiana formation),¹ Middle Ordovician of Kentucky (p. 522)
Floyd shale,¹ Upper Mississippian of Georgia (p. 430)
Drywood formation or coal group,¹ Pennsylvanian (Des Moines) of Missouri (p. 526)

Geologic Names of North America

By DRUID WILSON *and others*
