

EXPLANATION

Each column represents a basin or part of a basin whose rocks have been formally named below the rank of Newark Supergroup. The usage shown is that of the U.S. Geological Survey. Stratigraphic nomenclature is from the references listed at the column heads; age correlation is from Cornet (1977, 1989), Olsen and others (1982), Olsen (1984), Cornet and Olsen (1985), Robbins (1985), Ediger (1986), Olsen and Baird (1986), Traverse (1986, 1987), Robbins and Weems (1988), and R.J. Litwin (USGS, oral commun., 1989). Adapted from Smoot and others (1988).
