## PART I. BIBLIOGRAPHY, A-L

---

BY RUTH REECE KING, ELISABETH S. LOUD, MILDRED CHALLMAN MEAD,  
VIRGINIA M. JUSSEN, and GEORGIANNA D. CONANT

---

### INTRODUCTION

This bibliography of North American geology lists publications that appeared from 1950 through 1959 on the geology of the United States (including Alaska and Hawaii), the rest of the North American continent including Greenland, the West Indies, and adjacent islands, and also Guam and other Pacific island possessions—but not the trust territories of the United States. It includes both information previously published in the individual volumes for the ten-year period and supplementary material not included before, notably, a large group of reports prepared by and for the U.S. Atomic Energy Commission, with emphasis on those related to the uranium exploration program, and now made available to the general public either for purchase from the Office of Technical Services of the U.S. Department of Commerce or for examination in designated depository libraries throughout the world.

Articles by American authors published in foreign journals are cited if they deal with North American localities or are of a general nature, but not if they deal with foreign areas. Articles on North America by foreign authors are included regardless of place of publication while those of a general nature are included only if they appeared in North American journals.

The citations are listed alphabetically by author, with full title and publication data. There follows a subject index to the papers cited. Geologic names in the index are those used by individual authors, and their listing here does not imply approval by the Geological Survey.

A list of the serials examined for this cumulative volume is appended. Guidebooks, proceedings, and related types of literature prepared for special conferences, congresses, and symposiums are not included in the serial list but have been cited in the bibliography under the name of either the editor or the issuing society. Report series

issued by the U.S. Atomic Energy Commission or its contractors have been cited in the bibliography under the name of the author or issuing agency and include the report code letters and number, which are necessary for proper identification for purchase or library examination. Because the abbreviations used for the contractor names are usually quite clear and self-explanatory and follow the formats suggested by "Report number series used by the Technical Information Service in cataloging reports," by F. E. Stratton, U.S. Atomic Energy Commission report TID-85 (2d ed., revised), March 1960, they have been omitted from the regular serial list. In the bibliography, the reports have been listed together as a unit, following all the citations of formally published material by a given author, and have the suffix R in their index number for identification purposes.

Assistance of Marjorie Hooker, Jane R. Cruise, John S. Pomeroy, Vsevolod L. Skitsky, Herbert C. Crandell, Jr., Howard R. Cramer, Barbara L. Stringfield, Eleanor H. de Chadenèdes, Florence V. Oftedahl, Margaret Cooper, Margaret E. Barcroft, Virginia E. Rees, Henry J. Ferry, Karlyn Shoemaker, and Fred Jones on various stages of this volume is gratefully acknowledged.

The following U.S. Geological Survey bulletins comprise the issues of the Bibliography of North American Geology through 1959: 746-747 (1785-1918), 823 (1919-28), 937 (1929-39), 1049 (1940-49), 985 (1950), 1025 (1951), 1035 (1952-53), 1054 (1954), 1065 (1955), 1075 (1956), 1095 (1957), 1115 (1958), 1145 (1959), and 1195 (1950-59).

#### ORGANIZATION OF THE INDEX

The index to a bibliography can be used most effectively when the reader is familiar with its organization. The following paragraphs describe the system of headings, subheadings, and entries used in the index to this bibliography.

*Headings.*—The headings comprise the main subdivisions of the index and are recognized by their position, that is, flush with the margin of the column; these headings are in capital letters. They can be classified into two general types: geographic and subject headings. Typical examples of the headings are ALABAMA, ALBERTA, ALUMINUM, and ANTICLINES. Although most of the headings remain the same in each issue of the bibliography, new ones are included and others are discontinued as the need arises.

*Headings with cross references.*—Some headings have a cross reference only, that is, no entries are listed under the heading and the reader is referred to another heading. Examples are:

AQUIFERS. *See* Ground water.

BOTANY, fossil. *See* Paleobotany.

MINERAL MAPS. *See* Maps, *Mineral*.

ORGANIZATION OF THE INDEX

Some headings have entries listed under them but also have cross references to other headings of a similar or related nature. Examples are:

MINERAL DESCRIPTIONS. *See also* Mineralogy.

MINERAL DEPOSITS. *See also* Economic geology.

ECONOMIC GEOLOGY. For areal, *see* subheading *Economic geology* under States and countries. *See also* Mineral deposits; the more important economic minerals.

*Geographic headings.*—The geographic headings are names of countries and colonial possessions in North America, the States, territories, and possessions of the United States, the provinces of Canada, and well-known areas like the Atlantic Coastal Plain, the Appalachians, the Colorado Plateau, and the Williston basin. Examples of geographic headings are: ALABAMA, ALBERTA, CANADA, JAMAICA, MEXICO, NEVADA, and UNITED STATES. CANADA and UNITED STATES are headings used to index papers covering the whole of these areas or more than two or three States or provinces. For example, an article on oil and gas exploration in Manitoba would be indexed under MANITOBA but one on western Canada's oil and gas potentialities would be indexed only under CANADA and not under each province discussed in the paper. Similarly, "Feldspar and mica deposits in the southeastern United States" would be indexed only under UNITED STATES and not under the individual States described.

*Subject headings.*—The subject headings deal with the subject of the paper rather than the geographic areas. They include, among others, the general subdivisions of geology, such as ECONOMIC GEOLOGY, MINERALOGY, PALEONTOLOGY, the phyla and larger classes of animals, such as BRACHIOPODA, MOLLUSCA, and the common economic minerals and metals, such as COPPER, GOLD, MICA, and SILVER, and other geologic entries.

A few of the major subject headings and the scope of the entries listed under each are:

<i>Heading</i>	<i>Entries</i>
Bibliography-----	Subject, area, or individual.
Biography-----	Individual names.
Geologic formations-----	Listed by name of formation; only detailed information indexed.
Geologic formations, lists, sections, tables.	Area listing of all formation tables and sections.
Geologic history-----	Area.
Geologic maps-----	Area; some sketch maps included.
Guidebooks-----	Areas covered by field trips.
History-----	History of various organizations or geological investigations.

BIBLIOGRAPHY OF NORTH AMERICAN GEOLOGY, 1950-1959

Industrial minerals-----	Subject or area.
Mineral deposits-----	Area; also includes articles discussing origin of minerals or ores.
Mineral descriptions-----	Mineral name listing.
Mineral resources-----	Area; includes more than one mineral; not indexed to individual minerals.
Mineralogy-----	Mineral examinations, origin, etc.; methods of testing and the like.
Oil and gas fields-----	Listed by name of field.
Popular and elementary geology-----	Papers written for the layman.
Rock descriptions-----	Rock names and areas; restricted to new or unusual rocks or detailed descriptions.
Surveys-----	Special activities of U.S. Geological Survey or State and foreign geological surveys.
Systems-----	Chemical rock- or mineral-forming systems; alphabetically by formula or name.

*Subheadings.*—Subheadings, underlined and indented two spaces, are used to group entries under the geographic headings and under four of the subject headings. Subheadings used under geographic headings are: *General*, *Areas described* (for general descriptions), *Economic geology*, *Geologic maps*, *Ground water*, *Historical geology*, *Mineralogy*, *Paleontology*, *Petrology*, *Physical geology*, and *Physiographic geology*. Subheadings are used under the four subject headings EARTH, MAPS, PALEONTOLOGY, and TECHNIQUE. Subheadings for EARTH include *Crust*, *Interior*, and *Temperature*. Subheadings for MAPS include *Aeromagnetic*, *Geophysical*, and *Mineral*. The PALEONTOLOGY subheadings include *General* and the age groups, *Cambrian*, *Ordovician*, etc. Subheadings under TECHNIQUE include *Apparatus*, *Geophysical*, *Mineralogic*, and *Petrographic*.

*Entries.*—Entries form the main subdivisions of headings and are indented four spaces. Entries usually follow a subheading, but where they do not fit under any of the subheadings used, they follow the main heading directly. Under both the geographic and subject headings, the entries may be either geographic, subject, or a combination of the two. Each entry is followed by the name of the author of the paper referring to it. A number following the author's name refers to the paper so numbered in the bibliography. Examples of entries under geographic and subject headings are as follows:

COLORADO.

*Mineralogy.*

Montrose County, uranium-vanadium deposits: Weeks, A. D., 13R.

## ORGANIZATION OF THE INDEX

### ILLINOIS.

#### *Economic geology.*

Natural gas, Freeburg pool: Meentz, W. F., 4.

### INDEXES.

Geologic names of North America: Wilson, Druid, 2.

### IRON.

Alberta, Peace River area: Kidd, D. J.

Itabirite, origin of hard hematite: Park, C. F., Jr., 6.

Pennsylvania, eastern: Gray, C., 10.

*Use of index.*—In general, if the paper sought deals with a specific mineral resource from a specific State, province, or country, it should be found under the following entries: (a) the heading for the specific geographic area under the subheading Economic geology, and (b) the mineral resource heading with an entry under the specific geographic area. For example, a paper on iron deposits in Minnesota might be found under:

### MINNESOTA.

#### *Economic geology.*

Iron, Cook County, titaniferous magnetite: Grout, F. F., 5.

### IRON.

Minnesota, Cook County, titaniferous magnetite: Grout, F. F., 5.

However, if the paper discusses iron in a particular State but also covers deposits in several other States, there will be no entry under the specific States discussed but only under the United States. Thus the index would read in such a case:

### UNITED STATES.

#### *Economic geology.*

Iron, resources: Carr, M. E. S., 2.

### IRON.

United States, resources: Carr, M. E. S., 2.

In other words, papers covering the larger geographic area, of which the area of interest is a part, should also be examined for possible supplementary information on the particular area under study.

In the case of subjects and other special types of entry, a similar situation holds true. Most mineral names will not be indexed with an individual heading but will be found under the headings MINERAL DESCRIPTIONS or MINERALOGY, or under the Mineralogy subheading for the geographic area in which they are found. In general, items will be included under the larger, more general group heading rather than under an individual entry: that is, a special oil field, under OIL AND GAS FIELDS; general papers on aeromagnetic surveys under GEOPHYSICS or TECHNIQUE, Geophysical; Ordovician trilobites under TRILOBITA; etc.

## SERIALS

The following list gives the abbreviated title of periodicals and serials cited in or systematically searched for this bibliography. The complete titles of all these publications, as used in library catalogs and the "Union List of Serials," and the place of publication have also been included. Many of the foreign periodicals and most of the nongeological publications have been examined only for the particular articles cited and have not been searched completely.

- Abelson, Philip Hauge.** 1. Paleobiochemistry: *Sci. Am.*, v. 195, no. 1, p. 83-92, illus., July 1956.  
2. Organic constituents of fossils, Chap. 5 of Ladd, H. S., ed., *Paleoecology*: Geol. Soc. America Mem. 67, p. 87-92, illus., Mar. 25, 1957.  
3. Some aspects of paleobiochemistry, *in* *Modern ideas on spontaneous generation*, Nigrelli, R. F., chm.: N.Y. Acad. Sci. Annals, v. 69, art. 2, p. 276-285, illus., Aug. 30, 1957.  
4. (editor). *Researches in geochemistry*. x, 511 p., illus., New York, John Wiley & Sons, 1959. Includes papers by numerous authors which are cited individually.  
5. Geochemistry of organic substances, *in* Abelson, P. H., ed., *Researches in geochemistry*, p. 79-103, illus., 1959.
- Abernethy, Roy Franklin.** *See* Blaylock, D. W., 1, 2; Dowd, J. J., 1-13; Fieldner, A. C., 2; Provost, J. M.; Tavener, W. H.; Toenges, A. L., 1-3; Travis, R. G.; Wallace, J. J., 1-12; Williams, L., 1-3.
- Abesque, Frédéric.** *See* Claisse, F., 2.
- Abilene and Fort Worth Geological Societies.** (Bell, William Charles, leader). 1957 joint field trip guidebook, study of Lower Pennsylvanian and Mississippian rocks of the northeast Llano uplift [Texas], October 25-26, 1957. viii, 120 p., illus. incl. geol. maps, 1957. Includes papers by several authors which are cited individually.
- Abilene Geological Society.** 1. Geological contributions, 1950. 95 p., illus., Abilene, Texas [1950]. A symposium containing papers by numerous authors which are cited individually.  
2. Field trip guide book 1950, Strawn and older rocks of Pennsylvanian and Mississippian system of Brown, San Saba, McCulloch, Mason, and Kimble Counties, Texas, November 2-4, 1950. 44 p., illus. incl. geol. map, 1950. Contains papers by D. E. Gee, L. E. Fitts, Jr., and A. T. Cross, which are not cited individually.  
3. Geological contributions, 1952, Monroe G. Cheney Memorial Volume. ii, 76 p., illus., Abilene, Texas [1952]. A symposium containing papers by numerous authors which are cited individually.  
4. (Neal, Richard Freeman, chairman). Geological road logs of West Central Texas. 25 p., illus., Abilene, 1952.  
5. Cross section, Schleicher Co. to Childress Co., Texas. Abilene, Mar. 1953.  
6. Geological contributions, 1954. ii, 85 p., illus., Abilene, Texas [1954]. A symposium containing papers by numerous authors which are cited individually.  
7. Guidebook 1954, facies study of the Strawn-Canyon series in the Brazos River area, north central Texas, November 19-20, 1954. 52 p., illus. incl. geol. sketch maps, 1954. Contains papers by R. J. Cordell and S. P. Ellison, Jr., which are cited individually.  
8. Guidebook 1955, study of the Lower Permian and Upper Pennsylvanian rocks in the Brazos and Colorado River valleys of West Central Texas, December 2, 1955. 36 p., illus. incl. geol. sketch maps, 1955. Includes a paper by H. J. Holmquest, Jr., which is cited individually.  
9. Geological contributions, 1956. ii, 66 p., illus., Abilene, Texas [1957]. A symposium including papers by numerous authors which are cited individually.
- Abilene Geological Society, Stratigraphic and Study Group.** 1. The time rock units of west central Texas in block diagrams, south-north section, 1958.  
2. The time rock units of west central Texas in block diagrams, west-east section, 1958.

## Ackerman

- Abraham, Earl Michael.** 1. Geology of McElroy and part of Boston townships: Ontario Dept. Mines Ann. Rept. 1950, v. 59, pt. 6, 66 p., illus. incl. geol. map, 1951.
2. Preliminary report on the geology in the vicinity of aeromagnetic anomalies on the Bancroft and Coe Hill sheets: Ontario Dept. Mines Prelim. Rept. 1951-2, 19 p., illus., 1951.
3. Preliminary report on the geology of parts of Long and Spragge townships, Blind River uranium area, District of Algoma: Ontario Dept. Mines Prelim. Rept. 1953-2, 10 p., geol. map, 1953.
4. Geology of Sothman township: Ontario Dept. Mines Ann. Rept. 1953, v. 62, pt. 6, iii, 36 p., illus. incl. geol. maps, 1954.
5. (and others). Townships 149 and 150, Blind River area, District of Algoma, Ontario: Ontario Dept. Mines [Prelim. Map P.1], scale 1 in. to  $\frac{1}{4}$  mi., geol. map [1956].
6. The north shore of Lake Huron from Gladstone to Spragge townships [Ontario], in Gill, J. E., ed., *The Proterozoic in Canada*: Royal Soc. Canada Special Pub., no. 2, p. 59-62, 1957.
- Abrahams, Sidney Cyril.** 1. (and Calhoun, Bertram Allen). The low-temperature transition in magnetite: *Acta Crystallographica*, v. 6, pt. 1, p. 105-106, illus., Jan. 10, 1953.
2. (and Calhoun, Bertram Allen). A magneto-X-ray study of magnetite at 78° K: *Acta Crystallographica*, v. 8, pt. 5, p. 257-260, illus., May 1955.
3. (and Geller, Seymour). Refinement of the structure of a grossularite garnet: *Acta Crystallographica*, v. 11, pt. 6, p. 437-441, illus., June 10, 1958.

32. Surficial geology, Lindsay-Peterborough area, Durham, Peterborough, Victoria, Northumberland, and Ontario counties, Ontario. Map 1050A, scale 1:126,720 (1 in. to 2 mi), geology by C. P. Gravenor, 1959.
33. Physiographic divisions, Lindsay-Peterborough area, Durham, Peterborough, Victoria, Northumberland, and Ontario counties, Ontario. Map 1051A, scale 1:126,720 (1 in. to 2 mi), geology by C. P. Gravenor, 1959.
34. Dewar Creek, Kootenay district, British Columbia. Map 1053A, scale 1:63,360 (1 in. to 1 mi), geol. map with sections, geology by J. E. Reesor, 1958.
35. Geological map of the District of Mackenzie, Northwest Territories. Map 1055A, 2 sheets, scale 1:1,267,200 (1 in. to 20 mi), geology compiled by I. C. Brown, 1958.
36. Mira—Cape Breton and Richmond counties, Cape Breton Island, Nova Scotia. Map 1056A, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by L. J. Weeks and R. D. Hutchinson, 1958.
37. Brock River—Abitibi and Mistassini Territories, and Abitibi county, Quebec. Map 1060A, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by E. D. Kindle and G. C. Riley, 1958.
38. Cumberland Sound, Baffin Island, District of Franklin, Northwest Territories. Map 1061A, scale 1:506,880 (1 in. to 8 mi), geol. map with descriptive notes, geology by G. C. Riley, 1959.

## Canada

39. Geological map of southwestern Ontario, showing oil and natural gas producing areas. Map 1062A, scale 1:380,160 (1 in. to 6 mi), with sections, geology by J. F. Caley and B. V. Sanford, 1958.
40. Sudbury—Sudbury, Algoma, Timiskaming, Nipissing, Manitoulin, and Parry Sound districts, Ontario. Map 1063A, scale 1:506,880 (1 in. to 8 mi), geol. map, geology compiled by J. F. Wright, 1958.
41. Victoria—Vancouver, British Columbia. Map 1069A, scale 1:506,880 (1 in. to 8 mi), geol. map, geology compiled by H. M. A. Rice, 1959.
42. Aeromagnetic map, Boyd Lake, District of Mackenzie, Northwest Territories. Map 1073A, scale 1:253,440 (1 in. to 4 mi), with descriptive notes, 1959.
43. Snegamook Lake, coast of Labrador, Newfoundland. Map 1079A, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by W. F. Fahrig, 1959.
44. Aeromagnetic map, Wholdaia Lake East, District of Mackenzie, Northwest Territories. Map 1080A, scale 1:253,440 (1 in. to 4 mi), with descriptive notes, 1959.
45. Geology, Musquash—Charlotte, Kings, and Saint John counties, New Brunswick. Map 1084A, scale 1:63,360 (1 in. to 1 mi), with descriptive notes, geology by F. J. Alcock, 1959.
46. Aeromagnetic map series, scale 1:63,360 (1 in. to 1 mi), Geophysics Papers published from 1950–59 as follows:
  - No. [7], Arnprior, Ontario.
  - [8], Ottawa, Ontario.
  - [9], Kemptville, Ontario.
  - [10], Merrickville, Ontario.

## Canada

- Survey [Geophysics Paper] 749, scale 1:253,440 (1 in. to 4 mi), with explanatory notes, 1959.
51. Aeromagnetic series, index to map sheets, Sheet nos. 2-6 [1959].
  52. Kennetcook, Hants county, Nova Scotia: Canada Geol. Survey Prelim. Ser. Map 1-1956, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by I. M. Stevenson, 1957.
  53. Nelson (west half), Kootenay and Similkameen districts, British Columbia: Canada Geol. Survey Prelim. Ser. Map 3-1956, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology compiled by H. W. Little, 1957.
  54. Coal Mountain, Kootenay district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 4-1956, scale 1:9,600 (1 in. to 800 ft), geol. map with descriptive notes and sections, geology by D. K. Norris and R. A. Price, 1957.
  55. Mayo Lake, Yukon Territory: Canada Geol. Survey Prelim. Ser. Map 5-1956, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by L. H. Green, 1957.
  56. Snowbird Lake, District of Mackenzie, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 7-1956, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by F. C. Taylor, 1957.
  57. Pitt Lake (Vancouver, east half), New Westminster district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 8-1956, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by J. A. Roddick and J. E. Armstrong, 1957.
  58. Split Lake, Manitoba: Canada Geol. Survey Prelim. Ser. Map 10-1956, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by R. Mulligan, 1957.
  59. Terrace, Coast district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 11-1956, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by S. Duffell and J. G. Souther, 1957.
  60. Dildo, Avalon Peninsula, Newfoundland: Canada Geol. Survey Prelim. Ser. Map 13-1956, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by W. D. McCartney, 1957.
  61. Baddeck—Victoria, Cape Breton and Inverness counties, Cape Breton Island, Nova Scotia: Canada Geol. Survey Prelim. Ser. Map 14-1956, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by D. G. Kelley, 1957.
  62. Uranium City, Saskatchewan, Sheet 5: Canada Geol. Survey Prelim. Ser. Map 18-1956, scale 1:9,600 (1 in. to 800 ft), geol. map with descriptive notes, geology by L. P. Tremblay, 1957.
  63. Bathurst-Newcastle area, Northumberland, Restigouche, and Gloucester counties, New Brunswick: Canada Geol. Survey Prelim. Ser. Map 1-1957, scale 1:126,720 (1 in. to 2 mi), geol. map with descriptive notes, geology compiled by Charles H. Smith, 1958.
  64. Stephenville, Newfoundland: Canada Geol. Survey Prelim. Ser. Map 2-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by F. Q. Barnes, Charles H. Smith, and G. C. Riley, 1957.
  65. Gander Lake (east half), Newfoundland: Canada Geol. Survey Prelim. Ser. Map 3-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by S. E. Jenness, 1957.
  66. Adams Lookout (east half), west of 6th meridian, Alberta: Canada Geol. Survey Prelim. Ser. Map 5-1957, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by J. K. Eccles, 1957.
  67. Kettle River (east half), Similkameen, Kootenay, and Osoyoos districts, British Columbia: Canada Geol. Survey Prelim. Ser. Map 6-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by H. W. Little, 1957.
  68. Burtt's Corner (west half), York county, New Brunswick: Canada Geol. Survey Prelim. Ser. Map 7-1957, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by W. H. Poole, 1957.
  69. Red Indian Lake (west half), Newfoundland: Canada Geol. Survey Prelim. Ser. Map 8-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by G. C. Riley, 1957.
  70. Stikine River area, Cassiar district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 9-1957, 2 sheets, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, 1957.

## Canada

71. Anahim Lake, Coast district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 10-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by H. W. Tipper, 1957.
72. Lardeau (east half), Kootenay district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 12-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology compiled by J. E. Reesor, 1957.
73. Surficial geology, Drumheller (east half), west of 4th meridian, Alberta: Canada Geol. Survey Prelim. Ser. Map 13-1957, scale 1:253,440 (1 in. to 4 mi), with descriptive notes, geology by B. G. Craig, 1957.
74. Surficial geology, High River, west of 4th meridian, Alberta: Canada Geol. Survey Prelim. Ser. Map 14-1957, scale 1:253,440 (1 in. to 4 mi), with descriptive notes, geology by A. M. Stalker, 1957.
75. St. Mary Lake, Kootenay district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 15-1957, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by G. B. Leech, 1957.
76. Whycomagh, Inverness county, Cape Breton Island, Nova Scotia: Canada Geol. Survey Prelim. Ser. Map 17-1957, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by D. G. Kelley, 1957.
77. Bennett, Cassiar district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 19-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by R. L. Christie, 1957.
78. Manitoulin Island, District of Manitoulin, Ontario: Canada Geol. Survey Prelim. Ser. Map 20-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by B. A. Liberty, 1957.
79. Wolf Lake, Yukon Territory: Canada Geol. Survey Prelim. Ser. Map 22-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by W. H. Poole, 1958.
80. Sakami Lake area, New Quebec: Canada Geol. Survey Prelim. Ser. Map 23-1957, scale 1:506,880 (1 in. to 8 mi), geol. map with descriptive notes, geology by K. E. Eade, W. W. Heywood, and H. A. Lee, 1958.
81. Ledge Lake area, west of principal meridian, Manitoba and Saskatchewan: Canada Geol. Survey Prelim. Ser. Map 24-1957, scale 1:12,000 (1 in. to 1000 ft), geol. map with descriptive notes, geology by W. W. Heywood, 1958.
82. Uranium City, Saskatchewan, Sheet 6: Canada Geol. Survey Prelim. Ser. Map 25-1957, scale 1:9600, (1 in. to 800 ft), geol. map with descriptive notes, geology by L. P. Tremblay, 1958.
83. Cranberry Portage (west half), west of principal meridian, Manitoba: Canada Geol. Survey Prelim. Ser. Map 26-1957, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by T. Podolsky, 1958.
84. Wollaston Lake, Saskatchewan: Canada Geol. Survey Prelim. Ser. Map 27-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by W. F. Fahrig, 1958.
85. Pelican Narrows, Saskatchewan: Canada Geol. Survey Prelim. Ser. Map 28-1957, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology compiled by F. C. Taylor, 1958.
86. Hardisty Lake (west half), District of Mackenzie, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 2-1958, scale 1:253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by J. A. Fraser, 1958.
87. Fury and Hecla Strait, District of Franklin, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 3-1958, scale 1:506,880 (1 in. to 8 mi), geol. map with descriptive notes, geology by R. G. Blackadar, 1958.
88. Foxe Basin North, District of Franklin, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 4-1958, scale 1:506,880 (1 in. to 8 mi), geol. map with descriptive notes, geology by R. G. Blackadar, 1958.
89. Livingstone River, west of 5th meridian, Alberta: Canada Geol. Survey Prelim. Ser. Map 5-1958, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes and sections, geology by D. K. Norris, 1958.
90. Heavy metals in stream sediments, northern mainland of Nova Scotia: Canada Geol. Survey Prelim. Ser. Map 7-1958, 2 sheets, scale 1:253,440 (1 in. to 4 mi), 1958.
91. Baie Verte, White Bay and Green Bay districts, Newfoundland: Canada Geol. Survey Prelim. Ser. Map 10-1958, scale 1:63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by E. R. W. Neale, 1958.

## Canada

92. Napadogan, York county, New Brunswick: Canada Geol. Survey Prelim. Ser. Map 11-1958, scale 1: 63,300 (1 in. to 1 mi), geol. map with descriptive notes, geology by W. H. Poole, 1958.
93. Uranium City, Saskatchewan, Sheet 7: Canada Geol. Survey Prelim. Ser. Map 12-1958, scale 1: 9600 (1 in. to 800 ft), geol. map with descriptive notes, geology by L. P. Tremblay, 1959.
94. Drift-thickness contours, City of Ottawa (west part), Carleton county, Ontario: Canada Geol. Survey Prelim. Ser. Map 13-1958, scale 1: 12,000 (1 in. to 1,000 ft), with descriptive notes, compiled by J. M. Bostock, 1958.
95. Fort Enterprise, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 16-1958, scale 1: 253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by J. A. Fraser, 1958.
96. Charlie Lake, west of 6th meridian, British Columbia: Canada Geol. Survey Prelim. Ser. Map 17-1958, scale 1: 253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by E. J. W. Irish, 1958.
97. Surficial geology, Fort Macleod, west of 4th meridian, Alberta: Canada Geol. Survey Prelim. Ser. Map 21-1958, scale 1: 253,440 (1 in. to 4 mi), with descriptive notes, geology by A. M. Stalker, 1959.
98. Nippers Harbour, Newfoundland: Canada Geol. Survey Prelim. Ser. Map 22-1958, scale 1: 63,360 (1 in. to 1 mi), geol. map with descriptive notes, geology by D. M. Baird and E. R. W. Neale, 1959.
99. La Grande-Lac Bienville, New Quebec: Canada Geol. Survey Prelim. Ser. Map 23-1958, scale 1: 506,880 (1 in. to 8 mi), geol. map with descriptive notes, geology by W. W. Heywood, S. E. Brett, K. L. Currie, and K. E. Eade, 1959.
100. Canal Flats, Kootenay district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 24-1958, scale 1: 63,360 (1 in. to 1 mi), geol. map with sections and descriptive notes, geology by G. B. Leech, 1959.
101. Carroll Lake (east half), Kenora district, Ontario: Canada Geol. Survey Prelim. Ser. Map 25-1958, scale 1: 253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by E. H. M. Chown, 1959.
102. Deer Lake (east half), Kenora district, Ontario: Canada Geol. Survey Prelim. Ser. Map 26-1958, scale 1: 253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by L. D. Kirwan, 1959.
103. Geology, Lake Harbour, Baffin Island, District of Franklin, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 29-1958, scale 1: 63,360 (1 in. to 1 mi), with descriptive notes, geology by W. L. Davison, 1959.
104. Geology, Flathead, British Columbia and Alberta: Canada Geol. Survey Prelim. Ser. Map 1-1959, scale 1: 63,360 (1 in. to 1 mi), with sections and descriptive notes, geology by R. A. Price and D. U. Wise, 1959.
105. Geology, Northern Indian Lake, Manitoba: Canada Geol. Survey Prelim. Ser. Map 2-1959, scale 1: 253,440 (1 in. to 4 mi), with descriptive notes, geology by R. A. Kretz, 1959.
106. Geology, Chedabucto Bay, Guysborough and Richmond Counties, Nova Scotia: Canada Geol. Survey Prelim. Ser. Map 3-1959, scale 1: 63,360 (1 in. to 1 mi), with descriptive notes, geology by I. M. Stevenson, 1959.
107. Geology, Foxe Peninsula (eastern part), Baffin Island, District of Franklin, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 4-1959, scale 1: 253,440 (1 in. to 4 mi), with descriptive notes, geology by W. L. Davison, 1959.
108. Geology, Carbondale River, Alberta and British Columbia: Canada Geol. Survey Prelim. Ser. Map 5-1959, scale 1: 63,360 (1 in. to 1 mi), with sections and descriptive notes, geology by D. K. Norris, 1959.
109. Mount Wright, Quebec-Newfoundland: Canada Geol. Survey Prelim. Ser. Map 6-1959, scale 1: 253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by S. Duffell and R. A. Roach, 1959.
110. Chutine, Cassiar district, British Columbia: Canada Geol. Survey Prelim. Ser. Map 7-1959, scale 1: 253,440 (1 in. to 4 mi), geol. map with descriptive notes, geology by J. G. Souther, 1959.
111. Geology, Penylan Lake-Firedrake Lake, District of Mackenzie, Northwest Territories: Canada Geol. Survey Prelim. Ser. Map 8-1959, scale 1: 253,440 (1 in. to 4 mi), with descriptive notes, geology by F. C. Taylor, 1959.
