BIBLIOGRAPHY OF REPORTS RESULTING FROM U.S. GEOLOGICAL SURVEY TECHNICAL COOPERATION WITH OTHER COUNTRIES, 1967-74

By **WENONAH E. BERGQUIST**

INTRODUCTION

BACKGROUND

For about 36 years the U.S. Geological Survey (USGS) has had an active program of cooperation with earth-science agencies and institutions in other countries. This cooperation has been in the form of technical assistance to strengthen host-country institutions, and scientific cooperation on subjects of mutual interest. Most of the cooperative activities have resulted in scientific or technical reports; emphasis has been placed on the publication and dissemination of these reports for the use of those interested in exploration, development, and management of resources, and in research. Host-country agencies have been encouraged to publish the reports in their own publications series, and in many countries the Geological Survey has helped establish or expand host-country publication capability.

This bibliography lists reports that have resulted from the technical and scientific research programs undertaken by the U.S. Geological Survey cooperatively with other countries on a government-to-government basis. It is a continuation of Bulletin 1263 (Heath and Tabacchi, 1968) and covers scientific, technical, and administrative work of the USGS and cooperating agencies in 59 countries and 5 regions during the period 1967-74. A few titles published prior to 1967 are listed because they were not included in Bulletin 1263. Only reports authored solely or in part by USGS members, or jointly by USGS and counterpart staff members, are listed here. Many other results of the USGS cooperative work abroad, authored entirely by counterpart scientists, are not included unless they are USGS publications.

The reports are listed alphabetically by author, under the appropriate country; reports of wider scope are given under the continent

or geographic region, for example, Africa, Central and South America, or CENTO region. Reports not classifiable by geographic location are listed separately under the heading "General." All references to reports on water resources and hydrology were provided by George C. Taylor and James R. Jones, USGS. References to Antarctic reports are limited to USGS publications and were furnished by L. J. Roberts, USGS.

The reports and maps are available only through the listed source. Copies of articles published in scientific journals or by other governments or agencies can not be ordered from the USGS. Instructions for ordering publications of the USGS follow.

ORDERING U.S. GEOLOGICAL SURVEY BOOK REPORTS

Professional papers, bulletins, water-supply papers, techniques of water-resources investigations, bulk quantities of most nontechnical publications, and some miscellaneous reports, including some from all the foregoing series that have gone out of print at the Government Printing Office, may be ordered from the Branch of Distribution, U.S. Geological Survey, 1200 South Eads Street, Arlington, VA 22202, or from Geological Survey offices at Room 1028, General Services Building, 19th and F Streets, NW, Washington, DC 20244; Room 1012, Federal Building, 1961 Stout Street, Denver, CO 80202; Room 8102, Federal Building, 125 South State Street, Salt Lake City, UT 84138; Room 1C45, Federal Building 1100 Commerce Street, Dallas, TX 75202; Room 7638, Federal Building, 300 North Los Angeles Street, Los Angeles, CA 90012; Room 504, Custom House, 555 Battery Street, San Francisco, CA 94111; Room 678, U.S. Court House, West 920 Riverside Avenue, Spokane, WA 99201; and Room 108 Skyline Building, 508 Second Avenue, Anchorage, AK 99501 (authorized agents of Superintendent of Documents). Periodicals (Journal of Research, Earthquake Information Bulletin) can be obtained only from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

ORDERING U.S. GEOLOGICAL SURVEY MAPS

Address mail orders to Branch of Distribution, U.S. Geological Survey, 1200 South Eads Street, Arlington, VA 22202. Maps may be purchased over the counter at USGS offices where book reports are sold, and at Room 1C402, Geological Survey National Center, 12201 Sunrise Valley Drive, Reston, Virginia; 900 Pine Street, Rolla, Missouri; Building 41, Federal Center, Denver, Colorado; 345 Middlefield Road, Menlo Park, California; Room 441, Federal Building, 709 West Ninth Street, Juneau, Alaska; and 310 First Avenue, Fairbanks,

Alaska. Geological Survey maps are also sold by some 1,500 commercial dealers throughout the United States.

U.S. GEOLOGICAL SURVEY OPEN-FILE REPORTS

Reports and maps listed as open files are available for public inspection only at the USGS libraries listed below; they are not sold by the USGS nor the Superintendent of Documents. Information on copying reports at private expense may be obtained by writing to one of these libraries and referring to the report by title and author, and by number if one is given: Library, 4A100 National Center, 12201 Sunrise Valley Drive, Reston, VA 22092; Library, Bldg. 25, Federal Center, Denver, CO 80225; Library, 345 Middlefield Road, Menlo Park, CA 94025.
