

GEOLOGIC MAP OF THE NANCY LEE TUNNEL (525 LEVEL)

TOPOGRAPHIC MAP AND UNDERGROUND WORKINGS  
MAPS OF THE NANCY LEE MINE, KEYSTONE MINING DISTRICT, MINERAL COUNTY, MONTANA

GEOLOGIC MAP OF THE LOWER TUNNEL (640 LEVEL)

EXPLANATION

- |  |   |  |   |
|--|---|--|---|
|  | Diabase sill  |  | Trace of bedding planes                     |
|  | Revet and Burke formations  |  | Strike and dip of cleavage                  |
|  | Contact, showing dip<br>Dashed where approximately located                |  | Strike of vertical cleavage                 |
|  | Indefinite contact, showing dip   |  | Vein, showing dip                           |
|  | Fault, showing dip<br>Dashed where approximately located                  |  | Vein of high-grade ore                      |
|  | Fault zone, showing dip   |  | Vein of low-grade ore, chiefly siderite     |
|  | Fault breccia   |  | Portal                                      |
|  | Anticline<br>Showing trace of axial plane and bearing and plunges of axis |  | Foot of raise                               |
|  | Strike and dip of beds  |  | Lagging                                     |
|  | Strike of vertical beds   |  | Caved workings                              |
|  | Horizontal beds   |  | Drill holes<br>Showing angle of inclination |
