STREAM-SEDIMENT SAMPLE LOCALITY MAP

Not shown boundaries of drainage basins or areas that provide important sources related to the stream site sampled, size and distribution of area represented by each stream-sediment sample (●), and usual extent of sampling. Numbers are report sample site numbers. Complete analytical data and field sample numbers are given in Data and others (1998). Map is reproduced in reduced form in text figs. 24-27. Refer to Plate 1 for Description and Correlation of Map Units and explanation of other map symbols.
